Well dip sh** Get it right it's Lt.Col. William H Abendroth III 4030 Hanson is a rentail C&M Electronics Pays Taxes every year and they are 10 Meter amps not 11 Meter amps. Amps are not made or shipped from 4030 hanson rd. C&M Electronics Is at 4695 Duffield dr and is only open in the evning and weekends. Also web site stats "No Name"
World Class Amplifiers!!

Not intended to be used on the 11 meter band,
Doing so is a violation of FCC rules and regulations!!!
Note: All amplifier prices on this page are for non working replicas intended for display or educational purposes only. Modifying these models too a working amplifier is against FCC rules and regulations. So Bite Me

>you have to deal with here.

The breakdown of the moral fabric of society is very prevalent in many
areas. It's a shame that yours is one of the worst. I'm sure the
behavior of the radio op's in your area are reflective of this
behavior as well.

It's bad when people lack the common courtesy to not do things like
block someone else's driveway. It's especially telling when after
being asked to move, they refuse. It's a greater shame that the decent
people are forced to resort to clandestine methods to rid the
neighborhood of this type of trash.

>That incident, plus this fact: over the past 20 years, there have been some
>homes broken into. There would be a rash of two or three and then some
>homeowner would blow the intruder away. Of course, having been inside of
>their own home, no arrests were made.

As it should be.

>6 years. Perhaps 15 years ago, a homeowner heard noise from his garage. He
>blew someone away who was stealing his bicycle. He was arrested, but, funny
>thing, the grand jury refused to indict him. LOL. Then things got quiet
>again.

We need to move away from the liberal mentality which attempts to
paint criminals as "victims". When someone is committing a crime
against one's home and family, then they should have the right to
defend against it. If moral decency is not enough to deter scumbags
from committing crimes, then the very real possibility of coming up
against deadly force should be.

>
>Due to those facts, around here you might ask the neighbor. Likely nothing
>will change. Then, you do what you have to and just keep a 12 gauge handy
>(funny, but 12 gauges have been involved in a number of those incidents.
>They are very effective. Just make sure they are inside your house).

>11 Meter amps.

Call them whatever you want, but 47CFR2.815 says this:

(b) After April 27, 1978, no person shall manufacture, sell or
lease, offer for sale or lease (including advertising for sale or
lease), or import, ship, or distribute for the purpose of selling or
leasing or offering for sale or lease, any external radio frequency
power amplifier or amplifier kit capable of operation on any frequency
or frequencies between 24 and 35 MHz.

> Amps are not made or shipped from 4030 hanson rd.

You can play semantics all you want, but that is the contact address
for nonameamps and is therefore a legal business address. It is also
the address given in the domain registration for nonameamps.com.

> C&M
>Electronics Is at 4695 Duffield dr and is only open in the evning and weekends.

So? Does that somehow make it legal? LOL!!!

>Also web site stats "No Name"
>World Class Amplifiers!!
>
>Not intended to be used on the 11 meter band,

The intended use is clear even if it is unspoken or disguised. That's
why these amps are illegal to sell if they operate between 24 and 35
MHz -regardless- of where they were "intended to be used".

>Doing so is a violation of FCC rules and regulations!!!

It is a violation of FCC rules and regulations for you to ADVERTISE
those amps for sale. You have committed a federal offense by posting
your amps for sale on the internet.

>Note: All amplifier prices on this page are for non working replicas intended
>for display or educational purposes only. Modifying these models too a working
>amplifier is against FCC rules and regulations. So Bite Me

Semantic arguments don't work in court, and they don't work because
people aren't as stupid as you think. After all, that's how you manage
to sell these things -- if you make your intentions obvious to the
average CBer, do you really think you are pulling the wool over the
eyes of judges and the FCC? Besides, you say above that they are 10
meter amps and -not- 11 meter amps, but if it's a replica then they
aren't even 10 meter amps, are they? And if they don't work as shipped
but only after specific modifications or addition of specific
components then it is a 'kit' as defined by the FCC and is just as
illegal as a working amp.

So Bite Me

For several years the company has been illegally selling their splatterboxes from a location just a few miles away from FCC HQ. So why haven't they been busted? I have no idea. But this guy might know:

David H. Solomon,
Chief of the Enforcement Bureau, FCC
445 12th Street, SW
Room 7-C485
Washington, DC 20024

I sent a letter to him with the same question almost two years ago but never received a reply. Maybe someone else will have better luck.

C&M Electronics Pays Taxes every year

>Then why are they not licensed with the MD

>Department of Revenue?

Only you just now claimed they weren't registered with this "MD
Departement of Revenue". It appears your ignorance (as usual) flowing
from your lips engaged faster than your brain could manage,,,,as THIS
was your claim,,..

>"Also, NONE of these companies (C&M

>Electronics, Super Sport

>Electronics, Dixieland Communications, and

>No Name Amps) are

>registered with the Maryland State

>Department of Assessments and Taxation".

.
LOL..you invoking a "MD Department of Revenue" may sound great to
yourself, but non-existent in the context you are unable to grasp.
Here's a clue, Frank,,,,,the Department of Assessments and Taxation is
for BUILDINGS and PROPERTIES and the owners of those buildings and
properties. One may own a building and rent it out to a business and
such a business has nothing to do with the assessment department and the
building in which they are housed. ASSuming the Assessment department
somehow has jurisdiction over a business because they have the word
"taxation" in their title is about the dumbest thing you ever presented,
other than your usual failures.
Assuming *you* are able to attain information on tax records of a
privately held company illustrates not only your unsurpassed ignorance,
but the levels of desperation you experience in your miserable life.

>Bite me

Your ignorance bit yourself, Frank, as it always does. One need only permit you to rant and ramble, and one is assured you will say something incredibly stupid to the masses, illustrating your double digit IQ, self-hatred, and hostility born of ignorance.

From: nojunk_n3cvj@ptd.net (Dave Hall)
>The breakdown of the moral fabric of society

>is very prevalent in many areas.

Nowhere is such a statement more
true than is to be found in your posts.
Fact is, society is not breaking down and the sy is not falling. Merely because you are a deviant among society suffering from such depression that renders you incapable of seeing society
for what it is as opposed to this "breakdown" you always are personally experiencing, doesn't place the problem on society as you attempt to project. The problem, as always, is yours.
Your anti-socialistic personality causes you problems fitting in with the rest of society and therefore, you blame society as a whole.
Depression as you exhibit, such as seeing society's glass half empty all the time in your life, coupled with your oft-admitted and preferred socialistic views is part of the problem, as a free country such as we reside is obligated to allow you to espouse such anti-American rhetoric, but you may wish to consider moving to country that shares and supports your minority and warped views on a great society.

"Socialism is all about government control following sensible rules." - N3CVJ Dave Hall

that all the manias you toss about as insult are the ones from which you
more than likely suffer. You typify theclassic projectionist and search
for more insults as you angrily post along,,,,,,,. It all makes sense
when taken into consideration all but the most supervised of visits were
taken from you involving your child.

>Projecting?

Certainly.The angrier you get, the more insults you post as you go
along.

>Who's angry?

If your insult comes freely with no anger, the character flaw of which
you display is much worse than initial misonceptions of yourself.

>Other than you that is..... You project that

>anger on

>me, and then accuse me of doing it.
  YOU went off-topic and began ranting about mememememe as opposed
to the FCC rule you were unable to debate absent of insult and
off-topics

>You certainly are self absorbed aren't you?

Actually,, it is you that is self-consumed,,with ME. You made the thread
from one of your many errors (claiming that roger beeps are illegal) to
one of myself being your subject matter. To blame myself for your acts
is a bonus.

> You think this is all about you?

Not at all,,,,you do.I was speaking of your ignorcane holding a roger
beep as illegal on cb and you made your topic one of me,,,as usual.
You're obsessed.

>What's the matter, didn't mommy give you the

>attention you craved as a child, which you now
>demand from this newsgroup instead?

,,,,lol,,you are the one with a deficit in communications, focusing your attacks and insults on the person instead of a topic...you were never taught any better so you darn sure never learned how to debate. That goof about the roger beeps being illegal sure has you in a tizzy,,,,lol.

>The more you say it (And you're up to

>practically every post now) the less it means

>to anyone other than yourself.

YOU went off-topic and entered insults to this thread. I'm not the one selectively editing the thread and posts to create an illusion of righteousness for myself..*you are*....I'm not the one with issues of low self-worth and self-esteem, coupled with self-hatred and projection of personal issues.....*you* are.

>Who's the one obsessing now?

LOL...it has always been you. No matter how many times I redirect your childlike mannerisms and attention deficit, you are unable to maintain your original topic of erroneously claiming roger beeps are illegal on cb. Such an obsession and disorder has you unable to focus on anything but myself.

>Yep, I'm your

>worst nightmare.....

Which is why you snip the posts....you always distort truth,,,coupled with outright lying and attempting to project a post out of context as a manner in which it was not originally presented....you're a malicious lowlife, Davie.

>Funny, I was just following your example of

>posting style. Don't like it when your own rules
>and tactics are employed against you eh? As

>they say in my parts, "What's good for the

>goose......"

You initiated such snipping of posts. Your rules,Davie, but your need for balming others for your actions has always been part of your depression.

>It's not too late to call a mentla health

>professional

If such would aid in your supervised-only visits
with your daughter and assist in maintaining a civil relationship with her mother instead of one of hostility with all you come in to contact, I say go for it.

>So now who's the one projecting?

You did by mentioning a mental health professional, but such would probably aid you in your dilemma in seeing nothing but the moral fabric of society crashing in on your depression-filled life and world.

You brought up your off-topic, obsession
fancying yourself somehow qualified to judge
another merely by what they permit you in a
post.

>Ok then, which are you? a liar or a mental

>case? Either you are what you project,

I project nothing. Your interpretive skills are mildly retarded and you "see" things that no one else does, such as roger beeps being illegal on cb,,and socialism as the asnwer to our government, and privacy being a means for someone to get away with a criminal act....LOL...again,,the problem, as always, is within yourself. Blaming me, and society, and the FCC is not healthy or logical.

>in which case it makes you a sociopath, or you
>faked the whole "cartoon character" persona,

Well, gee, davie,,not only have you sealed your reputation as an Extra who doesn't have a clues at all about rules and regulations pertaining to cb radio (based on your hysterical claim that roger beeps are illegal), but entertaining thoughts to yourself that my usenet name may somehow be a legal name and "real" to yourself to the point of wondering aloud if the persona was "faked" or not, illustrates just exactly how far over the edge you were pushed,,,,,,LOL.

>which makes you an accomplished actor and

>a liar. So which is it?

The accomplished liar is yourself,,,your posts affirm such going all the way back into the archives,,you have lied about the Phelps, a cber being busted,,,you claimed the FCC maintains the roger beep is a sound effect device for amusement, but can not cite anything to back up any of your claims. Yet, somehow,,,,this is the fault of either myself or "society",,hyuk.
The list goes on and on
 Such illustrates your need for status to the point of creating it for yourself.

>I've created nothing.

In proper context of contributions to the world and the betterment of society, such a statement is true, as you have been taught your rants about society and myself as one are reactive and no proactive.
But in the context of that of what you present, it isn't anyone else on this group that recognizes your self-professed qualifications of judging others,,only you feel and claim yourself qualified to judge others by standards you set,,,such as the length of time one has spent in radio. This is called elitism and would be frowned upon if it weren't for the

fact that watching you claim self-elevation is but one of the small gems that makes many of us feel so good about our lives. Whenever one of us that know how to treat people without insult need a pick-me-up, we merely tune in to one of your posts or one of Franks. On one of those rare occasions where we have a bad day at work or play, we have only to read what you have posted to remind us how screwed up others like yourself really are, and immediately feel good about our lives,as we thank God for our blessings and realize our problems in life our quite mundane when compared to those that you share on a daily basis with the world: blaming society, hating yourself, subconsciously chossing to see nothing but the bad in society and feeling comletely helpless and hapless about the diagnose,,,er,,,subject, and blaming others for your self-created hell.

> You're trying to assign it to me.

You've assigned yourself these things. Again, no one else has ever made the mistake that you have and attributed such qualifications to yourself. You are now suffering from delusions of grandeur.

Your bahavior is sign of a low self-esteem and one not satsified with their personal life and accomplishments,

>You speak as if you've had extensive

>experience in those areas.

All the regs, Davie, have been exposed to your many years of angry posts crying about society, seeing society as direct reflection of CB radio.

_
Such gives way
to your behavior that demands the need for insulting
others,,"projection".

>Funny, the same thing neatly applies to you.

>You are merely the flip side of the same coin

>that you accuse others of being.

Not one person can come forward and claim I have wrongfully affronted them. I attack issues, not people, until initiated. If defending a position I present must encompass the attack of another by illustrating their initial attacks, so be it. I don't mind getting down in the mud once in awhile with swine not unlike yourself to illustrate what malicious liars and scumbag hypocrites those who defended N8's behavior (read: yourself) while attacking others for the "crime" of speaking about freebanding, actually are.

_
 Number two, it illlustrates your self-hatred and dis-satisfaction with your personal self and a bruised ego, as the need for insulting another merely for their opinions and views is highly indicative of a

character flaw AND low self-esteem.

>It would be if it were true. You should leave

>the diagnosis to me.

Might as well, as no one else holds you as qualified except yourself.

>You fall far short of the mark in that area.

_
>enjoying yourself? I know I am

I always enjoy myself

>No need to get THAT personal

>Besides,

>that leads to blindness.

You're out in left field again, Davie. Better unwrap that tinfoil hat you need wear when posting and clear your failed attempts at making yourself clear to the masses.

I must grin,,,,,, you attempted to give the impression you did not inquire of such by selectively editing your inquiry in your orginal post and leaving only my reply to your inquiry.

>I comment on the relevant (And I use the term

>loosely) points and discard the rest.

You were the one that deemed "enjoying myself" as relevant. You're breaking down and self-contradcting yourself, Davie, as you're posts are so far removed from your assinine claim that the FCC had roger beeps as illegal and the more you snip them the further you remive yourself..but,,,that is the point, isn't it,,to remove yourlsef from such foolish claims, as it is quite embarrassing to see an Extra have his collective azz kicked in rules and regulations knowledge by a low life cber that freebands...lMAO!

_
Such what makes you
a lid and a detriment to hammie radio. You're part of what is strangling the hobby.

>Care to elaborate on just what is "strangling"

>the ham radio hobby?

You are. You are part of the problem, Elaborating will just cornfuse you further, I prefer to continue to use you as the example here on usenet. That you require detailed and further explanation is just another to add to your list of ever-growing personal problems.

>A hobby you have thus far rejected and

>claimed to have little to no interest in?

I rejected no such thing at any time, but your desperation is much appreciated.

>So now you want us to believe that you are

>some sort of subject matter expert on the

>dynamics of the ham radio hobby?

No more than you desperately want "us" to believe and accept your self-qualifications on the judging of others and what is good for them. You are a problem operator mostly for certain, as it is a great probability that most act on the air in the manner they conduct themselves in this forum

>If that is true, then you must be a real

>wing-ding

>on the air.

That you worry (putting it mildly) about all you can not control, producing extreme and profound inner feelings of impotence that manifest in your attacks on usenet as a means of venting your frustrations with myself and "society as a whole", has nothing to do with myself, actually. You build your world around me

> Hopefully Frank is wrong

Frank has been wrong all 12 names he called me..even when he has "definitely" called me by name.

>and you're not really a closet ham.

A shining example. I can say, when referring to "us", that my views are much more in line with the average cber than your own. You run, as always, when posed a question you are unable to provide for, such as "Who do YOU profess to speak for when utilizing the term "us"? (chuckle). Take your time,,

>Tell Ray I said hi.....

Sure,,,tell me what channel he rides or what his handle is and I'll 10-5 anyhting you can't communicate effectively yourself.
But then, of course, you must do something in return,,,tell Kimberly the penchant you have for inquiring into people's personal lives and making it your off-topic on usenet. She needs to understand when the crow comes home to roost that such rules were initiated by yourself.

I appreciate your comments, but that isn't an option. I have asked him to turn it down numrous times, which he does, but then after a week or so he'll start again. Calling the police isn't an avenue i want to go down. If you call the police out in the uk, when it comes round to selling your house, you have to, by law, state if you have had problems such as noisy neigbhours. Therefore making it difficult to sell your house. I'm also not bothered about him trying to give an arse whipping as he's a little shit. I can't intimidate him either because he's the type of person to call the police. Therefore i want to get my own back so he knows how i feel.

>
> thanks for condoning rf interference to a neigbors stereo and not

Thanks for your comments. Could you point me in the right place to get
a better understanding about cb. If possible could you also just
elaborate on some of the things you have mentioned as i don't know
anything about cb. For instance what is a stock cb. What is SSB? How
much would a stock cb cost and where would you advice getting one from
on the internet?

Thanks

Dude

FREE!!

For advanced techs and serious radio hobbyists, we're now offering a FREE copy of our previously published "CB EPROM DATA BOOK" by Martin Pickering. (EPROM = Erasable Programmable Read Only Memory.) We sold it for many years but it's now out of print. This little manual of 60 illustrated pages is an absolute GEM of CB technical knowledge you'll just never find anywhere else. And it's yours for FREE from our Web site.

This book reveals the secrets of advanced channel programming, and picks up where our "CB PLL DATA BOOK" (www.cbcintl.com/pllbook.htm) leaves off. You'll get a thorough background in how these amazing programmable chips can be used to modify many popular CB PLL circuits for expanded frequency coverage. Covers the basic programming techniques, and even includes real PC board artwork for making EPROM circuits. Sample artwork includes EPROM boards for the popular MB8719, PLL02A, ï¿½PD2824, and ï¿½PD858 PLL circuits.

Best of all, the price is right! Download your FREE copy of "THE CB EPROM DATA BOOK" (948 KB Adobe PDF) at:

www.cbcintl.com/docs/EpromBook.htm

Don't forget to check out all our other CB specialty books, plans, kits, & high-performance accessories at:

www.cbcintl.com

Source record: 182788

To learn the technical TRUTH about CB Radio without all the hype from people who are just plain ignorant, check out the following books from CBC International. They're selling right now at a big discounts on our EBAY & AMAZON stores too.

Check it out!

To see exactly what these books look like, plus all the specific, chapter-by-chapter details, see our Web at:

www.cbcintl.com

Some of the books included are:

BOOK #1: THE "SCREWDRIVER EXPERT'S" GUIDE To Peaking Out & Repairing CB Radios. List $25. The most popular "big dummy's" guide ever published on do-it-yourself CB repairs & modifications. Covers peaking of receivers, transmitters, modulation, mike problems, antenna & SWR problems, detailed frequency modifications for both crystal & PLL radios. Loaded with charts, illustrations, and specific instructions for most brands including the new export models. This latest edition also covers slider and broadbanding tricks, FM conversions, and much more!

BOOK #2: THE CB PLL DATA BOOK. List $20. The only complete reference source on CB PLL synthesizer circuits ever published! Detailed PLL theory explained in layman's terms. How they work, and how to modify them for many more channels. Includes specific PLL block mixing diagrams, truth charts, & IC pin function diagrams for nearly every PLL chip ever used. Covers all the most popular U.S. & export chassis, with specific listings of all models using the chip.

BOOK #3: UNDERSTANDING & REPAIRING CB RADIOS. List $42. Giant 370-page technical book for the professional repairman. Picks up where the "SCREWDRIVER EXPERT'S" GUIDE leaves off. Includes circuit descriptions & troubleshooting guide for 23- & 40-Ch., crystal & PLL, solid-state & tube, AM, FM, SSB, CW, American & export models. Covers test equipment (& where to find it), transistor basics, synthesizers, receivers, transmitters, power supplies, T/R switching, antennas, interference, parts & accessory sources. Over 350 illustrations including schematics, charts, and photos. Huge subject index also lets you look up repairs by symptoms. This is "must" reading for any serious CB technician!

For details on our Galaxy-Ranger Service Manual (2nd Ed.) go to:

www.cbcintl.com/galaxy.htm

lol let me get this right you are afraid to call the police because it
will go on record that you have noisy nieghbors and make it difficult
to sell you house But you are Not afraid to illegall;y opereate a CB
and risk getting fined for interference by the goverment when the
whole nieghborhood start complaining that you are fucking up there TV
sets and stereos computers etc. yes that makes sense are you in monty
python by any chance.

>far over the edge you were pushed.

You're kidding right? Do you really take every word so literally?
Maybe that is the crux of your problem. Where did you get the idea
that I would be so ridiculous as to consider the name "Twistedhed" as
a legal name? No one said anything about that, only about the
personality which you project while using that pseudonym.

You've said time and time again that my diagnoses of your
psychological issues is based on what "you allow us to see". The
obvious conclusion one would draw from that statement is that you are

deliberately modifying your behavior on this newsgroup.

So I'll ask again, which are you a sociopath or a liar?

>
>
>Well, gee, davie,,not only have you sealed your reputation as an Extra
>who doesn't have a clues at all about rules and regulations pertaining
>to cb radio (based on your hysterical claim that roger beeps are
>illegal),

A roger beep was classified as an "amusement device" by the FCC over
20 years ago. Sorry but there was no google then, so no, I don't have
a "hard copy" to reference. If that has changed, that's news to me,
but I'm not above admitting if I am wrong. So prove me wrong and
provide me clarification that the FCC has re-thought its original
declaration.

>
>The accomplished liar is yourself,,,your posts affirm such going all the
>way back into the archives,,you have lied about the Phelps, a cber being
>busted,

You have never proved that those statements are anything but the
truth. The fact that you accused me of lying about them does not prove
anything. The fact that you cannot find any information about the CBer
who got popped for disturbing the peace, merely reflects on your
inability to access information. That you refuse to accept my
explanation regarding an old repeater antenna is not proof either.

>,,you claimed the FCC maintains the roger beep is a sound effect
>device for amusement, but can not cite anything to back up any of your
>claims.

Absence of evidence is not evidence of absence. The claim was made
over 20 years ago. I read it back then. I can't remember where
specifically. But because I can't bring it forth now, that makes me an
automatic liar in your book.

>ï¿½
>
>
>Not one person can come forward and claim I have wrongfully affronted
>them.

What? You're kidding again right? You can't make a post without
attacking someone. I don't want to hear about "you're only giving it
back". Two wrongs don't make a right, and the fact that someone might
have been critical of your 5 years ago is not an excuse for you to
leave your civility at the front door every time you post something
now

> I attack issues, not people

THAT is a crock. You can't separate the issues from the people. You attack them, accuse them of having "communications deficits" (Among other things), and then turn around and claim that you are only defending yourself.

>, until initiated. If defending a
>position I present must encompass the attack of another by illustrating
>their initial attacks, so be it.

Your definition of an "initial attack" is somewhat incredulous.

> I don't mind getting down in the mud

Of course not, that's been your intention from day one. You need it to feed your enormous appetite for attention.

>while attacking others for the "crime" of speaking
>about freebanding, actually are.

Freebanding IS a crime. A federal crime. And it remains so, despite your 5 year attempt to deflect from that original topic. You are a practicing criminal. You can't deal with the reality of that claim so you deflect, obfuscate the truth, and go on the offensive by attacking the harbingers of that truth in an attempt to tarnish the message by knocking down the messengers. But, truth be told, even if you do manage to silence the speakers of truth, you are STILL a practicing criminal whether or not anyone else knows it or not.

>, as the need for insulting
>another merely for their opinions and views is highly indicative of a
>character flaw AND low self-esteem.

I speak the truth. If the truth insults you, it's not my problem and further reflective of your own psychological issues.

>_
>Such what makes you

<snip>

He's playing you, Dave. And you have to admit that he's good at it.
But that should come as no suprise when you consider that he has no
job, no wife, no ambition, and no sense of responsibility to his
family, his community, his country or himself.

Before you start typing your next reply to one of his trolls, form an
image in your mind of how he -really- is -- a fat, greasy-haired,
pre-middle-aged couch-potato who clings to his mommy's apron-strings,
and who uses the internet as a social surrogate for when his mommy is
away working to support him because he's too lazy to support himself.
It's a scary image to be sure, but it's far more believable than his
claim of being a "professional journalist".....LOL!

BTW, I don't try to reason with the unreasonable twit anymore -- I
just keep him ranting to make sure that no unsuspecting bystander is
fooled by his psuedo-logic. Without people like us to publically
expose his sociopathic nature he would be busy trying to convince
honest, hard-working people into becoming freeloading criminals like
himself so he won't feel so alone in the world. And even though he is
a truly pathetic individual, don't forget that he still serves a
useful purpose by setting the ultimate example of a human failure!

(Tampa Bay Always Kicks Philthy Azz) wrote:
YOU went off-topic and entered insults to this thread.

>Where did I go off topic?

Where didn't you go offtopic is the question.

_
LOL...it has always been you. No matter how many times I redirect your
childlike mannerisms and attention deficit, you are unable to maintain
your original topic of erroneously claiming roger beeps are illegal on
cb. Such an obsession and disorder has you unable to focus on anything
but myself.

>You are on those drugs again.

Don't do drugs, Davie, or smoke, or drink, but your repeat invocation of
such illustrtates the fondness you have for such foreign substances.

>Try adding to the topic instead of trying to

>insult me and maybe you will learn something.

I have learned you that your orignal calim of roger beeps being illegal
on cb is wrong, and it contributed to your breakdown.

>Where did I go off-topic?

You did by mentioning a mental health professional, but such would
probably aid you in your dilemma in seeing nothing but the moral fabric
of society crashing in on your depression-filled life and world.

>So you categorically deny that the moral

>compass of our society has declined in the

>last few decades?

My opinion on your off-topic subjects is not pertinent to your gaffes.
Try to remain on topic and stop running from your idiotic claim that
roger beeps are illegal on cb. Were you able to manage to locate any
passage among FCC rules that agrees with your clownish claim that the
FCC holds roger beeps as "amusement devices"? No, you weren't. Were you
able to find anything among the "old" FCC rules that illustrates they
"used" to view roger beeps as illegal as you claimed? Again, NO, you
were not. More bullshit, more lies from N3CVJ. Pointing out your lies
and bullshit has you on one hell of an angry personal attack,,,,,as is

to be expected...such behavior shows a shining example of why your type is the scourge of hammie radio..no communication skill and when a salient point is made showing your claim is bullshit, you can't handle it and something inside your little bruised ego goes "pop" and you begin to hurl insults and become personal. You're not an effective communicator, Davie-son, and you most certainly do not set an example or abide by the hammie creed.

>Ask your buddy Jim in Rochester

He's not my buddy. I don't know anything about the man except that you can learn proper communication skills from such a person.

>if he feels that his neighborhood is as good as

>it was 25 years ago.

There are exceptions to all rules, such as the single neighborhood you selected as your example. To listen to the president, domestic crime has actually decreased in the country. Assuming the president is telling the truth, such flies in the face of your claim that society has "declined". But let's keep with your goofy claim,,,,,since you reside in such a foul area, you should remove yourself from the problem instead of redundantly reacting all the time on usenet about your woes and blaming everyone else (society) for your problems. Of course, if you had the slightest clue about being "proactive" instead of reactive to your problesm you wouldn't need look to Frank for support in many of your childish threads.

>Ok then, which are you? a liar or a mental

>case? Either you are what you project,

>in which case it makes you a sociopath, or you
>faked the whole "cartoon character" persona,

Entertaining thoughts to yourself that my usenet name may somehow be a legal name and "real" to yourself to the point of wondering aloud if the persona was "faked" or not, illustrates just exactly how far over the edge you were pushed.

>You're kidding right? Do you really take every

>word so literally?

I merely reply to the words you present. You must come to comprehend that it is not my fault nor socities fault that the words you choose to present are never adequate in retrospect in conveying properly just what you meant. You have this entertaining need to say what you posted isn't really what *you* meant,,,illustrating once again, have severe disabilities in conveying yourself clearly and properly,,,a deficit in communications.

> Maybe that is the crux of your problem.

The problem, as has been satsifactory demonstrated time and time again, is inside your head and with your poor communicative skills. Blaming me or society for what ails you is a bonus.

>Where did you get the idea that I would be so r
>idiculous as to consider the name

>"Twistedhed" as a legal name? No one said

>anything about that, only about the personality
>which you project while using that pseudonym.

Everything you interpret, including my persona, has been shown time after time to be in the extreme minority.

>You've said time and time again that my

>diagnoses of your psychological issues is

>based on what "you allow us to see".

Not at all,,,,what I have said, is your self-imposed status that somehow has you suffering from delusions of qualification to judge others, is based on what I allow *you*,,,,no one else..there is no "us" when any other hammie speaks of you. There has never been a hammie that has included you in the word "us" on this group, and for good reason.

>The obvious conclusion one would draw from

>that statement is that you are deliberately

>modifying your behavior on this newsgroup.

You're sinking faster than your twisted psyche can follow.

>So I'll ask again, which are you a sociopath or

>a liar?

And I'll ask again,,,,please present the rules and regs showing the FCC holds a roger beep as illegal or as a means of amusement. First things first.

_
Well, gee, davie,,not only have you sealed your reputation as an Extra who doesn't have a clues at all about rules and regulations pertaining to cb radio (based on your hysterical claim that roger beeps are illegal),

>A roger beep was classified as an

>"amusement device" by the FCC over 20

>years ago.

No dice, An Extra should know the current lawas and regulations, especially for a service he has used many times since the rules you speak of were enacted. Nevertheless, that was never the issue,,,the

issue was that you maintain the FCC holds the device as a means of amusement and that such is illegal on cb,,,,,,,,,,only it isn't true,,its bullshit from an Extra that should know what he is talking about prior to embarrassing himself with ignorance.

>
>Sorry

Indeed, but beside the point.

> but there was no google then, so no, I don't

>have a "hard copy" to reference.

Of course you don't.

>If that has changed, that's news to me, but I'm

>not above admitting if I am wrong.

You have been dancing around the subject. Allow me to remind you that when I told you such is NOT illegal, you made the statement that "only those who have a clear understanding of the rules and do not suffer from problems" know that a roger beep is illegal on cb. Indeed,your problems have always been illustrated Davie, but thise time, you presented them on a silver platter to the radio world.

>So prove me wrong and provide me

>clarification that the FCC has re-thought its

>original declaration.

No need to prove you wrong, as EVERYONE except you is aware of the rules. The burden of proof is always on the claimant, not the inquirer, although, such is how you would prefer this country to be,,,it ranks right there with your admitted socialism and anti-privacy stances,,,as that isn't how things are done in this country.
Your absence of proof of all your claims is most definitely absence of validity.

>So I'll ask again, which are you a sociopath or

>a liar?

The accomplished liar is yourself,,,your posts affirm such going all the way back into the archives,,you have lied about the Phelps, a cber being busted,

>You have never proved that those statements

>are anything but the truth. The fact that you

>accused me of lying about them does not

>prove anything.

But Davie,,,,the continual absence of you providing for proof in ANY of your claims is all the proof one needs.

>The fact that you cannot find any information

>about the CBer who got popped for disturbing

>the peace, merely reflects on your inability to

>access information.

Sure, sure,,,lol,,,,,coupled with the fact that you beg to be taken at face value with no proof at any time, merely reflects on your inability to prove anything you have ever said regarding any of your claims,

>That you refuse to accept my explanation

>regarding an old repeater antenna is not proof

>either.

Ahh,,but once again,most in radio, especially licensed hammies, have ever owned a certain antenna, especially a base antenna, they would remember it mostly all their lives. The fact that you claimed you had an antenna, and told another that his antenna "doesn't hold a candle" to your Phelps Staion master, then your mind goes blank and you reply "What Phelps" when asked about your Phelps a few years later, is all the proof one needs to realize you lie all the time. Begging to have your bullshit believed merely because you claim it true is not proof.

_
,,you claimed the FCC maintains the roger beep is a sound effect device for amusement, but can not cite anything to back up any of your claims.

>Absence of evidence is not evidence of

>absence.

You keep saying that, but absence of evidence is most certainly the standard by which an individual is judged in the United States but since you take issue with so many of the
ways of which the US operates, you should move to a country that operates under your system of belief, as you are in the radical minority here and because society doesn't conform to your troubled beliefs, you claim the country is going down hill. You have issues.
But then again, watching your socialistic mannerisms and elevating yourself to the position of one qualified to judge others on what you are given, is all the "evidence" one needs for a sound judgement of yourself.

>The claim was made over 20 years ago. I read
>it back then. I can't remember where

>specifically. But because I can't bring it forth

>now, that makes me an automatic liar in your

>book.

Not at all,,,,that you can't bring forth ALL your unsubstantiated claims make you a liar in everyone's book. When one makes unfounded claims on a regular basis and has not once provided for any of them when asked, that person is viewed as a liar, a propagandist at best.

Not one person can come forward and claim I have wrongfully affronted them.

>What? You're kidding again right? You can't

>make a post without attacking someone. I

>don't want to hear about "you're only giving it

>back". Two wrongs don't make a right, and the
>fact that someone might have been critical of

>your 5 years ago is not an excuse for you to

>leave your civility at the front door every time

>you post something now

You're looking in a mirror.

I attack issues, not people

>THAT is a crock. You can't separate the

>issues from the people. You attack them,

>accuse them of having "communications

>deficits" (Among other things), and then turn

>around and claim that you are only defending

>yourself.

Not at all. Many times have I admitted giving back ten times what is received.

–
, until initiated. If defending a
position I present must encompass the attack of another by illustrating their initial attacks, so be it.

>Your definition of an "initial attack" is

>somewhat incredulous.

And pales in comparison to your definition of self-interpretation, state of society, absence of proof, rules of the FCC, and self-annointed qualifications.

_
I don't mind getting down in the mud

>Of course not, that's been your intention from

>day one. You need it to feed your enormous

>appetite for attention.

You are the one making all the posts personal and about myself as opposed to an issue,,,it is what alerted the radio world to your communications deficit,,,in addition to your flip-flopping and lying about cbers and your position regarding such, depending on your mood for the day.

_
You are the one defending N8's disgusitng felonious crimes while attacking others for the "crime" of speaking about freebanding.

>Freebanding IS a crime.

Talking about it isn't, something your defict has yet to overcome.

>A federal crime.

If that were so, all who have received an NAL would have a criminal rap sheet,,,lol,,but alas,,they don't. Care to elaborate,? Tell me genius, is a federal crime the same thing as a felony? <g>

>And it remains so, despite your 5 year attempt
>to deflect from that original topic. You are a

>practicing criminal. You can't deal with the

>reality of that claim so you deflect, obfuscate

>the truth, and go on the offensive by attacking

>the harbingers of that truth in an attempt to

>tarnish the message by knocking down the

>messengers.

Message? LMAO,,,WHAT message?
Misinterpreting your reactive calling of names is a message is more of waht ails you. That you choose to defend one who blatantly gets busted by the FCC for jamming a repeater and who was convicted of child abuse (a FELONY) while railing against one who chooses to speak of a topic you can not only handle, but are unable to properly define, illustrates your ignorance, hypocrisy, and skewered radical view that are shared by none except yourself and N8WWM and KC8LDO.

> But, truth be told, even if you do manage to

>silence the speakers of truth, you are STILL a

>practicing criminal whether or not anyone else

>knows it or not.

On the contrary,,I'm not the one that has made countless accusations based on nothing more than ignorance,,,you are.

>I speak the truth. If the truth insults you, it's not
>my problem and further reflective of your own

>psychological issues.

If one speaks the truth, one has no problem providing for suc. You have provided for nothing, except more lipservice.

_
Such what makes you
a lid and a detriment to hammie radio. You're part of what is strangling the hobby.

>Care to elaborate on just what is "strangling"

>the ham radio hobby?

You are. You are part of the problem, Elaborating will just cornfuse you further,

_

>If that is true, then you must be a real

>wing-ding

>on the air.

That you worry (putting it mildly) about all you can not control, producing extreme and profound inner feelings of impotence that manifest in your attacks on usenet as a means of venting your frustrations with myself and "society as a whole", has nothing to do with myself, actually.

>That you felt this important enough to make

>yet a second response to indicates the depth

>of your obsession.

It wasn't a second response, it was a first response to a thread you have hacked.

_
A shining example. I can say, when referring to "us", that my views are much more in line with the average cber than your own.

>Once again, you cannot possible know what

>the "Average CBer's" views are.

Sure I can. The fact that I was a regular contributor for over a year to a subscription-only monthly Sporadic Waves whose topic was cb, illustrates just that. Publishers only print what is advantageous to their bottom line, especially with a for-profit 'zine such as Sporadic. If you need an education on how the business operates, that is no surprise, but feel free to profess more ignorance on that of which you do not know.

>You a just a simpleton living in a make believe
>world.

I'm not the one that sees the sky falling or society failing me, or feels I am the lone voice in a society whose "moral fabric" is degenerating and against me, or one who blames others and society for all not comprehended ...*you* are.

>He's playing you, Dave. And you have to admit that he's good at it.

He thinks he is, but I've had his number for quite awhile now. I only
let him play to the point where he reminds everyone just how absurd
his thinking is. Once that point is reached, then I just cut him off
and put him back in his box until the next time.

>But that should come as no suprise when you consider that he has no
>job, no wife, no ambition, and no sense of responsibility to his
>family, his community, his country or himself.

I try to refrain from extrapolating things about his lifestyle which
are not readily apparent from his behavior here. I can fairly
accurately ascertain that he has psychological issues. But I don't
know what his real age is, or other things about his personal life.
Quite frankly (No pun intended) I'm not all that interested either.

>Before you start typing your next reply to one of his trolls, form an
>image in your mind of how he -really- is

I already know based on his reactions. He is starved for attention.
You have to walk a fine line between exposing him for what he is, and
feeding his enormous craving. That's why he has fits when people cut
the verbosity of his posts down. He likes reading his own words, and
it's blasphemous for someone else to "edit" them. Classic narcissism.

> -- a fat, greasy-haired,

(Tampa Bay Always Kicks Philthy Azz) wrote:

>I have learned you that your orignal calim of roger beeps being illegal
>on cb is wrong, and it contributed to your breakdown.

You have yet to provide a specific passage in FCC part 95 which
permits a roger beep.

Whether or not the FCC now considers a roger beep to be for amusement
or entertainment purposes is a matter for speculation until the FCC
rules specifically.

I'm telling you what I saw 20 years ago, when the FCC lumped together
a whole batch of birdies, echo's, "beeps", and other "toys" and
declared that their use was deemed to be "for entertainment purposes"
and as such were not allowed under part 95. Furthermore they also
added that the addition of such devices to existing radios would void
type acceptance.

>>So you categorically deny that the moral

>
>
>
>
>No need to prove you wrong, as EVERYONE except you is aware of the
>rules.

Nowhere in the rules does it say that roger beeps are legal. The fact that they are not included on the vast majority of legitimate radios further supports that notion.

Specifically, 95.413 subpart a6 specifically addresses devices used for amusement or entertainment. A roger beep could be classified as such, since it is not addressed anywhere else.

95.412 subpart b also defines permissible tones, and defines them as "only when the signal is used to make contact or to continue communications". They further clarify the intent by mentioning selective call units.

If there was a passage in the rules which read something like:" A single tone, signalling the end of transmission is permissible", then it would be a different story. But there isn't such a passage. So you have nothing to stand on when you make the claim that roger beeps are legal.

>The burden of proof is always on the claimant, not the inquirer

And you claim that R.B.'s are legal without any evidence to back it up, so I'm waiting for you to prove it.

>it ranks
>right there with your admitted socialism

Provide me the quote where I've admitted to being a socialist. You are
so far off the mark on that one, that it's laughable, even for you.

> and anti-privacy stances,

If you have nothing to hide, you have nothing to fear.....

>>So I'll ask again, which are you a sociopath or
>
>>a liar?

>
>The accomplished liar is yourself

Says you. You who have failed to prove any of your claims. And as you
are ripe to say, the poof is on the claimant. You claim I'm a liar,
but cannot prove it. What does that make you?

>>You have never proved that those statements
>>are anything but the truth. The fact that you
>>accused me of lying about them does not
>>prove anything.
>
>But Davie,,,,the continual absence of you providing for proof in ANY of

my cobra 29ltd classic came with roger beep, from the factory, and its FCC type accepted. does your question apply to the legality of the beeps on frs radios? or on 2 meter repeaters? they are just for amusement? your statement makes as much sense as saying you can't use a cb radio for anchor because the FCC doesn't say you can. so you have nothing to stand on when you make the claim that roger beeps are illegal.

The Forums are up and running and tests confirm that we are now ready
to allow immediate approval of signups. The forums are split into
categories and already there are a few posts there begging for some
answers :)

yup would like you too ask and answer any questions on Packet and now
PSK31.....

I know its not the time of year but also looking for a partner for September
time to try a link to the USA on Psk31....with qrp power..........

So hop on over to http://packetforums.red-heat.com/ and join in, it
will be fun!

see you soon.
Tony.

dropping, signals the end of transmission.

nonsense,roger beeps or actually nasa beeps were used on the apollo missions.
after the moon missions is when they started catching on with cb'ers. apollo
used am radios. was nasa using the beep as a sound effect to entertain us?

ok, lets some thing straight.

I don't want to interfere with other people's tv/steros etc. That is why i asked this group if there was a way to interfere with "his stereo"! If that means causing other neighbours problems then i don't want to go down that route. I'm not "afraid" of calling the police. In about a year or so we hope to move a bigger house to start a family so i don't want any unnecessary problems when we move house. If you have had a problem with a noisy neighbour who has no respect for common decency then you might possibly understand why i have gone to the lengths such as asking such a group as this. I don't want to get into an argument about this. If you think what i am doing is immoral then by all means voice your opinions, but please don't start a personal attack on me with comments such as "are you in the monty python" I have had a lot of positive feedback from this group so please don't be the minority and start a feud.

Thanks for your comments but if you want to air any more unprecedented attacks on me i would prefer you kept them to yourself.

Dude

Well you could do one thing Rich...........Stop
spamming the newsgroup. You could make one post
listing all of the items, but you do 6, 7, 8 posts.
AOL does have rules about Spam, so do everyone
a favor, make one post with items for auction.

Do you mean like when Twisty asked for help when he posted N7VCF's
phone number a few hundred times with instructions on how not to be
traced? Or like when Landshark asks for help when he posts "George's"
ISP info while whining about his changing nics?

>want to go down that route.

Well, there is no guarantee that a CB is going to interfere with a
stereo, and also no guarantee that it -won't- interfere with anyone
else's stereo or TV.... or cordless phone, or answering machine, or
baby monitor, or intercom, or just about anything else with an
amplifier and a speaker.

> I'm not "afraid" of calling the police. In
>about a year or so we hope to move a bigger house to start a family so
>i don't want any unnecessary problems when we move house.

....hmmmmm, how does calling the police cause "unnecessary problems"
when trying to sell a house a year later? Because the buyers might
check the police reports in the area? If it's a crime-ridden
neighborhood then it won't make any difference, and if there is hardly
any crime then one or two calls for insignificant stuff like noisy
neighbors isn't going to rattle your property value. Actually, a few
reports should be a positive influence on a prospective buyer since
-no- neighborhood is without crime, and it shows that the neighbors
have at least some sense of civic responsibility (they won't shut
their blinds when your house gets robbed). OTOH, if it's an upscale
'keep-to-yourself' mentality that prevails then nobody will care if
you call the cops or not. So I don't get it. Is there something you
are not telling here?

> If you have
>had a problem with a noisy neighbour who has no respect for common
>decency then you might possibly understand why i have gone to the
>lengths such as asking such a group as this.

Almost everyone has had problems with noisy neighbors, but few people
solve their problems outside of the law. In fact, such action usually
makes things worse. What's that old cliche.... two 'wrongs' don't make
a 'right'?

> I don't want to get into

After all The FCC has bigger fish to fry in today's market like Sat TV thief's. After turning over regulating of CB's to local law enforcement they pretty much washed there hands of the CB Radio. They are too under Manned and under funded to worry about the CB Radio. within the last 3 years 30 amp builders have opened there doors wide to the public and No One Gives a Crap but Frank. P.S. Frank you lost the war give up

Maybe you missed the part about Quindar tones:

http://www.hq.nasa.gov/office/pao/History/alsj/quindar.html

>>Ever see Capricorn One?
>>
>yes, i have it on dvd. the moon missions weren't faked.

No, but the movie was good entertainment, complete with roger-beeps!
"Marooned" was pretty good, too. I didn't like "Apollo 13" as much as
I thought I would -- computer animation has come a long way, but it
still looks fake when compared to the special effects that were
state-of-the-art just before computers took over the scene. Damn
accountants!

Yea, I wouldn't open it either..people are willing to part
with large amounts of cash for Dale memorabilia. That thang
may end up being worth some major coin later in life. (?)

Oh gee, another rendition of the "let's ignore the rapists until all
the murders are caught" song.

>After turning over regulating of CB's to local law enforcement they pretty much
>washed there hands of the CB Radio.

They didn't "turn over" anything -- they still have authority over
their own rules and regulations. HR2346 only -permits- local
enforcement, it doesn't -require- it, and it doesn't pre-empt
enforcement under any jurisdiction by the FCC.

> They are too under Manned and under funded
>to worry about the CB Radio.

I agree, which is why people should cooperate so as not to make the
situation worse. You aren't helping at all by selling splatterboxes.

> within the last 3 years 30 amp builders have
>opened there doors wide to the public

Really? List them. List all 30, and after I verify them I'll never
reply to any of your posts, or even make mention of you or your
illegal business. In fact, I'll even leave the newsgroup permanently.

> and No One Gives a Crap but Frank. P.S.
>Frank you lost the war give up

Well now -that- was convincing. Heck, I'll just hop on the
anti-federal express and buy myself a big ol' lin-yar, drive around
town yelling "A-A-A-A-U-D-I-O-O-O" and cursing at anyone that pitches
a bitch because I'm bleeding all over Ch. 9. Hey, fuck 'em if they
can't take a joke. After all, the FCC don't care so nobody has any
right to complain, right?

Hello,

This is a WARNING NOTICE from the SBC Internet Services (SBCIS) Policy
department, regarding abusive, offensive and/or harassing emails/postings
sent from your SBCIS account.

It has been brought to our attention that you are posting on the internet
newsgroups with a known AOL user as you're account information RE:
wa3moj@aol.com
Said individual has forwarded a complaint concerning these posts.

Be advised it is a violation of our Terms of Service
(http://sbc.yahoo.com/terms/)and Acceptable Use Policy
(http://support.sbcglobal.net/legal/aup.shtml) to use our service to email
or post, threatening, abusive, obscene, hateful, or otherwise objectionable
material.

If additional complaints are received concerning your SBCIS account, it will
be TERMINATED, and you may incur an early termination fee.

Sincerely,
The SBCIS Policy Department

ROTFLMFAO!!!

> Go back to the gay newsgroups, freak.

LOL!! George now approves of people spamming the group.
HUmmmmmmm, what happened to that Sh&t storm that was
going to be heading my way???? LMAO!!!

To whom it may concern,
The individual who's posts on Usenet that I am including, has not only
harassed people, but changes his screen name just to by pass news
filters. He use's foul language, threatens people, harasses others,
posts off topic all of these are against your TOS.
I wouldn't want my children to read this stuff! You can't filter him out,
because he changes his screen name on purpose, so how is a parent going to
protect their children from reading the filth this person posts?
I am asking that you inform this person of your TOS & AUP and
have him adhere to it. It is very unfair that one person can get away with
these types of actions and his ISP doesn't do anything about it, I can't be
the only one that complains.
Please I beg you, have this person post on topic, stop using foul
vulgar language and most of at least stick with one screen name, that
way filters can work and children can at least have some sort of
filtering of this stuff.

abuse@comcast.net
dmca@comcast.net

Now watch him go on his nic changing routine, go man, go! More
times you do it, the more complaints they get, not only from me.

You must be thinking of my AOL account that I route through Vancouver
whenever I'm in Colorado, but I only use that when the Issaquah uplink
to the shill ISP in Ohio goes on the fritz. Perhaps I should start
shipping packets through relays in Philadelphia just to see if your
head explodes. But then again, maybe you are begging me for yet
another demonstration of your obsession with identities. Is that what
you need to carry your ego through the hot summer months? We can do
that, too. So how do you like the name Leonard?

That's because there was no squelch. Audio was phase-modulated onto a subcarrier of the uplink/downlink carriers, and both were continuious transmissions. The Quindar tones were used to flip between the mod and demod circuits. I would assume that full duplex audio was possible but wasn't used in order to save weight, power and bandwidth.

What is Narcissism

Written by Dr. Sam Vaknin

About Narcissism

A pattern of traits and behaviors which signify infatuation and obsession with one's self to the exclusion of all others and the egotistic and ruthless pursuit of one's gratification, dominance and ambition.

An all-pervasive pattern of grandiosity (in fantasy or behaviour), need for admiration or adulation and lack of empathy, usually beginning by early adulthood and present in various contexts. Five (or more) of the following criteria must be met:

*

Feels grandiose and self-important (e.g., exaggerates achievements and talents to the point of lying, demands to be recognized as superior without commensurate achievements)

*

Is obsessed with fantasies of unlimited success, fame, fearsome power or omnipotence, unequalled brilliance (the cerebral narcissist), bodily beauty or sexual performance (the somatic narcissist), or ideal, everlasting, all-conquering love or passion

*

Firmly convinced that he or she is unique and, being special, can only be understood by, should only be treated by, or associate with, other special or unique, or high-status people (or institutions)

*

Requires excessive admiration, adulation, attention and affirmation - or, failing that, wishes to be feared and to be notorious (narcissistic supply)

*

Feels entitled. Expects unreasonable or special and favorable priority treatment. Demands automatic and full compliance with his or her expectations

*

Is "interpersonally exploitative", i.e., uses others to achieve his or her own ends

*

Devoid of empathy. Is unable or unwilling to identify with or acknowledge the feelings and needs of others

*

Constantly envious of others or believes that they feel the same about him or her

*

Arrogant, haughty behaviours or attitudes coupled with rage when frustrated, contradicted, or confronted

*

"Take it from
somene who has been denied countless interviews, granted a few, and no-commented to- death when it comes to who really is in charge at the FCC. If you believe it's saviour time, you have one hell of a wake-up call pending you my friend. I can supply you with hundreds of hours of interviews from the NSAs covert Echelon global spy communications system(monitors ALL modes of communication for "key" words) clear down to the FCCs local, regional and National Directors comments. Who you think is in charge isn't, and what you think will take place, won't. The resources simply are not there and congress' pending vote on the current bill is unlikely to gather the muster to pass. Even if it does, the allocation of funds is the equivalent of just a few dozen or so added employees. No, your messiah is a false god. What will likely take place SOMETIME in the future, is that local municipalities will be given the jurisdiction of enforcing their own areas. But this is old news. Like I said, you are free to believe what you like and no one will think ill of you for it. But these are the facts. It is my profession and my passion to educate the public.(I am a writer) Especially when it comes to Big Brothers Bull. "

*

Is obsessed with fantasies of unlimited success, fame, fearsome power or omnipotence, unequalled brilliance (the cerebral narcissist), bodily beauty or sexual performance (the somatic narcissist), or ideal, everlasting, all-conquering love or passion

*

"I am 185 pounds of T'Wisted Steel -n- sex
appeal...keep your female family members away from me, lest you see for yourself."

*

Firmly convinced that he or she is unique and, being special, can only be understood by, should only be treated by, or associate with, other special or unique, or high-status people (or institutions)

*

"No one would even know THAT if you wouldn't
have brought the Sporadic article to electronic fruition that brought me
worldwide attention and accolades from cbers and freebanders. I even met
several fine hammies through Sporadic,....still don't understand the
mentality that reduced you to search the world for anytihing you could
find on my new well-known worldwide household handle. You made my
internet name instantly recognizable..it was only fitting I changed my
handle to it...I get way more contacts...."

*

Requires excessive admiration, adulation, attention and affirmation -
or, failing that, wishes to be feared and to be notorious
(narcissistic supply)

*

"Congratulations to K4KWH,,the newest member of the Church of Twistedhed.
N7VCF will teach you how to properly worship, KC8LDO will teach you how
to get the word out., both will teach you how to fail regularly."

*

Feels entitled. Expects unreasonable or special and favorable priority
treatment. Demands automatic and full compliance with his or her
expectations

*

"I am certain beyond a doubt whatsoever, no one hammie or upperclassmen
for that matter would give a rats azz if barefoot DXers employ the
unused and abandoned 11 meter frequencies above 40. Yet,,,,,there
exists a certain core of pedophialic lid-types that construe a slight
overlooking of minor rules as capitol crime."

"If the non-U.S. stations can operate ssb there,
why shouldn't I, especially if I want to have a nice
DX contact with one of them? Many of us LIKE the law as it is,
it keeps "yes men" off the freqs. "

*

Arrogant, haughty behaviours or attitudes coupled with rage when
frustrated, contradicted, or confronted

*

"I elected me as keeper of the faith as a countermeasure to
your personal attacks and invoking of men's sexual connotations to
cause problems and beg people to take mercy upon your withered and
self-disrespected soul."

>
>TIA

No, and if you feed Twisty's delusions by even suggesting that
anything he says might be the truth (even if it is) it will only
encourage him to make up more and bigger lies. FYI, "George" is not
WA3MOJ -- if I understand the explanation I received via email, the
call was posted to trip up Twisty because the name was phonetically
similar to the president, and we all know how much he hates both hams
and George Bush. The plan evidently worked, but I don't think he (the
newsgroup "George") expected it would work -this- well. Also remember
that trolls like Twisty often post from both sides of the fence just
to stir things up. In fact, it has been suggested that the infamous
forgery of Twisty, allegedly written by Leland, was actually written
by Twisty himself. It wouldn't suprise me at all if that was the case.

Anyway, if you ever have any doubts as to whether or not I am posting
through a sock puppet, just ask yourself if you think I have ever had
any problem expressing my opinions, popular or not, under my one and
only name. I think you will agree that I don't, and that I don't need
a sock-puppet to hide behind, or to say whatever I want to say. I also
find that only one internet account occupies more of my time than it
probably should -- I have neither the time nor the ambition to play
'musical identities' with multiple accounts or newsgroup accesses.

BTW and OT, what do you know about the new Hemi? Is it just a 360 with
hemi heads?

Jim is one of the most level headed people on this board, Frank. In
fact we have two cool Jim's here. Neither one of them will ever suck
up to anyone on this board..just an FYI

>I didn't mention Twist, and you didn't deny it.

I mentioned Twisty because he was the source of the lie. If other
people belive him that's their fault, not mine. He preys on gullible
and weak-minded people for his support. He probably thinks you belong
in that category or you wouldn't have received any such emails. And
from a different angle, I can fill up someone's mailbox with different
names just like anyone else can.

If someone makes a claim, ask for proof. No, don't just ask, -demand-
proof. I guarantee that they don't have any proof because I'm not "i
am not george".

> You guys should
>stop with the Twist stuff.

I have several times. A couple years ago I was up in Alaska for
several months and he wouldn't let up even after I had left. He just
keeps begging for my attention. He has had many opportunities to take
our discussions out of the group and into email, but I'm sure you
noticed what happened last time I made the offer -- he chickened out
with some bullshit excuse about an imaginary military group......

If you want this "Twist stuff" to stop, go complain to the source of the problem -- Twistedhed.

> I've talked to you via email, more
>than I have Twist, Frank. I like Twist, but I speak my own mind.

I can believe that because you are the only person that has bothered to ask me for the truth. The rest are Twisty's sheep.

>Looks like the akc ballon has been deflated...looks like the
>akc posse' was defeated by one brave keyclown. (me)

So be it. But there are still plenty of people that oppose illegal operation, myself being only one.

>Common Denominator..we are -all- radio fans. (a dying breed)

To that I will agree 100%. I just don't happen to agree with the methods used by some at the expense of others.

>>
>Are you going to buy a no name? <g>

Not only "no" but "FUCK NO!!!". If I'm going to violate federal regs
you can bet that I'll do it in style -- we're talking quad 3CX250's
for a big rig, or a pair of 6146's for a basic mobile. And none of
that solid-state crap -- tubes are the best tools for the job, and
they can be much more than "competitive" when under control of modern
semiconductor circuits.....

If I was going to build an amp it wouldn't be a conventional "linear".
I would channel the mic jack through the amp (plug the mic into the
amp and plug the amp into the CB mic jack), then run a full-blown,
grid-modulated, Class-E transmitter using the CB as the exciter only
(PLL- or xtal-controlled RF frequency source with -no- modulation).
Efficiency is better than 85% even -with- the filament power, and
harmonic distortion is negligible because output from the tubes is
high-impedance which is more easily filtered than the low-impedance of
a solid-state design.

Me buy a No-name amp? Bite your toungue!

>You, Dave, and Geo all wait for his next post.

On the contrary, Twisty can't get enough of us. I (and I think I speak
for the rest of us) am perfectly willing to shitcan his name to the
killfile, but he just keeps begging for attention. If it were anyone
else it wouldn't matter, but the problem is that Twisty is moderately
intelligent and has a working knowledge of logical fallacies. This
makes him no better than your average politician, but still a danger
to legitimate arguments if left unchecked, especially when the
audience (rec.radio.cb) is gullible enough to believe in "bird watts"

and "swang".

>>
>> If other
>> people belive him that's their fault, not mine. He preys on gullible

I think you have it the other way around. I'll include my favorite sig
file at the end of this post; read it and you tell me who goes out of
his way to "fuck with" the other.

>>
>> He probably thinks you belong
>> in that category or you wouldn't have received any such emails.
>>
>Any such emails? I said I've had more emails from you, or about
>you. A few from Curt when you threatened to sue him and I.

I have only emailed you once in the past few years, and that was only
because you thought I was "George". If you have received any other
emails in my name then please forward them to me, with headers, so I
can take appropriate action.

>>
>> And

>>
>Not mine..hotmail's filtering works pretty well.

Hotmail sucks. Regardless, some of these Usenet trolls have no life
and spend their welfare checks on multiple internet accounts. So even
if they are from different ISP's, they still may be from the same
person.

>>
>> If someone makes a claim, ask for proof. No, don't just ask, -demand-

I'll address the problem when it becomes a problem. The BPL issue is
really a 'wait-and-see' situation. If it causes as much interference
as people say it will, I don't think it will survive very long, and I
don't think hams -or- CBers will have any influence in the matter.

Oh Oh you did it now. That question rattled Frank with a long reply trying to explaining a way a simple question he didnt even answer. Richard M was the man who identified insane Georgy porgy as wa3moj.

201. Amateur Radio Newsline™ Report 1399 June 4, 2004

Newsgroup: rec.radio.cb
Date: 2004-06-04 17:35:57 UTC
From: radionews@aol.com
Message-ID: <20040604133557.16591.00000456@mb-m15.aol.com>
Source record: 183011

Amateur Radio Nerwsline Report number 1399 will follow in a few moments. First, this important announcement from our Support Fund Administrator Andy Jarema, N6TCQ:

--

The following is not necessarilly for retransmission. I guess you already know that if you are hearing my voice on a closed-circuit advisory it means that Newsline is again facing a financial crisis.

Well, you're right. The funds are so low that we may not be able to pay the bills from May. Worse, for the first time in our history, we even do not have the money to send a representative to Huntsville this
summer to present the 2004 Young Ham of the Year Award. And in two words --- "that's bad." "Real bad."

The solution to both of these problems really lies with you. Our world-wide all volunteer staff produces these newscasts for you. The all volunteer Young Ham of the Year Committee labors tirelessly each year to select a youngster to receive the Award. Joe Eisenberg, K0NEB, oversees the Newsline sponsored Roy Neal, K6DUE, Amateur Radio Mentoring Project database, doing so at no cost. The list goes on and on.

I too am a volunteer, but I have to be the realist. I'm the accountant
who has to look at the bottom line and when it turns red, I have to say -- hold on -- there is no more money to continue. And that's about where we are right now.

So, here's the bottom line. If you want the newscasts to continue. If you want the mentoring program to continue and the Young Ham of the Year Award to continue, we need you to show it now -- right now -- through your financial support of Amateur Radio Newsline.

Remember that Amateur Radio Newsline is a federally chartered 501(C)(3) and California state not-for-profit corporation. This makes your donations tax deductible, whether you're an individual or a club.
The address to send them to is the Amateur Radio Newsline Support Fund, Post Office Box 660937, Arcadia California 91066. If you missed the address don't worry. It will be repeated at the end of this week's report.

For now I thank you for listening, for responding and offer you this weeks newscast which follows immediately.

--

Amateur Radio Newsline report number 1399 with a release date of
Friday, June 4, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio on alert on a stormy Memorial
Day
weekend, a BPL deadline is extended, another country says goodbye to
Morse code and June is Amateur Radio month. We'll tell you where
on
Amateur Radio Newsline report number 1399 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAMS AID AS TORNADOES CONTINUE

Strong storms with funnel clouds raced across Indiana during the
Memorial Day holiday forcing thousands of Indianapolis residents and
race fans alike to take shelter from tornadoes. Jack Parker W8ISH
was
tracking the storm that left behind a train of devastation while
putting radio amateurs on alert.

--

For the city of Indianapolis, the Race Day storms could not have
happened at a worse time. Hundreds of thousands of people were in
town for the 88th running of the Indianapolis 500 mile race and for
the NBA Playoff game between the Indiana Pacers and the Detroit
Pistons. The rain delayed race was nearing the end when race
officials threw out the checkered flag and warned nearly 400 thousand
race fans to immediately take shelter.

Accordling to early reports an F3 tornado passed just south of the
Indianapolis Motor Speedway and began its destructive path across the
south and east side of Marion county. Hundreds of central Indiana
amateur radio operators were kept busy from Sunday morning until late
Sunday evening tracking the funnel clouds and reporting ground truth
observations back to the National Weather Service office in
Indlianapolis.

While the Pacers took on the Detroit Pistons, tornado sirens blared
outside, motorists got stuck in traffic jams, and tree limbs and
debris were tossed into roadways. A funnel cloud described as two
blocks wide, tore the roof off a nursing home leaving nearly fifty
bed-ridden patients without shelter. They spent over an hour out in
the pouring rain as rescue personel attended to their injuries.
Downed
power lines, flooded streets and massive amounts of debris from
damaged homes made it difficult for Indianapolis police and fire
personnel to reach those in need.

According to the National Weather Service more than a dozen tornadoes had touched down in 10 Indiana counties. This was the third time in three years that powerful tornadoes have ripped across central and southern Indiana.

Reporting from Indianapolis, for Amateur Radio Newsline, this is Jack Parker W8ISH

--

Marengo in southern Indiana was hard hit, with at least one fatality, four injuries and numerous homes damaged or destroyed. But Indiana was not alone in dealing with weather related problems. According to news reports several people in Kansas and Nebraska were injured by the
weekend's tornadoes which also ripped through parts of those states. Ham radio was on alert there as well. More on this ongoing story in future Amateur Radio Newsline reports. (ARNewsline(tm), W8ISH)

**

THE BPL FIGHT: REPLY COMMENT DEADLINE EXTENDED TO JUNE 22

The FCC has extended the deadline to file reply comments on already filed responses in its broadband over power line Notice of Proposed Rule Making ET Docket 04-37. The FCC granted the extension based on requests from the National Antenna Consortium and the Amherst Alliance.

The two organizations had sought to have the FCC postpone the filing comment deadline until either September 1 or two months after the public release of the NTIA's Phase 2 study -- whichever was later. The Commission responded that in its view an additional three weeks should be ample time to respond to any NTIA submission.

The FCC does not routinely grant such time extensions, and it denied earlier petitions, including filings from the ARRL. Now it has relented and has set a new Reply Comment deadline of Tuesday, June 22nd. (ARRL)

**

RESTRUCTURING: MORE COUNTRIES DROP CW

More restructuring has taken place in Europe. The GB2RS News Service reports that Finland has now officially dropped the Morse code requirement for that nations hams to have access to the High Frequency
bands. GB2RS says that Finland actually deleted the Morse requirement
on the 1st of November of 2003. Now, with the latest rules revisions there are now there are only two classes of amateur license in that European nation.

Also from GB2RS word that former French Class 2 licensees with F1 and F4 callsign prefixes are now being heard on the High Frequency bands.
According to the French national amateur radio society, this change was implemented on May 16th.

But C-W is far from dying or dead on the other side of the Atlantic. In fact the fourth European High Speed Telegraphy Championships take place the 15th through the 19th of September in Montenegro and Serbia.
(GB2RS)

**
RESTRUCTURING: NEW ZEALAND SAYS GOODBYE TO MORSE

Finland and France are not alone in saying goodbye to Morse code testing. So has a nation down-under.

On June 4th New Zealand's Telecommunications regulators issued a decree that says Morse proficiency testing has ended and thatNew Zealand Limited Class operators will soom have access to the high frequency bands. In fact, regulators have decided to upgrade Limited Class operators to the New Zealand General Class.

According to the notice, operators will not be required change their callsigns or take any other action.. The new rules go into effect on June 17th. (ZL2BHF)

**

ENFORCEMENT: POLICE JAMMER GETS 8 YEARS IN PRISON

A man convicted of jamming a Wisconsin emergency service radio system will spend the next 8 years behind Federal prison bars. Amateur Radio
Newsline's David Black, KB4KCH, is at the south-east bureau with the
details:

--

University of Wisconsin graduate student Rajib Mitra faces eight years
in prison after being convicted of intentionally jamming public safety
radio communications. The 25-year-old Mitra was sentenced by a

federal judge as a domestic terrorist under the Patriot Act which punishes substantial disruption of a critical public infrastructure.

The computer science student converted a radio receiver to transmit tones that interfered with the 800 MHz emergency radio system used by Madison police, fire and paramedics. In all, Mitra was accused of interfering with public safety communications 37 times last year. He told a federal judge the incidents were accidental--the result of a loose wire. But the judge likened that to a fairy tale, and increased
Mitra's sentence for perjury. The disruptions happened between January and October, 2003.

Assistant U-S Attorney Tim O'Shea says Mitra's crime stems more from immaturity than ideology. O'Shea says the case was about domestic terrorism, not like what happened in New York City September 11th 2001, but by the immaturity of the defendant.

Testimony included reports about disruptions that prevented police officers from communicating with each other while making arrests, keeping paramedics from getting patient information to hospital staffs
and decreased safety for firefighters while on calls.

In one incident, Mitra was accused of interfering with communications for three hours on Halloween night. He was also convicted of downloading pornographic sounds from the Internet and broadcasting them over police channels.

Mitra could have been sentenced to two years in prison. He also faces
three years probation and has been ordered to pay more than 6-thousand
dollars to the Madison Police Department.

From the South-East bureau in Birmingham, Alabama, I'm David Black, KB4KCH, for the Amateur Radio Newsline.

--

Its not known if the government will use Mitra's conviction under the
Patriot Act as the basis of prosecution of others acused of the same type of crime. (ARNewsline(tm) from Capital Times, others)

**

ENFORCEMENT: RESTERAUNT FINED $10,000 FOR USING 2 METERS

Remember the case of Best Wok? The New Jersey resteraunt that was warned by the FCC to stop using an illegal high power 2 meter cordless
telephone to coordinate deliveries but which continued to do so anyhow?

Well, that decision by the store manager is going to cost the company $10,000. Thats the amount of the fine that the FCC has levvied against Best Work for transmitting on 145.8376 MHz without Commission authorization. The resteraunt was given the customary 30 days rto pay
up or to file an appeal. (FCC)

**

ENFORCEMENT: RIGHT APPLICATION - WRONG BURTON

The FCC admits that it made a mistake when it announced that it had sent a warning letter to a former California ham and designated his GMRS radio service application for a hearing. What happened? Amateur
Radio Newsline's Bruce Tennant, K6PZW, tries to sort it all out:

--

The FCC recently announced that it had sent another warning letter to Richard A. Burton, the ex-WB6JAC. This, warning him about operating without a license and designating his GMRS application for review.

Only one problem. The regulatory agency had the wrong Richard A. Burton.

It turns out that it was a Richard A. Burton in another state who, this time, applied for a GMRS license. It was not the Richard A. Burton who lives in California.

Complicating thins further the California Richard A. Burton had filed for a GMRS license over a year ago. He voluntarily rescinded his application after the FCC set it aside for review.

So what happened? According to a note in the ARRL Letter, the FCC was
acting on the belief that the latest GMRS application had come from the California Richard A. Burton. And mistakenly, the regulatory agency designated it for hearing.

For the Amateur Radio Newsline, I'm Bruce Tennnant, K6PZW, in Los Angeles.

--

By the way, we did a search on the QRZ.com callsign supersite. We found that there are 12 hams that have the name Richard Burton living in North America. Of these one is a Richard A. Burton but he does not
live anyplace near the Richard Burton who was seeking the GMRS license. (ARRL, others)

**

ENFORCEMENT: TO MANY CALL SIGN CHANGES

The FCC is asking a New York, ham why he has filed over a dozen call sign change requests with the agency in the past four years. Since August 29, 2000, Kiyoshi L. Nakamura of Buffalo has held the call signs K3DJ, KJ6UZ, AD1L, K3DJ again, KH6DJ, AD1L again, K3DJ for a third time, AD2R, AD1L for a third time , AD2R, WH7S, AD1L for a forth
time and AD2R for a second time. And on May 4th, he again filed a call sign change request. This time he wants to give up AD2R and get back to K3DJ for the fourh time.

In its letter to Nakamura, the FCC says that his numerous call sign change applications raise questions about apparent abuse of the licensing system. This says the FCC that with limited exceptions, each call sign would be blocked by Commission rules from being reassigned to another licensee for two years.

So, the FCC gave Nakamura 20 days from the date of its inquiry letter to respond. He was told to state his intentions regarding the filing
of these applications. He was also told to coose one and only one call sign that he actually wants to keep. (FCC)

**

RADIO HONORS: AMATEUR RADIO MONTH IN NH

June is now Amateur Radio Month in New Hampshire. This, as Governor Craig Benson issues a proclamation honoring the states radio amateurs for their dedication and the service for its almost 100 year history of contributions to the advancement of communications technology.

First issued by the New Hampshire State Legislature in 1985, each succeeding Governor has recognized the role of the states Amateur Radio operators during the month of June. 2004 marks the 19th consecutive year that these proclamations have been issued. (Via e-mail)

**

TECHNOLOGY: IS IT BYE-BYE TO VHS?

Home recording using tape as a medium seems to be on its way out. According to the Consumer Electronics Association, in 2003, movie watchers rented more DVDs than VHS tapes. Also, DVD sales increased by 30% while the sale of VHS VCR's dropped by an unexpected 50% in
2003.

Whats replacing the venerable VHS system? Hard disk recorders like TIVO which have been dropping in price over the last twelve months. When combined with satellite or cable TV, these devices make delaying a program to watch later as easy as 1-2-3. (Science OnLine)

**

THE SOCIAL CIRCUIT: HAM-COM IN DALLAS TEXAS IN JUNE

Turning to the ham radio social calander, if you will be in the Dallas., Texas area the weekend of June 18th and 19th, make it a point to attend Ham-Com 2004. This is the ARRL West Gulf Convention held at the Arlington Convention Center in the Dallas suburb of Arlington. This years features include indoor and outdoor flea markets, numerous commercial exhibits, a D-X luncheon, an APRS workshop and much more.

Information on this one is on line at www.hamcom.org or by writing to Ham-Com 2004. P.O. Box 12774, Dallas, Texas, 75225. The phone and fax number is area code 214-361-7574 (Ham-Com)

**

THE SOCIAL CIRCUIT: KNOXVIOLLE TN. IN JUNE

And the 38th annual Knoxville Hamfest and Electronics Exposition is slated for June 11th and 12th. The venue is the Knoxville Exhibition, World's Fair Park in Knoxville, Tennessee. The theme this year for the event is "Promoting Youth in Amateur Radio." More information is on-line at www.w4bbb.org (K4PZT)

**

THE SOCIAL CIRCUIT: A TALE OF HAM RADIO AT NAB

Also, if you want to read more about ham radio at the recent National Association of Broadcasters Convention in Las Vegas, take your web browser over to www.haleisner.com. Then click on the column titled "The Other Side of the Control Room Glass" by our own Bill Pasternak, WA6ITF. This month Bill not only takes reads to the N-A-B show but also tells of his recent exploits at the Dayton Hamvention. Again, its all on-line at www.haleisner.com (ARNewsline(tm))

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

RADIO LAW: FREQUENCY COORDINATION FOR THE 2004 NATIONAL POLITICAL CONVENTIONS

Remember a few years ago when the ARRL became the FCC's "single Point of Contact" or spoc on repeater related matters? Well how about one for this years political conventions? Well that honor has gone to a New York based consulting engineer. Bill Pasternak, WA6ITF, has more:

--

At the request of the Frequency Coordinating Committee for the 2004 Political Conventions the FCC has designated Louis Libin, as the single point of contact -- or spoc -- for coordinating broadcast R-F operations. This, under Section 74.24 of the agency's Rules.

Libin will oversee all RF operations for broadcasters in Boston from July 26th through July 29th and in New York City from August 30th through September 2nd. Nor is this the first time for him to do so either. Louis Libin is considered one of the worlds foremost authorities in the area of RF compatibility and has worked on numerous televised events over the years.

For the Amateur Rafio Newsline, I'm Bill Pasternak, WA6ITF, in Los Angeles.

--

More on this story is at the cyberspace at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-04-1494A1.doc (FCC, CGC)

**

RADIO LAW: 811 PROPOSED AS A NATIONWIDE CALL-BEFORE-DIGGING NUMBER

The FCC is asking for comments on a proposal to adopt "811" as a nationwide call-before-digging number. The regulatory agency believes that this will give excavators one simple number to call to avoid cutting buried cables, gas lines and other important infrastructure.

Currently there are 70 nationwide "One Call" centers that serve different geographic areas. They are generally accessed by dialing toll-free or local telephone numbers. The FCC however believes that having one simple number to call like 811 should promote safety and lead to fewer utility outages.

Want to know more? It's all on-line at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-247171A1.doc (CGC)

**

RADIO LAW: COURT UPHOLDS CABLE RULING

Meantime, the FCC is considering a Supreme Court appeal in cable Internet access dispute. This, after a federal appeals court says that it is standing by its October ruling that cable TV operators should open their lines to rivals who also want to use them to sell high-speed Internet service.

The Federal Communications Commission asked the 9th U.S. Circuit Court
of Appeals to revisit the decision, but the court declined to do. If upheld, the circuit's decision would likely subject cable operators to
the same rules as local phone companies, who are forced to lease their
lines to rival providers of phone service and D-S-L Internet access. (Published reports)

**

WORLDBEAT-UK: 2004 AMSAT COLLOQUIUM IN THE UK

Turning to news from around the world, the 2004 AMSAT-UK Colloquium will be held on Friday, July 30th through Sunday, August 1. This, at
the University of Surrey, Guildford, United Kingdom.

A feature of this year's meeting will be a talk and Question and Answer session with Professor Colin Pilinger of the Beagle 2 project. More information is on-line at www.uk.amsat.org. (AMSAT-UK)

**

WORLDBEAT-ALBANIA: TIRANA ALBANIA FOR DX'ERS IN JUNE

And Albania's first ever DX Convention, is scheduled for 19th to the
20th of June in the city Tirana. Attendees will get to meet many figures from the DX community who donated equipment to put Albania on the air. This includes G3LQP, W6UM, OH2BH and T93Y. United States Amateurs should contact K2WR, at k2wr@njdxa.org for advice how to travel to this gathering. (Via e-mail)

**

ON THE AIR: FRENCH RULES CHANGE SPAWNS DX OPERATION

FT1ZL is on Amsterdam Island and is expected to become active soon. This, after the French have change their licensing structure to grant holders of that nations VHF only license operating privileges on the High Frequency bands.

French stations with the numeral 1 or 4 in their prefix can now operate the low bands using all modes except A1A, A2A, F1A and F2A.

FT1ZL will use his new found privileges on 20, 17, 15, 12 and 10 meters SSB during his Amsterdam Island stay. (Internet)

**

DX

In D-X, IK4RUX says that he plans to operate portable IF1 from Favignana. He will be found on SSB and C-W from the June 19 to the 26
th. QSL this operation direct or via the ARI Bureau. (GB2RS)

And K8AQM reports that his upcoming trip to Samoa will take place July
7th to the 21st. He will operate as 5WZ0TR from the Samoan Village Resort on 160 though 10 meters. Modes will be CW, SSB, RTTY and PSK. All QSLs are via K8AA at his callbook address. (OPDX)

**

THAT FINAL ITEM: BANNED BY ONE WORD

And finally this week, the tale of why hams in Thailand were not allowed to talk to hams in other parts of the world for a number of years. The truth be known, it was all because of a three letter word. Here's Q-News Graham Kemp. VK4BB, with the rest of the story:

--

Audio report only. No text available. Lisen on-line at www.arnewsline.org/

--

And for those of you who do not speak French, the word oui -- sometimes pronounced as the English word "we" -- means "yes."

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain,
the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official
website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

A reminder that the nominating period for the 2004 Amateur Radio Newsline Young Ham of the Year Award is now on. This program is open to any FCC licensed young radio amateur age 18 or younger residing in the contiguous 48 states and who has made a significant contribution to the community, the nation or ham radio though the United States Amateur Radio Service.

More information and a downloadable on-line nominating form is at our website. That's in cyberspace at www.arnewsline.org. The cutoff for
nominations this year is midnight on June 30th.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don
Wilbasnks, AE5DW, saying 73 and we thank you for listening."

ROTFLFAO the only "ballon" is the one up your ass left there by your
buddie transshark. You are afraid to let leland or doug know your name
and address all you did was sneak around lelands home when he was out
and take pics of dougs driveway after he chase you off the porch.

I have a question for you guys jim and landshark and noname, do you
respect the USA? Do you support this country in time of need would you
pitch in if called for? If president Bush came on TV and said
everybody needs to obey the laws of the land would you still operate
illegal CB? Just wondering

Or it could be the repeater he jammed when he said he had business in a town he couldn't even pronounce (Lutz) and was "looking for" me. LOL..Leonard,,,,,hey Frank,,what's the rest of the name? Hehe,,someone got ya' on remote control and done tossed the switch to auto-pilot.......get a life, Frankie,no matter how much you cry on this group about me this and me that, no one but you and Lelnad gives a damn.....oh, at times Geogre does, but he's more interested in swearing and getting past shark's killfile and obsessing on Steve, much in the manner you obsess on myself. Why, hell, if mopar and I were to suddenly disappear, you would have to convince Geogre to join you in your random, off-the-wall and offtopic attacks in the form of outbursts about Jay or Toll. Of course, you'd curse Randy and Tim more often, also, with those four letter words you like to toss around as insult.

_
>No, and if you feed Twisty's delusions

You are troubled, chubby, way beyond anyones initial reckoning. He said
"Geo",,,not "Twist",,heheh,,try it again, now,,s-l-o-w-l-y.

> by even suggesting that anything he says

>might be the truth (even if it is) it will only

>encourage him to make up more and bigger

>lies. FYI, "George" is not WA3MOJ

>-- if I understand the explanation I received via
>email, the call was posted to trip up Twisty

Imagine that,,,,,it's about me,,,,Frank's temper got the best of him and
made another (gasp!) self-contradiction....it's always about
memememememe,,ain't it Frankie, mah boy? In fact, you not only see
behind every post, you see me when I'm not even mentioned. You talk
about me in your sleep, you mention me in all your posts, you make
thread topics of me,,,,LOL,,,

>.because the name was phonetically similar to
>the president, and we all know how much he

>hates both hams and George Bush.

Poor Gillinad is feeling that pain again behind his left eye...that
twitching giving way to his chubbed carcass....the only hate that takes
place, is from you Gillinad,,and YOUR clique who you always stood and
defended,,,N8, Geogre, and Lelnad, But at least the group can take it at
face value when you say you correspond with email with the person who is
responsible for much of the garbage on this ng, otherwise, there is no
way one may have thought about such a scenario that involved you.

> The plan evidently worked, but I don't think he
>(the newsgroup "George") expected it would

>work -this- well.

Plan worked? LMAO,,,,,the only plan that worked was linking you to crying about Jay and Toll and Eitner illustrating you were using a google account to attack many on this group with the usual curse words that you used to use when not shill posting. Only you have ever come out and named those three together and started crying about them. You screwed up when you did it as Iamnotgeorge2004,,,again. Deal with it, lowlife.

> Also remember that trolls like Twisty often

>post from both sides of the fence just to stir

>things up.

That's Davie, you're taking about,,,,I freeband and have plenty of hammie friends and don't tend to separate the services in the manner that affects your twisted psyche....I enjoy certain aspects of hammie radio and I enjoy cb,,,,you have been trying to say I hate hammies for the longest time,,,LOL,,,I hate no one,,hate is an unhealthy emotion that leads to instability, demonstrated daily by yourself,

>In fact, it has been suggested that the

>infamous forgery of Twisty, allegedly written

>by Leland, was actually written by Twisty

>himself.

>It wouldn't suprise me at all if that was the

>case.

LOL,,it was suggested,,,,,sure it was,,,by yourself....hehehe!
Talking about those conspiracy theories again, Frank, Better watch out, Lelnad will tell you I'm getting little green men after you.

>Anyway, if you ever have any doubts as to

>whether or not I am posting through a sock

>puppet, just ask yourself if you think I have

>ever had any problem expressing my

>opinions, popular or not, under my one and

>only name.

Sure you have, and even admitted it. Lying is a problem, Frank,,,that you choose not to accept it as such, is your problem. Lying is a flaw in your character, for a lie affects the manner in which you communicate to

others.
The rest of the world knows lying is a problem. Recognizing it, is the first step to recovery, whether your twisted psyche and low self-esteem is ready to accept it or not, you have made the first step toward recovery by admitting your lying. Now deal with it, move past it, and you won;t find yourself so hostile and looking to me and concerning yourself with me each waking day.

> I think you will agree that I don't,

No Frank,,only YOU agree that lying is not a problem.

>and that I don't need a sock-puppet to hide

>behind, or to say whatever I want to say.

But you do,,,,and you sock puppet is much closer in line with your past performance and repeated gutter language and lying behavior on this group than anything you frantically type about me in order to justify your actions.

>I didn't mention Twist, and you didn't deny it.

_
>I mentioned Twisty because he was the

>source of the lie.

No Frank,,,you were the source,,I merely pointed it out, Let's look at
it again, shall we? No one has EVER complained about Jay and Toll and
Eitner, collectively coined and fronted off by name and in order in that
manner except YOU. Gawd, I love usenet,,,,,you can't take it back!
Anyway,,,,you goofed and started bashing them again when you were
posting as Iamnotgeorde2004,,I merely pointed it out again, Frank,,,,and
you went off the deep end, once again. But hey, you say what you
want,,,I said my piece,,,the facts are there for anyone who wishes to
see you and only you bashing those three thoughout google history.

> If other people belive him that's their fault, not
>mine.

I ask no one to believe me at anytime,,,ever,,,but here you are begging
for people to believe *you*. You have always cared too much what others
thought about you on soe obscure corner of the
net,,,,lol...anyways,,they can believe google,,,,not you, Frank,

> He preys on gullible and weak-minded people
>for his support.

HHahaha,,,,man,,you are really pizzed again,,,pray tell (hyuk), who have I "preyed" upon , Frank? Hahah,,,this illustrates your disdain for others,,,never mind me,,,,who do you feel is so weak in their mind that they fell prey to my "preying",,,,,,,,,,,,,hahahahah!

>He probably thinks you belong in that category
>or you wouldn't have received any such

>emails.

That's pretty good, Frank,,,,thank God you are here to tell tell mopar how I feel about him after all these years...LOL,,,,mopar knows exactly where I stand with him,,that you claim he is not capable of trusting his own wits illustrates exactly what you think of him, Frank.

> And from a different angle, I can fill up

>someone's mailbox with different names just

>like anyone else can.

You've done that on many occasions.

>If someone makes a claim, ask for proof.

Oh, brother,

> No, don't just ask, -demand- proof.

Lol,,that's a circular argument with you. Demand proof, you attack,,,,lol.

>I guarantee that they don't have any proof

>because I'm not "i am not george".

And after all these years of never posting on weekends, I went out and got an aol account and computer just the other week just to harass you from several diffferent aol ip addresses on the weekends.

_
(You guys should

stop with the Twist stuff.)

>I have several times.

Everyone can see for themself through the years that even on weekends, I occupy your mind, thoughts, behaviors, threads and topics.
You are extremely hostile right now because you have been exposed posting as someone who was attacking mopar in other posts. You panicked and began attacking (who else) myself and your desperation was illustrated in the pathetic attempt at not only attempting to convince mopar that you somehow know how I feel towards another, but at completely undermining Mopar's own ability and good sense, as if he needs you to explain things to him.Don;t go away mad, Frank,,,just get over yo' bad self.

>If you want this "Twist stuff" to stop, go

>complain to the source of the problem --

>Twistedhed.

Riiight,,,mopar just told you he didn;t enter me into the conversation,,,,and I wasn't the topic,,yet YOU entered me into the conversation, and you are trying to sell mopar on the idea it is somehow MY fault that you put me into this topic? LMAO,,,,,that's great...but I don't think he's gonna buy it.

Well, I'll take your word for it Frank, but people are saying you are "i
am not george" in my mailbox.
I didn't mention Twist, and you didn't deny it.

>I mentioned Twisty because he was the

>source of the lie.

You were the source,,I merely pointed it out.
You mentioned me because you HAD to.
You were the source of several lies today,,,you said I hate
hammies,,,,,well, you said to demand proof,,,,,well,,go ahead,,,what
made you menstruate to the point of misterpreting anything I ever posted
to the point where you believe I would label any group based on dealings
with individuals? Oh that's right,,,,demanding proof from you is met
with personal attack,,,that "give me proof" is only for you to
demand,,,LOL.

_
(You guys can't get enough of Twistedhed, you and two others are the
only people who deem it worth your time to re-quote the webtv mess.
You, Dave, and Geo all wait for his next post.)

>On the contrary, Twisty can't get enough of us.

You post about me all the time, Frank. You're a troubled chub,er , man. For years, you have played with yourself to the topic of twistedhed on weekends....google "sucker punch" in here and see how Lelnad pioneered talking about me each and every weekend and how you followed like good disciple should.

> I (and I think I speak for the rest of us)

You can't speak fro anyone, Frank..but you goo right on ahead believing you have this same status that makes Davie and Lelnad so starved and disorderly.

>am

>perfectly willing to shitcan his name to the

>killfile, but he just keeps begging for attention.

google,,,,

>If it were anyone else it wouldn't matter, but t

>he problem is that Twisty is moderately

>intelligent and has a working knowledge of

>logical fallacies.

And THAT, is the reason for this year, that Frank can't control himself around myself. Just a few years ago it was my illegal radio operation on freebad because it "affected" him in his "work". A pattern is emerging here,,,Frank needs a new reason every once in a while to blame his obsessive compulsive disorder.

>This makes him no better than your average

>politician, but still a danger to legitimate

>arguments if left unchecked,

"Legitimate" argument....LOL,,,,endowing yourself with status to the point you believe mopar needs you to tell him how I feel, and now to the point of being the one who decides what criteria merits "legitimate" on this group,,,,,,,no cigar, Gillinad,,,,go take a shower, you speak for yourself, loser.

>especially when the audience (rec.radio.cb) is

>gullible enough to believe in "bird watts" and

>"swang".

I never used the term, but those three you have always attacked under "Sparky" and under Iamnotgeorge2004 probably have a time or two,,otherwise, it wouldn't have made such an impact on your easily impressionable and feeble mind.

Now you did it. You already have him calling you me, in addition to
being race warrior. In fact, he has me matched up to all the aol users
here, posting on weekends. You're cornfusing him with facts.,,but the
call sign of "wa3moj" was put out there to "mess with
twisted",hehhe...,Frrank freely admits such but somehow, continues to
blame me for thse folks actions,,,,,,(sigh),,I guess that is to be
expected, after all, I do illustrate they have no self-control.

Here is your post that explains why you are "satisfied and confident"
in your conclusion:

http://tinyurl.com/2hodj

First off, I don't reference Sean and Toll Free as two different people because Sean -is- Toll Free. Second, I don't think I have ever spelled Eitner's name as "Eitener". Third, "iamnotgeorge2004" makes reference to Dennis #12, a name I have never even heard of unless he means Dennis O.

Yet you, in your unparalleled wisdom, pulled three names from the five names listed, made a very loose association to a few of my posts, then concluded that I must be "iamnotgeorge2004". ROTFLMMFAO!!!

You were 'satisfied and confident' that I was Leland Scott because we both had Supernews in our headers;

You were 'satisfied and confident' that I was Glenn Sparks because his last name was similar to Sparky;

You were 'satisfied and confident' that I was Ben Lee because we both made mention of similar court cases here in WA;

You were 'satisfied and confident' that I was N7VCF because we have the same first and last name and are in the same state.

I am 'satisfied and confident' that you are an idiot.

I might be going to Hazleton the weekend of the 25th
George, this might be "your" chance to say these things to
my face. You going to be a chicken? If I'm going to the
there, you give me a "real" Comcast addy, I'll give you
my cell and where I'm staying. I'll know by the beginning
of next week, I have to by then, shipping the Bronco out
for the event @ PAP.

Well Jim I'll disagree a little. Frank's sh#t stinks
as much as anyone else, it's the arrogant attitude on I know
more than you, no matter what, IMHO.

LMAO!!! Yes, it was all a master plan Mopar,
we planted those hints so you all could think it was
George and not the real culprit..... ROTFLMFAO!!!!
Then why does he jump Mopar every time you mention
WA3MOJ or the name George? I don't see Frank jumping
up & down on obvious BS being posted about him.
Hey, what happened to the supposed attempt by Tim or
Twist on Frank's life? Remember that story?
I mean, there's almost nothing you can believe by these
guys except when they talk tech, then it gets interesting at
least.

I dont know who your talking to fagshark there is no "george" in this
NG but its typical of a transexual lover like you to be trying to hook
up with men. Sorry I am not in PA anyway why not stay home in san
franscisco and shove a garden hose up your ass steveo will be glad to
consult on the correct size.

wrote:

<snip>
>frank i paid you a compliment also.

I was going to give a quick and easy answer, but after thinking about it I figured this is as good a time as any to clear the air with the group. I hope this diatribe prevents any misunderstandings that may occur in the future.....

I know that I'm an arrogant ass, and I know that people don't like me because of it. But I really don't care because this isn't a popularity contest, and I don't have any desire to socialize with semi-literate rednecks who think life revolves around beer, CB radio, porno videos and "professional" wrestling (and no, I don't mean everyone is like that). I'm here to provide tech help for those that want it, clear up some of this CB-mythology, encourage fence-sitters to operate legally, and get a few laughs by prodding Twisty into paranoid tantrums.

No, I wasn't born an arrogant ass -- I worked hard at it. I taught myself electronics when I was a kid (mostly tube stuff because they were cheap -- boy, those were the days!), I had formal training and some radio/electronics experience in the USMC, worked in a commercial radio shop for several years, earned my degree by studying hard, and have worked in the field as an EE for over a decade. I know my stuff, and I have proven that many, many times in this group by chasing off the voodoo-tech-wannabees who used this group as a refuge from other experienced and knowledgable techs and hams in other forums.

I am generally polite to people who are polite to me (with the exception of some regular newsgroup keyclowns, of course). As far as personality is concerned, people must realize that everybody is different and will have different personalities. I couldn't care less if a person is an arrogant ass, a sloppy drunk, or even a flaming homosexual (which is -not- a reference to Landshark -- I don't know his sexual orientation and I really don't want to know). I don't care if they can't spell, or don't understand English very well, or have Tourette's syndrome, or even if they don't have a CB and just want to hang out here. What makes a difference to -me- is if they can think logically and chew gum at the same time. Many people in this group can't. Others don't care to try because it would probably result in mild to moderate psychosis due to the conflict between reality and their half-baked ideals they use as excuses for their behavior (does this sound like anyone we know?).

I don't think I'm such a bad guy -- I just take my RF seriously, my discussions logically, my coffee black and my Tequila straight. If that doesn't sit well with anyone else, that's their problem.

It's not as much a show, as it's a large gathering of Early
Bronco's. It's actually not to bad, some 6 to 8 Bronco owners
are going to ship them back, so costs are fairly reasonable.
My only problem is time off of work, that would be the sticking
point. I'll know by Monday, Tuesday is the deadline for payment
on the car carrier.
The 6th Annual East Coast Bronco Roundup is being held June 25-26,

2004, at Paragon Adventure Park.

LOL!! I did a Mapblast, it's a little over an
hours drive from Allentown, it shows how much
he wants to back up his words.
It's too far for you Mopar, I did the same thing from
your address, 3 1/2 hours plus.

what a moron, he wasn't talking to you. he said comcast, do you use comcast?
having trouble keeping up with the thread? head back over to the gay newsgroups
you brag about reading. geo isn't in PA anyway, he is in NJ, not to far from
you.

well spoken frank and i hope others take note.
as with you the electronics was early then on to the military. using
drum drive computers then makes one appreciate what one is using now.
btw, mezcal is a helluva lot easier than tequila ;)

the AKC rocks, no doubt about it.....kind of like a good 4 watt
radio........it has good audio and makes texas city suck even more
than it already does.........AKC4L..........what ya goin to do timmie
when the AKC, sw chapter puts the dead key on ya.............rogo?????

Never liked him but his anticommunist policy worked. He set the policy for peace by outspending the CCCP into submission. It worked but he put this nation into an inflationary period. Love him or hate him he will go down in history as the man who defeated communism.

Along with Al Gore (invented the internet) ;)
Seriously, I liked Regan, voted for him and think it was a
great loss for the world when he was diagnosed with
Alzheimer's.

Look back at past posts I've made about Frank.
I've said a dozen or more times, that when Frank talks
about CB radio, I usually don't disagree, as with his
political views, again I usually don't disagree.
But when I have disagreed, it usually will end up with
him throwing out some sort of insult, instead of just
disagreeing.
Look at the posts that Dave & I had, were there insults

thrown out? No! Did we agree on most of what we talked
about? Yes! Did we disagree about some things? Yes!
But it did not end with insults being thrown at each other.
I saw his post in a response and this seemed pretty
poignant:

"But I really don't care because this isn't a popularity
contest, and I don't have any desire to socialize with semi-literate
rednecks who think life revolves around beer, CB radio, porno videos
and "professional" wrestling (and no, I don't mean everyone is like
that)."

What's your IQ Jim? I know what mine is and guess what?
It's a lot higher than Frank seems to think mine and I'm sure
a lot of others. Mopar is an owner of his own business with
multiple employees, I think he's got some smarts. I've talked
with you lot's of times, I wouldn't think of you as "redneck".
The truth is, he says he an EE, by what he's said here I
would believe it, but his broad statement above makes no sense
if he is as smart as he says.
He knows no more about my education any more than I his
or for that fact anyone's else's on this board, so my point is
that just because someone types something that either you don't
like or makes no sense to you, doesn't mean that they are a

"semi-literate rednecks who think life revolves around beer, CB radio, porno
videos and "professional" wrestling"

As he said:
"I don't think I'm such a bad guy -- I just take my RF seriously, my
discussions logically, my coffee black and my Tequila straight. If
that doesn't sit well with anyone else, that's their problem."

If that is true, I'd bet he would have a great time with I and Mopar
and a couple of others here.
I don't take my RF seriously, It's not my line of work. I do take
my work seriously, my coffee from his state sponsor (Starbucks),
my Tequila is Petron, but I usually drink beer, not hard liquor.

See below.

> Look at the posts that Dave & I had, were there insults
>thrown out? No! Did we agree on most of what we talked
>about? Yes! Did we disagree about some things? Yes!
>But it did not end with insults being thrown at each other.

>"But I really don't care because this isn't a popularity
>contest, and I don't have any desire to socialize with semi-literate
>rednecks who think life revolves around beer, CB radio, porno videos
>and "professional" wrestling (and no, I don't mean everyone is like
>that)."

Notice the last line -- particularly the part in parentheses: "I don't
mean everyone is like that". Now read your response:

> What's your IQ Jim? I know what mine is and guess what?
>It's a lot higher than Frank seems to think mine and I'm sure
>a lot of others. Mopar is an owner of his own business with
>multiple employees, I think he's got some smarts. I've talked
>with you lot's of times, I wouldn't think of you as "redneck".
>The truth is, he says he an EE, by what he's said here I
>would believe it, but his broad statement above makes no sense
>if he is as smart as he says.

And you wonder why I will sometimes respond with an insult. Well,
Shark, it's because sometimes you (and others) read only what you want
to read and skip the rest even if it's relevant. I do the same thing
myself on occasion, but the difference is that when my mistake is
brought to my attention I will accept the fault and apologize
(assuming I don't catch it myself and correct it before anyone
responds). OTOH, you don't correct your mistakes -- you just whine
about me making insults.

And if you want examples of both I am perfectly willing to swim
through google and find some.

> He knows no more about my education any more than I his
>or for that fact anyone's else's on this board,....

I know nothing of your education, Shark. You could have a Ph.D. or be
a third-grade dropout, I don't know and I don't care. But when you
start crying about posts that you don't even fully comprehend or that
you read with your own interpretation, I tend to lean in the direction
of 'third-grade dropout'.

>.... so my point is
>that just because someone types something that either you don't
>like or makes no sense to you, doesn't mean that they are a
>"semi-literate rednecks who think life revolves around beer, CB radio, porno
>videos and "professional" wrestling"

I'll invoke creative license on the description, but my point should
be obvious.

>As he said:
>"I don't think I'm such a bad guy -- I just take my RF seriously, my
>discussions logically, my coffee black and my Tequila straight. If
>that doesn't sit well with anyone else, that's their problem."
>
>If that is true, I'd bet he would have a great time with I and Mopar
>and a couple of others here.

It might just happen, but only if you can agree that the merits and
personal satisfaction of operating legally outweighs the fleeting rush
of being a 'bad-boy on the band'.

> I don't take my RF seriously, It's not my line of work. I do take
>my work seriously,

See? We -do- have something in common!

> my coffee from his state sponsor (Starbucks),

Yuppie-juice.

>my Tequila is Petron,

Never heard of it. The name sounds like an oil company.

> but I usually drink beer, not hard liquor.

Beer. Interesting fluid. Looks like piss, smells like piss, ends up as
piss. What's next -- soylent green?

No flames or insults intended, but who do you think was -really- in
charge those 8 years -- a hollywood actor with Alzheimers that was
once the spokesperson for a huge power company (GE)? or a Texas oil
baron and former head of the CIA?

Yea, you're right.....I shouldn't have mentioned it here.
most CB's don't care about that stuff.....suffice to say
even understand how transmitting the signal thru powerlines
causes the illegal and malicious interference.
you and i both know that Big corporations with Big money
and Big lawyers get anything they want.

Gave it up in 1976.

Kind of a bizarre movie though, makes you wonder what's
in a Granola bar :)

She's a hell'uva woman (Nancy Regan). It must have
been hard to still love someone that didn't even remember
you or the life that you led with him.

I guess your right Mopar. I think Frank's post was a kind
of "this what I am" that's fine, I can accept that, but can he
accept that we are what we are?
If this is some sort of olive branch, I and I hope others can
accept that from him too.

Ugh, makes me shudder ((((((((((

Landshark

--
Most true happiness comes
from one's inner life, from the
disposition of the mind and soul.
Admittedly, a good inner life is
hard to achieve, especially in
these trying times. It takes
reflection and contemplation
and self-discipline.

Possibly, but doubtful. He had orderd advisors, when they were
attacked he ordered limited troops to protect them. Before he
was assasinated, he had started to make plans to withdrawl
them.

Source record: 183109

This is one of the last ones made.....very, very good condition. No damage, finish is excellent with no wear marks etc. I used it with the Gold Faced Kenwood 599D twins. This one is a solid 9.8 on the scale of 1 to 10. Photo URL below.

$160 shipped to CONUS

Photos here..... www.members.aol.com/mgaluvr/astaticgoldeneagle.jpg

Because of the highly reflective nature of the 18K gold plated finish on this mike the photos appear to show some inconsistency in the mike finish. The photos are just picking up some room reflections from the camera flash, the actual surface of the mike is uniform and near perfect, no mars, scratches, etc.

disagree. maybe he was not the greatest president but his work with
habitat for humanity is exemplary. his work in verifying correct voting
procedures in foreign countries shows his commitment to democracy.
he had his presidential problems but he more than makes up for it in his
later life.
also remember his cancer research fund raising work.
not a great fan of his but your statement of 'a total waste of life' is
not warranted.

Please try and remember where a lot of those terrorists of 911 came from.
Try and think where a lot of support for terrorism has come from in the
past. I'll give you two hints:
1) It was not Iraq.
2) The country is the most important source of our oil.

Much safer to hit a small country that can't hurt you much, yet give you a
good military record (since we can't even seem to find out how many *days*
pay Bush received during his 'alleged' service). Unfortunately, it isn't
going quite as smoothly as Bush apparently had imagined. Regardless, most
of the well connected folks, both Democrats and Republicans, had ways to
avoid the military during the draft.

As to WWII, go read your history books.

As to Vietnam, I agree.

The Kennedys have a most interesting track record, most of it not
particularly good.

As to Florida, it helps when your brother is governor. Regardless, Bush had
less of the popular vote. Lovely system.

We'll just wait and see what happens long term to our economy. Mr. Bush has
dug a *very* deep pit of debt. Make $1,000,000.00 in stocks and you only
pay 15%
Make $50,000.00 per year and you'll wish you only paid 15%.
We aren't going to balance the budget with more tax cuts for the wealthy and
tax increases on the poor. I note that SUVs and trucks are big sellers.
With the oil producers starting to reach maximum capacity limits, it is
going to be interesting where we are heading. Not.

While everyone seems preoccupied with military records, war, and
prescription drugs, methinks it might be a good idea to take a look how deep
this debt is getting. While cutting taxes, there seems to be more corporate
welfare than ever, even as we allow people to become homeless. It doesn't
make much sense to me, but probably makes a *lot* of sense for the folks in
power. Those corporations contribute heavily to re-election campaigns.

Best regards from Rochester, NY
Jim

I agree with Jim. I also point out his hard-line policy when the USSR
invaded Afghanistan -- he announced that any further advance would be
considered an act of war against the US. That took some serious balls!

The war with Iraq was about oil, not terror. It was fought under the
illusion that Saddam's WMDs might be used by terrorists. He probably
did have chemical and biological weapons, but so does most every other
nation, including the US. I'm sure the CIA probably knows where those
weapons are now but can't touch them without starting WWIII.

Nope. Never have, never will. I thought I would try it once about ten
years ago. Installing the software ripped apart my browser and patched
some system DLLs so I couldn't log onto my regular ISP -- even after
it was uninstalled. Had to reformat the HD to fully get rid of it.
Never again.

This group is still the same old sh!t. While you dumba$$es bicker and fight like married couples, I'm talking on my radios, CB, MURS and ham, playing with IRLP linked repeaters, and a bit of Echolink, to all my old radio friends and the new ones, too. Even found a few of the old CB voices on 2 meters.

Anyway, while preparing an audio copy of This Week In Amateur Radio, www.twiar.org, they had a random thought that I thought was funny as hell and I had to share it with you. Look for it under "Buckeye Bullet".

http://www.geocities.com/scott_unit_69/

It's 7 minutes and change and it's 417K. You may want to listen to the whole report, and check the mailbag for "1000 Marbles" in Report #582. You may never feel the need to bicker again...

I have NEVER seen any version of a domestic Cobra CB radio with a
factory installed roger beep, and that includes the 29 LTD.

> does your question apply to the legality of the beeps on frs radios?
>or on 2 meter repeaters? they are just for amusement?

There is no legitimate need for an "end of transmission tone" on FRS
either. I find them to be extremely annoying. But evidently they seem
to be legal. On the other hand, the FCC specifically calls out that
devices used to scramble or otherwise disguise your transmissions are
illegal, yet there are FRS radios which come with voice scramblers.
Some manufacturers push the legal limits hoping that they won't get
their hands slapped. Sometimes they are successful.

> your statement makes as
>much sense as saying you can't use a cb radio for anchor because the FCC
>doesn't say you can. so you have nothing to stand on when you make the claim
>that roger beeps are illegal.

Except what I read 20 years ago which included them in with other
noise maker devices which are designed strictly for amusement.
Granted, I guess I'm on the hook to find some sort of "proof", but
that will be a tough call due to the amount of time which has elapsed.

I guess a correspondence with the FCC might settle the issue once and
for all.

Hello Davie. Now that you have demonstrated such overt concern for another's state of personal being illustrating the off-topic preferences you prefer, go on and expound on how I profoundly do not affect you. What do you know about replacing gaskets on the bottom end of two cycle Evinrudes? I prefer IB Diesel and Merc to Evinrude.

itoldyouiamnotiamnotgeorge@yahoo.comm (itoldyouiamnotiamnotgeorge) wrote:
>Liberals claim President Bush shouldn't have

>started this war.

The term "liberal" has been intentionally misappropriated by the Bush admin to encompass all who dare disagree with them and sheopled minions like yourself are the gullibles they prey upon.

>They complain about his prosecution of it.

This forwarded chain email you received and posted is quite vague and inaccurate,,,,,to wit:

>One liberal recently claimed Bush was the

>worst president in U.S. history. Let's clear up

>one point:

Beginning with the most pertinent: this "one" liberal you speak of apparently carried enough weight to spur you into posting unoriginal and thoughts and this much duplicated post that was forwarded to your inbox. Couple this with the troubling notion that because he opposed the Bush admin by daring to exercise an American birthright such as speaking his mind and claiming Bush is the worst president, he was labeled a "liberal" by suckers like yourself.

>We didn't start the war on terror.

It's not a war on terror,,this is another war on intangibles that only the right appears able to define....they will lose it just as their last war on intangibles,,,their lost war on drugs. Bush arrogantly said he will rid the earth of terror,,,a ludicrous statement bordering on grandiose delusions for the obvious reason.

If the war was truly about terror, when do we invade China, N Korea, Malaysia, Singapore, Ireland, S America, Phillipines, The Sudan, Chad, Syria,,,,,the list goes on to include more countries than you can possibly name. Many countries have leaders juts as bad, or worse than Hussein,,,,that he was a bad gut is of no question, but Bush has maneuvered to present that as his only reason for this war, failing to find the WMDS, concerning which Cheny told us, "We know he has them, we know where they are".

>Try to remember, it was started by terrorists

>BEFORE 9/11.

Yes,,the mideast Arab conflict goes back to the sons of Abraham, Isaac and Ishmael. Yet, Bush did nothing prior to 9-11, even though you readily admit this was well underway...just like N Korea,,Bush was informed over a year ago about Little Kim in N Korea about to restart his reactors, yet, Bush did nothing and now they will have completed their third (estimated by the US government :Bush administration) nuke by this Christmas and N Korea was specifically named by Bush as part of his "axis of evil" which is rapidly, as predicted, becoming his "plethora of problems". Bush did manage one thing successfully, he handed Bin Laden his stated objective on a silver platter. What's that? You forget what Bin Laden's STATED GOAL was? Why, it was to "to draw the United States into the Arab conflict".

>Let's look at the "worst" president and

>mismanagement claims.

Why not? You not only invoke four or five presidents as the "worst" and refer to them as one, but the gist of the matter is understood that anytime the discussion is of Bush and his failures, obfuscation must be attained at all costs to divert subject, and invocation of another is always a great place for you to point your blame.

>FDR led us into World War II. Germany never

>attacked us: Japan did.

Who claimed Germany attacked us? What's that? No one? Ahh,,I see,,check it out..Iraq never attacked us..the terrorist were all of Saudi descent exceopt for three.

>From 1941-1945, 450,000 lives were lost, an

>average of 112,500 per year.

Lost lives are lost lives, the invocation of such numbers are a desperate attempt by the Bush regime to downplay the lives that are being lost each day. Spew those stats to the families of those killed and see if it makes a diffference, you will find, it doesn't.

>Truman finished that war and started one in

>Korea, North Korea never attacked us.

Neither did Iraq,,,,and let me save you the easily defeated and tired argument that Iraq was "linked to Al Queda",,,as Al Queda supporters and in many cases, terrorist training camps can be found in just about every other country, as well, and called a "link".

>From

>1950-1953, 55,000 lives were lost, an average
>of 18,333 per year.

As long as big numbers are tossed, the desperate hope is the number of Americans lives lost in Iraq won't seem so bad, by comparison,,the proof is in the pudding,,those numbers you presented were done so in a specific attempt of "comparison". Check what you were comparing those numbers to and again, direct your questions and stats to the families of those dead by the Bush invasion of Iraq and see if it makes one iota of difference.....it doesn't.

>John F. Kennedy started the Vietnam conflict

>in 1962. Vietnam never attacked us.

Neither did Iraq.

>Johnson turned Vietnam into a quagmire.

Bush turned Iraq into a quagmire, despite Powell's much repeated warning of just that prior to the Bush regime's invasion.

>From 1965-1975, 58,000 lives were lost,

>an average of 5,800 per year.

Comparison's again invoked as desperate attempt to somehow show the lives lost in Iraq are somehow more acceptable and to be condoned and accepted.

>Clinton went to war in Bosnia without UN or

>French consent, Bosnia never

>attacked us.

Neither did Iraq. And in addition, Bush slammed Clinton for his "failure to define a clear exit strategy" when he went in to Kosovo.
Pot, kettle, black.,,hypocrite galore is the Bush-lite man.

>He was offered Osama bin Laden's head on a

>platter three times by Sudan and did nothing.

Bush had his chances,, as did his father BEFORE Clinton was president,,if you need schooled on the particulars, I will be more than happy to provide them.

>Osama has attacked us on multiple occasions.

Yes,,,and despite Bush' promise that he would "not rest intil he is brought to justice' and that he would remain Bush' "number one priority", the president has not only failed in capturing him, but fooled legions of his sheople by effectively morphing BL into Hussein. Now, occupying Bin Laden has taken a back seat to his fundraising and mudslinging campaign that he initated in the media.

>In the two years since terrorists attacked us,

>President Bush has liberated two countries,

Wrong,,,if you need the exact particulars on this, I will quote the Bush admin that admitted that Afghanistan is back in the hands of war lords..in fact, it is worse now than it was before the Americans came to Afghanistan You should really pay attention to this admin that you blindly defend so as not to make such errors in the future by regurgitation of false propaganda.

>crushed the Taliban, crippled al-Qaida,

Crippled Al Queda? Just the opposite,,they are stronger now than ever. Bush is the poster child for their recruiting. Never before has the Muslim community world-wide gained such sympathy. If Al Queda was cripppled, we wouldnt be under such terror alerts that we never experienced in the past. The mere fact that the alerts are more frequent is prrof positive that we are under more danger and threat from them than at any other time in history. If they were "crippled", and Hussein was removed, which WAS the latest stated objective, kindly explain why we are still there and our soldiers are dying each day by terrorist attacks.

>put

>nuclear inspectors in Lybia, Iran and North

>Korea without firing a shot,

Thanks for illustratting the complete failure of the Bush admin concerning N Korea.

>and captured a terrorist who slaughtered

>300,000 of his own people.

With Botulin and Mustard gas given to Hussein by the US,,there is a picture of Rumsfeld shaking Hussein's hand solidifying the chemical gas deal...do you need to see that, too? I'll be more than happy to provide the complete text and pic from the mass media when the deal went down.

>We lost 600 soldiers.

And how many did you say died as direct
result of
that gas the repubs gave him?

>Bush did all this abroad

>while not allowing another terrorist attack at

>home.

Bush can invoke a terrorist alert a weekend every sixty days or so and when nothing happens, he can say, "Lookie, I protected you.",,Well, golly gee, under that illogic, one can say Clinton did a much better job protecting us, as we were never under such domestic terror alerts for domestic terror attacks when he was in office. Now, since you are so opt to present numbers when figuratively manipulating such to bolster your political position, allow equall time: What number of Americans died by domestic terrorist attacks while Bush was in office and what number died while Clinton was in office? Suddenly, your presentation ofstats and figures doesn't pan in your favor.

>Worst president in history? Come on!

Yes,,,worst president in history.

>The Democrats are complaining about how

>long the war is taking, but...

The Bush admin takes collective aim at libs, demos, anyone that doesn't agree and anyone who hasn't joined them. Bush has yet to define a clear exit strategy. The right doesn't want to be reminded of the Bush claims prior to invasion that the "war" was to be quick with "awe", not an undefined and prolonged occupation.

>It took less time to take Iraq than it took Janet

>Reno to take the Branch Davidian compound.

>That was a 51 day operation.

Yet, Waco was completed...the objective in Iraq, has not been completed..nor has the one in capturing Bin Laden, which, we were told, was to be the Bush number one agenda.... Remember WMDS? FIRST it was about "lierating the Iraqis", and we didn't buy that,,so Bush then said it was about WMDS....when none were found, it became about removing Hussein AND a search for a WMDS "Program".
  Bush directed his staff to add the term "program" in August of 2003 when he learned his intelligence was seriously compromised concerning WMDS in Iraq. The adding and inclusion of the term "program" allowed the admin to save a bit of face with the sheopled minions, as a weapons program is much easier to find than WMDS,,as ALL countries have a "weapons program".
Bush, when questioned about the inclusion of the term "program" on national television, angrily shouted "What's the difference"...indeed,,why was such a term directed and implemented by the admin to their staff in memos in 2003 if there is "no difference". What's the difference?

>We've been looking for evidence of chemical

>weapons in Iraq for less time

>than it took Hillary Clinton to find the Rose

>Law Firm billing records.

Lest you forget,,,,the search for WMDS was a failure. Invocation of Clinton as attempted obfuscation of Bush wrongs illustrates the desperation of the Bush camp.

>It took less time for the 3rd Infantry Division

>and the Marines to destroy the Medina

>Republican Guard than it took Teddy Kennedy
>to call the police after his Oldsmobile sank at

>chappaquiddick.

Yea,,thats because the lie that Bush told. He told (read: lied) the country that satellites showed a buildup of several hundred thousand troops on the Iraqi border poised to invade their neighboring country was a hoax,,,one that was debunked by the St. Petersbug Times, who won a pulitzer for purchasing their own extremely expensive satellite photos showing nothing,,nada,,,zip,,not a single troop or tank on the border. As usual, Bush claimed his incompetent,"faulty intelligence". The lie that he had satellites showing such a massive buildup of troops in Iraq was what he used to justify such a large invasion.

>It took less time to take Iraq than it took to

>count the votes in Florida!!!!

That's only because the republicans and Katherine Harris became involved and violated the Florida State Constitution and invalidated an entire county of voters,,,,,the county that awarded Gore the national presidential election. Bush failed to carry the popular vote of the people of the United States. End of story.

Message-ID: <1L7xc.25320$Tn6.4900@newsread1.news.pas.earthlink.net>
Source record: 183133

I have a Uniden PC122 in a '92 Nissan Sentra. When the electric fans kick on, there is enough noise to cover up the low signals. I have tried running power from the fuse box and the battery. The power ground is only a foot long or so. The chassis is grounded next to the radio. The antenna is on the trunk and has an SWR of 1.05:1 on channel 28 and isn't higher than 1.2:1 on any channel. Transmit and receive are what they should be other than the noise. I'm thinking I should try capacitors in the fan motor?

Hey LS, I'm still having fun on CB. I just have more choices and more folks to talk to now. Got to listen to the drivers while I stewed in traffic for over
an hour because a trash truck dumped it's load from an overpass onto the highway below. I think all the Baltimorons should file a class-action suit against the driver and trash company so we can all get about $30 for our gas and aggravation. Check our local news:

I've got one fan with caps across the motor, a toroid inductor AND quite
a few wraps around a snap together ferrite core. This was good for CB
and 800 MHz. It's still damn strong on 146 MHz and 446 Mhz.

328. FS: Astatic Golden Eagle - Excellent condition

Newsgroup: rec.radio.cb

Golden Eagle Amplified power mike.....

This is one of the last ones made.....very, very good condition. No damage, finish is excellent with no wear marks etc. I used it with the Gold Faced Kenwood 599D twins and the audio was beautiful. . This one is a solid 9.8 on the scale of 1 to 10.
Photo URL below.

$160 shipped to CONUS -

www.members.aol.com/mgaluvr/astaticgoldeneagle.jpg

Because of the highly reflective nature of the 18K gold plated finish on this mike the photos appear to show some inconsistency in the mike finish. The photos are just picking up some room reflections from the camera flash, the actual surface of the mike is uniform and near perfect, no mars, scratches, etc.

What did it rub against to make those micro-scratches and what are those rings around the screws on the head? It looks like a different head was put on that body as the body looks clean and the head is not.

Must have been wiped with paper towels. Damn scratchy paper.

    the ng has been dumb'd down steve. its surprising no one
jacks the spammers here.
jay and jim upstate usually have something to contribute technically but
wisely bail when the crap starts flying. frank is another but has a sh*t
dont stink attitude. could you tell me who are george, leland and doug.
it seems without them braying it is quite quiet here.

–
 (Well Jim I'll disagree
a little. Frank's sh#t stinks as much as anyone else, it's the arrogant
attitude on I know more than you, no matter what, IMHO.
          Landshark)

–
(maybe so shark but he does post relevant info concerning the hobby. you
have
to admit its better than the flames.)

–
Frank is damn near the top of the group with flames, in addition to
Geogre and Lelnad, mostrecently joined by N3CVJ, the hypocrite Hall.

–

                Look back at past posts
I've made
about Frank. I've said a dozen or more times, that when Frank talks
about CB radio, I usually don't disagree, as with his political views,
again I usually don't disagree. But when I have disagreed, it usually
will end up with him throwing out some sort of insult, instead of just
disagreeing.
See below.
        Look at the posts that Dave & I had, were there
insults thrown out? No! Did we agree on most of what we talked about?
Yes! Did we disagree about some things? Yes! But it did not end with
insults being thrown at each other.
        I saw his post in a response and this seemed

pretty poignant:

>"But I really don't care because this isn't a

>popularity contest, and I don't have any desire

>to socialize with semi-literate rednecks who

>think life revolves around beer, CB radio,

>porno videos and "professional" wrestling (and
>no, I don't mean everyone is like that)."

_
>Notice the last line -- particularly the part in

>parentheses: "I don't mean everyone is like

>that". Now read your response:

(What's your IQ Jim? I know what mine is and guess
what? It's a lot higher than Frank seems to think mine and I'm sure a
lot of others. Mopar is an owner of his own business with multiple
employees, I think he's got some smarts. I've talked with you lot's of
times, I wouldn't think of you as "redneck". The truth is, he says he an
EE, by what he's said here I would believe it, but his broad statement
above makes no sense if he is as smart as he says.)

_
>And you wonder why I will sometimes respond
>with an insult.

He didn't wonder that at all. In fact, no one wondered that at all, He
pointed out your attitude sucks. Everyone knows why you respond with
insult,,,you have problems communicating effectively and a problematic
low self-esteem that effects your psyche.

>Well, Shark, it's because sometimes you (and

>others) read only what you want to read and

>skip the rest even if it's relevant.

LOL..note how Gillinad again blames others for his responding with
insult..he claims he responds with insult because of what others
do..LMAO.
Of course everyone skips what they feel is not relevant. Again, here you
present yourself as one who decides for others what is relevant and what
isn't...and use it as an excuse for your behavior comprised of insult.

>I do the same thing myself on occasion, but

Of course you do the same thing,,"but".. the difference is, taa-daa:
You're a hypocrite.

>the difference is that when my mistake is

>brought to my attention I will accept the fault

>and apologize (assuming I don't catch it

>myself and correct it before anyone responds).

Wrong,,you insult when it is pointed out that you have been wrong, especially with your technical mistakes, which makes you go wild with incoherency and off-topic personal rants, and no I'm not talking about myself, I'm speaking of a host of people that have corrected you in your incorrect theories that don't work when put to real life applications.

>OTOH, you don't correct your mistakes -- you

>just whine about me making insults.

The truth has always pained you. If pointing out your insultive demeanor pains you so to the point of misnterpreting those who illustrate your manic depressive actions as "whining", the remedy is quite easy,,stop insulting,,as usual, you cry about your own inner problems and somehow blame others for pointing it out.

>And if you want examples of both I am

>perfectly willing to swim through google and

>find some.

Go ahead,,,,swim in google excrement and find some of those times you apologized,,,then I'll do the same and find many more where you were blatantly wrong and either attacked the person correcting you in a personal manner in attempts to redirect the topic from one of your ignorance and technical incompetence to one of the person that corrected you, absent of any apology whatsoever. .

 (He knows no more about my education any more than I
his or for that fact anyone's else's on this board,....)

>I know nothing of your education, Shark. You

>could have a Ph.D. or be a third-grade

>dropout, I don't know and I don't care.

"But",,you DO care, as you make such comments relating to such,,,posting about things you profess not to care about illustrates yet another problem of yours.
It's not anyone elses fault when they can't comprehend you, Frank,,,,you're not the most effective communicator,,you haev a myriad of problems lending to your inability to follow a thread and an incredible low self-esteem which reduced you to insulting others. And your interpretations are in the minority, it's why only yourself, Lelnad, N8, and Geogre use the term "AKC" when relating to radio.

>I tend to lean in the direction of 'third-grade

>dropout'.

Yes, that much is quite obvious, as that mentality is apparent in the majority of your posts, sans the ones with no insult.

(... so my point is
that just because someone types something that either you don't like or makes no sense to you, doesn't mean that they are a "semi-literate rednecks who think life revolves around beer, CB radio, porno videos and "professional" wrestling")

>I'll invoke creative license on the description,

>but my point should be obvious.

Creative license? LMAO,,how much "creative license" latitude could one possibly have in the field of electronics when adhering to scientific laws? Not much, if any.
Nevertheless, your "point" IS obvious, as shark illustrated it quite perfectly.

>I don't think I'm such a bad guy --

Inability to see yourself as the masses and moral majority.

>I just take

>my RF seriously, my discussions logically,

Your logic has been defeated by many more competent techs than the manner in whcih you hold yourself.

> my

>coffee black and my Tequila straight. If that

>doesn't sit well with anyone else, that's their

>problem."

No,,it;s YOUR problem, because as with shark, as soon as you are told your behavior is unbecoming, you escalate your attacks, like a child that has problems communicating effectively,,they throw tantrums and blame others for their insecurities and shortcomings, just like you, Frank,

(If that is true, I'd bet he would have a great time with I and Mopar and a couple of others here.)

>It might just happen, but only if you can agree

>that the merits and personal satisfaction of

>operating legally outweighs the fleeting rush of
>being a 'bad-boy on the band'.

Hehehe,,,you can play with others only if you can convince them to see it your way and adhere to your rules,,,,,,,,hahhaaha,,,,,take your ball and go home, mad boy.

(I don't take my RF seriously, It's not my line of
work. I do take my work seriously,
See? We -do- have something in common!
my coffee from his state sponsor (Starbucks),)

>Yuppie-juice.

Labeling all that you don't understand has always been a bane of your
existence.

(my Tequila is Petron,)

>Never heard of it. The name sounds like an oil
>company.

(but I usually drink beer, not hard liquor.)

>Beer. Interesting fluid. Looks like piss, smells

>like piss, ends up as piss. What's next --

>soylent green?

No,,,...more like little green men hijacking your thought
process...again...
At least we understand the catalyst for your rabid undeserved responses
in addition to your lack of self-control of your own emotions:
alcohol.,,,but then again, you were pegged as an alcoholic years ago
when you said you "didn't drink anymore" and went as far to give the
reasons, as if any were interested in more of your personal
woes,,,lol,,,appears the alcoholic fell off the wagon. I hear they do
wonderful things at AA,,,it's not too late to gain a life instead of
attacking everyone elses and blaming them for your misery and failures
in life.

This group is still the same old sh!t. While you dumba$$es bicker and fight like married couples, I'm talking on my radios, CB, MURS and ham, playing with IRLP linked repeaters, and a bit of Echolink, to all my old radio friends and the new ones, too. Even found a few of the old CB voices on 2 meters.
Anyway, while preparing an audio copy of This Week In Amateur Radio, www.twiar.org, they had a random thought that I thought was funny as hell and I had to share it with you. Look for it under "Buckeye Bullet".
http://www.geocities.com/scott_unit_69/
It's 7 minutes and change and it's 417K. You may want to listen to the whole report, and check the mailbag for "1000 Marbles" in Report #582.
You may never feel the need to bicker again...

–

Waving a hand to the north land. Stone Crab tournament just ended with one of the most successful bags we ever had. Giant red snapper are being taken on ledges in fifty foot of water and deeper. Sailfish and gags are being caught in depths of 150 foot like there is no tomorrow. Some really new interesting tiny, handheld powerful VHF radios are making the market, also. Have a good one up there.

LOL,,yea..you've always "been there and done that" so much better than
others,,,,such illustrates your disdain fro freebanding and amp
usage,,,,you did it,,,but anyone else that does what you did, is a
"criminal",,,but somehow,,,,when you do it, you aren't a "federal
lawbreaker" with no respect for the rights of "society",,,LOL.

> there just isn't THAT much money to be

>made,

Look, just because you and your partner whom you referred to as a "sex
fiend" failed to make it a succesful business endeavor doesn't mean
others share your incompetence. There are many radio shops around the
country that are successful as full time businesses that make it, with a
healthy profit to boot..

> if you at least want retain enough dignity to

>look at yourself in the mirror the next day.

Something for which you continue to strive, but somehow, just can't
attain.

>CB radio repair is nickel and dime stuff. It's

>hard to justify paying a $59 repair bill for a

>radio that could be replaced for $79.

Only to those who couldn't do such properly. Your failed business
illustrates your lack of a successful business plan required to make
such an endeavor a success.

>It was great for some spare cash, but I'd never
>make a living from it.....

And since YOU couldn't make a living off it, you incorrectly feel others are unable..LOL. No dice. The majority of people are more adept at communicating effectively with others than yourself, and such a trait is necessary when dealing with the public. Perhaps it is why you failed.

A competent tech IS worth his weight in gold. If a quality tech were to open a radio shop here on the suncoast, and offer fair prices, he or she would be living in paradise and making a great living doing what he/she enjoyed. Since AES closed their doors, our closest shop is in the next county.

Hope someone can help on this topic. Quite a while back (over 6 mos.)
I read in this group about a gentleman who lived in S. Cal, Barstow,
Bakersfield, or somewhere like that, that would take a Penetrator base
antenna and modify it. He had a web site but I have done some searches
to no avail.Does anybody remember this man? Or at the least, does
anyone know where I might get some parts for the antenna?
I need the plastic bushings(standoffs ?) on the mast, the ones
holding the mast away from the mount and ground radials.
Thanks in advance to any of you that may have some info.

isn't higher than 1.2:1 on

Is your antenna mag-mount or proper mount? Trunk hinges are not good RF
grounds. Get some braid
and connect the sides of the hinge together. Just drill a hole and mount it
right if you're mag-mount.

Our local node is 4234. I'll be out tonight for a few hours around 8 to 10
PM EDT.
I'll have the two meter on scan while the CB sideband net is going on. Don't
worry
that the node says it's 440. It's linked to 146.895. If you don't know my
call, I can
email it to you.

Pay attention for your sanity's sake. If I wanted you to do something,
I would have brought up the subject, not you. If *I* wanted you to do
anything, quite Frankly, you would have done it ,,you see, I have that
type of control over yourself at your insistence.

>Shall I pick it out of thin air?

Of course,,,you aren't expected to change your obsessive tactics now.

>or do you want me

Pay attention...I *have* everything I want and if you didn't suffer from
character flaws and communication deficits you would have caught that
the first time. I look to you for nothing except entertainment derived
from watching you spaz.

>to come up with one based on ridiculous

>associations and unlikely coincidences?

I don't want you to do anything that you can't comprehend, as it always
ends up with you cornfused, cursing and ranting on about twist this and
twist that, resulting in more of your lost self-control and illustration
of your low self-esteem.

>But you are avoiding the issue, Twist. It's not

>about me, it's about your own lack of

>comprehension when you accuse me of being

>somebody else based on weak associations

>and random conincidences.

No, mindless, that was never the topic,,such is *your* topic, subsequent only to *your* incompetence and obsession concern and acusations concerning *my* identity. You're all pizzed off and frustrated again and making me your topic again,,,,,LOL,,,

For example, take a few of your favorite words and phrases, put them through the google-grinder, and only one name keeps popping up in almost all instances -- Leonard H. Anderson. "Coincidence? I think not!"
Now go ahead and attack the logic of this conclusion, and when you are through I'll have -your- words to use against -your- allegations. LOL!
Check the thread, oh disciple of mine, as the post you were replying of mine mentioned nothing about your identity. You're off-topic and having Twisted convulsions again.

_
Hehe,,someone
got ya' on remote control and done tossed the switch to auto-pilot.......get a life, Frankie,no matter how much you cry on this group about me this and me that, no one but you and Lelnad gives a damn...

>And that's why you invoke our names on a

>regular basis. Uh-huh.

You were already told by a casual observer that you can't get over yourself and concern yourself with myself along with Davie-son each and everytime you log on..of course, none expect you to believe it, as you have proven yourself unfit and unable to see yourself as the masses do.

_
.oh, at times Geogre does, but he's more interested in swearing and getting past shark's killfile and obsessing on Steve, much in the manner you obsess on myself.

>....now wait a second.... didn't you just get

>done whining about how "George" and I were

>the same person?

No, I never said anything of the sort. I said you were posting as "Iamnotgeorge2004@yahoo.com" and you have done your best to claim that I said you were George, but as usual, your best simpl isn;t good enough. The group is much more intelligent than you give them credit for, hence your intense campaign at trying to place words in other's mouths.

_
Why, hell, if mopar and I were to suddenly disappear, you would have to convince Geogre to join you in your random, off-the-wall and offtopic attacks in the form of outbursts about Jay or Toll. Of course, you'd curse Randy and Tim more often, also, with those four letter words you

like to toss around as insult.

>Which four letter words are those, Twist?

Retainment is a skill that comes only when one has achieved effective communication.

>....<yawn>

LOL,,yes,,,one can see how bored you must be to go out of your way with such obsessive behaviors. Gain some insight and you won't need to look to others for personal enlightenment.

>SOBR.

You forgot the "e"between the "b" and the "r", but somehow, it won't last,,,you display the classic obsessive dwelling signs of an alcoholic, in addition to the self-contradictions (I don't drink anymore,,,,but of course, this was more than likely said suffering a DT episode) and the self-wrapped behavior of presenting to this group your reasons for no longer drinking as if someone actually cared of your self-created woes is indicative of a plethora of character flaws and personal failures. Frankly, according to your own statements, you never saw combat, so the life altering trauma you suffered was not from the military,,you would be best to stop blaming it on such.

(That's too bad for frankie, let the games begin..)

_
>Didn't I say that you should demand proof?

You have said a hell of alot of things that make no sense and untruths.

>Well, here is Twisty's 'proof':

>http://tinyurl.com/2hodj

No,,that isn't "twisty's proof", that's google's proof. I merely poined
it out.

>If you find that convincing

Sure it's convincing,,,you are the ONLY one to front off and insult
Eitner and Jay and Toll by name when they aren't mentioned,,only you
have done this throughout your sockpuppet incarnations.

>then maybe you are

>interested in buying this bridge I have in

>Arizona.....

No one would buy anything from a convicted liar, Frank,,especially a
bridge or anything that required your word. Once again, such isn't my
proof, Frank,,I merely pointed it out, as it is Google's proof.

>Typical Twisty spin

No spin, Frank,,,it's a google presentation.

> -- unable to accept responsibility for his own

>ignorance.

The ignorance is all yours. Frankly, your inability to comprehend that the masses know you are the only one to maliciously front off Jay, Toll and Eitner by name and all in one breath with a personal attack is quite entertaining, as
it has you displaying that purple and red shade of anger you simply are unable to do a thing about,,,oh yea,,,,,,, if it makes you feel any better, I certainly take some responsiblity fro *your* ignorance.

>So where's that military group, Twist?

Retainment comes only with effective communication skill, Gillinad. Once again, I will be more than happy to post the url when and if you present the "list of companies assigned to the freeband an their replies" "proving" they receivie continual interference from freebanders, like you said you were going to produce some time ago,,,,and that's only the first of many lies,,er, claims you have not provided for that contributed to your forced verbal extraction you are indeed a frequent liar.

LOL,,yea..you've always "been there and done that" so much better than
others,,,,such illustrates your disdain fro freebanding and amp
usage,,,,you did it,,,but anyone else that does what you did, is a
"criminal",,,but somehow,,,,when you do it, you aren't a "federal
lawbreaker" with no respect for the rights of "society",,,LOL.

> there just isn't THAT much money to be

>made,

Look, just because you and your partner whom you referred to as a "sex
fiend" failed to make it a succesful business endeavor doesn't mean
others share your incompetence. There are many radio shops around the
country that are successful as full time businesses that make it, with a
healthy profit to boot..

> if you at least want retain enough dignity to

>look at yourself in the mirror the next day.

Something for which you continue to strive, but somehow, just can't
attain.

>CB radio repair is nickel and dime stuff. It's

>hard to justify paying a $59 repair bill for a

>radio that could be replaced for $79.

Only to those who couldn't do such properly. Your failed business illustrates your lack of a successful business plan required to make such an endeavor a success.

>It was great for some spare cash, but I'd never
>make a living from it.....

And since YOU couldn't make a living off it, you incorrectly feel others are unable..LOL. No dice. The majority of people are more adept at communicating effectively with others than yourself, and such a trait is necessary when dealing with the public. Perhaps it is why you failed.

Yes, you -do- have everything you want. You want my attention as
demonstrated by your begging, like a dog that keeps dropping a stick
at my feet hoping I'll throw it. So I throw it and watch you trip over
your feet trying to reach the imaginary prey before it has a chance to
escape, you bring it back, drop it at my feet again and beg for more.
Mildly entertaining, which is why I don't put you back on your leash,
but at least you understand who is the master and who is the pet.

there is?
I hate to say it, but there are only 3 Cb shops still in business here in
the Phoenix area (Apollo communications being the longest running of
them)

Having visited that one off and on over the years, I can tell you, there
is more money in other types of equipment (cell phone resellers, sat tv,
ham gear, etc). CB is becomming nothing more than a low margin hobby.

Right! The few CB specialty shops in my area that have been around
since the heyday, have either closed their doors, or sought other
means to sustain themselves. Sure, you can still buy a CB there, but
they've also become dealers for cell phones, car audio, alarm systems
etc, most of which are now responsible for bringing in the lion's
share of their revenue.

That question rattled Frank with a long reply trying to explaining a way a simple question he didnt even answer. Richard M was the man who identified insane Georgy porgy as wa3moj.

>Twisty that is absolutly incorrect, and is a flat

>out lie.. I will post the post to show you,

Fine,,post it in its entirety.

>Richard M called me aaron never called me

>george,

Heheh,,wasn't my argument until you invited me amid your cornfusion....LOL,,you need to comprehend just who it is you are replying. Read the post you presented from Dick, for crying outloud,,he most certainly DID identify George Busch by call...

N0BK wrote:
("Given the dressings I have gotten from him about hanging out on CB in virtually identical language, I strongly suspect friend George WA3MOJ is also Aaron Voobner as well as middlefinger4. Several other wierd coincidences lead to this suspicion. No big deal, one more for Bozo*Flush. His reaction to Chris passing the Extra was to my mind incompatible with being a human being let alone an OT extra licensed nearly as long as I have.
Dick NØBK)

–

Just in case you missed it, here it is again:

N0BK wrote:
("I strongly suspect friend George WA3MOJ")

>Yes he said that,

Of course he said it,,,that's a neat shuffle dance you're doing....hell of a flip-flop from you getting all rabid and calling me names when you claimed he never said that...tyr this again,,,you first said:

>Twisty that is absolutly incorrect, and is a flat

>out lie.. I will post the post to show you,

>Richard M called me aaron never called me

>george,

But, then we see he indeed called you Aaron AND George.

> because he already thought I

>was wa3moj because of PhilC from 2 or 3

>months earlier.

Whatever reason, he most certainly called wa3moj "George", ...you claimed he didn't, now you're offering reasons WHY he did it,,,,hehhee.

> And you implied he "identified who George is"
>which is not the case.

He most certainly did,,,,,he identified Aaron (in this instance) as wa3moj, who happends to Be Geogre Busch. That was the idenitification made by Dick.

> Here is were you imply a lie in case you

>forgot,

"Richard M was the man who identified insane Georgy porgy as wa3moj.

–
Yes,,,read it again,,,you can also google the word insane alon with Dick's call and find the post where he most certainly did say that.
But all in all, I'm glad you cleared one item up,,,you prefectly

illustrated Gillinad's profound propensity for lying all the time,,

See.....Frank said the call WA3MOJ was posted as means to "trip twisty up". You brilliantly illustrated I wasn't even involved in the mentioning of the identity of the call WA3MOJ at the time you present, beautifully exhibiting the extent Gillinad has been reduced. Cheers!!

LOL..Leonard,,,,,hey Frank,,what's the rest of the name?

>You want me to come up with a last name for

>you?

I have everything I want. I've asked nothing of you at any time except
to back your bullshit lies. I merely asked you about this newest name
you're tossing about while drooling on yourself. concerning yourself
with me.

>Then you -do- want me to pick a last name for

>you.

Pay attention for your sanity's sake. If I wanted you to do something,
I would have brought up the subject, not you. If *I* wanted you to do
anything, quite Frankly, you would have done it ,,you see, I have that
type of control over yourself at your insistence.

>Oh, that's right, you are Twistedhed the

>Omnipotent. LOL!

And you are impotent. LOL!
As far as you're concerned,,yes,I'm omnipotent,,,,exactly! Untouchable!
I am your deity and reason for reputation demise for illustrating your
lies, I am all that concerns you an all that you can focus upon.
That's right.

>Shall I pick it out of thin air?

Of course,,,you aren't expected to change your obsessive tactics now.

>or do you want me

Pay attention...I *have* everything I want and if you didn't suffer from
character flaws and communication deficits you would have caught that
the first time. I look to you for nothing except entertainment derived
from watching you spaz.

>Yes, you -do- have everything you want. You

>want my attention as demonstrated by your

>begging, like a dog that keeps dropping a stick
>at my feet hoping I'll throw it.

The only thing you throw is lies. You have been told by the majority of this group your atitude sucks and you chase me like a loyal mutt.

>So I throw it and watch you trip over your feet

>trying to reach the imaginary prey before it has
>a chance to escape, you bring it back, drop it

>at my feet again and beg for more. Mildly

>entertaining, which is why I don't put you back

>on your leash,

Dig that flattery via imitation and verbatim mimes.

>but at least you understand

>who is the master and who is the pet.

As does everyone else. Imitation is the sincerest form of flattery. AS everything else in your life, you're so off the edge you are unable to recognize when you're doing it...lending that much more satisfaction to those who bother to follow your topics of me.

>to come up with one based on ridiculous

>associations and unlikely coincidences?

I don't want you to do anything that you can't comprehend, as it always ends up with you cornfused, cursing and ranting on about twist this and twist that, resulting in more of your lost self-control and illustration of your low self-esteem.

>SOBR.

You forgot the "e" between the "B" and the "r". After claiming you don't drink anymore, and foolishly going as far to post the reasons WHY you don't drink anymore (as if someone gave a damn about your persoanl crisis' and woes and problems and demons with which you are unable to cope) and then illustrating you fell off the wagon again,all can understand your rants and rabid attacks. Alcoholism is a disease, but drinking again after you said you quit, most definitely illustrates a problem of large magnitude and proportion in your personal life,,,another of which you are impotent, powerless, and have no control.

>But you are avoiding the issue, Twist. It's not

>about me, it's about your own lack of

>comprehension when you accuse me of being

>somebody else based on weak associations

>and random conincidences.

No, mindless, that was never the topic,,such is *your* topic, subsequent only to *your* incompetence and obsession concern and acusations concerning *my* identity. You're all pizzed off and frustrated again and making me your topic again,,,,,LOL,,,

>Oh, but it is -your- topic that -you- initiated by

>your groundless accusations of me of being

>five different hammies, a fact which you

>conveniently ignore whenever the topic floats

>to the surface where everyone can see it.

The entire contingency witnessed your breakdown over the past several years concerning your overt concern for personal information, in addition to the umpteen "most certainly" identites you placed forth,,,,"Leonard" being the latest..this obsession of yours wasn't initiated by myslelf, but such a confused failure like yourself has always needed another to blame for their personal actions. It at least illustrates that you know your actions are incorrect, your inner psyche just needs a manner in which to justify such behavior and blaming others allows such.

>For example, take a few of your favorite words
>and phrases, put them through the

>google-grinder, and only one name keeps

>popping up in almost all instances -- Leonard

>H. Anderson. "Coincidence? I think not!"

What you think is irrelevant. You just got done saying a few months ago "His name is DEFINITELY Dave McCambell and he's an Extra".

> Now go ahead and attack the logic of this

>conclusion, and when you are through I'll have
>-your- words to use against -your- allegations.

>LOL!

Check the thread, oh disciple of mine, as the post you were replying of mine mentioned nothing about your identity. You're off-topic and having Twisted convulsions again.

>Once again, it was -you- that initiated the topic
>by begging for my attention with, "Frank is

>iamnotgeorge2004. He hasn't posted as him

>since he was caught."

Take it the next logical step. You posting as iamnotgeorge2004 and attacking myself, mopar, randy, shark, and anyone else, not only illustrated YOUR begging for attention, but your yellow cowardly way for attempting to shill post.

_
Hehe,,someone
got ya' on remote control and done tossed the switch to auto-pilot.......get a life, Frankie,no matter how much you cry on this group about me this and me that, no one but you and Lelnad gives a damn...

>And that's why you invoke our names on a

>regular basis. Uh-huh.

You were already told by a casual observer that you can't get over yourself and concern yourself with myself along with Davie-son each and everytime you log on..of course, none expect you to believe it, as you have proven yourself unfit and unable to see yourself as the masses do.

>SOBR.

If you WERE sober, you woullnd't hate yourself half as much as your behavior illustrates.

_
oh, at times Geogre does, but he's more interested in swearing and getting past shark's killfile and obsessing on Steve, much in the manner you obsess on myself.

>....now wait a second.... didn't you just get

>done whining about how "George" and I were

>the same person?

No, I never said anything of the sort. I said you were posting as "Iamnotgeorge2004@yahoo.com" and you have done your best to claim that I said you were George, but as usual, your best simpl isn;t good enough.

>LOL! I gotta add that to my sig file!

Of course you do. You hold me that important.

_
The group is much more intelligent than you give them credit for, hence your intense campaign at trying to place words in other's mouths.

>SOBR + projection.

Tell us again why you quit drinking and then tell us how you suddenly fell off the wagon again..wait,,,never mind,,,,its clear to all I am the reason for your all your failures,,including you drinking again.

_
Why, hell, if mopar and I were to suddenly disappear, you would have to convince Geogre to join you in your random, off-the-wall and offtopic attacks in the form of outbursts about Jay or Toll. Of course, you'd curse Randy and Tim more often, also, with those four letter words you like to toss around as insult.

>Which four letter words are those, Twist?

Retainment is a skill that comes only when one has achieved effective communication.
When it comes to effective communication, "your best simpl isn;t good enough."

>....<yawn>

LOL,,yes,,,one can see how bored you must be to go out of your way with such obsessive behaviors. Gain some insight and you won't need to look to others for personal enlightenment.

>SOBR.

Call AAA and get a sponsor, but you must rid yourself of the excess hate and weights I placed around your neck prior to recovery. You were unable to manage this on your own, hence your relapse into the bottle.

You forgot the "e"between the "b" and the "r", but somehow, it won't last,,,you display the classic obsessive dwelling signs of an alcoholic, in addition to the self-contradictions (I don't drink anymore,,,,but of course, this was more than likely said suffering a DT episode) and the self-wrapped behavior of presenting to this group your reasons for no longer drinking as if someone actually cared of your self-created woes is indicative of a plethora of character flaws and personal failures. Frankly, according to your own statements, you never saw combat, so the life altering trauma you suffered was not from the military,,you would be best to stop blaming it on such.

>SOBR = Same Old Boring Rhetoric.

Same old drunk, Frank the Failure.

>your choosing for the purpose of public

>embarassment? Well, I can't publically

>embarass you

Then perhaps after several years of continual failure and impotence you
should focuss your attention on something productive, proactive, and
whihc actually matters...wait a second, I juts illustrated how much I
matter in your world,,,,again..

>until you tell me which group

>you have chosen. So where's that group,

>Twist?

Retainment may return after you gain sobriety. Retainment is a trait of
effective communication skill. Despite my ansering this inquiry twice in
the pasttwo days, you fail to comprehend effective communication. Gain a
sponsor and they will assist you over this terrible time you are
suffering through.
Once again, I will post a url for the group when you post those comments
from the businesses assigned to the freeband that suffer interference
you claimed is "rampant" from
illegal cb. After all, you made the claim and have ran from it ever
since you were unable to find any,,,,,,not a single business. See, this
is another area where you were full of bullshit and unable to handle
being continually proved incompetent and unknowledgeable concerning cb
radio, which lead to the abandonment of the subject and morphed into
personal attack by yourself. Now, about that shade of purple on your
face and red on your neck,,,,,

>sat tv, ham gear, etc).

Perhaps there is, but I can assure you that field is completely
oversaturated with dealers.

>CB is becomming nothing more than a low

>margin hobby.

Not here. Hunters and fishermen use cb all the time, as do many other
businesses,,,,,road workers, construction, fishing vessels (who have our
"own" freqs,,,:),.
See, where the signal is not only unobstructed by flat land and water,
cb is quite popular, way more so than VHF. It is not any big feat to
talk across the state or across the Gulf, especially the way its been
lately with zero noise levels at night. Such cb popularity would support
a great cb shop just fine in this county. As it stands, most take their
radios north to a super tech,,,,ask Geo to ask Mason about him,,he knows
the tech, and the dude makes big bucks, is reasonably priced, and does
great work. I have a radio he peaked, tuned and converted many years ago
and the only thing that ever needs replaced is the battery in the
mic...I'll never part with it and if the tech should retire ot stop

working on radios, I'll buy several more from him prior to him doing so.

Tune your freebadn dial on the weekends, especially late at
night,,,,you can copy all the activity and listen in on what is being
caught and where they are. K4KWH, go grab your spy-kit, listening
devices and recorders!

Twist,

Ah, be nice. He mentioned you said "skip" when there was no skip. If you
feel up to it, inform him of sporadic e propogation and how it doesn't
affect everyone at the same time ;)

Best regards from Rochester, NY

I'm new to this group and know very little about CB radios, so please, no flames! I'm restoring a 1957 Buick Special and want to use a CB in my car. I'm looking at possibly buying a Cobra 29LTD classic w/ the supermod upgrade. My only problem is that I don't an antenna showing on this car. My question is this: If I were to use one of those Helix coil antennas, and mounted it under the seat, would it work just as well as a regular antenna on the roof? My theory is that using one of those helix antennas would compensate for the fact that I'm mounting it in such a weird location (that is, if location even makes a difference). Again, I know almost nothing about this sort of stuff. All I know is that I definately want a CB in my '57 Buick. Any info is appreciated.
Bryan

Brian,

Any transmission from within the passenger compartment will be attenuated at least 10 dB. On 27 MHz, it will likely be 20 dB. Reception will also be adversely affected the same amount. In other words, you won't be able to communicate.

Best regards from Rochester, NY
Jim

You think so? Well, let's find out just who chases who, shall we? I
propose that for one entire month we don't refer to each other
directly or indirectly, by name or by allusion. We will post as if the
other doesn't even exist. But of course, this won't be any fun unless
there are stakes involved. So if you think that you have the
self-discipline to overcome your obsessions for one month then name
your stakes.

You still have your blinders on, Twist -- "the entire contingency"
laughed hysterically at my demonstrations of -your own- obsession with
identities! They were intentionally based on the same flimsy proof and
faulty logic as each of the "umpteen 'most certainly' identities you
placed forth" on me. I mocked you and you are -STILL- too stupid to
realize it -- ROTFLMMFAO!!!

>this obsession of yours wasn't
>initiated by myslelf,

Indeed it was, Twist -- before I began throwing your ignorance back in your face you had already 'pegged' me as Doug Adair, Leland Scott, Ben Lee, Glenn Sparks and N7VCF. And it is those failures that drives you insane every time I toss out a name in your direction. You chase the stick, thrash it around for a while, drop it at my feet then stand there proudly proclaiming how -you- have -me- chasing sticks! I probably shouldn't be saying this because you might realize your complete and utter foolishness, but you aren't good for anything except the entertainment value of watching you self-destruct on your own lies, and at this point I think you have really gone over the edge and have started to believe all the lies you have been telling yourself for all these years. So what the hell.

Hey, what happened to your forged quote that claims I said you are
Race Warrior? Oh well..... So how's the job search going? Got any
interviews set up for next week? Have you tried McDonald's? Oh, that's
right, they only hire kids, geriatrics and the mentally disabled; they
don't hire able-bodied people that are lazy and irresponsible.

Honestly, you would probably do as well by hanging a megaphone out the window. CB radios are low power and you need to get every little bit out to get any practical use from them which includes using a very good well tuned antenna. RM

PS, Still kicking my rear for selling a 55 Century in 1975 that had less than 30k on it.

Hello, Jim

I had tried Firebird (a previous version). It did work, I had no complaints, but just couldn't justify the space it was taking on the hard drive. I'm trying to remember how big it was - I seem to recall the compressed download being around 20 MB. I've tried a number of different browsers, but simply keep Explorer now. All of the patches Micro$oft keeps putting out for the browser and the OS just keeps eating more hard drive space. Of course, Linux and others also have patches (as security flaws are discovered).

Try it if you wish; the older version did work fine. I just gave up trying all those different browsers (Netscape, Firebird, Opera .....)

Best regards from Rochester, NY

Thanx Jim. It was a 6.8 mb download at the job but it didn't seem to
work. I tried the latest version of Mozilla and I like the speed
compared to navigator 7.1. Different strokes.....

huh?

3 main Cb shops for a town 15% larger than Los Angeles in land area?????

I did forget to mention the 3 or 4 flying-j truck stops around the valley
that carry CB equipment (in a small area of their vast shopping areas).
I asked a store manager about that. He basically told me that if the
market doesn't pick up soon, such things will go the way of the dinosaur
by next year.

hmmmmmmm. funny, go to any sports shop and you'll see lots of FRS/GMRS
radios being marketed. not a single cb radio to be had in any of those
places here in Arizona.

> See, where the signal is not only unobstructed by flat land and water,

The problem is, around here (in arizona), that isn't a real supportable
market (or statement). it might be true other places. However, doing some
listening on the "ol' 11 meter band" of late, I have heard, even in the
middle of the day, less than 20 people operating anywhere on band. Its
become a ghost town here abouts. the only nitwit bunch still left exists
on chan 38 LSB (you know the bunch: Howie Kingston, Larry the leadfoot,
AL and others).

sheeeeeeeit! I've done that with the old FRG-7. not much to be heard
freeband around here and it don't take long for anyone to run the
intruders off 10 either.

412. NY TIMES says new super-small Hammie Antenna defies physics

Newsgroup: rec.radio.cb
Date: 2004-06-11 14:43:04 UTC
From: nicolaicarpathia@webtv.net
Message-ID: <17536-40C9C4F8-366@storefull-3251.bay.webtv.net>
Source record: 183172

This article by columnist Ian Austin appeared in yesterday's (June 10) New York Times. I sent Mr. Vincent an email concerning some past posts regarding antenna designs and tests.

_
it was love that ultimately led Rob Vincent to develop what he says is a way to make antennas significantly smaller but still efficient.
"About 1995 I had met a sweetheart and we fell in love," Mr. Vincent, now 60, recalled. "I went to live with her, but the only problem was that she lived on this postage stamp of a yard in a congested neighborhood."
The real estate owned by Carolyn Hardie, the woman Mr. Vincent later married, was an issue because his amateur radio interests had turned toward frequencies in the 160-meter band. That band is close to broadcast AM radio. And, like an AM station, operating on it requires a tall antenna - in Mr. Vincent's case, one that is 140 feet high.
Aesthetic and zoning questions aside, the 50-by-100 foot lot was not big enough to accommodate the guy wires needed to stabilize a tower that high.
So Mr. Vincent, a technician with the University of Rhode Island's physics department, began thinking about ways to make antennas smaller. The end result is a system that he claims can produce antennas that are one-third to one-ninth as high as normally required. He has spoken to other ham operators in over 80 countries on the 160-meter band through his relatively new, self-supported backyard tower, which is one-third of the conventional minimum size.
Mr. Vincent said his improvements were not just applicable to ham radio towers. They could be used to either further shrink the tiny antennas in cellphones, he said, or boost their efficiency.
Small yet efficient antennas have long been a goal for radio researchers, said R. Dean Straw, the senior assistant technical editor for the American Radio Relay League, an association of amateur operators. "The holy grail is an antenna the size of a grain of salt that produces big signals," he said.
Generally the size of antennas increases with the wavelength of the frequencies they are transmitting or receiving. While there are several formulas for determining optimum height, the height of most antennas is one-quarter to one-half the wavelength. At 140 feet, for instance, Mr. Vincent's ham tower would have been slightly higher than one-quarter of the wavelength of 160 meters, which is equal to 525 feet.
Smaller antennas can be used, but with a trade-off. "When you get below a quarter-wavelength, efficiency drops off dramatically," Mr. Vincent said.
Before arriving at the university in the early 1990's in a

still-unfulfilled quest to complete his undergraduate degree, Mr. Vincent spent about 30 years in radio-related engineering jobs, mostly with a radar division of Raytheon. But his tinkering with antennas dates back to when he obtained his first amateur radio license at the age of 14.

"I've always had a natural understanding of radio - maybe it's from a prior life," Mr. Vincent said. "But in those early days I could not fathom how an antenna worked."

The relationship between antenna height and efficiency was so well established that he initially kept his antenna-shrinking work a secret. Mr. Vincent also acknowledged that he had relatively little idea of what might work when he began the project.

"When I started out to do this it was 10 percent theory and 90 percent black magic," he said. After reviewing much of the literature, Mr. Vincent started designing antennas with special simulation software on a personal computer.

From the most promising of those virtual designs, he ran tests using antennas that were about 18 inches high and fashioned from copper-covered Plexiglas rods. One model seemed particularly successful until it lost its signal during a high-powered broadcast test. When Mr. Vincent went outside, he found only a lump of molten metal and plastic.

Gradually, he said, potential areas of improvement became apparent. He began confiding in some friends from the ham radio world and faculty members in the physics department. One friend allowed Mr. Vincent to build a 46-foot-high experimental antenna at his country home, which includes a salt marsh.

Saltwater is an antenna builder's dream. By providing a highly conductive base for the antenna, the water improves reception.

The big prototype improved upon conventional designs in many ways. But one crucial one involved the placement of devices known as load coils along its length. Load coils are commonly used in cellphone antennas to alter their current patterns.

Conventional broadcast antennas, Mr. Vincent said, generally have a lot of current at the bottom and very little if any at the top. With his design, current is more evenly distributed.

To avoid suggestions that saltwater, not his design, was the magic, another 46-foot prototype followed, built on rock. It offered 80 to 100 percent of the efficiency of an antenna three times its size.

About three years ago, the University of Rhode Island became interested enough in Mr. Vincent's work that it gave him office space. After a review by engineering and physics professors, it began the process of patenting and selling the technology. Mr. Vincent has turned over all his rights to the university.

"We've seen test data from Rob Vincent and it sure is attractive," said Quentin Turtle, the director of industry research and technology transfer for the university.

Mr. Straw of the radio relay league said he was impressed with Mr. Vincent's work ethic. "But I remain somewhat skeptical,'' he said. "I'd like to see some validated field test measurements."

Mr. Vincent said he was aware that would-be buyers of his technology

would demand better test results, although measuring the efficiency of antennas is difficult. But given the scrutiny his project has received to date, he said he was confident that his antennas would pass muster. "I'm part of the technical staff to a whole bunch of Ph.D's," he said. "You can't fool these people."

Sounds oversaturated.

>huh?

>3 main Cb shops for a town 15% larger than

>Los Angeles in land area?????

Well, sure,,going strictly on your words that cb was becoming nothing more than a "low margin hobby", it would appear not much activity is taking place in your area,

>I did forget to mention the 3 or 4 flying-j truck

>stops around the valley that carry CB

>equipment (in a small area of their vast

>shopping areas).

Yet you fail to see the oversaturation?

>I asked a store manager

>about that.

>He basically told me that if the market doesn't

>pick up soon, such things will go the way of

>the dinosaur by next year.

Yea, yea,,I've heard it all before,,,,,look, several regs on this group, that shall remain anonymous for the time being, have claimed many times over the past six years that cb was coming to an end, that radios would become vastly more expensive as a natural fallout directly related to what was falsely prophesized to beincreased fines, and that Hollingsworth was to be their personal savior and was the second coming to cleaning up radio and that all kinds of major changes were coming to the hobby that would drastically affect cb use, sales, etc., as we know

it. There will always be a niche for someone. One man gathers what
another man spills.

–

>Having visited that one off and on over the

>years, I can tell you, there is more money in

>other types of equipment (cell phone resellers,
>sat tv, ham gear, etc).

Perhaps there is, but I can assure you that field is completely
oversaturated with dealers.

>which field?

Cell phone resellers, sat tv, ham gear, etc.

>as I stated before, we don't have that many

>dealers here anymore.

I'd say just the ones you illustrated were more than adequate.,,and that
doesn't account for the those you are not aware of who work out of their
homes.

>CB is becomming nothing more than a low

>margin hobby.

Not here. Hunters and fishermen use cb all the time, as do many other
businesses,,,,,road workers, construction, fishing vessels (who have our
"own" freqs,,,:),.

>hmmmmmmm. funny, go to any sports shop

>and you'll see lots of FRS/GMRS radios being

>marketed. not a single cb radio to be had in

>any of those places here in Arizona.

I've been through Arizona. Let's see,,,border patrol has them,,,most
personal four wheel drives, especially the Broncos and Jeeps I've seen
in the barrens of the desert sport cb antennas. FRS/GMRS radios are
useless in some areas and at many events. Turn on a FRS at a campground
in the summer, or Disney World...you get the picture. Those who want the
cb want if for its characteristics and properties

–

See, where the signal is not only unobstructed
by flat land and water, cb is quite popular, way more so than VHF. It is
not any big feat to talk across the state or across the Gulf, especially
the way its been lately with zero noise levels at night. Such cb
popularity would support a great cb shop just fine in this county. As it

stands, most take their radios north to a super tech,,,,ask Geo to ask Mason about him,,he knows the tech, and the dude makes big bucks, is reasonably priced, and does great work. I have a radio he peaked, tuned and converted many years ago and the only thing that ever needs replaced is the battery in the mic...I'll never part with it and if the tech should retire ot stop working on radios, I'll buy several more from him prior to him doing so.

>The problem is, around here (in arizona), that

>isn't a real supportable market (or statement).

>it might be true other places. However, doing

>some listening on the "ol' 11 meter band" of

>late, I have heard, even in the middle of the

>day, less than 20 people operating anywhere

>on band.

Incredible. As one of my disciples just illustrated for you, they are claiming no dx at all...absolutely amazing how one can feel that because they hear no dx, the rest of the country isn't receiving any. I always have at least the espanol dx coming in,,,and blasting across the Gulf to Texas or any of the islands is rarely a problem. Heck, the last time I talked to Tim a few years ago, there was a hurricane out in the Gulf between us.

> Its become a ghost town here abouts. the

>only nitwit bunch still left exists on chan 38

>LSB (you know the bunch: Howie Kingston,

>Larry the leadfoot, AL and others).

Hehe,,yea,, I hear that crew every now and then..but no one made me laugh harder than Port-a-potty Charlie.

_
 Tune your freebadn dial on the weekends,
especially late at night,,,,you can copy all the activity and listen in on what is being caught and where they are. K4KWH, go grab your spy-kit, listening devices and recorders!

>sheeeeeeeit! I've done that with the old

>FRG-7. not much to be heard freeband around
>here and it don't take long for anyone to run

>the intruders off 10 either.

We don't have that problem around here. We have courteous operators, several hammies who also freeband here and you know what? They've done

it for years with no one giving a damn about it or threatening to
"tattle"..heheh. No problems on ten meter with unwanted intruders,
unless its another licensee from Sarasota blasting way too many watts
through a beam while pointed north. I seriously question if some of you
who claim not much is happening on the freeband actually take the time
to search....'cause rare is the time that one can't find some ssb
activity between 25 and 30 mhz. Maybe a directional would help you.

You have that chance each and every weekend, Gillinad, yet my return on
Mondays or Tuesdays is greeted with your many bright and jolly petitions
invoking my handle which were made by yourself,,taa-daa,,over the
weekend. Your behavior is habitual, obsessive, and none feel you capable
of cure after all these years.,,LOL.

Youv'e been proved a liar by many, Frank, otherwise, I would agree to
this. See, you wil merely escalate your anger under your sock puppets,
such as iamnotgeorge2004, and use it to maintain your malice and
obsession, while lying and denying it is you, but that's all good, too,
as everyone knows your knowledge was soundly trounced by Jay and Toll
and Eitner and others and you hold grudges and have attacked them by
invoking their names throughout your posting history when they were
nowhere to be found. This most certainly illustrates YOUR obsession as
one who can't "let it go", or let anything go, regardless the pathetic
whines you continue to offer holding yourself as victim.

> But of course, this won't be any fun unless

>there are stakes involved. So if you think that

Your interpretation skills are about as effective as your communication
skills

>and techs should go there

I said no such thing. Pay attention, clueless, I said if a competent
tech were to open a cb shop on the suncoats they would have a goldmine.
That you minsinterpret everything is why you must hide from the group
with your google.

>that is just an

>example of his delusion he talks about skip

>when there is no skip

>he harasses frank and dave hall

You have that backwards, disciple. Be baptized and be exorcised, ye
demon of Frank..

>and jerry k4kwh.

>Jerry never did anything to him yet

>Twisty attacked him without cause simply for

>posting about freeband violators being busted.

I didn't attack Jerry, I pointed out his malicious trolling for
responding to forged posts he knew `were forged when it was shown he was
a lying scumbag much like yourself. It had nothing at all to do with the
information he presents. In fact, one may google his posts and see I
never attacked him for his beliefs. In fact, if anything, I have
defended him in instances when, in hindsight, I shouldn't have,,,he was

less than honest and less than forthright, which compromised his integrity and reputation, but I had to find out myself, even though I was publicly warned on this group about his motives and sneaky demeanor. There again is my problem,,,I'm too nice a guy and give everyone the benefit of doubt until they prove otherwise.

>Twisteds type posts belong in the pirate news

>group or somewhere else not rrcb. Its time he

>waddled off into the sunset and said sayonara.

Keep starving for status,,it's related to radio, whether you like it or not. You're impotent concerning what comprises radio, and you're a fascist, attempting to tell others what does and does not belong in their radio discussions. Have a cigar, boy,,,,

   Just in case you missed it, here it is again:
N0BK wrote:
("I strongly suspect friend George WA3MOJ")

>Yes he said that,

Of course he said it,,,that's a neat shuffle dance you're doing....hell
of a flip-flop from you getting all rabid and calling me names when you
claimed he never said that...tyr this again,,,you first said:

>Twisty that is absolutly incorrect, and is a flat

>out lie.. I will post the post to show you,

>Richard M called me aaron never called me

>george,

But, then we see he indeed called you Aaron AND George.

>Yes my mistake

One of many. But it wasn't a mistake, it was aoutright lie, as it was
there for all to comprehend and see,,,you were just so hellebent and
angry and posting before your mind could cathc up with your fingers, all
you were worried about was telling me I was "incorrect" and telling a
"flat out lie" and it overtook your interpretive skills.

>was saying Dick never called me george, yes

>he did cqall me that, but your post insinuated

>he identified me as wa3moj,

You denied it and forced me to rub your nose in it.
Your interpretation skills are not shared by many, its why you find
yourself on such a lonely, low, level.

>when Phil C long before Dick gave me that

>name.

> Dick was a parrot and that is all,

Incorrect. Dick was much more than a parrot. A blowhard coward like yourself can never hope to achieve the credibility of Dick's words and you claiming he was incorrect will never make it so..

> he

>called me a name that was already given to

>me. Not anything else as you like to insinuate

>because he already thought I

>was wa3moj because of PhilC from 2 or 3

>months earlier.

Whatever reason, he most certainly called wa3moj "George", ...you claimed he didn't, now you're offering reasons WHY he did it,,,,hehhee.

>Yes, he did call me that, but I am offering

>proof as to why he did it, he did it because he

>heard others calling me that, you have done

>the exact same thing.

Your word is not proof, never was, never will be. Deal with it and get over yourself.

> And you implied he "identified who George is"
>which is not the case.

He most certainly did,,,,,he identified Aaron (in this instance) as wa3moj, who happends to Be Geogre Busch. That was the idenitification made by Dick.

>He didnt identify anyone, what is his proof?

LMAO,,,

>he is guessing whom he thinks aaron is, this is
>where you are trying to play your semantics

>game.

> Here is were you imply a lie in case you

>forgot,

"Richard M was the man who identified insane Georgy porgy as wa3moj.

_
Yes,,,read it again,,,you can also google the word insane alone with Dick's call and find the post where he most certainly did say that. But all in all, I'm glad you cleared one item up,,,you prefectly illustrated Gillinad's profound propensity for lying all the time,,
See.....Frank said the call WA3MOJ was posted as means to "trip twisty

up". You brilliantly illustrated I wasn't even involved in the mentioning of the identity of the call WA3MOJ at the time you present, beautifully exhibiting the extent Gillinad has been reduced. Cheers!!

>Dick was not involved in identifying the call of

>wa3moj, he used it in a post, one in which you
>are trying to make something out of it that isn't
>PhilC, was the first and only one to say I was

>wa3moj months before dick ever made

>mention of wa3moj in that post.

>Dick only mentioned the call to assume aaron

>and "george" were the same people, nothing

>more nothing less.

>And yes Frank was right the call sign was

>posted with you in mind,

You just said Phil posted it first,,,now you're saying one of you leeches posted it first to "trip up twisty",,,,lol,,,you can't save yourself, let alone Frank.

> No one said you were mentioned in the

>identity of wa3moj

But you and Gillinad said I was most certainly involved by virtue of the reason the call was posted,,,,but you contradict yourself AND Frank by saying Phil posted it.

>you said Dick was involved

>in identifying wa3moj, that again you are

>100% wrong,

No,,I'm not wrong,,,,Dick did identify wa3moj, regardless of who did it prior to him.

>Phil C had that honor of calling me wa3moj

>months before dick or yourself ever muttered

>the words.

There you go again,,,you illustrate perfectly it was months before I ever "muttered the words", yet Frank maintains it was posted in my honor, even though I wasn't involved in such a conversation regarding that call for "months" (according to you). That you and Frank would post a call in my honor when I wasn' even involved in such a conversation, illustrates that you losers at life are way too obsessed with myself,

and illustrate your admitted extremes you resort in order to "trip up
twisty:....heheh!
have a great weekend, goober!

> Jim were you drinking guiness when you made the claim about MUF??

MUF is generally meant a generalized maximum usable frequency which will
support propogation between two point on the globe. There also exists a
minimum frequency based upon effective radiated power, below which the
signal will not be received. Above the maximum, the signal will not be
reflected.

Sporadic e occurs when ionized clouds form. These can be quite small or
fairly extensive. If not very extensive, they may support only one hop and,
being much closer to the earth than the f layer, will not support multiple
hops (they can, however, if extensive enough). If you read the
'guesstimate' on the MUF between two places, it may be on the order of 18
MHz, yet, if sporadic e forms, you may be able to communicate on 12, 11, 10,
or even 6 meters - despite the fact they are all well above the 'muf'.

Of course, as one goes higher in frequency, troposperic ducting comes into
play. One may well communicate thousands of miles on 440 MHz, yet one
wouldn't call that the 'muf'. There is more information available now than
there was in the 50s ;)

Best regards from Rochester, NY
Jim

Correct, but I was thinking in the terms of what is published concerning future 'estimated' MUF, in which case they are looking for F layer reflection. Heck, if you consider the moon, 24 GHz has been successfully used - but I wouldn't consider 24 GHz as the MUF. The original post was stating that 11 meters (or 10) was dead. The consideration is that the sunspot cycle is in such decline that, normally, F layer propagation won't be available. My response was that sporadic e does exist - but not everywhere at once. The bands do open, despite the MUF being far lower in frequency. I get the feeling that you are simply trying to say I'm wrong; I was simply speaking out against the generalities.

no,that is not what you said. you said:
well duh I can make a very small 160 meter antenna using loading coils
too its called a dummy load

you said that a small 160 meter and is called a dummy load. whats the matter
dummy,can't remember what you wrote a half hour ago?

your last post is even funnier, a dummy load is very small and will work on
160? as what? a dummy load? not as an antenna.
stick to the gay newsgroups, freak, thats all you know about. what a moron

were did i say a 46 foot 160 meter antenna defies physics? your totally lost

Perhaps, but there have been countless other claims - the e-h antenna, the cross-field antenna, the fractal antenna. It seems that sometime after the announcement, someone finds fault with the measurements. I'm not saying "it ain't so", I'm simply saying I'd wait a while and see what happens.

>Mondays or Tuesdays is greeted with your many bright and jolly petitions
>invoking my handle which were made by yourself,,taa-daa,,over the
>weekend. Your behavior is habitual, obsessive, and none feel you capable
>of cure after all these years.,,LOL.

And you have the same opportunity every time you return from the
weekend. You post on Friday, give me all weekend to respond to your

post(s), and the first thing you whine about the next week is about how poor, defenseless you was so brutally attacked over the weekend. Yet it is -you- that defends your continued participation by whining about how you are compelled to respond to every post directed at you (except, of course, any dialog which you have no chance of spinning, which you characteristically ignore or snip).

>Youv'e been proved a liar by many, Frank, otherwise, I would agree to
>this.

I have admitted lying, but neither you nor anyone else has ever provided any proof of such, only delusions and groundless suspicions. It is -you- that has been proven to be a liar time and time again.

> See, you wil merely escalate your anger under your sock puppets,
>such as iamnotgeorge2004,

I neither use nor need any sockpuppets, Twist. It is -you- that has been caught several times using sockpuppets, such as 1mangang and N7VCF@cotse.com. And because -you- couldn't get away with it you must blame others for doing the same.

> and use it to maintain your malice and
>obsession, while lying and denying it is you, but that's all good, too,
>as everyone knows your knowledge was soundly trounced by Jay and Toll
>and Eitner and others and you hold grudges and have attacked them by
>invoking their names throughout your posting history when they were
>nowhere to be found.

I don't hold grudges, Twist. I give credit where credit is due and discredit those that deserve it. Heck, I have even given -you- credit for some things over the years. But I usually don't include Jay in the list of voodoo techs -- he knows his antennas, which I can respect regardless of his inconsistent statements regarding other radio gear and his position on illegal operation. The voodoo tech list includes not just Toll and Eitner, but also Skippy, Tnom, Brian, and a few others. And you are ignoring the fact that I don't refer to Sean and Toll as two different people, as I explained before. OTOH, Leland hasn't posted in a long time yet you "invoke" his name constantly. And when I was gone for several months you "invoked" my name on a weekly basis. It is -you- that regularly "invokes" the names of those whom -you- have a grudge, even when they are not present.

> This most certainly illustrates YOUR obsession as
>one who can't "let it go", or let anything go, regardless the pathetic
>whines you continue to offer holding yourself as victim.

You have been whining for years about how Leland forged you, yet your 'proof', like all of your 'proof', was shredded by Ockham's razor. Then you defend your grudge by misquoting the late DM, a person that can no longer defend his own statements. You also whined about how I butted into your business on a public forum, but failing to mention that I did so only after you continued your malicious attacks on your

'critics' which I had managed to silence for the sake of newsgroup peace. Despite all that, the only person in this newsgroup who has EVER whined about being a victim is -you-, and you use it as justification in your attempts to victimize others. The problem is that you have never been able to suceed in victimizing anyone, and that really chokes your throttle.

>> But of course, this won't be any fun unless
>
>>there are stakes involved. So if you think that

I have a question about an antenna. I have an old Antenna Specialists M-902 Black Stallion antenna that I am thinking about using. It looks like the one here http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3093592178 but I don't know how well you can see it. It's a shunt-fed, base loaded antenna that is about 3 ft. long and mounts on the trunk lip. My question is how does it compare to some of the new antennas like Wilson or K40? Wilson claims to be the best http://www.wilsonantenna.com/w1000.htm but are they really that much better?

> > Best regards from Rochester, NY
> > Jim

And since 24 GHz moonbounce has been achieve running less than 100 watts output, I assume that the MUF is at least 24 GHz. I also doubt that the d layer, e layer, or f layer (or sporadic e) has anything to do with it. Most likely, the phase of the moon (less illumination from the sun means less noise) and its' distance from the earth. In any event, I assume the question has been settled. MUF is a minimum of 24 GHz everywhere. Funny, but that 10 meter band is still open at times to some places and not others.

I would gently remind you that the original problem was someone (Twisty) saying a band was open whilst someone else maintained it was not. That was my point about sporadic e.

With all due kindest of regards from Rochester, NY

Huh? I'm no expert in microwaves, but I don't see how sunlight can be
the cause of noise in a lower part of the EM spectrum, unless the
effect is caused indirectly.

I know that it is late but I just found this pome and thought I would get it up before I lose it again.

A CB Christmas

'Twas the night before Christmas and all the CB's
Were buzzing with Buddies and their Christmas trees.
The stockings were hung from antennas with care
In hopes that St. Ratchet-Jaw soon would be there.
The kids turned off their rigs and hopped into bed
And waited to hear hoof-beets clomp overhead.
The silence was dreadful-each little one's ear
Was poised for whatever noise he could hear.
When far, far away up in the sky
Could be heard, "Hay, Good Buddy, this rig sure can fly!"
This year old St. Ratchet-Jaw left the dear at home
And went round in an eighteen-wheeler, bright with chrome.
Each part of the systems was glowing with flame
As Ratchet-jaw checked them and called them by name.
"On, headlights! On, motor! On, seatbelts! On, breaks!"
"On, steering! Transmission! Exhaust! Mercy sakes!"
And then to the roof there arose such a clatter,
The household awoke to see what was the matter.
The truck tried to land on the roof, so they say,
But it weighed twenty tones, and the shingles gave way.
As the boards and plaster proceeded to crack,
The kids and their parents yelled, "Quickly! Move back!"
The rear of the truck fell in first, with such force
That the goodies inside jammed open its doors.
As the trailer sprung open, a great wave of toys
Rained down just in front of the good girls and boys.
The CB's, antennas, fuzz busters and such
Delighted the kids, who yelled, "Thanks very much!"
And as Ratchet-Jaw saw all the damage, with fright,
He ran away, shouting, "Merry Christmas, goodnight!"

From the December 1977 issue of S-9 Magazine.

Hell, I heard some skip come through today and even that wasn't noisy by
comparison to 15 years ago.

> Yet you fail to see the oversaturation?
Oversaturation? you'd better go into some of the finer details of the
"opiniuon" you are stating. I happen to understand a lot more about
economics than you'd think (I have, among other things, an education in
managerial accounting, business administration and economics <both macro
and micro>). you have stated over saturation, yet you haven't detailed as
to how you reach this conculsion....

funny, I mentioned nothing about hollingsworth, fine structures or
anything else other than cb is becomming a low margin hobby.

I hate to say this, but I hear far more many people on the frs bands
locally than on CB. the radios are cheaper, you can buy them anywhere
(even at a local 7-11 or circle-k) and they don't require anything other
than a 9 inch antenna (full sized) or a rubber duck to work (not to
mention they work on double-a batteries!).

>
>

> Perhaps there is, but I can assure you that field is completely
> oversaturated with dealers.
again, you fail to detail why this is.

perhaps its because of a dminishing customer base (and other factors)?
c'mon, lend a little of your knowledge and prove your statements.

> Cell phone resellers, sat tv, ham gear, etc.

requoting what I already stated eh?

>
> I'd say just the ones you illustrated were more than adequate.,,and that

> homes.
around here, that isn't many......
besides, if you go to someone working out of his home, is the work
warranted against defects of the technician? Thats one nice thing about a
real dealer with a tech on staff. they offer warranties.

>

> cb want if for its characteristics and properties _
take a look again. I ahve 3 friends that wortk with border patrol down
here. they don't carry cb's of any kind. in fact, the policy of the border
patrol is to NOT install them or use them. thats what the government
radios are for.

as for the many vehicles oufitted with 102' whips, take a closer look. you
might find the antenna and nothing else.

> working on radios, I'll buy several more from him prior to him doing so.
you'd still be stuck. as more techs retire and no new ones become
available, the cb radios in service don't get repaired as often (thus they
get junked). its cheaper to go out and get a GMRS/FRS radio at a local
sports store and use that (I can get 5-15 mile range out of mine using a
nice homebuilt J-pole antenna for 460 Mhz).

>

> talked to Tim a few years ago, there was a hurricane out in the Gulf
> between us.
irrelivant.
the fact is, there are less and less CB's in use each year. soon it won't
matter as BPL will trash most of the HF bands (thus making any remaining
CB radios unusable).

>
> Hehe,,yea,, I hear that crew every now and then..but no one made me

Hello, gang

Sometimes we get into arguments. I know there have been a few times I haven't been real pleasant, but hopefully we can get along. I am sending this (I received this in my e-mail) just for everyone's perusal.

Although the sentence was for spam and not personal attacks, I wish we *all* would consider that everyone here is a human being and likely a radio enthusiast. I have no problems with posts concerning facts (FCC fines someone - whether cb or ham), but we really should try to avoid some of the personal attacks. Just my opinion - hope some others feel the same, but that is your choice.

******* message follows**********

Buffalo Spammer Sentenced to Jail
Reprinted from Reuters

WASHINGTON (Reuters) - A New York state man who sent out millions of "spam" e-mails has been sentenced to 3-1/2 to seven years in prison, the state attorney general's office has said.

Howard Carmack, known as the "Buffalo Spammer," received the maximum sentence for 14 counts of identity theft and forgery, a spokesman for New York Attorney General Eliot Spitzer said on Thursday.

Carmack sent out 825 million bulk e-mail messages using stolen identities and forged addresses, the court found, and was the first defendant to face charges under the state's new identity-theft statute.

He was found guilty in April.

The forgery conviction fetched the longest sentence, while the other convictions drew shorter sentences of one year to four years. All will be served concurrently, Spitzer spokesman Brad Maione said.

Carmack could be out in 3-1/2 should he behave in prison, Maione said.

Internet provider EarthLink won a $16.5 million US judgment against Carmack last year, and EarthLink officials testified in the criminal trial as well.

"We're satisfied that today's sentencing sends a strong message to spammers, and EarthLink will continue to investigate spammers and work with law enforcement," said EarthLink assistant general counsel Karen Cashion in a statement.

Unwanted bulk messages now account for roughly 83 percent of e-mail traffic, according to filtering company Postini.

Many of Carmack's alleged activities are illegal under a national anti-spam
law that took effect in January, seven months after he was charged.

Frank,

Do a Google search on blackbody radiation. The sun radiates far more than light. There is uv (I'm sure you're aware), plus microwave, plus lower frequencies as well. The temperature of the body determines where the bell curve of frequency of radiation will peak, but there is a heck of a lot of other radiation too.

Hi, It won't work very well at all.
You can probably still get a CB antenna that looks like a regular
AM/FM car antenna. Not the very best CB antenna in the world but it works
OK
and best of all it looks like a regular antenna.
Good luck and happy motoring!!

I have constructed a homeade antenna that is mounted on a trunk-lip mount on a Nissan Sentra. The bottom is 18" of 1/2" copper pipe with a 3/8" theaded adapter soldered in the bottom. There is a 9" long peice of pvc with a 2" diameter 6ga. copper coil around it. Then there is 4" more copper pipe with a 3ft' stainless tip on top. The problem is that it would be too easy to bend the trunk with copper pipe. I thought about a spring but then the whole thing would bend too much when the trunk is opened. If I move the coil down below roof level, the SWR goes way up. I thought about using pvc for the lower part but I can't quite figure out how to construct it. I may take some pictures of what I have. Stay tuned......

>(I'm assuming it does).
>
>Bryan

Length of the coax does not matter if, and -only- if, the shield is properly grounded at both ends. By 'properly grounded' I mean:

1. The radio mounting bracket and negative power lead should be bolted directly to the chassis (hump, dash, etc) and the negative power lead should be as short as physically possible; and

2. The antenna mount is located in a spot that provides a good RF ground for the shield, such as the roof or bumper.

If properly grounding both ends is not practical, and sometimes it isn't, then ground just one end and use 18 feet of coax (or any multiple of 18 feet). The length is based on 1/2 wavelength of the operating frequency, and 18 feet is 1/2 wavelength at 27 MHz. This length will take the RF ground at one end of the coax and mirror it at the other end. So if your radio isn't properly grounded it can 'borrow' the ground from the antenna mount, or vice-versa. But know that this method is not as good as properly grounding both ends of the coax.

If both ends are not properly grounded then it makes no difference what length of coax you use -- the system will suck.

Chris;

Nice home brewed antenna for the mobile. You are right about bending the trunk lip with an antenna that size. Some people use guy wires, made out of nylon rope or string, to take some of the forces off the antenna while driving.

Most people use a form of bumper mount, or the trailer hitch. Either one would let you construct a more robust mount for the antenna. Also I would strongly suggest that you don't use regular lead-tin solder for any area that you have to have high mechanical strength. It will crack I'll guarantee you. You will have to use silver solder in its place.

Also try posting some messages on "rec.radio.amateur.antenna". They don't care if you're a Ham, CBer, or what ever so long as you have an interest in antennas. Some of those guys have already been down the road you're on and can give you some VERY valuable tips on how to go about your project.

Good luck.

yes I agree you do nice work chris one question though the 6ga copper
coil and 1/2 in copper pipe are overkill for CB no need to go that big
unless you are running megawatts. Even with your illegal 100 w amp
you still only need a wilson or equivelent that would be much less
weight and problems. but may be you just like the look of it etc. the
heavy duty badass appearance kind of like car hood hold down pins on a
stock engine lol

KC8LDO, offended the nation and disgraced himself by undermining the
death and tragedy in NYC while comparing it to his personal crusade of
cleaning up the cb channels with:

That's easy to explain. As another poster a short time back said about
Part 95 rules "I don't care", well you see what happens when that mind
set gets applied in a different context. It is very apparent they didn't
care about human life either, including their own.

hi,

I need a cb antenna, trunk lip preferred or could go mag mount
that is less than 33" and can tune to at least once channel.
Got a wilson for the road but got to get into the parking ramp
at work :(

Anyone know of a quality antenna like that who has got
one swr'd to work?

thanks Carl

Thanks. I just wanted to prove to myself that I could make my own antenna and see how well it worked. There are 2 reasons for the large coil. In comparing a few antennas of roughly equal length, the ones with large open coils tend to be more broad-banded. Larger materials also have less resistive loss and more radiating are. The lower part doesn't really have to be 1/2' copper pipe but it was the first thing I thought of. I'm going with copper wire wrapped on pvc shortly.

Well, if it's a mag-mount Wilson, just unscrew the coil/whip assembly when you get to work. Place the cap on it that came with the antenna and you should be good to go... Unless of course, you want to transmit from within the parking garage, but the garage would pretty much drop your transmit range to near Nil anyway, so I am doubting that...

it shouldn't matter if the antenna is resonant. at that point, eny length
of coax will do (however, the shorter, the better loss wise).

no its not. its 18 feet * vf (velocity factor of the coax). in the case of
rg-58 u, its .66 = vf.

from there, the math is easy.

We're talking about grounding on the shield, not in the coax. The
velocity factor of the shield is nearly the same for solid wire which,
for all practical purposes, is 1.

From there, the math is even easier.

rotflmao I dont think mounting 8 lb. of plumbing on your trunk lid is efficient. There are easier ways to get bandwith. for example if you want efficient youd be using a 9 ft whip. even bent over like a bow the 9 ft is more efficient than a 4 ft loaded open air coil model.

What I don't understand is the 18 feet. You have to consider the velocity factor of the coax to arrive at an electrical 1/2 wave. With a typical factor (and they vary considerably) on the order of 70%, that would imply a coax length of perhaps 13 feet to yield an electrical half wave.

Of course, sometimes 1/4 wave matching sections of 75 ohm coax is used when two 50 ohm verticals are fed to bring the total impedance to 100 ohms, which, when combined in a Y, yield 50 ohms to go back to the radio.

Best regards from Rochester, NY
Jim

the open air coil antenna is less efficient because the coil radiates
part of the power and that power is lost.

500. FREE! "THE CB EPROM DATA BOOK" OF FREQ. MODS

Newsgroup: rec.radio.cb
Date: 2004-06-14 00:31:41 UTC
From: Lou Franklin <lou@cbcintl.com>
Message-ID: <bfspc05t902da6mgekvi8oeke1202c7ram@4ax.com>
Source record: 183310

FREE!!

For advanced techs and serious radio hobbyists, we're now offering a FREE copy of our previously published "CB EPROM DATA BOOK" by Martin Pickering. (EPROM = Erasable Programmable Read Only Memory.) We sold it for many years but it's now out of print. This little manual of 60 illustrated pages is an absolute GEM of CB technical knowledge you'll just never find anywhere else. And it's yours for FREE from our Web site.

This book reveals the secrets of advanced channel programming, and picks up where our "CB PLL DATA BOOK" (www.cbcintl.com/pllbook.htm) leaves off. You'll get a thorough background in how these amazing programmable chips can be used to modify many popular CB PLL circuits for expanded frequency coverage. Covers the basic programming techniques, and even includes real PC board artwork for making EPROM circuits. Sample artwork includes EPROM boards for the popular MB8719, PLL02A, ï¿½PD2824, and ï¿½PD858 PLL circuits.

Best of all, the price is right! Download your FREE copy of "THE CB EPROM DATA BOOK" (948 KB Adobe PDF) at:

www.cbcintl.com/docs/EpromBook.htm

Don't forget to check out all our other CB specialty books, plans, kits, & high-performance accessories at:

www.cbcintl.com

SAVE MONEY! We regularly run EBAY auctions in which you can save up to HALF the cost of our most popular CB books and accessories. To see what's currently on sale, double-click the line below:

504. CB REPAIR & MODIFICATION BOOKS AT 40% OFF

Newsgroup: rec.radio.cb
Date: 2004-06-14 00:31:55 UTC
From: Lou Franklin <lou@cbcintl.com>
Message-ID: <pfspc09brh96s4mpffas90hef9t0igeqa4@4ax.com>
Source record: 183314

To learn the technical TRUTH about CB Radio without all the hype from people who are just plain ignorant, check out the following books from CBC International. They're selling right now at a big discounts on our EBAY & AMAZON stores too.

Check it out!

To see exactly what these books look like, plus all the specific, chapter-by-chapter details, see our Web at:

www.cbcintl.com

Some of the books included are:

BOOK #1: THE "SCREWDRIVER EXPERT'S" GUIDE To Peaking Out & Repairing CB Radios. List $25. The most popular "big dummy's" guide ever published on do-it-yourself CB repairs & modifications. Covers peaking of receivers, transmitters, modulation, mike problems, antenna & SWR problems, detailed frequency modifications for both crystal & PLL radios. Loaded with charts, illustrations, and specific instructions for most brands including the new export models. This latest edition also covers slider and broadbanding tricks, FM conversions, and much more!

BOOK #2: THE CB PLL DATA BOOK. List $20. The only complete reference source on CB PLL synthesizer circuits ever published! Detailed PLL theory explained in layman's terms. How they work, and how to modify them for many more channels. Includes specific PLL block mixing diagrams, truth charts, & IC pin function diagrams for nearly every PLL chip ever used. Covers all the most popular U.S. & export chassis, with specific listings of all models using the chip.

BOOK #3: UNDERSTANDING & REPAIRING CB RADIOS. List $42. Giant 370-page technical book for the professional repairman. Picks up where the "SCREWDRIVER EXPERT'S" GUIDE leaves off. Includes circuit descriptions & troubleshooting guide for 23- & 40-Ch., crystal & PLL, solid-state & tube, AM, FM, SSB, CW, American & export models. Covers test equipment (& where to find it), transistor basics, synthesizers, receivers, transmitters, power supplies, T/R switching, antennas, interference, parts & accessory sources. Over 350 illustrations including schematics, charts, and photos. Huge subject index also lets you look up repairs by symptoms. This is "must" reading for any serious CB technician!

For details on our Galaxy-Ranger Service Manual (2nd Ed.) go to:

www.cbcintl.com/galaxy.htm

SAVE MONEY! We regularly run EBAY auctions in which you can save up to

>impedance of the antenna back to the transmitter.

You are both missing the issue regarding velocity factor.

The reason you want the shield RF-grounded at the antenna mount is to
prevent RF from bleeding onto the -outside- of the coax. The reason
you want the radio chassis RF-grounded is to prevent the radio from
floating which also puts RF on the -outside- of the coax. The common
denominator here is "-outside- the coax". So......

Forget the inside of the coax and just focus on the shield for a
moment. Think of a 1/2 wavelength of coax shield as a half-wave
antenna. If one end is properly grounded and therefore fixed at RF
ground, the other end will also be at RF ground. That means if the
antenna end of the shield is properly grounded then the radio chassis
will also be RF-grounded, and vice-versa. This is true -regardless- of
the velocity factor because the RF in this case occurs on the sheild;
i.e, the -outside- of the coax.

And for the sake of mentioning it, it's not a bad idea to use 18' even
if both ends are properly grounded just in case one end looses its

connection due to corrosion, loose screws, bad connector, or whatever. Granted the coax will never be mounted in a straight line like a true 1/2 wave antenna, but it's better than nothing. And if you are really anal about coax length you can trim the line after installation by using a GDO to find the ground node on the sheild.

> Like Frank said if
>the antenna were matched (non-reactive) and properly grounded the
>length of the coax doesn't matter.

I never said anything about the antenna being non-reactive. A non-reactive antenna is almost impossible. Even a resonant antenna will show some reactance at the feedpoint because you can't feed an antenna directly on a node (the only points where an antenna would be non-reactive).

And SWR (antenna matching/resonance) isn't the issue -- the issue is grounding, because if both ends of the coax are not properly grounded (RF ground) then the coax length can be manipulated to fool the radio into thinking it has a perfect SWR at the expense of losing RF from the shield. It also allows a path for RFI to enter your system, and puts RF on your power leads and mic.

Here are my recommendations on this issue. Use them or ignore them, that's your choice. But they are based on fact and not CB voodoo:

1. Establish a good RF ground at both the radio and the antenna mount.

2. Tune the antenna with a field-strength meter.

3. Scratch the numbers off the faceplate of your SWR meter and use it -only- as a go/no-go fault indicator (low = good, high = bad). If you can't ignore the numbers then just throw the damn thing away.

4. Use 18' of coax for added protection against faults.

The sun most definitely radiates noise. Ask any satellite TV user
about "sun outages" during the spring and fall when the sun is in
direct line with the satellites. You can literally watch the noise
floor rise along with the sun. At some point, the noise is high enough
that it starts playing havoc with the S/N ratio of analog signals and
the BER of digital ones.

The sun most definitely radiates noise up and down the spectrum. I am
curious how microwaves (24 GHz) are subject to refraction by the
magentosphere, and whether they are refracted to a greater or lesser
degree than visible light (the effect of which which is negligible).

IOW, solar microwave noise could be refracted onto, and therefore
reflected from, surfaces of the moon that aren't directly illuminated
by sunlight. I'm sure that's the case, but I have no idea if it makes
any practical difference.

>Care to argue that point?

I would. What happens when you bring a solid sheet of conductive
material close to the end of a coil? Eddy currents -- it has
tremendous losses, the Q drops like a rock, and it's inductance is
unpredictable. It's a royal bitch to design a shielded IF/RF coil or
transformer to be used for high frequencies, and shielding is almost
-never- used for power RF coils and transformers unless there is some
serious space between the inductor and shield, hence the popularity of
toroid cores for those applications. And since a bigger coil makes a
bigger field, you need much more 'free space' to maintain a high-Q.
Vertically mounting a big coil above the sheet metal of a vehicle
results in a very lossy coil.

The difference between copper and stainless steel is not very
significant at 27 MHz. What -is- significant is that bare copper will
quickly form a layer of corrosion (visible or not) which will render
an excellent conductor useless for RF. So unless you are willing to
polish and degrease the antenna every day, I'll take the stainless.

I would think that 4 feet would be more than enough distance.
So you would say that a large air wound coil has more loss than a
small diameter coild wound on a solid form?

That's how Dolby works. DBX is 2:1:2 compression/decompression.

>I would think that 4 feet would be more than enough distance.

It would depend on the diameter of the coil. I remember there is an
equation somewhere to determine the loss, but it involves some heavy
calculus and it's too early in the morning for integrals.

>So you would say that a large air wound coil has more loss than a
>small diameter coild wound on a solid form?

No, not necessarily. If the wire diameter is the same, the smaller
coil might easily be more efficient due to lower DC resistance.
Distributed capacitance isn't much of an issue at 27 MHz unless you
have lots of close-wound turns, and even then it's not necessarily a
loss but a factor that affects the coil's reactance. Regardless, there

are very effective winding techniques to reduce that problem. There are many low-loss coil form materials available, such as Teflon, some of the better quality ceramics, and even grooved hardwood makes a decent core at RF frequencies (however, PVC sucks above a couple hundred kHz). There is also the issue of weather conditions that can significantly affect an open coil regardless of whether or not the wire is insulated -- rain/humidity, snow, air pollutants (ozone can make a -=BIG=- difference!), etc. Even the speed of the vehicle can have an effect on the properties of an open coil. For the sake of consistency and longevity, a smaller coil that is sealed from the elements (as a whole) is a far better choice for anyone serious about the issue.

BTW, I wasn't chewing you out or suggesting you were anal. I posted my
reply to the group as a general commentary on the whole issue because
it needs to be covered every now and then.

However, I think that anyone doing a CB installation who would use a
GDO to locate the ground node on their shield probably does fit into
the category of anal-retentive.

I personally like Sierra Nevada Pale Ale, Costal Fog Ale is a
close second. The best beer I had was while traveling Europe,
in Germany of course (I was there during October Fest 1989).
I actually has some pretty good beers in Italy too, mostly
Lagers to which I'm fond of too.

Chris; yes there is, and for that I apologize.

PVC gets very brittle when exposed to sun or cold. You might need to
think about hooking some kind of line to it keep from losing the top
of the antenna in case it breaks.

I have the same problem with low clearances. When I bought my antenna(s) I got a 2' and a 4' I run the 2' around town and local commuting but when on the road swap out to the 4' as long as the antenna is tuned you don't have to retune, just swap and go. Taking it off everyday is a pain even though I always carry a leatherman. I don't know who, but someone makes a quick release system, I have been recluctant to do this because quick release for me is also quick for someone else, even if the CB theft as of late has probably declined :)

I do notice a bit of decreased performance when going to the 2' but for being in a mertopolitan area it serves my purpose well, I don't really DX. The only problem I forsee is the proximity to the roof, I would certainly go with a top load. My antenna is mounts on a firestik stake hole mount at the rear pass side of my truck, I have found the 2' performance is MUCH better there than mounted closer to the cab as many do. Yeah it kinda looks like an RC car and I have to be more careful walking around it as not to whack my head but it's not bad.

My 2' is a Firestik2 and my 4' is a FireFly I have been happy with both and they were purchased at walcott CB, they have been a pleasure to work with! They ship super fast.

http://www.walcottcb.com/

Good Luck!
Chad

Virginian is First U.S. Ham to Accomplish 'Tuna Tin II' WAS: from The ARRL Letter, Vol 23, No 24
Website: http://www.arrl.org/ on June 11, 2004

Virginian is First U.S. Ham to Accomplish 'Tuna Tin II' WAS:
It took him four years, but a ham from Bealeton, Virginia, has become the first US amateur licensee to work all states using a flea-power "Tuna Tin II" transmitter. ARRL member Bob Chapman, W9JOP, recently completed his "QRPp" (less than 1 W output) accomplishment and has received his ARRL Worked All States Award certificate. "Unfortunately, ARRL does not issue a certificate for WAS QRPp," he said. "Mine is endorsed with 'QRP-CW.'"
Chapman, 71, says he actually used two Tuna Tin transmitters to accomplish the feat. He worked and confirmed the contiguous 48 states with a classic Tuna Tin, which uses an inverted tuna can as a chassis. Not only was Chapman running just 250 mW--one-quarter of a watt--he was crystal controlled on 7043 kHz! Chapman says he snagged the last two states, Hawaii (KH6U) and Alaska (WL7WH) using a homebrew 20-meter Tuna Tin, rockbound on 14,060 kHz and also running 250 mW. "No QRO here," Chapman says of his setup. "Just a low-power, low-tech station with a G5RV wire antenna at 50 feet and a 'TiCK' keyer." He uses a vintage Collins 51S-1 receiver.
A ham for 50 years, Chapman further points out that he accomplished his QRPp WAS without any schedules but "just by waiting for the states to pass within my capture area--namely, on my frequency," he said. He also has a QRP Amateur Radio Club International QRPp Worked All States certificate. His wife, Joy, is KA9TTB.
In 2001 Steve Chapman, VE7SL, in British Columbia, Canada, became the world's first amateur to accomplish QRPp WAS using a Tuna Tin II running about 400 mW.

nicolaicarpathia@webtv.net (Nicolai The only thing you throw is lies.
You have been told by the majority of this group your atitude sucks and
you chase me like a loyal mutt.

>You think so?

It's not just me, Frank,,others have told you the same thing, and as
usual, you are incapable of seeing yourself as you are viewd.

>Well, let's find out just who chases who, shall

>we? I propose that for one entire month

Haha,,you didn;t even make one entire weekend, as usual.

>we

>don't refer to each other directly or indirectly,

>by name or by allusion. We will post as if the

>other doesn't even exist.

You have that chance each and every weekend, Gillinad, yet my return on
Mondays or Tuesdays is greeted with your many bright and jolly petitions
invoking my handle which were made by yourself,,taa-daa,,over the
weekend. Your behavior is habitual, obsessive, and none feel you capable
of cure after all these years.,,LOL.

>And you have the same opportunity every time
>you return from the weekend. You post on

>Friday, give me all weekend to respond to

>your post(s), and the first thing you whine

>about the next week is about how poor,

>defenseless you was so brutally attacked over
>the weekend.

That first instinct by yourself to lie gets you in more trouble than you can handle every time, Frank. See, i do not "post" on Friday giving you all weekend to reply to my post. I "reply" on Friday to your cries and rants blaming me for being your personal anti-christ. You will find all my posts on Friday directed to yourself are replies to *your* posts,,,posts with *me* as your topic. Go on,,check them all out and seethe with yet more anger as your favorite person is right as rain again.
You have been taught before if you wish no contact with me, merely exhibit some self-control and void me of your thougths, if that possible. Do not make your topic, do not speak of me,,,,for if you wished no response by myself, you would not invoke my handle. this called communication. This is how usenet works. Athis is how proper communication wroks, despite your many torrid cries of how unhappy you are with the way this system of communication operates, culminating in your failure to start your own fascist, er..moderated newsgroup. Starved for status which you are continually denied and not permitted by myself or any other.

>Yet it is -you- that defends your continued

>participation by whining about how you are

>compelled to respond to every post directed at
>you

"Compelled" is an excellent choice of terminology for the myriad of thread titles you initiate with my handle as your topic..... (chuckle),,,I find it amazing that you fail to grasp the simplest of all,,,,such is exactly how usenet works. When a post is "directed" at one, it is done so to elicit a response. Your fascination and confusion with such a simple concept is astoundingly frightening, then again, simple, proper communication technique, (such as the golden rule to treat others as you would be treated) has always confounded you, elicited confused screams and babbles, and eluded your grasp.

> (except, of course, any dialog which you

>have no chance of spinning, which you

>characteristically ignore or snip).

Never have I initiated or introduced snipping into a thread. Returning your usenet behavior and shoving it down your throat has always been an added bonus not intended by myself,,,but then again, such wouldn't take place if you wouldn't so readily permit it.

_
You've been proved a liar by many, Frank, otherwise, I would agree to this.

>I have admitted lying,

Not at all, The extraction was taken from you in a specific thread when you claimed you didn't care about illegal cb. You had to be shown a post you made a few years ago detailing your reasons for your hositility toward those who don't follow specific FCC rules that make them "illegal cbers".You know the post, the one where you list your reasons for caring about all that you construe unfair.

>but neither you nor anyone else has ever

>provided any proof of such, only delusions and
>groundless suspicions.

See above as your admittance or word regarding must be taken with a grain of salt and nothing more than internet entertainment and can be filed with just about everything else one finds on the net.

>I neither use nor need any sockpuppets,

>Twist. It is -you- that has been caught several

>times using sockpuppets, such as 1mangang

A subject that causes you great pain. If I was 1mangang, who was lmangang?

>and N7VCF@cotse.com. And because -you-

>couldn't get away with it you must blame

>others for doing the same.

Hehhe,,yea, I'm upset because of an internet personality that was here 4 or 5 years ago
that got the best of you. In fact, I have harbored such hostility over your effective and skilled debate with 1mangang or lmangang all those years ago, that your crying about Toll, Jay, and Eitner, gave me just the reason to "blame" you for being Iamnotgeorge2004 as a direct retaliation for this gang fellow that only you invoke many years later..hehehe....see, Gillinad, not only can you not get over yourself, you can't get over things that occurred years ago in your miserable life.,,heehee,,,that's a helluva lot of baggage to carry all the time...no wonder you have problems,,,,and you claim you hold no grudge,,hyuok,,home run for the 1mangang! (or was it lmangang),,(chuckle).

_

You merely escalate your anger under your sock puppets, such as iamnotgeorge2004, _
and use it to maintain your malice and
obsession, while lying and denying it is you, but that's all good, too, as everyone knows your knowledge was soundly trounced by Jay and Toll and Eitner and others and you hold grudges and have attacked them by invoking their names throughout your posting history when they were

nowhere to be found.

>I don't hold grudges, Twist.

Sure you do, Frank. You are quite Twisted, my friend. The fact that you can't even see the forest for the trees is a very pressing and serious problem for you. Frankly, the mere repeated mention by yourself of an internet personality that hasn't posted in years (1mangag, lmangang, Toll, Eitner) illustrates you indeed hold a grudge. Your repeated bitching, whining and moaning about Toll, Eitner and Jay when they haven't posted in some time illustrates the intensity of how the past continues to affect and reek havoc on your bent and Twisted psyche. Not being able to see it yourself is the reason for the laughter you hear directed toward yourself. Those not laughing merely shake their heads with pity for you.

>I give credit where credit is due and discredit

>those that deserve it. Heck, I have even given

>-you- credit for some things over the years.

But what you say means nothing,,,nada,,,zip,,,,I merely enjoy watching internet thugs like yourself become all consumed and ate up with self-created frustration that always leads to self-destruction,,,that a small percentage of those like yourself are unable to comprehend their own deterioration and get over themselves is reason enough to permit you all the razor blades you wish to chew upon.

>But I usually don't include Jay in the list of

>voodoo techs -- he knows his antennas, which
>I can respect regardless of his inconsistent

>statements regarding other radio gear and his

>position on illegal operation.

Another self-contradiction, as you have claimed that those who break the law in any manner are not due respect, and lest you forget, Jay talks dx on his cb. Just another in a long line of bullshit from you, illusttating you talk out both sides of your mouth and don't even adhere to your own claims.

> The voodoo tech

>list includes not just Toll and Eitner, but also

>Skippy, Tnom, Brian, and a few others.

Brian? You mean Griffey in Chicago? Hahaha,,,you have problems with every one who knows more than you.

>And

>you are ignoring the fact that I don't refer to

>Sean and Toll as two different people, as I

>explained before.

Non-sequitur.

>OTOH, Leland hasn't posted in a long time yet
>you "invoke" his name constantly.

Lelnad posts daily. You have defended him and N8WWM and N3CVJ on numerous occasions when it has been proved the lot of you are malicious and all about harassment by any means. Wasn't that long ago you were identified by several on this group of sending viruses to participants..and even if you weren't guilty, the mere fact that you were the number one suspect (save your breath, despite appointing me as your personal savior and anti-christ, it wasn't myself that blamed you) illustrates just how you are viewed in this group. You not comprehending it is priceless.

>And when I was gone for several months you

>"invoked" my name on a weekly basis.

You weren't gone for a few months. You
refrained from posting under your own email and handle for a little over three and a half weeks and began posting again from another ip after having yours ripped and tos'ed from your chubby little hands for tos and aup violations.
It is -you- that regularly "invokes" the names of those whom -you- have a grudge, even when they are not present. This most certainly illustrates YOUR
obsession as one who can't "let it go", or let anything go, regardless the pathetic whines you continue to offer holding yourself as victim.

>You have been whining for years about how

>Leland forged you, yet your 'proof', like all of

>your 'proof', was shredded by Ockham's razor.

You can say it over and over but it simply won;t make it any more so, It wasn't my word,,,it was Dick's word, and you shredded nothing, let alone Ockham, except your own credibility with often repeated lies concerning who blamed Lelnad. Once again, I wasn't even present in the hammie group in whcih Dick identified KC8LDO as forging myself and others.

>Then you defend your grudge by misquoting

>the late DM, a person that can no longer

>defend his own statements.

I didn't misquote Dick, Frank. I presented his post unedited and in its entirety, something that prevents you from functioning coherently. Do you need see it again so you can illustrate just what part you

misinterpret as being misquoted by myself, even though I presented the post isolated and in its entirety? He clearely stated Lelnad was forging myself and Train and Timbo in the hammie groups.

>You also whined about how I butted into your

>business on a public forum,

Not true,,I said nothing of the sort, Frank, any time. Your pretty upset right about now, Frank. What's eating at you in such a profound manner?

>but failing to

>mention that I did so only after you continued

>your malicious attacks on your 'critics' which I

>had managed to silence for the sake of

>newsgroup peace.

LOL,,sure you did. There were no malicious attacks by myself,,,as I had no critics. These "critics" you allude, were limited to N8WWM, KC8LDO, and Kari the Finnish,,er,,,boy...you joined the fray and had your head handed to you,,,several times. Your entire little cliqued out group of "antis" has been shown to be internet bullies and cowards. You have aligned yourself with some real losers, Frank,,,birds of a feather.

>But of course, this won't be any fun unless

>there are stakes involved.

Says you. I have fun all the time.

>So if you think that

>you have the self-discipline to overcome your

>obsessions for one month then name your

>stakes.

Frank, pay attention,,,I have everything I want,,,,you have nothing to offer myself which I didn't already take,,,such was recognized by utmost satisfaction with the manner in which you are viewed.

>Where's that military group, Twist?

Same place as your list of companies you were to present that were suffering interference from illegal cb. Repeating your angered stutters is not getting back on the wagon, Frank. That you suffered so greatly you needed to tell this group you quit drinking and outline the reasons for such, then to watch you fall again and begin that downward familiar spiral the bottle hands you each and every time, must be quite agonizing for you. At least by wearing your alcoholism on your sleeve you gain sympathy, as intelligent individuals recognize your behavior and

problems stem from a sickness and disease.

From: n7zzt@127.0.0.1 (Eric Oyen - N7ZZT)
On Fri, 11 Jun 2004 11:26:36 -0400, Nicolai Carpathia wrote: Well,
sure,,going strictly on your words that cb was becoming nothing more
than a "low margin hobby", it would appear not much activity is taking
place in your area,

>Its not just my words......

>its a provable fact if you just turn on the radio.

(sigh),,turning on the radio and not hearing voices is not a "fact" that
lends to your statement that cb is "nothing more than a low margin
hobby".

>Hell, I heard some skip come through today

>and even that wasn't noisy by comparison to

>15 years ago.

Yet you fail to see the oversaturation?

>Oversaturation? you'd better go into some of

>the finer details of the "opiniuon" you are

>stating.

Certainly. For a city the size you mentioned, it certainly doesn't
require the three cb shops AND trucks stops you mentioned, to take care
of the cb needs of the populace that engages in cb. Couple this with
YOUR words that it's a "fact" that not much radio activity is taking
place in your area and voila,,,,oversaturation.
Kapish?

>I happen to understand a lot more about

>economics than you'd think

What, pray tell, gives you the misinterpretation of any view I may hold
concerning your economic knowledge? It appears a nerve was struck, Eric,
and I wasn't the one who mentioned it.

>(I have, among

>other things, an education in managerial

>accounting, business administration and

>economics <both macro and micro>).

Congratulations. I never questioned your education, but since you brought it up, bragging about such an education yet complaining that you can't find employment illustrates your education isn't quite up to what you present.
Besides, why are you mentioning your knowledge of economics and education? I certainly didn't bring it up.

>you have stated over saturation, yet you

>haven't detailed as to how you reach this

>conculsion....

Sure I have,, and so did you,,,but let's assume I didn't for your sake, Eric. Someone blowing their own horn concerning their education should be able to interpret such going strictly by the amount of cb shops and dealers you claim in your area in addition to your statement that cb is not all that popular in your area. That you failed to draw the analogy is cumbersome to only yourself.

_
Yea, yea,,I've heard it all before,,,,,look, several regs on this group, that shall remain anonymous for the time being, have claimed many times over the past six years that cb was coming to an end, that radios would become vastly more expensive as a natural fallout directly related to what was falsely prophesized to beincreased fines, and that Hollingsworth was to be their personal savior and was the second coming to cleaning up radio and that all kinds of major changes were coming to the hobby that would drastically affect cb use, sales, etc., as we know it. There will always be a niche for someone. One man gathers what another man spills.

>funny, I mentioned nothing about

>hollingsworth, fine structures or anything else

>other than cb is becomming a low margin

>hobby.

Why is that "funny" to you? I mention it as an example of how those not unlike yourself are continually wrong with their statements pertaining to cb. Also, I mentioned nothing about your education nor your knowledge of economics, yet that didn't stop you from introducing it. Such a stance appears hypocritical, Mr, Oyen.

>I hate to say this, but I hear far more many

>people on the frs bands locally than on CB.

>the radios are cheaper, you can buy them

>anywhere (even at a local 7-11 or circle-k) and
>they don't require anything other than a 9 inch

>antenna (full sized) or a rubber duck to work

>(not to mention they work on double-a

>batteries!).

Perhaps there is, but I can assure you that field is completely
oversaturated with dealers.

>again, you fail to detail why this is.

Same reason, but if you need it spelled out: When there is only one
dealer in town, the customers have limited options. When there are many
dealers in town, the customers can select their dealer,,,each dealer
must adjust their prices according to other dealers selling similar, if
not exact wares. Instead of making larger profits on an item, a smaller
profit is made when an item is sold, Such is part of healthy competition
by another dealer. At the risk of you not comprehending another analogy,
the same can be illustrtated with the breakup of the baby Bells. Feds
said the breakup would make for more competition and lower prices for
customers. Yes, it made for more competition, but prices did not come
down (with your self-professed background in economics, it shouldn't be
too difficult for you to factor in inflation and cost of living
adjustments to arrive at this epiphany) and the market is saturated with
long distance providers. Still need "proof"? Go the FTC or FCC website
and read about "slamming" by phone companies,,,the entire practice was
born of a glut of providers, in other words: oversaturation.

>perhaps its because of a dminishing customer

>base (and other factors)? c'mon, lend a little of
>your knowledge and prove your statements.

Already have. Perhaps you can lend some of your "knowledge" instead of
merely presenting what you hear on the radio as example of this "fact"
for which you quest concerning this lack of activity on the cb of which
you speak., Ah never mind, I *know* it's merely your personal opinion
and have no interest in attempting to change your belief that such is
fact.

>Cell phone resellers, sat tv, ham gear, etc.

>requoting what I already stated eh?

Why are you snipping your own posts, Eric? You asked what I referred to
when I said "That field (of which YOU mentioned) was also
oversaturated",,,you inquired and asked what I was speaking of. I
replied that these cell phone resellers of sat tv , ham gear, etc, are
oversaturated. Your selective snipping begs an explanation.

_
I'd say just the ones you illustrated were more
than adequate.,,and that doesn't account for the those you are not aware
of who work out of their homes.

>around here, that isn't many......

If you are speaking of Phoenix, define "many".
  You have no way of knowing how many work from their homes
repairing radios and the like.
The again, your disdain illustrated by your many negative comments over
the years concerning cb and all that relates to it is all the reason
cbers need to keep you out of the loop and uninformed about such techs
and their shops in their homes.

>besides, if you go to someone working out of

>his home, is the work warranted against

>defects of the technician? Thats one nice thing
>about a real dealer with a tech on staff. they

>offer warranties.

Sure,...a whopping 90 days. You must not know it, so I'll take this
opportunity to inform you......some of these techs are retired from
places like AES......working from their home gives them a supplemental
income in their golden years and diminishes their competence in no
manner. I know my tech would fix something that went wrong after one
paid for the service, but then again, judging by our fans in Tampa Bay
after winning world champion titles in sports, the folks here seem a
little more educated than in other large cities, like say, Detroit,,,,we
don't burn or riot,,,we have nice folks here and their initegrity, such
as is illustrated with our well known techs, travels by word of mouth. A
path is beaten to these techs doors and they will often turn away work
unless one was referred by a local who knows the tech.

>Not here.

Why am I not surprised?
Hunters and fishermen use cb all the time, as
do many other businesses,,,,,road workers, construction, fishing vessels
(who have our "own" freqs,,,:),.

>I'm not sure where "there" is.

Apparently, that's not all of which you are uncertain.

I've been through Arizona. Let's see,,,border patrol has them,,,most
personal four wheel drives, especially the Broncos and Jeeps I've seen
in the barrens of the desert sport cb antennas. FRS/GMRS radios are
useless in some areas and at many events. Turn on a FRS at a campground
in the summer, or Disney World...you get the picture. Those who want the
cb want if for its characteristics and properties _

>take a look again. I ahve 3 friends that wortk

>with border patrol down here. they don't carry

>cb's of any kind. in fact, the policy of the

>border patrol is to NOT install them or use

>them. thats what the government radios are

>for.

I disagree and doubt you, Eric, as the border patrols don't use cb for their communications, but to listen in on those who DO use them for smuggling in illegal aliens and running drugs. And I guranteee that if one were to contact the border patrol directly through official channels, one would find no such policy exists as you claim. The border patrol is a tax supported entity and as such, your claim can easily be disproved,,their policies are open books.

>as for the many vehicles oufitted with 102'

>whips, take a closer look. you might find the

>antenna and nothing else.

(sigh),,whatever you say, Mr. Education.

_
See, where the signal is not only unobstructed by flat land and water, cb is quite popular, way more so than VHF. It is not any big feat to talk across the state or across the Gulf, especially the way its been lately with zero noise levels at night. Such cb popularity would support a great cb shop just fine in this county. As it stands, most take their radios north to a super tech,,,,ask Geo to ask Mason about him,,he knows the tech, and the dude makes big bucks, is reasonably priced, and does great work. I have a radio he peaked, tuned and converted many years ago and the only thing that ever needs replaced is the battery in the mic...I'll never part with it and if the tech should retire ot stop working on radios, I'll buy several more from him prior to him doing so.

>you'd still be stuck.

"Still" implies a current state of such, of which I have yet to experience.

>as more techs retire and no new ones become
>available, the cb radios in service don't get

>repaired as often (thus they get junked).

Completely untrue. There exist a plethora of tube type radios still in operation, in addition to more modern (by comparison) radios such as the Cobra 2000.

>its cheaper to go out and get a GMRS/FRS

>radio at a local sports store and use that (I can
>get 5-15 mile range out of mine using a nice

>homebuilt J-pole antenna for 460 Mhz).

And I can get worldwide range out of my cb
with a cheap fiberglass stick bungeed to the mast on my boat using

27.555.
Besides, you gonna carry around a J-Pole?

_
Incredible. As one of my disciples just illustrated for you, they are
claiming no dx at all...absolutely amazing how one can feel that because
they hear no dx, the rest of the country isn't receiving any. I always
have at least the espanol dx coming in,,,and blasting across the Gulf to
Texas or any of the islands is rarely a problem. Heck, the last time I
talked to Tim a few years ago, there was a hurricane out in the Gulf
between us.

>irrelivant.

But Eric, it's no more irrelevant than your economic or educational
background which you invoked, or your J-Pole when we were speaking of
mobile operations, or your invocation of GMRS and FRS when we were
speaking of cb.

>the fact is, there are less and less CB's in use

>each year.

Cobra's recent release of their quarterly financial report disagrees
with you. They sold more mobile cb radios this year in a four month
period than all of last year.
There is a fact for you to digest. Perhaps you can offer a "fact" of
your own instead of merely claiming something and calling it a fact?

>soon it won't matter as BPL will trash most of

>the HF bands (thus making any remaining CB

>radios unusable).

Works both ways, In fact,,,,the only ones who may continue to operate
unimpeded may be the high powered cb operators with huge linears and
those on open water away from such direct sources of interference.
Imagine that.

_
Hehe,,yea,, I hear that crew every now and
then..but no one made me laugh harder than Port-a-potty Charlie.

>hehe. oh yeah. I still hear the nunch of them in
>there right now (and there is a little light skip

>from ohio comming through, but its not string

>enough to overcome the locals.

>DE N7ZZT

>Phoenix, Arizona

I talked to Show Low Arizona Sunday morning at 2:40 AM with 3 watts on ssb. The rains came late this year, arriving over the weekend, but they finally came. We had a little over 3.5 inches of rain in a two hours, but the seas barely even chopped and made for an interesting weekend.....not to mention the dx it brought to the 11 meter band.

Frank Gilliland wrote:
Here are my recommendations on this issue. Use them or ignore them,
that's your choice. But they are based on fact and not CB voodoo:
1. Establish a good RF ground at both the radio and the antenna mount.
2. Tune the antenna with a field-strength meter.
3. Scratch the numbers off the faceplate of your SWR meter and use it
-only- as a go/no-go fault indicator (low = good, high = bad). If you
can't ignore the numbers then just throw the damn thing away.
4. Use 18' of coax for added protection against faults.

_
Number 4 is pure bullshit. The coax length doesn't matter in this
application and any "added protection" one MAY gain from using your
specified length is so marginable it is useless when applied to cb.

559. Re: Ideas for a homemade mobile antenna.

Newsgroup: rec.radio.cb
Date: 2004-06-15 05:32:43 UTC
From: Chris <spadfly@earthlink.net>
Message-ID: <%Rvzc.5352$Wr.357@newsread1.news.pas.earthlink.net>
Source record: 183369

Just an update for anyone following this thread. I tried the pvc lower half with good results. I just did a very loose spiral of copper wire around the pvc. I was wrong on a couple of things, though. The antenna in the picture has 12" of copper pipe at the bottom, not 18". The pvc section was 18". Anyway, there was no difference in performance but it's still not flexible enough for the trunk mount. The other thing I did was compare it to a trunk-mounted 3 ft. antenna by antenna specialists. The 2 signal reports I got showed that my antenna won. The numbers I got from 2 people in different directions were 5 and 2 db on my antenna and 2 .5 and 1 on the Antenna Specialists. It's up rather close to the rear window. I wonder if either antenna would do better closer to the back of the trunk.

In your opinion. The subject has nothing to do with that. It has to do with a bent over antenna becoming a poor antenna.

Amplitude Compandored Side Band. It's a narrow bandwidth single
sideband modulation technique which was first proposed when UPS was
handed a 2 Mhz chunk of the 220 Mhz ham band.

Such a blatant and easily proven lie is why I, even after having
admitted to lying in the newsgroup, have much more integrity than you
can ever hope to have.

> Returning
>your usenet behavior and shoving it down your throat has always been an
>added bonus not intended by myself,,,but then again, such wouldn't take

>place if you wouldn't so readily permit it.

My "usenet behavior" is available for everyone to see on google. So is
yours, although much of yours is disguised. You shouldn't let people
like me bother you so much -- just because you are too afraid put your
name to your words (to the point where even your sock-puppets have
sock-puppets), that is no reason for you to get obsessed about people
who can be honest.

>_

>
>
>Hehhe,,yea, I'm upset because of an internet personality that was here 4
>or 5 years ago

Is that what you call your sock-puppets? Internet personalities? Damn,
Twist, you are more disturbed than I suspected. Don't you see what's
happening to yourself? Your paranoid schizophrenia has not only forced
your splintered mind into a multiple-personality disorder, but it has
also justified the disorder as necessary for the execution of your
"golden rule" of revenge (i.e, "do unto others so they will do unto
you and subsequently justify you doing unto others first"). Hmmmm....
so you beat your dog because you feel it will bite you in the future,
and when it finally bites you, you then feel vindicated for having
beat your dog. That's -REALLY- twisted, Twist!

>that got the best of you. In fact, I have harbored such hostility over
>your effective and skilled debate with 1mangang or lmangang all those
>years ago, that your crying about Toll, Jay, and Eitner, gave me just
>the reason to "blame" you for being Iamnotgeorge2004 as a direct
>retaliation for this gang fellow that only you invoke many years
>later..hehehe....

And there is an example of Twisty's "golden rule" in it's finest form.
The fact is I rarely mixed it up with your "internet personalities" of
1mangang -or- lmangang. However you did send me an email which I
posted and which exposed your webtv IP in the header. Is that the
foundation of your grudge with me? That I posted proof of your fake
identity which you basically handed to me on a platter? You should be
whining to the mirror, Twist..... oh, that's right, you have this
issue about taking responsibility for your own actions -- you can't.

>see, Gillinad, not only can you not get over yourself,
>you can't get over things that occurred years ago in your miserable
>life.,,heehee,,,that's a helluva lot of baggage to carry all the
>time...no wonder you have problems,,,,and you claim you hold no
>grudge,,hyuok,,home run for the 1mangang! (or was it

>bitching, whining and moaning about Toll, Eitner and Jay when they
>haven't posted in some time illustrates the intensity of how the past
>continues to affect and reek havoc on your bent and Twisted psyche. Not
>being able to see it yourself is the reason for the laughter you hear
>directed toward yourself. Those not laughing merely shake their heads
>with pity for you.

It wasn't me that brought up the issue of voodoo techs. But of course
you can't believe that since you still think I'm "iamnotgeorge2004".
Now I'm curious as to what would happen if I said that I -was- the
"internet personality" in question -- after all, you yourself said
that I am a liar and that I can't be trusted. So if I proclaim myself
to be "iamnotgeorge2004", are you going to bounce back and say that
I'm not? I doubt it. LOL!!! From now on I'll neither admit nor deny
any of your delusions -- it's more fun that way!

>>I give credit where credit is due and discredit

>Another self-contradiction, as you have claimed that those who break the
>law in any manner are not due respect,

I never said anything of the sort, Twist. Respect is earned. You
haven't figured out how to earn any respect from anyone, so don't
start whining when someone else earns -my- respect.

> and lest you forget, Jay talks dx
>on his cb. Just another in a long line of bullshit from you,
>illusttating you talk out both sides of your mouth and don't even adhere
>to your own claims.

You mean like when you agreed to take our conversation to email on the
clearly-stated condition that I participate in the military group of
your choosing? So where is that group, Twist?

>> The voodoo tech
>
>>list includes not just Toll and Eitner, but also

Well, at least you didn't use it as a noun this time. But you really need to lay off those hyphens -- they will give you away every time, Leonard. LOL!

>>OTOH, Leland hasn't posted in a long time yet
>>you "invoke" his name constantly.
>
>
>
>
>Lelnad posts daily.

Really? Which sock-puppet do you think -he- uses?

> You have defended him and N8WWM and N3CVJ on
>numerous occasions

I have never defended Adair. On the contrary, I have stated many times that I do not agree with his methods (if they can actually be called 'methods'). Hall and Scott (and that's Leland Scott, just in case some dopehead thinks I'm talking about Scott69) are perfectly capable of defending themselves, especially against your paranoid accusations.

>illustrates just how you are viewed in this group. You not comprehending
>it is priceless.

You still have a problem with facts, Twist: Sideband was the first person to make mention of the alleged virus, and he accused Voobner. You and your sock-puppets often suggested that I was Voobner. But the whole matter seemed to come to a close after Tim admitted creating the file and sending it to Voobner. The copies I received had no virus, and Sideband never posted a header to prove it was from Voobner or

anybody else. IOW, your perceptions are in conflict with the facts as usual.

>>And when I was gone for several months you
>
>>"invoked" my name on a weekly basis.
>
>
>You weren't gone for a few months. You
>refrained from posting under your own email and handle for a little over
>three and a half weeks and began posting again from another ip after
>having yours ripped and tos'ed from your chubby little hands for tos and
>aup violations.

You're not playing the game, Twist. You are supposed to whine about how I was only gone for 2-1/2 months, after which I would quote the paranoid response you gave upon my return -- "you were never gone". And none of my ISPs have ever TOSsed me as you claim but cannot prove (or even come up with any of your semi-suspicious conincidences to support such a lame accusation).

>It is -you- that regularly "invokes" the names of those whom -you- have

Cool. Then dbx should work with CB. I'll give it a shot this summer.

how about "no.".

there are reasons for not going on the "freeband" (as its called).
how about these reasons:

1. other allocated services use these from time to time

2. you can/will be fined by the FCC (and in extreme cases, even your
equipment will be confiscated and sold or destroyed)

3. loss or revocation of other FCC licenses (such as ham, commercial, etc)

4. JAIL TIME (this has been known to happen).

Need I say more?

Yeah, if you really want to improve the efficiency of your antenna,
bend it over and put the high voltage node close to a large mass of
metal. LOL.

Well mine doesn't and a decent antenna would have a stiff enough
whip not to do that. He was talking about bending it over like the
"Barney Phife" mobile.

I didnt say the whip was close to a large mass of metal I said bent
over like a bow and that means in free space, assteroid.

LOL!!! I love it. All I do is type Ditto to "LMAO" and notice Geo calls ME a hypocrite. He should talk, right BP. He defends Doug a known Felon, repeater jammer, porn poster, spammer, nut case. Leland defends Doug too, so George has no legs to stand on when calling other people hypocrites.
Landshark
_
Frank and Hall and both ran to defend N8WWM on many occasions, too. This little group is what comprises the "akc" that Frank always refers. Hell, "AKC" is one of Frank's favorite terms,,google THAT term and see who pioneered it,,,Doug, Frank, Lelnad, Geogre, and Hall..in that order.

> I have also NEVER

>defended any actions that Doug has been

>proven guilty of.

That's only because you claim those reported by the FCC on the rainreport
do not constitute guilt of which the FCC claims..
Nevertheless,,,here are but a few of your defenses of Dogie. As pertaining to his bust, taken from "king of clowns busted" and "n8wwm makes rainreport""

N3CVJ wrote:
>" ....the complaint was withdrawn because

>there was either insufficient evidence, or it

>was

>shown that Doug was not the person doing the
>jamming."

No,,the complaint was NOT withdrawn, as is standard procedure, Dogie was sent a warning via certified snail mail, like the majority of other first time offenders.
Here's my personal favorite personification fo what makes you the grand mastah poobah who holds court in the Hypocrite Hall....the one of you justifying Dogie's illegal actions by pointing to others.......

>"Whatever he did, he did because he doesn't

>like people like you, who have little respect for

>the law.

Of course, we have the more entertaining, liberal, tear-jerking, choker you wrote in regards to Doug getting busted.... :

>I have a habit of standing up for the little guy,

>when a bunch of people gang up on them.

>especially when the little guy is right.

Hahaha...no you don't Davie. In fact, you can illustrate NO thread, NO topic in which you "stood up for the little guy" where a " bunch of people gang up" on him. And Dogie was not right, at any time.
The ONLY people you have ever defended in here have been N8, Lelnad, and Frank.
In fact, google Dogie's call, along with "sandbagger" and you are right there in each and every thread, arguing vehemently and acting like Dogie's arm-chair lawyer,,,,joined by the three stooges of Frank, Lelnad, and Geogre.
But,,,,let's illustrate how close you actually claimed you were to the situation.....you wrote:

>".....there are people, that are in the know,

>that have filled me in on some of the smaller

>details".

The FCC were the ones "in the know",,,not your mysterious non-existent "people". The complaint came from club members (those "in-the-know"). And then here is the one where you claim it could be Chuck-eye who was impersonating Dogie to frame him and the possibility was being investigated by the FCC.....hehhhehe.....ah, never mind,,the post is there in those threads for all to enjoy,,,,, but don't say you didn't defend Dogie when he got busted. It's an outright lie.

All valid reasons, so I wondered why you had to embellish? No one ever
went to jail for freebanding alone.... none ever went to jail with for
freebanding with another, either <g>!

I tried a "crazy" idea years ago. Two commercial pitch transposers. Drop frequency down and turn on a narrow filter. Voice quality is not super, but not bad and it used half of the bandwidth. Can cut qrm quite a bit.

Best regards from Rochester, NY
Jim

Fraank Gilliland wrote:
>I don't hold grudges, Twist.

Sure you do, Frank. You are quite Twisted, my friend. The fact that you can't even see the forest for the trees is a very pressing and serious problem for you. Frankly, the mere repeated mention by yourself of an internet personality that hasn't posted in years (1mangag, lmangang, Toll, Eitner) illustrates you indeed hold a grudge. Your repeated bitching, whining and moaning about Toll, Eitner and Jay when they haven't posted in some time illustrates the intensity of how the past continues to affect and reek havoc on your bent and Twisted psyche. Not being able to see it yourself is the reason for the laughter you hear directed toward yourself. Those not laughing merely shake their heads with pity for you.

>It wasn't me that brought up the issue of

>voodoo techs.

It is you that continues to invoke Eitner and Toll's name.

>But of course you can't believe that since you

>still think I'm "iamnotgeorge2004".

Illustrating how profoundly what I believe impacts your life.

> Now I'm curious as to what would happen if I

>said that I -was- the "internet personality" in

>question -- after all, you yourself said that I am
>a liar and that I can't be trusted. So if I

>proclaim myself to be "iamnotgeorge2004",

>are you going to bounce back and say that I'm
>not?

Impossible. You are unable to proclaim yourself iamnotgeorge2004. I already proclaimed you he, so there is no need for you to comment on it at all, unlesss, of course, you are either desperately trying to convince another you are not he, or are once again so encapsulated with what I believe.

> I doubt it. LOL!!! From now on I'll neither

>admit nor deny any of your delusions -- it's

>more fun that way!

As long as I'm having fun and you claim to be having fun, you should try it without becoming personal and making me your topic. See if you are able to entertain yourself without myself being involved in your world.

>I give credit where credit is due and discredit

>those that deserve it. Heck, I have even given

>-you- credit for some things over the years.

But what you say means nothing,,,nada,,,zip,,,,

>uh huh. right. sure. Does anybody believe

>that?

> .....anybody?

Sure, Frank,,those who have the good sense not to waste their time with you,,of course, you accuse me of being 12 different people at this point in four different states, so it's easier to say twistedhed is the internet personality of all who have ever exposed you for the fraud you are, and disagreed with you, Frank. This way, you only appear crazy to those of us who really know you're a dishonest alcoholic who can't maintain sobriety.

_
I merely enjoy watching
internet thugs like yourself become all consumed and ate up with self-created frustration that always leads to self-destruction,,,that a small percentage of those like yourself are unable to comprehend their own deterioration and get over themselves is reason enough to permit you all the razor blades you wish to chew upon.

>Now I'm an "internet thug". When did I get

>demoted from being an "internet terrorist"?

>LOL!!!

Why don't you ask whoever referred to you as an internet terrorist. You really haven't a clue who you're talking to these days, Frank. You're swinging at ghosts and have been reduced to complaining about me in your personal email to several newsroom regs,,,,,talk about a serious depressive and psychological issue. I always knew I captivated you and my loyal worshipers of Dogie and Davie and Lelnad, but I had no concept of to what extent until recently.

>But I usually don't include Jay in the list of

>voodoo techs -- he knows his antennas, which
>I can respect regardless of his inconsistent

>statements regarding other radio gear and his

>position on illegal operation.

Another self-contradiction, as you have claimed that those who break the law in any manner are not due respect,

>I never said anything of the sort, Twist.

Sure you did, Frank. I even slapped you with it a few times until you cried about,,,what else,,,,,,,,,,,memmememe..:)

>Respect is earned.

Google that, my plagiaristic fiend!

>You haven't figured out how to earn any

>respect from anyone,

That's always been your problem, Frank. You get no respect anywhere so you come into a cb room thinking you'll get it automatically, only you were found to be an arrogant jerk.

>so don't start whining

>when someone else earns -my- respect.

I wasn't whining at all,,merely pointing out your self-contradictions. No one is losing any sleep over what you think or don't think of them, let alone any respect you may or may profess for one. As I expressed when you claimed you have defended and agreed with posts I have written, that means nothing. You are near the aardvark on the scale of evolution, yet below the monkey, sucking up what bugs you are given, yet fostering great admiration via mimicry. Not quite grasping the rung of which you cling on the ladder of evolution is a bonus to bothering to witness your self-crucifixion.

_
and lest you forget, Jay talks dx
on his cb. Just another in a long line of bullshit from you,
illusttating you talk out both sides of your mouth and don't even adhere to your own claims.

>You mean like when you agreed to take our

>conversation to email on the clearly-stated

>condition that I participate in the military group
>of your choosing?

Not at al. I mean like the one where you claimed you would contact the businesses allocated to the freeband, which you said were suffering interference from illegal cbers and you would post the proof here in this group. I mean like the claim *you* invoked your personal occupation, claiming you worked for a business legally permitted to transmit on the freeband.
For some reason, you feel you have the right to demand something of

another for which you refuse to provide yourself.

>So where is that group,

>Twist?

Provide for your claims, I'll provide for mine. After all, you made the claim first and went as far as to claim you would contact those businesses on your own,,,,,no one asked you to do that, as we knew you were full of shit,,,yet, you insisted,,,the results were predictable,,,,,when questioned, you would insult, evade the topic, and run, run, run like the wind. So, provide your contacts from these business, I'll provide the group of which you beg,in fact, I'll post the url here on the group and everyone can watch you curl into the fetal position and deteriorate even further.

>The voodoo tech

>list includes not just Toll and Eitner, but also

>Skippy, Tnom, Brian, and a few others.

Brian? You mean Griffey in Chicago?
Hahaha,,,you have problems with every one who knows more than you.

>Yes, Brian Griffey, the tech-wannabe who

>hacked a "Class-C linear", claimed that linear

>operation is not required for SSB, and thinks

>the 'flywheel effect' happens without a

>resonant tank.

>And

>you are ignoring the fact that I don't refer to

>Sean and Toll as two different people, as I

>explained before.

Non-sequitur.

>Well, at least you didn't use it as a noun this

>time. But you really need to lay off those

>hyphens -- they will give you away every time,

>Leonard. LOL!

Leonard, am I now? Is this where you distant yourself from your claims that I was "absolutely" Dave from,,,where was it again? Ah, it doeesn't atter,,,someone is watching you swing at ghosts and kicking you down a very long and dark rabbit hole.

>OTOH, Leland hasn't posted in a long time yet
>you "invoke" his name constantly.

Lelnad posts daily.

>Really? Which sock-puppet do you think -he-

>uses?

You shouldn't be so over concerned with what I think and take such issue with thinsg,,,such as the fact that only you cry about eitner and toll from time to time and front them off by name. Someone else may think you are trying to make an argument that you aren't iamnotgeorge2004.

_
 You have defended him and N8WWM and
N3CVJ on numerous occasions

>I have never defended Adair.

Hehhe,,sure you have. I called him the pound puppy,,,my dogie on a leash and you fell right in with him and his "akc". In fact, you are the one who continues to bring to the group the terms "akc" and "keyclown".

>On the contrary,

>I have stated many times that I do not agree

>with his methods (if they can actually be called
>'methods')

Yes, you have stated this, but it is in direct contradiction to many of your posts saying otherwise.

>. Hall and Scott (and that's Leland Scott, just

>in case some dopehead thinks I'm talking

>about Scott69) are perfectly capable of

>defending themselves, especially against your
>paranoid accusations.

But of course they are,,ony,,,google is no accusation. One can google N8wwm in this group and go back to the beginnings and see only yourself and davie and lelnad defending Dogie.

_
  when it has been proved the lot of you are malicious and all about harassment by any means. Wasn't that long ago you were identified by several on this group of sending viruses to participants..

>Wrong:

Right. Randy accused you right after several others of us received similar emails. You never could comprehend that you can;t send me a virus on webtv. If you need to see the post, say it, but stop lying,

Frank. It illustrates how desperate you are in addition to your anger
and alcoholism you are dealing with.

_
and even if you weren't guilty, the mere fact that you were the number
one suspect (save your breath, despite appointing me as your personal
savior and anti-christ, it wasn't myself that blamed you) illustrates
just how you are viewed in this group. You not comprehending it is
priceless.

>You still have a problem with facts, Twist:

>Sideband was the first person to make

>mention of the alleged virus, and he accused

>Voobner.

And Randy accused you, and several of us agreed. You have always lied
about the facts, Frank. So what if sideband was the first to mention
it,,,you were blamed and for damn good reason. You're breaking your back
over this topic as much as my referring to you as iamnotgeorge2004.

> You and your sock-puppets often suggested

>that I was Voobner.

> But the whole matter

>seemed to come to a close after Tim admitted

>creating the file and sending it to Voobner.

>The copies I received had no virus, and

>Sideband never posted a header to prove it

>was from Voobner or anybody else. IOW, your
>perceptions are in conflict with the facts as

>usual.

The "fact" is, sideband has never been caught in a lie in this ng, you
have, despite your concern with *my* perception.

>And when I was gone for several months you

>"invoked" my name on a weekly basis.

You weren't gone for a few months. You
refrained from posting under your own email and handle for a little over
three and a half weeks and began posting again from another ip after
having yours ripped and tos'ed from your chubby little hands for tos and
aup violations.

>You're not playing the game, Twist. You are

>supposed to whine about how I was only gone
>for 2-1/2 months, after which I would quote the
>paranoid response you gave upon my return --
>"you were never gone".

You weren't gone.

>And none of my ISPs have ever TOSsed me

>as you claim but cannot prove

Sort of like you and your claims,,,,

>(or even come up with any of your

>semi-suspicious conincidences to support

>such a lame accusation).

Exactly like you and your unsupported claims.

_
It is -you- that regularly "invokes" the names of those whom -you- have
a grudge, even when they are not present. This most certainly
illustrates YOUR
obsession as one who can't "let it go", or let anything go, regardless
the pathetic whines you continue to offer holding yourself as victim.

>You have been whining for years about how

>Leland forged you, yet your 'proof', like all of
y

>our 'proof', was shredded by Ockham's razor.

You can say it over and over but it simply won;t make it any more so,

>Gee, that's what I have been telling you all

>these years that you have been accusing me

>of being N7VCF. Maybe if you repeat it a few

>more times the Identity Fairy will hear you and
grant you a wish.

It wasn't my word,,,it was Dick's word, and you shredded nothing,

>Speaking of 'shredding', there can't be much

>left of Dick's shirt-tail after all your clawing and
>scratching.

Which has proven you a liar each time you claim it was I who orginally
identified lelnad as a forger...as it was Dick. Call it whatever you
may, you were caught lying again. Merely pointing to Dick's post when
you continue to attempt and lie and say his post was distorted, when it
was presented unedited, illustrates you have no interest in any truth

whatsoever, but a malicious, personal agenda and will lie about a deceased man in order to carry out the manner in which you find your pleasure.

_
 let
alone Ockham,

>You, a "self-professed" "professional

>journalist",

Not "self=professed", Frank,,your alleged career is "self-professed",Lelnad's career is self-professed,,,,you,,,AND Lelnad, have inquired about my career,,,,hence, it is not "slef-professed", chubby, but glad to see my words continue to impact you so.

>never heard of Ockham's razor!

>And if that wasn't bad enough you didn't even

>have enough brains to look it up.

>ROTFLMMFAO!!!!!!

  except your own credibility with often repeated lies concerning who blamed Lelnad. Once again, I wasn't even present in the hammie group in whcih Dick identified KC8LDO as forging myself and others.

>There you go with another attempt at

>"truth-by-repitition". Thank goodness for

>Google.

Yes,,,thank goodness for google,,,I wasn't in the thread, Frank, as it was in a hammie room. You must be into the hooch by now to try such blatant lies,,but then again, we do recognize your behavior is born of a disease.

_
>Then you defend your grudge by misquoting

>the late DM, a person that can no longer

>defend his own statements.

I didn't misquote Dick, Frank. I presented his post unedited and in its entirety,

>You posted it out of the context of the thread

>and into the context of your obsession with

>Leland.

What context was that? I said Lelnad forged me, you said he didn;t, I claimed Dick identified him as such, you claimed Dick did no such thing. I posted his thread, unedited, by itself, and it clearly said Lelnad was forgin myself, Tim and Train in the hammie group. You lied, Frank.

_
something that prevents you from functioning coherently.

>The context of the thread prevents your claim

>from functioning coherently.

Do
you need see it again so you can illustrate just what part you misinterpret as being misquoted by myself, even though I presented the post isolated and in its entirety? He clearely stated Lelnad was forging myself and Train and Timbo in the hammie groups.

>Allow me:

>http://tinyurl.com/2sapq

I don;t bother to click on your links, Frank, but I have a feeling you failed to present the post of Dick identifying Lelnad as a foger. Now what would cause you to not post that lionk, eh Frank?

>And I'm even going to add that link to my sig f

>ile!

Another to dwell upon,,hehhe,,what an obsession!

>You also whined about how I butted into your

>business on a public forum,

Not true,,I said nothing of the sort, Frank, any time. Your pretty upset right about now, Frank.
What's eating at you in such a profound manner?

>You don't remember posting this: "Wrong. You
>stuck your nose into someone elses business.
>I mentioned you not once until you interefered

>and began taking sides of the pornposting

>posse."?

It says nothing about a publiuc forum, Frank. In fact, why not post the link to that thread? Oh, but wait, that would present that post in context, rendering what you attempt to convey as utter bullshit,

>Strange, looking through google it sure looks

>like you posted that line. Matter of fact, it looks
>like most of 2001 was spent by you whining

>about how I butted into your business.

Not true, Frank, but you go on making your posts and thread topics about me and tell the world how its my fault.

_
>but failing to

>mention that I did so only after you continued

>your malicious attacks on your 'critics' which I

>had managed to silence for the sake of

>newsgroup peace.

LOL,,sure you did. There were no malicious
attacks by myself,,,as I had no critics. These "critics" you allude, were limited to N8WWM, KC8LDO, and Kari the Finnish,,er,,,boy...you joined the fray and had your head handed to you,,,several times. Your entire little cliqued out group of "antis" has been shown to be internet bullies and cowards. You have aligned yourself with some real losers, Frank,,,birds of a feather.
>As I said before, thank goodness for google.

Exactly.

>But of course, this won't be any fun unless

>there are stakes involved.

Says you. I have fun all the time.

>I suppose you do; that is, of course, if your

>idea of fun is to spend half the day in front of

>the computer, the other half in front of the TV,

>and only taking time out to raid the fridge and

>cash your welfare check.

Profound.

>So if you think that

>you have the self-discipline to overcome your

>obsessions for one month then name your

>stakes.

Frank, pay attention,,,I have everything I want,,,,you have nothing to offer myself which I didn't already take,,,such was recognized by utmost satisfaction with the manner in which you are viewed.

>Where's that military group, Twist?

Same place as your list of companies you were to present that were suffering interference from illegal cb. Repeating your angered stutters is not getting back on the wagon, Frank. That you suffered so greatly you needed to tell this group you quit drinking and outline the reasons for such, then to watch you fall again and begin that downward familiar spiral the bottle hands you each and every time, must be quite agonizing for you. At least by wearing your alcoholism on your sleeve you gain sympathy, as intelligent individuals recognize your behavior and problems stem from a sickness and disease.

>Yes, you do suffer from a disease. It's called

>'excusum ad-nauseum'.

>Where's that military group, Twist?

Where's that business list, Frank?

==========

6 seconds. Much less time than you dreaming you have a research facility in
your trailer.

593. Another classic Twisted contradiction

Geo, I'm quite quick on my feet, and I'm an asshole. But then again, I'm not a malicious asshole. Most things I do are in good fun. The way I see things, albeit sometimes myopic, is that people need to understand that they don't really matter in the grand scheme of things. That's my purpose with most of my comments. Any of us could leave Earth tomorrow, and would it matter? Not a bit. To our families and friends, yes, but in the bigger picture, not at all. That's why I *sometimes* enjoy hassling you and others here. I have no hate for anyone here. You can't hurt me. The only individuals who *can* do that are people you allow to do so.

Toodles until I again deem you worth my time,

Randy

596. Nicolai Carpathia = Antichrist

Frank, do you know who "Nicolai Carpathia" happens to be? It is the name of the character in the "Left Behind" series of Christian books about the end times. Nicolai Carpathia is the name of the Antichrist in that series. Pehaps a most appropriate name for our poster.

>Frank and Hall and both ran to defend N8WWM on many occasions, too.

.....hmmmm, when did I ever do that? I seem to recall as early as Jan
of 2001 that I didn't agree with his methods, but I also pointed out
that he was just mirroring the behavior of those that didn't like his
pro-legal position. And one of those people (and probably several of
your "internet personalities") was you, Twisty. If I was defending him
then I was also defending you. So what are you whining about?

> This
>little group is what comprises the "akc" that Frank always refers. Hell,
>"AKC" is one of Frank's favorite terms,,google THAT term and see who
>pioneered it,,,Doug, Frank, Lelnad, Geogre, and Hall..in that order.

Oh really? I don't think I have ever typed "akc" in any of my posts
until now. But just for kicks, let's see where this term originated:

http://groups.google.com/groups?hl=en&lr=&ie=UTF-8&c2coff=1&safe=off&selm=93illt%24j9f%241
%40nnrp1.deja.com

And if you want the first occurance of "AKC" in rrcb then:

http://groups.google.com/groups?hl=en&lr=&ie=UTF-8&c2coff=1&safe=off&selm=1998032617492400
.MAA09898%40ladder01.news.aol.com

So have you found a job yet? Or do you still make your mommy work two
jobs to support you?

>http://biblebookstore.com/biblebookstore/group_548.htm

I've heard the name before, as well as the literary series. I've also
heard that the author tends to interpret the book of Revalation a bit
too literally. It doesn't matter since those are just a few drops in
the huge pro-apocalyptic media bucket. Seems a lot of people have a
morbid fascination with global annihilation, and Christianity has it's
fair share of nuts. The only difference is that the Christian whackos
embrace their perversion by calling it a study of religious doctrine.
Sounds like a Twistedhedism to me.

I just tested my 9' whip (mounted on the roo-guard of my Dodge). Tied it back so the top was parallel with the ground (pointing East, if that makes a difference). Measurements were compared to the antenna straight up.....;

SWR didn't change at all, and vertically polarized field strength dropped by a hair. However, horizontally polarized field strength made a huge jump to the good. Subjectively, I listened to the toilet bowl while pulling on the lanyard. Some weak signals disappeared while others came in that weren't there before. Let the whip go back to vertical and the old signals came back while the new signals were lost.

Looks like it's a compromise situation.

Dude, I recommend that you read both EBay's & AOL's
TOS on these types of posts. They are very much against those
policy's.

Message-ID: <40cfd365$0$78777$c30e37c6@lon-reader.news.telstra.net>
Source record: 183474

Hi all,

I am about to buy 2 pairs of Midland 2 way radios.
The G300 (3W) and the GXT400 (4W).
From www.thetwistergroup.com

My last one (left on the roof of my car and never found again) was a very reliable Kenwood UBZ-LH68 (0.5W). Will I be disapointed with the build quality of Midland? None in Australia to touch before buying.

Am'I making a mistake... Is there a better place to buy?
I am in Australia and very new to the handheld 2 way radio world.

If these are useless radios or an notoriously bad shop please tell me.
The shop should be right if www.resellerratings.com is correct. But not many people rated them.

Patrick.

>Hahaha...no you don't Davie. In fact, you can illustrate NO thread, NO
>topic in which you "stood up for the little guy" where a " bunch of
>people gang up" on him.

You obviously are incapable of finding them. In the very beginning, I
took a stand against those who ganged up on CBers for no other reason
than they were "different". Later on, when it became apparent that the
tide had shifted, I took the stand to support the rights of legal
operators.

>And Dogie was not right, at any time.

Maybe not his methods, but his attitude with respect to illegal CB
operators is pretty much on the mark.

>The ONLY people you have ever defended in here have been N8, Lelnad, and
>Frank.

When you and other like minded simpletons bring unfounded accusations
and pure unadulterated lies forth and attempt to present them as
truth, then yes, I will defend the honor of those you wish to smear.

> In fact, google Dogie's call, along with "sandbagger" and you are right
>there in each and every thread, arguing vehemently and acting like
>Dogie's arm-chair lawyer

If not an outright lie, it is an extreme exaggeration. I do not
condone some of the things which have happened here that you have
attributed to Doug (Which there is still no solid proof of). The fact
that my name appears in the same thread means nothing. Google Doug's
call and "Twistedhed", and you will see similar results. Does this
mean that you defend Doug too?

>But,,,,let's illustrate how close you actually claimed you were to the

Yea so? Since I do not know the intimate details of the situation,
certain people kindly brought me up to speed.

>
>The FCC were the ones "in the know",,,not your mysterious non-existent
>"people".

The FCC was one party to one of the issues. But they were not the only
ones involved. There are other people who personally know people
involved with the alleged "jamming" incident. They are in a far better
position to offer insight than guys like you who only know what you
read on the internet.

> The complaint came from club members (those "in-the-know").

Now you're catching on.......

>And then here is the one where you claim it could be Chuck-eye who was
>impersonating Dogie to frame him and the possibility was being
>investigated by the FCC.

That's a lie. I don't even know Chuck. Unless it was offered as a
hypothetical speculation in response to something equally
preposterous.

>......hehhhehe......ah, never mind,,the post is
>there in those threads for all to enjoy,,,,, but don't say you didn't
>defend Dogie when he got busted. It's an outright lie.

I haven't defended anyone. I have only offered alternative
explanations for certain events. YOU, of all people, who stand up for

the rights of criminals to be criminals, (until they are convicted!)
to stand here and accuse me of refusing to drive a guilty stake
through the heart of another person (who just happens to be someone
you don't like) before all the facts are in and the courts have ruled.
I guess by this logic then you really ARE a federal criminal.

The sign of a true sociopath. Abandon core principles when it suits
you.

THAT sir, makes you a grade "A" hypocrite.

Frank
Did you try it in Barney Phife mode? The start of this thread was
on car, it was suggested that you tie it down like a bow. Bows are
bent 180 degrees, so it would have to be tied down to the same level
as the base. I tried it and the minimum SWR point moved lower in
frequency.
Modeling it showed that the take off angle also increased. Maybe
causing the effect you were seeing.

no, but considering that the 27.495 - 27.885 is allocated to
government/military, I suspect that one can end up with a bunch of very
pissed of MP's at the dorr waiting for your explaination (or some men in
dark suits with FBI on the I.D.'s asking lots of serious questions). I
can't say that its happened recently, but I do know, it CAN happen.

If he made these posts with a single post saying "items
for auction", then listed them all in a single post, not a
problem. But when he makes these posts once, twice a
week spamming the group, he's in clear violation of
EBay's TOS & AOL's.

Steve;
I didn't play with it all that much to see which direction it talked the best. Modeling, showed that the Max Horizontal field is broadside to the antenna and Max vertical is more inline with the direction that its bent. Does your news server carry alt.binaries.pictures.radio? I put a jpeg of it there.
Red is The Hor field, Black is the Vert

>Looks like it's a compromise situation.

It is. You failed to account for, or at least detail, a myriad of
factors. Were you in a free zone? How near was the closest object? Did
you have a duplicate antenna in which to compare duplicate tests? Did
you repeat the test with the antenna on the opposite side of the
vehicle? Did you move the vehicle around? A single day's atmospheric

condition for a single test? One perfunctory test is meaningless in the context of science.

(Frank as well as you still
believes the earth is flat.)

Landshark

_
Frank and Hall and both ran to defend N8WWM on many occasions, too. This little group is what comprises the "akc" that Frank always refers. Hell, "AKC" is one of Frank's favorite terms,,google THAT term and see who pioneered it,,,Doug, Frank, Lelnad, Geogre, and Hall..in that order.

>I have also NEVER

>defended any actions that Doug has been

>proven guilty of.

That's only because you claim those reported by the FCC on the rainreport
do not constitute guilt of which the FCC claims..
>You are the one who is quick to point out that

>a criminal is not a true criminal until convicted.

Non-sequitur.

>Yet you seem to conveniently forget that when
>the shoe is on the other foot.

It sure is,,each time the FCC makes a bust you agree with.

_
Nevertheless,,,here are but a few of your defenses of Dogie. As pertaining to his bust, taken from "king of clowns busted" and "n8wwm makes rainreport""

N3CVJ wrote:
" ....the complaint was withdrawn because there was either insufficient evidence, or it was

shown that Doug was not the person doing the jamming."

>I was merely offering an alternative

>explanations.

No,,the complaint was NOT withdrawn, as is standard procedure, Dogie was sent a warning via certified snail mail, like the majority of other first time offenders.

>And just how would you know what Doug

>received?

What difference does that make? Try and remain relevant.
The FCC lists all actions taken. You have maintained that once a person receives an NAL, that's it,,,you're guilty. You choose to agree with the FCC and their actions except when it occurs to one whom you defended vehemently.

_
Here's my personal favorite personification fo what makes you the grand mastah poobah who holds court in the Hypocrite Hall....the one of you justifying Dogie's illegal actions by pointing to others.....
"Whatever he did, he did because he doesn't like people like you, who have little respect for the law.

>Taken out of context, in the manner in which

>you presented it, that could apply to just about
>anyone.

No Dave,,it's not taken out of context, as you referred to Dogie and his bust,,,,not "anyone". Yes, it could apply to just about anyone, but it applied to Dogie,,,,,so why attempt and obfuscate differently? You defended his behavior by pointing to another. In fact, you say it's MY fault for his behavior.

_
Of course, we have the more entertaining, liberal, tear-jerking, choker you wrote in regards to Doug getting busted.... :
I have a habit of standing up for the little guy, when a bunch of people gang up on them.
especially when the little guy is right.

Hahaha...no you don't Davie. In fact, you can illustrate NO thread, NO topic in which you "stood up for the little guy" where a " bunch of people gang up" on him.

>You obviously are incapable of finding them.

>In the very beginning, I took a stand against

>those who ganged up on CBers for no other

>reason than they were "different". Later on,

>when it became apparent that the tide had

>shifted, I took the stand to support the rights of
>legal operators.

And Dogie was not right, at any time.

>Maybe not his methods, but his attitude with

>respect to illegal CB operators is pretty much

>on the mark.

The ONLY people you have ever defended in here have been N8, Lelnad, and Frank.

>When you and other like minded simpletons

>bring unfounded accusations and pure

>unadulterated lies forth and attempt to present
>them as truth, then yes, I will defend the honor
>of those you wish to smear.

Well, by all means, attempt to defend anyone you wish, but calling names is not the manner in which to justify your bullshit, davie. That's almost as bad as pointing to another to justify one's behvavior.

–
 In fact, google Dogie's call, along with "sandbagger" and you are right there in each and every thread, arguing vehemently and acting like Dogie's arm-chair lawyer

>If not an outright lie, it is an extreme

>exaggeration. I do not condone some of the

>things which have happened here that you

>have attributed to Doug (Which there is still no
>solid proof of). The fact that my name appears
>in the same thread means nothing. Google

>Doug's call and "Twistedhed", and you will see
>similar results. Does this mean that you

>defend Doug too?

Difference is, once the google search is doen, one can read for themselves and see what took place, not what you tell people, as it has been illustrtaed time and time again that you say one thing and have to be shown you said the opposite at another point in time. In fact, your posts are chock full of contradictions and lies.

_
But,,,,let's illustrate how close you actually claimed you were to the situation.....you wrote:
".....there are people, that are in the know, that have filled me in on some of the smaller details".

>Yea so? Since I do not know the intimate

>details of the situation, certain people kindly

>brought me up to speed.

Yea? Tell ya' what...you name names and I'll name names..since you asked me first of how I knew what happened with Dogie.Who brought you up to speed, Davie,,,as only those involved know what took place...of course, one could read the FCC files, but you say that means nothing.

_
The FCC were the ones "in the know",,,not your mysterious non-existent "people".

>The FCC was one party to one of the issues.

>But they were not the only ones involved.

Same with just about every other action taken against those busted for interference. Of course there has to be other parties involved. Try and remain lucid and relevant.

>There are other people who personally know

>people involved with the alleged "jamming"

>incident.

Damn,,,ya' think?

>They are in a far better position to offer insight
>than guys like you who only know what you

>read on the internet.

There you go again,,ASSuming.

The complaint came from club members
(those "in-the-know").

>Now you're catching on.....

Catching on? Taht's rich. I'm the one that brought such to your attention back when you were talking shit and defending this felon.

And then here is the one where you claim it
could be Chuck-eye who was impersonating
Dogie to frame him and the possibility was being investigated by the FCC.

>That's a lie. I don't even know Chuck. Unless it
>was offered as a hypothetical speculation in

>response to something equally preposterous.
.

Whatever....,,it's there,,,you most certainly said it,,,,,,you also said it was your understanding that the FCC would investigate this angle.....
....hehhhehe......ah, never mind,,the post is there in those threads for all to enjoy,,,,,, but don't say you didn't defend Dogie when he got busted. It's an outright lie.

>I haven't defended anyone. I have only offered
>alternative explanations for certain events.

No Davie,,,,,you blamed me for Dogie's actions. You said he did what he did because of people like myself...that most certainly was not only a pathetic excuse, but a desperate and pathetic defense of one that was busted by the FCC. Odd how you always maintain one is a criminal for daring to speak about freebanding and talking dx, but when N8WWM is busted by the FCC, you offer reasons why he shouldn't be called a criminal. I am quite satisfied with your replies in this thread, Davie. You are shining.

>YOU, of all people, who stand up for the rights
>of criminals to be criminals, (until they are

>convicted!) to stand here and accuse me of

>refusing to drive a guilty stake through the

>heart of another person

Here comes that exaggeration again you spoke of, davie.

>(who just happens to be someone you don't

>like) before all the facts are in and the courts

>have ruled.

You are the one that ran to his defense. I didnt
bring this matter to you,,,you entered yourself into the thread to blame me for n8's behaviors, case closed.

>I guess by this logic then you really ARE a

>federal criminal.

Your logic. Only you and Geogre and Lelnad and Frank have called those who dx and freeband "federal criminals",..you have cried and cried that the term applies, illustratting your supreme ignorance of the term. Yet, when a federal entity (FCC), charged with carrying out punishments with no court hearings says N8WWM is guilty, you defend him, deny you did so, then defned him some more. Issues, Davie,,,,you have serious issues.

>The sign of a true sociopath.

You're getting angry again and non-lucid. ASSuming status you neither have nor can attain is non-productive, delusional, and off-topic.

>Abandon core

>principles when it suits you.

You have done just that by defending N8's repeated jamming actions while calling others a "federal criminal" for exercising their speech of topics of dx and freeband. A whack job and a hypocrite you are indeed.

>THAT sir, makes you a grade "A" hypocrite.

>Dave

>N3CVJ

>"Sandbagger"

>http://home.ptd.net/~n3cvj

Forest for the trees,,no wonder you and Frank adhere to each other like dingleberries.

Frank, do you know who "Nicolai Carpathia" happens to be? It is the name
of the character in the "Left Behind" series of Christian books about
the end times. Nicolai Carpathia is the name of the Antichrist in that
series. Pehaps a most appropriate name for our poster.

nicolaicarpathia@webtv.net (Nicolai Carpathia) wrote:
Fraank Gilliland wrote:
I don't hold grudges, Twist.
Sure you do, Frank. You are quite Twisted, my friend. The fact that you can't even see the forest for the trees is a very pressing and serious problem for you. Frankly, the mere repeated mention by yourself of an internet personality that hasn't posted in years (1mangag, lmangang, Toll, Eitner) illustrates you indeed hold a grudge. Your repeated bitching, whining and moaning about Toll, Eitner and Jay when they haven't posted in some time illustrates the intensity of how the past continues to affect and reek havoc on your bent and Twisted psyche. Not being able to see it yourself is the reason for the laughter you hear directed toward yourself. Those not laughing merely shake their heads with pity for you.
You are unable to proclaim yourself iamnotgeorge2004. I already proclaimed you he, so there is no need for you to comment on it at all, unlesss, of course, you are either desperately trying to convince another you are not he, or are once again so encapsulated with what I believe.
As long as I'm having fun and you claim to be having fun, you should try it without becoming personal and making me your topic. See if you are able to entertain yourself without myself being involved in your world. Those who have the good sense not to waste their time with you,,of course, you accuse me of being 12 different people at this point in four different states, so it's easier to say twistedhed is the internet personality of all who have ever exposed you for the fraud you are, and disagreed with you, Frank. This way, you only appear crazy to those of us who really know you're a dishonest alcoholic who can't maintain sobriety.
I merely enjoy watching
internet thugs like yourself become all consumed and ate up with self-created frustration that always leads to self-destruction,,,that a small percentage of those like yourself are unable to comprehend their own deterioration and get over themselves is reason enough to permit you all the razor blades you wish to chew upon. Why don't you ask whoever referred to you as an internet terrorist. You really haven't a clue who you're talking to these days, Frank. You're swinging at ghosts and have been reduced to complaining about me in your personal email to several newsroom regs,,,,,talk about a serious depressive and psychological issue. I always knew I captivated you and my loyal worshipers of Dogie and Davie and Lelnad, but I had no concept of to what extent until recently.
I wasn't whining at all,,merely pointing out your self-contradictions.

No one is losing any sleep over what you think or don't think of them, let alone any respect you may or may profess for one. As I expressed when you claimed you have defended and agreed with posts I have written, that means nothing. You are near the aardvark on the scale of evolution, yet below the monkey, sucking up what bugs you are given, yet fostering great admiration via mimicry. Not quite grasping the rung of which you cling on the ladder of evolution is a bonus to bothering to witness your self-crucifixion.
and lest you forget, Jay talks dx
on his cb. Just another in a long line of bullshit from you, illusttating you talk out both sides of your mouth and don't even adhere to your own claims.
I mean like the one where you claimed you would contact the businesses allocated to the freeband, which you said were suffering interference from illegal cbers and you would post the proof here in this group. I mean like the claim *you* invoked your personal occupation, claiming you worked for a business legally permitted to transmit on the freeband.
For some reason, you feel you have the right to demand something of another for which you refuse to provide yourself. Provide for your claims, I'll provide for mine. After all, you made the claim first and went as far as to claim you would contact those businesses on your own,,,,,no one asked you to do that, as we knew you were full of shit,,,yet, you insisted,,,the results were predictable,,,,,when questioned, you would insult, evade the topic, and run, run, run like the wind. So, provide your contacts from these business, I'll provide the group of which you beg,in fact, I'll post the url here on the group and everyone can watch you curl into the fetal position and deteriorate even further.
=A0=A0when it has been proved the lot of you are malicious and all about harassment by any means. Wasn't that long ago you were identified by several on this group of sending viruses to participants.. Right. Randy accused you right after several others of us received similar emails. You never could comprehend that you can;t send me a virus on webtv. If you need to see the post, say it, but stop lying, Frank. It illustrates how desperate you are in addition to your anger and alcoholism you are dealing with.
and even if you weren't guilty, the mere fact that you were the number one suspect (save your breath, despite appointing me as your personal savior and anti-christ, it wasn't myself that blamed you) illustrates just how you are viewed in this group. You not comprehending it is priceless.
And Randy accused you, and several of us agreed. You have always lied about the facts, Frank. So what if sideband was the first to mention it,,,you were blamed and for damn good reason. You're breaking your back over this topic as much as my referring to you as iamnotgeorge2004. Which has proven you a liar each time you claim it was I who orginally identified lelnad as a forger...as it was Dick. Call it whatever you may, you were caught lying again. Merely pointing to Dick's post when you continue to attempt and lie and say his post was distorted, when it was presented unedited, illustrates you have no interest in any truth

whatsoever, but a malicious, personal agenda and will lie about a deceased man in order to carry out the manner in which you find your pleasure.
=3D=3D=3D=3D=3D=3D=3D=3D=3D=3D=3D=3D=3D

>LOL the cork has popped

Sure has, Frank, but no one holds it against you,,,we know it originated with a disease over which you are powerless and no one minds if you find your pleasure by playing with my posts...heck, you have always had to look to me for something or another. Alcoholism is nothing to fool with, Frank..I'm sorry about you losing your sobriety.

I didn't pull it over 180 degrees. I don't even know if it will bend
like that without taking off the spring. But it seems like if it goes
over 180 the top capacitance to ground would increase, as well as the
inductive reactance due to the bend, which might explain the drop in

frequency. IOW, it might result in a crude form of linear-loading.

> Modeling it showed that the take off angle also increased. Maybe
>causing the effect you were seeing.

Possible. But with a 90 degree bend it seems more likely that it was
just a polarity issue. I wouldn't even begin to guess how the polarity
would be affected in a 'Barney bend'.

The curb was right next to the truck. Gee, maybe that messed up my
test.....

> Did
>you have a duplicate antenna in which to compare duplicate tests?

Yes I did. Did I use it? No.

> Did
>you repeat the test with the antenna on the opposite side of the
>vehicle?

The antenna not mounted on either side of the vehicle. It was mounted
on the front of the vehicle, which I clearly stated and you couldn't
comprehend because of your communication deficit.

> Did you move the vehicle around?

Why yes, it started break-dancing as soon as I keyed the mic.

> A single day's atmospheric
>condition for a single test?

Sunny, 74 degrees, <20% humidity, 29.96 in/Hg, tree and grass pollen
were moderate, weed pollen was low, mold spores were high, no
measurable seismic activity and the aurora monitor was quiet.

> One perfunctory test is meaningless in the
>context of science.

Unless the test is conclusive. Once again you are confusing inductive
and deductive logic, but that's no suprise since the only part of the
book you studied was the chapter on logical fallacies.

--

This is Andy Jarema, N6TCQ, Newsline Support Fund Administrator, getting caught up with our supporters. In the month of August of last year we heard from The Reading, PA Radio Club, W3BN; Joseph Bartzi, Jr., KC8DKF of Columbus, OH; The North Hills Radio Club in Sacramento, CA; monthly contributor William Walters, WA2IBM, of San Jose and monthly contributor Scott Hensley of the Area Communications Team, also in San Jose

Thank you to everyone, and we promise to do our best to continue to earn your care and support. A reminder that Newsline is a federally chartered 501c 3 California non-profit corporation. FCC regulations prohibit us from telling you exactly how to support us, but that information is on our website at www.arnewsline.org. That address will be repeated at the end of the newscast.

I'm Andy Jarema, N6TCQ.

--

Thank you Andy. Now, Amateur Radio Newsline report number 1400 with a release date of Friday, June 11 2004 follows in 5-4-3-2-1.

The following is a Q-S-T.

Australia to make big changes in its Amateur Radio service, Greece will welcome hams at the 2004 Summer Olympics and Amateur Radio Newsline celebrates 1400 weeks of service to the world-wide ham radio community. It all comes your way, right now!

(Billboard Cart Here)

**

RESTRUCTURING: BIG CHANGES DOWN-UNDER

Big changes are coming to ham radio down-under. This, as Australia announces some sweeping changes that are about to take place in that nations Amateur Radio service. Owen Duffy reports:

--

The ACA has released their report entitled "Outcomes of the Review of Amateur Service Regulation". The report contains the ACA's intended changes to the Amateur service following stakeholder response to the recent discussion paper entitled "A Review of Amateur Service Regulation."

The key changes are removal of the Morse qualification requirements for all grades of amateur radio license; introduction of a new entry level license (the Foundation License) along the lines of the UK Foundation License, although it will be adapted to suit Australian preferences.

A three tier licensing structure: Advanced, Standard, and Foundation; translation of Unrestricted, Limited and Intermediate licenses to Advanced; translation of Novice and Novice Limited licenses to Standard; a privileges package for the Standard License that is much greater than enjoyed by Novice Licenses today.

A generous privileges package for the Foundation License allows voice or Morse code at low power (10W PEP) using only unmodified commercial transmitting equipment on all of 80m, 40m, 15m, 10m, 2m, and most of 70cm.

Australian participation in CEPT Recommendation T/R 61-01 (reciprocal licensing) is in progress. The status-quo is essentially preserved in respect to higher operating power; interference and interference management built on current arrangements.

Apparatus Licensing as the vehicle for licensing Australian amateur stations (though stations licensed under CEPT Recommendation T/R 61-01 would be class licensed). State significance of callsigns remains.

This has been Owen Duffy for the CQVK project on Q-News Australia.

--

As we go to air, no effective date for these changes to take place has been announced by the Australian Communications Agency. (Q-News)

**

INTERNATIONAL: THE BIG DISPUTE

Two Asian Pacific nations are embroiled in a territorial dispute and Amateur Radio appears to be caught right in the middle. Q-News Graham Kemp, VK4BB, is in Brisbane with the details:

--

A centuries-old territorial dispute between Japan and South Korea is again escalating with the South Koreans placing a group of amateur radio operators on the rocky islets known in Korea as the Lonely Islands. To the Japanese they are the Bamboo Islands.

The radio station, licensed by South Korea, was seen as a provocation by the Japanese. Some amateur radio operators in JA are

said to have interfered with the South Korean stations transmissions.

I'm Graham Kemp, VK4BB, of Q-News for the Amateur Radio Newsline.
--

Kemp says that hams around the world were surprised to hear about the dispute. This is because our hobby stresses development of technologic skill along with friendly international communications. (Q-News)

**

RESCUE RADIO: THE NEBRASKA TORNADO AFTERMATH

Back on this side of the Pacific Amateur Radio operators were on duty aiding tornado-stricken communities in Nebraska and elsewhere in the Midwest. Norm Seeley, KI7UP, picks up the story from here:

--

As we reported last week, a May 22nd tornado virtually destroyed most structures in the small town of Hallam, Nebraska. Hallam is located some 20 miles south of Lincoln and one death there was attributed to the storm.

During and after the tornado ham radio was an important part of the overall emergency service effort. The ARRL Letter quotes Nebraska Section Emergency Coordinator Reynolds Davis, K-zero-G-N-D, as saying that Lancaster County ARES and SKYWARN spotters were activated that evening in response to a report of an approaching front. Within a half-hour, W0NWS at the National Weather Service office was receiving tornado damage reports via the Lincoln Amateur Radio Club K0KKV repeater.

The storm severely damaged a high school in Norris, Nebraska, and plucked the tower supporting the K0RPT repeater's south region receiver from the ground. The tornado went on to demolish additional homes to the northeast. Its path of destruction finally ended south of the town of Bennet.

Once the SKYWARN Nets closed, the remainder of the K0RPT system was put into service to support Red Cross communications between the tornado scene, the chapter house and a shelter set up in a Lincoln high school for residents displaced by the storm. Two ARES nets were activated May 23rd to coordinate damage survey and assessment. They logged reports via K0EOC at the Lancaster County Emergency Operations Center.

For the Amateur Radio Newsline, Norm Seeley, KI7UP

--

Amateur Radio communications support continued for several days. (ARRL)

**

Break 1

More news after a break for you to identify your station. Cue the announcer, please:

"From the United States of America, we are the Amateur Radio Newsline, heard on bulletin stations around the world including the K2SBD repeater serving Long Island. New York."

(5 sec pause here)

**

WITH NEWSLINE: SEND US YOUR ID - PLEASE

The station I-D you just heard was recorded a few weeks ago at the Dayton Hamvention. And it has lead us to an idea.

Would you like to I-D your own repeater or bulletin station here on Amateur Radio Newsline? Well here is how you can do it.

Simply record on a cassette tape the following sentence and include the call sign and location you want to honor.

From the United States of America, we are the Amateur Radio Newsline, heard on bulletin stations around the world including the
"xxx"
repeater serving "yyy zzz." The "xxx" is the call
sign. The "yyy"
and "zzz" are the city and state.

Then, take the tape and mail it to Amateur Radio Newsline, Editorial Office, 28197 Robin Avenue, Santa Clarita, California, 91350. As time permits, we will select an audio I-D and include it in the newscast.

All tapes submitted become the property of the Amateur Radio Newsline and cannot be returned.

Again, the address to make yourself a part of this bulletin service is Amateur Radio Newsline, Editorial Office, 28197 Robin Avenue, Santa Clarita, California, 91350. (ARNewsline(tm))

**

HAM RADIO IN SPACE: FIRST EXPEDITION 9 QSO A BIG SUCCESS

AMSAT reports that the first ARISS contact with the Expedition 9 crew on the ISS took place on Tuesday, May 25th. During his first-ever amateur radio contact, Astronaut Mike Fincke, KE5AIT, answered 18 questions asked by the students who gathered at the Erie Planetarium in Pennsylvania.

The contact used the facilities of telebridge station, VK5ZAI, in Australia to assure high quality space to ground communications. It

was deemed very successful as the children applauded and thanked KE5AIT for taking the time to join them from space. We will have more ham radio space related news later on in this weeks newscast. (AMSAT, ARISS)

**

WORLDBEAT: HAM RADIO AND THE 2004 SUMMER OLYMPICS

If you are planning to attend the 2004 Summer Olympics in Greece, we have some good news for you. Foreign radio amateurs from CEPT countries or from countries with reciprocity can use the special prefix J42004 from August 1st to November 15th without any special license from Greek Authorities.

Not only that. Demetre Valaris, SV1UY, says all hams visiting Athens for the Olympics is more than welcome to give a shout on 145.425 MHz with a 88.5HZ access tone. Demetre says that this is so visitors can hook up with Greek hams and share hospitality.

What about visiting hams from non CEPT nations? They will have to contact Greek telecommunications regulators for special permission to operate. (Via E-Mail)

**

RADIO RESEARCH: MCRN TO TEST RADIATION ANGLES

The Marconi Radio Club of Newfoundland station VO1MRC will be conducting an antenna comparison experiment on the 19th and 20th of June and you are invited to take part. Amateur Radio Newsline's Bruce Tennant, K6PW, has more:

--

Each day during the experiment from 0000 to 2400 UTC station VO1MRC will operate a CW beacon on 5269.5 kilohertz. Its purpose will be to determine the relative performance of high and low radiation angles. The antenna in use will be identified by a code in each transmission.

VO1MRC will also be open briefly for 2 way contacts with stations authorized to transmit on 60 meters starting 0000 UTC each of these days and will operate simplex on 5260.5 kilohertz CW. Following this it will transmit on 5327.5 kilohertz upper sideband and receive 5346.5 kilohertz upper sideband and 3807.5 kilohertz on lower sideband.

The experiment was proposed by Marconi Radio Club of Newfoundland and is endorsed by Radio Amateurs of Canada. Its operated under an authorization issued by Industry Canada which is that nations telecommunicastions regulatory body.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

For further information, please check the Marconi Radio Club of Newfoundland web site. That U-R-L is http://www.ucs.mun.ca/~jcraig/5megex.html (RAC)

**

ENFORCEMENT: TO MUCH RF

The licensee of FM station KWNZ, located in Carson City, Nevada, has been fined $10,000 by the FCC. This, for creating ground-level radiation in excess of the permissible public exposure level at KWNZ's McClellan Peak transmitter site.

The CGC Communicator says that the various excuses offered by the licensee were not impressive. For example, KWNZ contended that there was no evidence whatsoever of public use of the particularized ten square foot area where the station exceeded the RFR permitted radiation limits.

According to the FCC, it is not necessary to establish actual public use of the particular unfenced and unmarked]area where excessive power density occurs. The regulatory agency says that public use of an area nearby is sufficient.

(DO NOT READ: More is on-line at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-04-1533A1.doc (CGC)

**

ENFORCEMENT: AMATEUR RADIO ACTIONS

Now with more enforcement news here's the FCC's Daryl Duckworth, NN0W:

--

Audio report only. Hear it on this weeks newscast at http://www.arnewsline.org
--

More on these issues as the FCC releases follow-up information. (FCC, RAIN)

**

BEST PRACTICES: EMERGENCY READINESS GUIDE FOR LOCAL MEDIA

The FCC's Media Security and Reliability Council has published a new booklet titled the "Readiness Guide for Local Media on How to Prepare for Emergencies." This colorful pamphlet is good for a quick overview of what the media should do in times of emergencies. Its available on the web in both Mocrosoft Word and PDF format. The PDF version is at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-

244522A1.pdf. Download the following doc version at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-244391A1.doc. Finally, the generic website for the Media Security and Reliability Council is http://www.fcc.gov/MSRC/. (CGC)

**

ON THE AIR: THE COLLINS COLLECTORS NETS

And if you own vintage ham gear, you might want to become a member of the Collins Collectors Association and join one of their monthly nets. The nets are held the first Wednesday of the month on 3.888 MHz beginning at 7:30 PM in the Eastern time zone and 8 PM in the Central, Mountain and Pacific time zones.

These nets draw hundreds of vintage stations from across the country and are anchored by a "tall ship" AM station in each time zone and you do not need to operate Collins gear to take part. For more information. just tune in. Comments go by e-mail to wa9vrh@mtco.com (Via e-mail)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United
States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

CHANGING OF THE GUARD: LLOYD "SIG" SIGMON W6LQ - S.K.

A ham radio operator who developed a public warning scheme that eventually carried his name, has died. This, with word that 95 year old Lloyd Sigmon, W6LQ, became a silent key on Wednesday, June 2nd, following a long illness.

Known to his ham radio buddies as Sig, in 1955 W6LQ perfected a method that allowed the Los Angeles Police Department to issue emergency warnings over local radio stations. At the time Sigmon was an executive with radio station KMPC and wanted to boost station ratings by providing traffic information.

Then Los Angeles Police Chief William H. Parker permitted use of Sigmon's device but only on the condition that it be made available
to any radio station that wanted to use it. He also is dubbed the bulletins as SigAlerts in honor of W6LQ.

The first SigAlert was broadcast on Sept. 5, 1955. It was carried by six radio stations and urged medical personnel to respond to a train derailment outside Los Angeles Union Station. The California Highway Patrol later took over freeway traffic warnings from the Los Angeles Police Department and handles SigAlerts, which now are computerized.

Lloyd Sigmon, W6LQ, was born in 1909 in Stigler, Oklahoma. He was fascinated by electronics and received his first Amateur Radio license at age 14. He died at Green County Assisted Living Center in Bartlesville, Oklahoma, where he had been residing the past four years. (Published news stories)

**

RADIOS LEGACY: THE HISTORIC KGFJ 1230 KHZ TRANSMITTER SITE HAS BEEN SHUT DOWN

The CGC Communicator reports the passing of a different sort. This with the announcement that on May 24th a historic AM broadcast transmitting site was turned off after 80 years of service.

In 1924, radio station KGFJ started broadcasting from the Odd Fellows Lodge Building on Oak Street near downtown Los Angeles. In more recent years, the station call sign was changed its call letters to KYPA.

Shortly after 4 PM on May 24th, Marvin Collins, W6OQI, turned on the new 1230 kHz transmitter. Its signal is diplexed into a tower at the KBLA 1580 kHz transmitter site.

Collins says that the old KGFJ "flat top" antenna had been in continuous use by since 1924. He adds that the old antenna may well have been the last full-time use of a flat top antenna anywhere in the country.

Marv took photos of the old KGFJ site and the new diplexed setup at KBLA, visit Marvin's web page at http://earthsignals.com/Collins/ and scroll to "KGFJ 1230." You can write to Marv at KFIam640@aol.com

(CGC)

**

HAM RADIO IN SPACE: BIG LAUNCH DOLLARS RAISED AT DAYTON

AMSAT says that its Launch Fund campaign now has $93,0000 in it. This, thanks to donations received at the recent Dayton Hamvention including one anonymous donor who matched every dollar collected with another one.

AMSAT North America President Robin Haighton, VE3FRH, says that now is the time to make a final push to reach $110,000 goal. He adds four words that seem to come right out of the Mel Brooks musical the Producers. The four words are - "we can do it." And
Haighton is

confident that they will.

More about the fund and ham radio space exploration is on-line at www.amsat.org. (AMSAT-NA)

**

HAM RADIO IN SPACE: ECHO NEAR COMPLETION

And some more good news from on the ham radio satellite scene. It comes from Jim White, WD0E, who has been testing and performing final integration of the ECHO ham-sat.

White says that as far as he can tell the ECHO team is on track and the new satellite is looking good. He says that there are a few minor items have to be completed before the bird is sent to the Kazakhstan launch site. White says that he is confident that it will be 100% by the time it gets there for the launch. (AMSAT-NA)

**

WORLDBEAT: HFRADIO.NET TAKES LIGHTNING HIT

Due to a system failure caused by a recent lightning strike, the H-F-RADIO dot NET Canadian Amateur Radio Bulletin service has lost its database of subscribers. In order to rebuild it and for subscribers to continue receiving those weekly bulletins, hams across Canada are asked to send an e-mail to webmaster@hfradio.net with the word "subscribe" in the subject line. (RAC)

**

DX

IN DX, K8AQM, reports that his trip to Samoa will take place between July 7th to the 21st. While there he will operate as 5W0TR on 160 through 10 meters using CW, SSB, RTTY and PSK. Also, look for him as KH6BB from Hawaii July 5th and 6th and 22nd through he 24th. QSLs go via K-8-A-A as his Callbook address.

And members of the United Kingdoms Wrexham and District Amateur Radio Society will be on from the Isle of Man from September 1st to the 8th. Station location will be at the discontinued Coast Guard lookout tower at Scarlett Point. Activity will be on all High Frequency bands plus 50 MHz, 70MHz, 144MHz and 432 MHz, at full UK power on CW, SSB, RTTY, PSK and SSTV. More information is on-line at www.gb4iom.co.uk (Various DX sources)

THAT FINAL ITEM: CELEBRATING NEWSCAST 1400

And finally this week its time for a bit of a celebration here at Amateur Radio Newsline. That's because this newscast marks 1,400 consecutive weeks that we have been bringing you news from the worlds

of Amateur Radio and personal communications. With some thoughts on this milestone, here's our producer Bill Pasternak, WA6ITF:

--

If you get out your calculator and do the math, you will find that 1400 weeks comes out to be 26 point 923 years. Close enough in our book to say 27. And in ham radio news, I guess we can say that's a
pretty long time.

Back when we still edited on tape I used to wonder how many splices that we made in a year. One day I sat down and figured out that there were about 30 in an average newscast. That was 120 a month or 1440 a year and an awful lot of Scotch splicing tape. Had we stayed on tape it would mean that we would have cut into a piece of audio tape 38,880 times as of today.

But we stopped putting the newscast together using tape almost 4 years ago. Now its done in the digital world using computers and programs like Goldwave and Cool Edit pro. Becoming part of the digital age early on is something we are kind of proud of. Being on your favorite repeater for the past 27 years and never missing a deadline is another.

As we enter year 27 and begin rolling on toward year 28, we pause and renew our simple pledge to you. The promise we made many years ago and which continues to guide our very being. Amateur Radio Newsline will be here as long as you want us and as long as you support us. We exist to serve you and we all consider it an honor to do so.

Speaking for all of the volunteers who make up the world-wide Amateur Radio Newsline team, I say "thank you." Thank you for sharing your
lives with us through the magic of Amateur Radio. Thank you for caring about us through your ongoing support. Most of all, we thank you for being a part of what we like to call the Amateur Radio Newsline family.

To paraphrase a line from the show Chicago. "We simply could not do
it alone."

Again, we thank you.

I'm Bill Pasternak, WA6ITF.

Jim.

--

As one of the anchors who has been here almost from the start, I add my thank-you's as well.

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

A reminder that the nominating period for the 2004 Amateur Radio Newsline Young Ham of the Year Award is now on. This program is open to any FCC licensed young radio amateur age 18 or younger residing in the contiguous 48 states and who has made a significant contribution to the community, the nation or ham radio though the United States Amateur Radio Service.

More information and a downloadable on-line nominating form is at our website. That's in cyberspace at www.arnewsline.org. The cutoff
for
nominations this year is midnight on June 30th.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm
Jim
Davis, W2JKD, saying 73 and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2004. All rights reserved.

You don't see any gain compared to a vertical 1/4 antenna from that plot. All you see are far field patterns. Try again Dimwit.

I didn't write "modeling....." from above, but it is common sense that when an antenna rotates away from its vertical polarization it also rotates away from its original vertical gain.

This is really bizare Tnom and Lancer post within minutes of each other and both from ax.com too lol. I tell you what tnom or lancer or whatever you call youself now you need to model a 4 foot open coil type antenna sitting on a Barney police car and compare it to a full 9 ft in a Barney Bend configuration on the same police car. No watergates and whistling auuudio into echo mikes and watching the swang do it right this time.

>alt.binaries.pictures.radio? I put a jpeg of it there.
>Red is The Hor field, Black is the Vert

I got the day off so I took the truck out in the field, did a
Barney-bend to the windshield-wiper, and did a 10 degree (36-point)
field-strength test. Your jpeg is pretty close to what I got, except:
I see sharper lobes; the measured horizontal was weaker relative to
the vertical (possibly due to a higher take-off angle -- FSM was about
200' downrange), and; forward has more gain than aft (not forgetting
that my mount is on the bow). While driving the truck in a circle for
the tests I noticed that some stations would null.

My guess is that the Barney-bend acts like a loop antenna with its
characteristic null, but because it is only a half-loop it has a
horizontal component.

We really should summon Jay for this discussion.

By the way I already did a open coil simulation, the links were in one
of my first posts to this thread. The same links you read when you
responded to tnom about his tests.

What did it rub against to make those micro-scratches and what are those rings around the screws on the head? It looks like a different head was put on that body as the body looks clean and the head is not.

Must have been wiped with paper towels. Damn scratchy paper.

Those micro scratches are just that.....very small and not noticeable under normal conditions....I shot that photo in the macro mode...very close up....and the screw heads are all original......and everything is original......

This
little group is what comprises the "akc" that Frank always refers. Hell,
"AKC" is one of Frank's favorite terms,,google THAT term and see who
pioneered it,,,Doug, Frank, Lelnad, Geogre, and Hall..in that order.

>Oh really? I don't think I have ever typed "akc"

>in any of my posts until now.

Results 1 - 10 of about 402 for "Sparky" "akc". (0.60 seconds)
Sorted by relevance Sort by date
Related groups: rec.radio.cb

>Very good, Twist.

LOL. Hey Frank, you should use a webtv somewhere some time. You're
having problems following who's who and need to understand how the thing
works.

> Now search through each

>one and count how many of those occurances
>were quoted from another post instead of

>typed by me.

Process of elimination serves quite nicely here. Check only those in the
search that are from you which contain the term "akc". You've used the
term quite regularly. Sobriety would permit return of your retainment
and not have you lying and claiming otherwise.

But,,,,there is supposed to be no skip...

>Who said anything about skip, Twist?

Go to the local flea market and buy a cheap webtv, Frank. You're
cornfused again and are calling everyone "twist".
What is "the toilet bowl"? I was assuming you referred to 6 since you
have a perpetual menstruation concerning skip and big radios.
Since you were listening to 6, you were hearing skip, as you damn sure
weren't listening local.

>Some weak signals disappeared while others

>came in that weren't there before.

And those "weak" signals must have been local, since you are playing
semantic word games and essentially claiming there was no skip.

>Let the whip

>go back to vertical and the old signals came

>back while the new signals were lost.

>Looks like it's a compromise situation.

It is. You failed to account for, or at least detail, a myriad of
factors. Were you in a free zone?

>No, I pay taxes just like every other

>homeowner.

All you had to say was you were wrong, you don;t have to cry about it.
After all, one wouldn't expect any experiment performed by yourself
yield anything other than subjective results.

_
How near was the closest object?

>The curb was right next to the truck. Gee,

>maybe that messed up my test.....

Your incompetence did that.

_
Did
you have a duplicate antenna in which to compare duplicate tests?

>Yes I did. Did I use it? No.

Flawing your subjected reportings even further.

Did
you repeat the test with the antenna on the opposite side of the
vehicle?

>The antenna not mounted on either side of the
>vehicle. It was mounted on the front of the

>vehicle, which I clearly stated and you couldn't
>comprehend because of your communication

>deficit.

To be fair, you need spoon fed and asked may things twice, because you
have problems making yourself clear and once you say something, you
often must reclarify yourself because you maintain what you wrote wasn't
esxactly what you meant. Add to this your repeated homage via liberal
quoting of myself, and there we have it.

Did you move the vehicle around?

>Why yes, it started break-dancing as soon as I
>keyed the mic.

LOL,,,,,no need for the sarcasm,,,,I understand your reluctance to
discuss your limitations.
None really needed me to point out your flawed test, as most caught it
as soon as you posted your incompetence.

A single day's atmospheric
condition for a single test?

>Sunny, 74 degrees, <20% humidity, 29.96

>in/Hg, tree and grass pollen were moderate,

>weed pollen was low, mold spores were high,

>no measurable seismic activity and the aurora

>monitor was quiet.

Now duplicate your tests in addition to your climate.

  One perfunctory test is meaningless in the context of science.

>Unless the test is conclusive.

One test can never be be conclusive in such applied logistics.

>Once again you are confusing inductive and

>deductive logic,

Not at all, you''re confusing my objective logic with your subjective
results.

> but that's no suprise since the only part of the

>book you studied was the chapter on logical

>fallacies.

Toss all the one liner insults you need in order to soothe your low
self-esteem. If I wouldn't have pointed out your incompetence
concerning your monkey acts, ignorance, and inability to differentiate
between objective and subjective results, another most certainly would
have.

lol remember I said
if you want efficient youd be using a 9 ft whip. even bent over like a
bow the 9 ft is more efficient than a 4 ft loaded open air coil model.
then asshole said
tnom@mucks.net wrote
Huh..... A bent over 9 foot whip has a very noticeable Loss compared
to a efficient 4 or 5 foot vertical.
now hoople head says
tnom@mucks.net wrote
  Modeling, showed that the Max Horizontal field is broadside to the
antenna and Max vertical is more inline with the direction that its
bent. Does your news server carry alt.binaries.pictures.radio? I put a
jpeg of it there. Red is The Hor field, Black is the Vert
I dont see any big loss there tnom I see only gain gain and more gain.
Yes clip your whip Barney style and point the car in the direction you
want to talk and you got gain, no illegal amp needed lol

_
I didn't write "modeling....." from above, but it is common sense that
when an antenna rotates away from its vertical polarization it also
rotates away from its original vertical gain.

_
This is really bizare Tnom and Lancer post within minutes of each other
and both from ax.com too lol. I tell you what tnom or lancer or whatever
you call youself now you need to model a 4 foot open coil type antenna
sitting on a Barney police car and compare it to a full 9 ft in a Barney
Bend configuration on the same police car. No watergates and whistling
auuudio into echo mikes and watching the swang do it right this time.

(LOL!! what a dumbass, you don't know what ax.com is? Damn, We are both
Frank too, he posts with ax.com..
What a dimwit.)

_
>That's Twisty-logic.

Hehehe,,,poor Frank,,,invoking twist at all costs. Couple this with his
alcoholism and the old boy is off and runing.

>He thought Leland and myself were the same

>person because we both posted through

>Supernews.

Yet, here you are blaming another for your own actions. The fact that you felt such logic good enough to put into practice for yourself illustrates your homage, but I like the manner which you need blame someone else for your actions, to the point of sharing with us how "Twisty-logic" has a hold of you and how Twistedmania has run wild on you. Hope you find sobriety, Frank. You weren't nearly as obsessed with me as you are when you drink. Each day and in all your posts, I'm in your thoughts, emails,,,,lol,,,,,you do get a free pass on your behavior, though, as alcoholism is a disease, thereby rendering you incompetent and in need.

Let's see.............An antennas bent so that the tip is parallel to
the ground?.............That represents an antenna that is now midway
between horizontal and vertical polarization.

The theoretical gain of that antenna should be equal between
polarizations. When such a scenario is in place the field strength
should drop to .707 of it's original. That represents a 3db loss
just from this antenna being bent.

Yet you stated.....................................

"vertically polarized field strength dropped by a hair."

When testing mobile antennas a 3db loss is huge.
Most all well designed efficient non bent antennas
will easily beat your -3db antenna.

Wrong. That represents an antenna with -both- horizontal and vertical
polarization.

>The theoretical gain of that antenna should be equal between
>polarizations. When such a scenario is in place the field strength
>should drop to .707 of it's original. That represents a 3db loss
>just from this antenna being bent.

Wrong. The theoretical gain of the antenna for a given polarity is a
function equal to the sum of the gains of equally spaced tangents
along the curve of the antenna.

>Yet you stated.....................................
>
>"vertically polarized field strength dropped by a hair."

As measured by my FSM.

>When testing mobile antennas a 3db loss is huge.
>Most all well designed efficient non bent antennas
>will easily beat your -3db antenna.

I did not say that it dropped by 3dB. The phrase "by a hair" is not my
words but the words of my spotter, and both of us generally use that
phrase to describe a meter shift approximately equal to the width of
the needle. And since the FSM used was only a 'relative' FSM (as
opposed to a CISPR quasi-peak detector), there is no way to quantify

"by a hair", nor did I attempt to do so.

I guess you need another example of your communication deficit. In the
post at the following link, notice that I did not use the term "AKC"

but merely quoted the text that someone else typed:

http://tinyurl.com/33r6x

Since the post included the term, it will naturally be listed in any search for "AKC" with me as the author -regardless- of whether I typed it or not. Now, find some posts where I actually typed the term, and find enough of them to back up your claims that it is one of my "favorite terms" and/or that I "pioneered it".

Are you trying to misrepresent my statement? My statement is not
wrong. A antenna bent in the above fashion is now midway between
horizontal and vertical polarization. Such an antenna always has
fields in both polarizations. I never stated it didn't

>>The theoretical gain of that antenna should be equal between
>>polarizations. When such a scenario is in place the field strength
>>should drop to .707 of it's original. That represents a 3db loss
>>just from this antenna being bent.
>

>along the curve of the antenna.

Not wrong at all. A diagonal antennas field strength drops to .707 of
its original when the receiving antenna stays vertical.

>>Yet you stated.....................................
>>
>>"vertically polarized field strength dropped by a hair."

>"by a hair", nor did I attempt to do so.

Ok.....so your test is quantified by "hairs". Now I get it.
My tests which were performed with much more detail were
chastised by you. Yet your test (the hair method) gets
validity.

I see how this works now.

rrcb has what they call in the WWF a story line and if you dont know
it you are left out of the action. the storyline tells who is the good
guy and who is the bad guy who did what to who and who holds a grudge
and has old scores to settle lol with who etc. here is what I know of
it so far.

in the beginning there were illegal cbers and legal cbers and
superbowl stars and amp gods who were more or less in charge of rrcb
and acted as moderators and gave the legal cb people a hard time. Then
doug N8WWM showed up and openly made fun of the illegal cbers and
coined the word keyclowns. so it is the keyclowns vs the
antikeyclowns. anyone who defended legal cb was called AKC and there
were poeple like Dave Hall and Frank around at that time as well as
Dwight Stewart who supposedly maskeraded as a guy named Aaron Voobner
aka the leader of the AKC. Around this time Leland scott answered some
posts of twistedhed and let him know that he did not feel freebanding
was cool. twistedhed then attacked him and of course doug joined in on
the fun. Supposedly doug found Twisteds po box before he had it
changed and sent him a used jock strap in the mail. This started a war
with twistedhed vs the world but most especialy Leland who he blames
for a number of forgeries someone did where twistedhed supposedly was
placing false for sale ads on the web. Oh and there was a famous
Respect For Freeband post posted in the ham newsgroup again supposedly
by twistedhed but blamed on Leland scott and others. There was so much

strife that many of the amp gods and superbowl keyclowns left the group to a few die hards remain like twistedhed, landshark and steveo. "george" came into the picture late as he is supposed to be a NJ keyclown and superbowl star that got his ham license and went legal. somewhere in the archives there is a post where he baited twistedhed with a call wa3moj in order to getb him to look up the name George Busch which was a joke about the president. From then on twisty called him george and so did everyone else. also twisty got a hold of many erronous callsigns and names that he tried to pin on people like N7VCF for Frank etc. Landshark is a keyclown that used to curse and troll as bad as any but eventually he turned in to a hypocrite that now reports his enemies to ISPs for spam and trolling. Once frank I think did a google search and found posts that Landshark made in a TS transexual group cruising for sex which have been prove to be accurate which pisses off landshark. His butt buddie is a keyclown named Steve aka steveo aka moparholic @hotmail.com who has lately come on as an internet tough guy his claim to fame is that he visits peoples houses and threatens to beat them up. he did go to lelands house and doug N8WWMs house and take photos after he was chase away. Im sure I have missed some but those are the highlights.

This stuff has been going on for near 5 yrs now and shows no signs of letup and just goes to show you cant tell the players without a score card lol

no i havn't. mozilla smokes but i f'd up and deleted my netscape browser
before i exercised mozilla completely. i'll try the slim browser at work
before i subject the family to another 'experiment'.

Yes Steve, I do believe he has lost it. This NG has seemed to consume his life and those of a couple of others. A really sad state of affairs, but oh well, you can't take an insane person and make them drink from the well of sanity.

Not at all. I have had issues with Twist in the past. I don't care any more or less if you attack him. He can defend himself. You, on the other hand, are an idiot. You have no hope of defending yourself, in person or verbally.

I'm looking for the old style pinger browning ping immition pinger

((not the Ic / emprom chip one's))

this one was made with real restisters and transistors
the one i'm farmiller with was made on a fiber board and
the transistors and was enclosed with shink tubeing,,

wanted wather working or not.. but not damaged or distroyed
email me.. thanks

Dear Mr.AKC4L,
How do you not know this amp is not going to be used for ham radio?I
did mention I wanted the Six Meter Version.You know 50 to 54 MHz.My
plan is to take the six meter version silver plate a few things change
the tune and load to beter parts,change the parasitic suppressors for
six meters.I have had a Heathkit SB-220 that was like that but they
have crappy power supplys.I wanted to try a JB-2000 for six with a few
mods now bite on that mister know it all C-ya and 10 4 good ding dong

704. please give me advise on this problem i have.my cb friends

>horizontal and vertical polarization. Such an antenna always has
>fields in both polarizations. I never stated it didn't

First off, you are making a leap from 'having both polarities' to an antenna being "midway between horizontal and vertical polarization", whatever that means. From your explanation below I can only assume you mean 'diagonal' polarization. But you can't get linear polarization from a curved radiator, and the only straight sections of the antenna were either horizontal or vertical. Maybe you can source your "midway" polarization somewhere, huh?

Second, the whip has a larger diameter at the base than it does at the tip, and is therefore more flexibile at the top than at the bottom. Because of this the whip bent into a shape somewhat distorted from an ideal 90 degree arc; i.e, the point on the arc at which the tangent of the arc was 45 degrees to both vertical and horizontal was most certainly -not- "midway" between the base and tip. So even if you -could- source your "midway" polarization (and you can't) it would probably not apply in this case.

Third, polarity is a 3-dimensional vectoral quantity. (Actually it's a 4-dim quantity if you include the scalar component. Regardless...) This means that the "polar compatibility" (for lack of a better term) between any two antennas is a factor not just of 'vertical' and 'horizontal', but also of wavelength/antenna length. This fact is proven all the time with the use of some long-wire antennas which, while clearly horizontal, are quite adept at receiving signals with vertical polarity; and not only that but some are most efficient when the wire is pointed directly at the source of the signal. IOW, contrary to the popular (but mistaken) notion that antenna polarity is as simple as 'vertical vs. horizontal', antennas exist which have a polarity that is perpendicular to the signal in not just one, but

-two- dimensions, and they work quite well.

Also, polarity is a vectoral sum, which is not a -real- quantity but an -effective- quantity. IOW, you can't bend a vertical antenna 90 degrees at the center and proclaim that the antenna has diagonal (45 degree) polarization. The fact is that you still have -seperate- vertical and horizontal polarizations, but their -sum- is 45 degrees. And that's true only in one dimension (don't forget that this is a 3-dimensional quantity). Any deviation from the one thin line that is perpendicular to both polar components and the vectoral sum (the -effective- polarity) will NOT be 45 degrees. This is not the case for a straight radiator which, at any given point, will exhibit polarity in TWO dimensions (a plane) that is fully perpendicular to the axis.

Even if you -did- bend the antenna 90 degrees at the center, that's no evidence that the vertical and horizontal components will share the same signal load. In a 1/4 wave vertical the top half of the whip is primarily capacitive while the bottom half is inductive. Taken seperately the bottom half is more efficient because it conducts the most current. Bending the antenna in half would result in an antenna with a strong vertical component and a weak horizontal component (which is better than no horizontal component at all, and both results are exactly what I observed in my test). And should there be an -electrical- midpoint it would be much closer to the bottom of the whip and not above the physical 'midpoint', the latter being the case with the bend on my whip.

Finally, my antenna is a 1/4 wave, stainless-steel, vertical whip (bent at the time) mounted on the front of an old Dodge truck. It is certainly not an ideal example of laboratory precision, and I never suggested it was. I did a test, I posted my observations, and I came to my conclusion based on those results. I never suggested that my test should be included in CRC's Handbook of Chemistry and Physics or Van Nostrands encyclopedia. I never declared that a straight antenna was better than a bent antenna or vice-versa. I never said that anyone should or should not bend their antenna. In fact, I made no definitive conclusion about my test other than what I stated -- the antenna had both vertical and horizontal polarity. And you agreed.

>>>The theoretical gain of that antenna should be equal between
>>>polarizations. When such a scenario is in place the field strength
>>>should drop to .707 of it's original. That represents a 3db loss
>>>just from this antenna being bent.
>>
>>
>>Wrong. The theoretical gain of the antenna for a given polarity is a
>>function equal to the sum of the gains of equally spaced tangents
>>along the curve of the antenna.
>
>Not wrong at all. A diagonal antennas field strength drops to .707 of
>its original when the receiving antenna stays vertical.

That's only true if the receiving antenna is a half-wavelength.

>>>Yet you stated.....
>>>
>>>"vertically polarized field strength dropped by a hair."
>>
>>
>>As measured by my FSM.
>>
>>
>>>When testing mobile antennas a 3db loss is huge.
>>>Most all well designed efficient non bent antennas
>>>will easily beat your -3db antenna.
>>
>>
>>I did not say that it dropped by 3dB. The phrase "by a hair" is not my
>>words but the words of my spotter, and both of us generally use that
>>phrase to describe a meter shift approximately equal to the width of
>>the needle. And since the FSM used was only a 'relative' FSM (as
>>opposed to a CISPR quasi-peak detector), there is no way to quantify
>>"by a hair", nor did I attempt to do so.
>
>Ok.....so your test is quantified by "hairs". Now I get it.

I doubt it.

>My tests which were performed with much more detail were
>chastised by you. Yet your test (the hair method) gets
>validity.
>
>I see how this works now.

No, you don't. But you will.....

The stated objective of your tests was to evaluate and quantify the performance of various antennas, drawing conclusions that could be extended beyond your testing conditions. However, the technical level of the tests exceeded the limitations of your equipment, education and experience. Your methods were less than scientific, your data was superficial and contradictory, and your conclusions were few and highly subjective. When the data from your first test didn't meet your expectations you provided excuses. Your second test proved that your excuses were wrong, so you made new excuses. Your data could not be quantified, yet you proclaimed that x antenna was better than y antenna was better than z antenna. You clearly failed to meet the objective of your tests. You don't know why you failed, so you made excuses for your failure. When you bragged about your tests in the newsgroup I evaluated your failures one by one. You then blamed -me- because you can't accept and correct your own failures.

OTOH, I did a simple test for fun, posted my observations, and provided my very limited conclusion WITH WHICH YOU AGREED. So according to -YOU- my test was both valid and conclusive.

Yet your obsession with me pushed you to try -- once again -- to discredit me in a technical discussion. And once again you failed. And once again you will blame me for your failure. If anything you should be asking questions instead of trying to act like some sort of radio guru (which you definitely are not).

NOW do you see how this works?

>http://tinyurl.com/33r6x

Your link as nothing to do with it. Check "sparky" and "akc" and you
most certainly talk of AKC in countless posts. Denying it only further
illustrtates you have no self-control.

>Since the post included the term, it will

>naturally be listed in any search for "AKC" with
>me as the author -regardless- of whether I

>typed it or not. Now, find some posts where I

>actually typed the term, and find enough of

>them to back up your claims that it is one of

>my "favorite terms" and/or that I "pioneered it".

Not interested in what you believe, Frank, so there is no inclination
for me to persue your begs concerning this any longer. You have used the
term on many occasions,,again, a blanket google search with "sparky" in
the "from" and "akc" in body of the post yields enough posts from you
usig the term to keep your attention captivated until your next bottle.

Hehhee,,,gee, Frank, thanks for posting the link showing Lelnad getting
busted.
In addition, you began puberty long before the dates on any of those
tiny urls' you presented with your offtopic rants and whines and
presonal attacks. You began menstruating and casting stones long before
the dates you presented. Always hlding yourself a victim,,,and somehow,
you have locked onto this fanatasy that I am responsible for all that
has gone bad in your life...LOL....lately, you hvae been all consumed
with me,,,,I mean, you have always made me your topic, but lately, your
emails to others concerning myself have reached a frenzy,,,a regular
mania. Losing your sobriety really wrecked you this time, Frank. I hope
you can recover from this psychotic episode and your slip back into
dependency.

He is unable. It has been lodged there since our first encounter.
Besides, the story has a recurring theme and a main focus,,,need one
ponder who has been painting the group with such a subject? I thought
not.
Hey,,Tarpon Tournament this weekend,,,,the damn things are rolling like
mad in the day time...a 124 pounder was caught this morning on a
breakaway jig, but I'm a purist and prefer the live bait. Breakaways may
catch more, but they literally "break away" and line the bottom of Boca
Grande with lead. Ever see a picture of a sliver king doing his tail
dance across the water? A beeeyooo-ta-fulll sight to behold!

>excuses for your failure. When you bragged about your tests in the
>newsgroup I evaluated your failures one by one. You then blamed -me-
>because you can't accept and correct your own failures.

I only stated the obvious.

1. After eliminating human error the A/B test were repeatable.
2. The SS steel whip could be beat by shorter antennas
3. The non believers could only sight theory and would never
do the test themselves.
>
>OTOH, I did a simple test for fun, posted my observations, and
>provided my very limited conclusion WITH WHICH YOU AGREED. So
>according to -YOU- my test was both valid and conclusive.

I only agree that if your "hair method" test is valid then my tests
were even more valid.

>Yet your obsession with me pushed you to try -- once again -- to
>discredit me in a technical discussion. And once again you failed. And
>once again you will blame me for your failure. If anything you should

734. CB antenna/antennas on a pickup truck

Newsgroup: rec.radio.cb
Date: 2004-06-19 00:40:03 UTC
From: NetWeasel <hd_883_97@yahoo.com>
Message-ID: <DXLAc.124908$DG4.46510@fe2.columbus.rr.com>
Source record: 183544

Hi all,
I've got an aluminum tool box in the back of my pickup truck. It's the usual type that spans the bed right behind the cab.

I'm thinking that it might make a good antenna mounting point. I don't want to drill into the body of the truck, but I wouldn't mind putting a couple holes in the toolbox.

I have two questions. The first is: If I mount brackets to the tool box, will I need some sort of ground strap to connect it to the frame of the truck to give me a good ground?

The second is: Will I see any real world improvement in performance by using dual antennas?

I like the look of the trucks that I see with antennas on each side of the bed box. It's nice for a balanced appearance. I also understand that it's a bit trickier to adjust SWR with dual antennas. I wouldn't be against using one as an antenna and simply using the other one to balance out the look of the truck (although, I guess some folks might think that's silly).

Thanks!
-NW

Yes..I'd drill the box into the truck frame, that way it won't come
loose in a traffic accident, and it will give you a good ground.
Ground strap would be my last resort..

Not unless you're in Texas and have bull-horns on your hood.

Twin antennas suck..they are too close to each other. Use one
antenna.

I got one of those from this transistor jockey, you might know of him.

That's all new-fangled technology to me, I'm used to a 61 S-Line
with a non amplified D-104 dialed in perfectly on vox..till ya fart
with the 30-L1 keyed..The Dosey seems to love it. <g>

:-)

never farted into the mic. sounds interesting though the pubes may be
caught in the key. dosey couldn't handle the scream though.

No..not into the mic. The vox works really good on that old S-Line..
the lock talk stays on with the D-104. When I speak the transmitter
will key up. It has two adjustments for it and if you get it just
right, it will ignore background noise and you can adjust the delay
on how long it stays keyed between words. I sit 2 or 3 feet from the
mic.. I'm sure you're familiar with vox.

Pretty slick for its age.

What IS illegal, under Part 95, Subpart D, paragraph 95.413, section (a), subparagraph (6) is "To transmit music, whistling, sound effects or any material to amuse or entertain;" and subparagraph (7) "To transmit any sound effect solely to attract attention."

It IS permissible, under paragraph 95.412, section (b) to "transmit a tone signal only when the signal is used to make contact or to continue communications. (Examples of circuits using these signals are tone operated squelch and selective calling circuits.) If the signal is an audible tone, it must last no longer than 15 seconds at one time. If the signal is a subaudible tone, it may be transmitted continuously only as long as you are talking."

The way SOME people use "Roger Beeps" they are clearly intended to amuse, entertain, and/or irritate.

>of text based adventure game.

Good precis, Mike. However, there's one group left out from this
venue, the Traditionalist-Fundamentalist who has adopted a very
rigid set of geas set out to cleanse a personal involvement with
an avocational radio activity. ("geas" refers to magical gimmicks
set to keep devils out of a local territory)

>With the different personalities involved, the games can get pretty
>interesting and funny, or sometimes they can become boring and
>repetitive. The MARS is Ham radio stuff is a good example of the latter.

Agreed. But, the "MARS is amateur radio" statement is an
example of not only a Traditionalist-Fundamentalist but one who
wants to make a hobby into a surrogate of a military life, of
rigid obeyance of some kind of "orders" from a fantasy of what
a hobby really is...and then fails to note the existance and the
raison d'etre of that particular originally-military radio service.

MARS was originally conceived (under the previous AARS) to
get radio amateurs involved with the U.S. Army communications
of 1925. Comms of any radio service of 1925 were rather
simple. Even the Army admitted that. The AARS never grew to
be a big thing and WW2 put a halt on everything amateur insofar
as operations. There's not much about "phone patches" as a
goodwill effort to give servicemen a link with home through
amateur radio prior to 1942... :-)

During the Cold War times, phone patches, whether through
MARS or individual hams, were very good for boosting morale,
especially for those stuck in so many foreign places. It hit a
high point with the Vietnam War, the southeast Asian MARS
stations handling up to 42,000 phone patches a month up to
1970. That's referenced at the Army's Center For Military

History (CMH) and available for download by anyone. [I gave
the link in here]

But, the Vietnam War ended 29 years ago, almost a generation
and a half in the past. MARS still has the task of involving
civilians with military radio but MARS has, for a long time,
changed its mission to be a true auxilliary radio service in the
military, that of being an affiliate communications service with
other U.S. government radio services. The one-month exercise
two years ago of Grecian Firebolt 2002 showed that MARS
does function quite well on its own without civilian radio amateurs
to fulfill its mission.

The existance and definition of MARS is covered by publicly-
available documents. However, the image in the minds of many
is solely from amateur publications (who overemphasize ham
involvement relative to the bigger mission picture) and that
image is about three decades out of date.

> If a poster is the type that is trying to antagonize others - that is

>she does not want to get people so angry that they don't respond. That
>would be losing the game. This player will want to be antagonistic of
>course, but will want to allow other posters to stay just this side of
>filtering or ignoring him or her.

Some have their minds made up and will never change. :-)

In here, several operate slightly differently in that perceived personal
"honor" is involved. They say something wrong or make an error and
then refuse to admit it until pinned against several walls and had it
rubbed all over them. :-)

That applies on any subject in any computer-modem venue, was so
even back in the late 1970s on ARPANET...then the original
USENET (probably the worst are academics not yet risen to their
full titled heights, heh heh)...continued on into BBSs and now the
Internet.

Amateur radio in general seems to be one of the most conservative
of all radio services...plus the fact that most of the hobbyists are
quite unaware of what goes on in other radio services. Amateur
radio publications seldom mention other radio services in the USA.
As a result there is a great deal of insularity (a sort of "dielectric
materialism") which, in turns, breeds even more conservatism.

Most interesting, that conservatism. Radio communications involves
the sharing of information. Radio does it very fast, yet the technology
advancements are all coming from the designer-manufacturers.

> Some here filter Len, but enough do not that he finds a steady stream
>of willing participants in his game.

The regulars are a very, very tiny percentage of the entire hum radio licensees...and they seem to be staunchly, archly, embedded-in-old-concept holes in the ground on what amateur radio "should be." Not a good venue to discuss anything but hidebound status-quoism.

Those who aren't in agreement with keeping things absolutely the same as when those olde-tyme hammes got their beloved licenses is in for a rough go. :-)

> Face it, he is good at it. It may not be what you are in here for, but
>he succeeds in his game.

It may be a game to others, Mike, but it is a lunchtime amusement for me. :-)

In one way, it is fun to poke holes in others' faulty concepts such as telegraphy and the Absolute Need to test all licensees for that ability forever and ever into the end of time in order to invade their precious HF turf! :-)

51 years ago I lucked out in my military service and got stationed at a major communications facility. That changed my concepts of what radio communications was about. Practically a wholesale revision, having had little exposure prior, all from amateur publications. The Army, the Navy, the Air Force just didn't use any telegraphy then for fixed-point to fixed-point radio communications. They had not done so since WW2. The USN depended on on-line cryptographic communications in the fleet, on cruisers and heavier class ships back in 1940 (that's how the USN could coordinate movements to engage in the Battle of Midway). That crypto messaging was by RTTY, not manual telegraphy. The "Sigaba" crypto TTY system was never compromised.

The regulars in this venue don't want to hear of that. It wasn't about "amateur radio" and it hasn't been publicized in QST. Except for Heil, none of the regulars were involved in any big-time radio communications experience. As a result, many are openly antagonistic against anyone who has done so and try to divert the thread into claims that I "embellish" my "CV," tooting my own horn so to speak :-) Really no. I'm trying to point out that "CW" was already being downsized a half century ago and its use is constantly decreasing until it has virtually disappeared for communications everywhere but in amateur radio.

> Note this does not apply to the strange fringe postings that appear to
>be personal battles, such as the one that Dave seems involved in with
>some hams in his locale. That is just really wierd stuff.

The true antagonistic poster seldom gets much response. Those get a large charge out of saying the worst things about another. That's part of the time-distance isolation "safety factor" for them in computer-modem communications. They can get away with it! :-)

What gets "weird" (or 'wired') is when another replies with correct facts and Strong response. The original antagonists almost go berserk. :-) [see the posts of the one who likes to use the word "putz"] The original antagonists Hate that sort of thing. It spoils their private little sociopathy game they so enjoy. :-)

>>>You

>>
>> Naw, it's totally resistible. And predictable.
>
> And yet you are now involved once more!

He can't help it. His "honor" is at stake...someone put a stake through a vital part back when he was trying to peddle Uber-status-quoism all about keeping amateur radio forever locked into the old standards and practices.

It may be an "evangelical" kind of thing. Or just brainwashed syndrome.

Ethnic cleansing must be done, impure concepts washed away.

>>> This is no small accomplishment. I for one have to respect that.
>>
>> I don't.

765. Re: CB and ham radio are the same.

Newsgroup: rec.radio.cb
Date: 2004-06-19 14:08:19 UTC
From: Jay in the Mojave <jay123a@qnet.com>
Message-ID: <40d44a65$0$108$6c56adcd@news.qnet.com>
Source record: 183575

Hello RF Burns, and Distinguished Radio Enthusiasts, type dudes.

Yeah what R.F. Burns said!

The anti gravity thing I am having problems with also.

Jay in the Great Mojave Desert, ... just down the road ah ways from the
fillin ststion.

Miss Dinah, down at Miss Dinahs fillin ststion, got new high desert
traveling food and servivial kits in stock now. But the price of gas is
still real high. Great prices on ammo and sleeping bag cushions, tho.

766. 440 MHZ repeater

Newsgroup: rec.radio.cb
Date: 2004-06-19 16:00:17 UTC
From: William Antonelli <wvantonelli@comcast.net>
Message-ID: <U9Wdne028IyI_kndRVn-hg@comcast.com>
Source record: 183576

Hello everyone:

I have a near brand new 440 MHz repeater. This is the Motorola GR-1225 without duplexer. In addition I have the Motorola RSS version 3.2 used to program this units as well the M-1225 and the P-1225.

This is a Windows based software.

Repeater was used on my site and now I have replaced with a more expensive one.
Works great. I am giving this and the software for a Icom 706 MKIIG

If you are interested please email directly at:
wvantonelli@comcast.net

Or send your phone number and I will call you (Within the Continental US, Puerto Rico, US virgin island, Hawaii and Alaska only, please)

Thanks

Will, W7JM

767. control tones on FRS

Newsgroup: rec.radio.cb
Date: 2004-06-19 17:40:59 UTC

Message-ID: <20040619134059.05775.00000247@mb-m05.aol.com>
Source record: 183577

Hi Group,

Any one know if it is legal to transmit control tones on the 27MHz CB band or the FRS band around 467 MHz?

Basically interested in using standard DTMF tones to control some devices around the house.

768. Yaesu 101 ZD ??

Newsgroup: rec.radio.cb

> Icom rocks.

I've got an IC-2100
http://www.rigpix.com/icom/ic2100h.htm

Does 136 to 174. 55 watts on MURS!!!!!

They don't have pics of my HTX-242, that covers about the same range as the Icom,
or my HTX-420 that will do 4.5 watts on FRS with an external antenna.

One must be careful with these radios. You can transmit where you don't want to.
If you program in a mutual aid channel, program a split that puts you in the ham band.
Unlike 27 MHz CB, there is no room on either side to mess with.

DTMF IS legal. However, only in tone operated squelch control. Insofar as use as a remote control, this may be against regs, as this does not fit the criteria of allowed one-way communication.

>
> I'm thinking that it might make a good antenna mounting point. I don't
want
> to drill into the body of the truck, but I wouldn't mind putting a couple
> holes in the toolbox.

Understandable.

> I have two questions. The first is: If I mount brackets to the tool box,
> will I need some sort of ground strap to connect it to the frame of the
> truck to give me a good ground?

Yes. For a quarter wave antenna the ground plane needs to be at least a quarter wavelength in size too for the antenna to function correctly. The truck body forms part of the ground plane while the capacitance of the truck body to earth ground forming the rest of the ground plane in simple terms.

> The second is: Will I see any real world improvement in performance by
> using dual antennas?

That all depends on your goals. The typical dual antenna setup, when done right, generates maximum signal strength to the front and to the rear. The signal strength to the left and right is considerably reduced. The same applies to your receive signal strength as well.

Long hual truckers normaly are concerned with communicating with other truckers on the road. Those truckers are going to be either in front or behind them on the highway. Thus it makes sense to maximize the signal in those directions, and thus the popularity of the setup.

If your more interested in general communications in any direction then you really don't want a dual antenna setup. What you want is an antenna location near the center of the truck, which will as nearly as possible, give you a uniform signal in all directions. The site you picked, on the tool box, would be a good one.

> I like the look of the trucks that I see with antennas on each side of the
> bed box. It's nice for a balanced appearance.

You have to make up your mind, good looks, or good performance. Your typical passenger truck is not wide enough, you need 9 feet, to properly setup a dual antenna system.

> I also understand that it's
> a bit trickier to adjust SWR with dual antennas.

It can be.

> I wouldn't be against
> using one as an antenna and simply using the other one to balance out the
> look of the truck (although, I guess some folks might think that's silly).

Your truck. You have to drive it.

Good Luck.

If you have stake bed holes, go to your local muffler shop,
have them bend a sort of "roll bar" for the antenna. Make
a mount in the center of the bar for the antenna. Then
mount it in the stake bed holes, drilling through the inner
bed, into the antenna bar for bolting it up.

Here's a pretty good link on how
antenna's work.

No. The site above has not only a discussion about antenna patterns, but the
antenna field pattern plots to prove it. I can supply some EZNEC 4.0
simulation files to prove same if you want.

Everyone will think I'm insane for saying this, but Landshark has it right. In order for co-phased antennas to achieve that ideal figure-8 pattern they must be nearly ideal antennas, which CB antennas are not. Landshark's link explains why this happens. I wouldn't expect any significant improvement in the omnidirectional characteristics of dualies (as the site claims), but I do know they don't provide any noticable directional gain.

If the "human error" is inability to read a 5-LED S-meter, sure, it's
easy to eliminate the error by not reading the meter.

>2. The SS steel whip could be beat by shorter antennas

Only antennas that were designed using temporal physics.

>3. The non believers could only sight theory and would never
> do the test themselves.

This is not a religious debate; i.e, "believers" vs "non-believers".
Your test was supposed to be a scientific experiment with conclusions
based on empirical data. You formed your conclusions without that
empirical data.

>>
>>OTOH, I did a simple test for fun, posted my observations, and
>>provided my very limited conclusion WITH WHICH YOU AGREED. So
>>according to -YOU- my test was both valid and conclusive.
>
>I only agree that if your "hair method" test is valid then my tests
> were even more valid.

You said: "Such an antenna always has fields in both polarizations. I never stated it didn't". You agreed with my -only- conclusion that the antenna under test had both horizontal and vertical polarization. You therefore validated my test, my data, and my conclusion.

>>Yet your obsession with me pushed you to try -- once again -- to

Hello Tony:

I think that cheap copies of the Starduster are out there. But the quality is the lowest I have ever seen. I bought a new cheap copy at a yard sale new in the box. After a few mins of looking at it, I threw it in the trash. I believe there went for something like 39.95 and the copies where engineered to have the cheapest design possible.

Maybe E-bay will have a older original one listed. Channel Guard also made a Starduster copy that was of excellent quality.

If you drive around in populated areas you might see one that the owner isn't using, and ask if they want to get rid of it. And if it been there a while its a good bet its a original one. Use the good LMR400 Coax.

I agree as well, a properly engineered single 102"
will outperform duals anyday.
Most truckers don't understand how and why antennas radiate RF energy and
they run duals because they give a balanced look, as a bonus co-phased
antennas tend to
supplement each other on vehicles with plastic or fiberglass bodies.
The fact is that the trailer blocks a majority of the RF
that co-phased antennas provide to the rear so they end up with a system
that transceives mainly to the front.
The exception to the rule would be a flatbed trailer.
I use a 102" whip on my T2000 which is mounted to a flat bar attached to the
frame that extends past the edge of the trailer which allows the antenna to
"see" behind the trailer.
The antenna is supported roughly 6' above the mounting point using a custom
made plexiglass bracket.
I have also attached 2 braided steel cables to frame which drag the road
during travel and supply a make-shift earth
ground when parked.
I will be flat honest with you and say that this system gets out farther
then i care for sometimes.
It also works well for sky-wave propagation when conditions permit.
My 4x4 truck uses a pedestal mount 102" whip and a
24" x 24" sheet of stainless, the pedestal is mounted to the floor of the
bed 1.5' behind the cab and cut to length with the top of the bed, the
stainless heet is sandwiched between the top of the pedestal and the bottom
of the antenna.
Very powerful system using a highly tuned 25 LTD

They don't nessessarly need be to be ideal, but the do need to be installed
the same way. By the way no antenna is ideal, but many people have a lot of
success anyway.

> Landshark's link explains why this happens. I wouldn't expect any

If you check the link I provided you will see there is some gain. The gain
does not become noticeable until you have at least a 1/4 wavelength
separation, and at that it is around 2 db or so. On the site I posted the
link for you will see the figure 8 pattern becomes very noticeable for a
half wavelength between antennas. Getting to that degree of separation is
much easier to do on a semi because of their size, and the fact the antennas
are further apart from being mounted on the side view mirrors. Passenger
vehicles just don't have the size needed.

The point was that it was a much better omni-directional pattern
on Dual antenna's, to which that is achieved. You are saying
that Signal Engineering, which soul business is antenna's is wrong,
good luck on trying to convince others of that.

> know anything, right?

They can't seem to get their facts right. For example:

" The pattern is "pulled" to areas where there is the most vehicle body. The pattern is the worst in directions where there is no metal body for a radial."

This is from their comment about mounting an omnidirectional antenna lifted right off their WEB page. The dual antennas mounted near the mid point of the vehicle should each have a similar pattern distortion due to mounting location, for example to the front and rear with some to the side where the antenna is mounted. Those are the directions where the metal is located, with more to the front and rear than to the side. Now refer to the antenna pattern for the site I mentioned you will see the greater field strength is to the front and rear of the vehicle too for quarter wavelength spaced antennas fed in phase, and is in the same direction. Both effects are adding together in the same general direction. However under their comments about a dual antenna setup they claim just the opposite in a round about manner.

Then explain away the the information on the other site. Get a copy of EZNEC
and model it yourself.

http://www.eznec.com/

And if you're to cheap to buy a copy then try the freebee versions at:

http://www.qsl.net/wb6tpu/swindex.html

Then you can check at the site below for antenna modeling tips and
information about many types of antennas from an expert in the area.

http://www.cebik.com/

And another interesting antenna site:

http://www.antennex.com/

You have been sleeping at the keyboard. I was on CB back in the late 70's
until I got fed up with all of the jerks on the air. Even ran a mobile
AM/SSB system. I used a Midland combo base- mobile radio. At that time the
rigs were 23 channels. I've been there, done that, and gave away the radio
to my nephew some years ago.

They also make antennas for money. And when money is involved you have to suspect the claims they make. It won't be the first nor the last time a manufacture stretched the truth, i.e. lied. But then again you guys also believe Class "C" amplifiers are linear, "magic" lenghts of coax to fix antenna SWR etc. This news group should be named "rec.voodoo.11m.radio" from all of the crap that's passes for fact.

Forget about all that antenna-modeling software crap and build a
simple field-strength meter. Then go measure it yourself because
that's how it's done in the real world, and that's how the page at
Landshark's link came up with the radiation pattern for the
bumper-mount antenna. A similar pattern can be found in almost any
radio-communications handbook that covers mobile antennas.

Including Radio Shack's famous tome, "All About CB Two-Way Radio"
which, IMO, should be the rrcb FAQ by proxy.

The antenna simulation software shows the same thing as single bumper mount antenna pattern as on the page Landshark posted. That's why I question the omni pattern for a dual antenna setup. In fact Frank you can look up the pattern for such a setup, dual antenna, in a copy of the radio engineer's handbook, and I'm surprised you haven't since you know about it. More than one Ham has modeled some commercially manufactured antennas and discovered they don't perform as the ads suggest. When the manufacture was confronted with the results they modified their claims. The software modeling approach works or people wouldn't waste their time with it. In fact more antenna manufactures are doing it since it saves a lot of screwing around making error prone measurements with a field strength meter, and that's how they are doing it now in the real world.

>> Forget about all that antenna-modeling software crap and build a
>> simple field-strength meter. Then go measure it yourself because
>> that's how it's done in the real world,
>
>Have you personaly done so for the setup in question?

Over the years I have tested many different antenna installations,
both on my own vehicles and at customer request. Here are a few that I
remember:

Just last month I tested a 4' helical mounted on the center of the
roof of a pickup. It showed a little gain to the front and rear, kinda
like what people are trying to achieve with dualies.

Another was a dual-antenna setup on a tractor cab. I don't remember
the make but they were short, center-loaded whips on the mirrors.
Almost no signal to the rear with or without the trailer, moderate
signal to the front and sides.

On the same truck (at a later date) was mounted a single 66" whip from
RS on the passenger-side mirror. This was goofy: it was generally omni
with a little gain to the front-left and right-rear, and there was
-no- expected dead-zone to the left-rear (possibly due to the antenna
height). Pretty good antenna! As far as I know he still uses it.

Tested dual 9' whips on the bumper of a very sweet GMC pickup (1-ton
custom job, diesel, fording package....the works!). Pattern was almost
perfectly omni. EXCELLENT SIGNAL STRENGTH!!!

I also tested my own truck with different antennas. The mount is
centered on the roo-guard. It almost always shows a slight gain to the
sides, but is generally omni.

I have tested more and with different types of radios (lots of VHF),
but I can't remember all of them offhand, and I don't feel like typing
all day. I should mention that I chose the location for the antenna
mount on my truck (on the front at hood level) because it was the
location with the best RF ground, as tested with my GDO. This is the
case for -my- truck. I wouldn't extrapolate that for any other
vehicle. In fact, the other day I was going over the Chevy (S-10) with
the GDO looking for a good spot for an antenna mount, and the spot

that works so well on the Dodge is -not- a very good RF ground on the Chevy. No antenna modeling software can predict something like that.

BTW, the easiest way to do a pattern test is to park the meter with a spotter a couple hundred feet away, drive the test vehicle in a tight circle, stop every ten degrees, key up and transmit the heading. It takes all of ten minutes, give or take, depending on how fast your spotter can read the meter and write down the data.

And I still don't understand the desire for front/back gain on a vehicle. Unless you drive most of the time on the long, straight highways of the desert and plains, a directional pattern isn't going to do much good at all, and what little bit gain you can get from a directional pattern won't amount to anything you can hear from the speaker. Oh well, to each his own. As for me, I'm going to try dual 9' whips on the rear bumper of the GMC.

Antenna modeling software is a great tool for learning theoretical antenna design. But unless the software was written by a team of grad students at Cal-Tech and runs on Big Blue, it cannot possibly account for all the variables involved. It is not, and should not be used as, a substitute for actual field measurements.

My reason for asking is the pattern is of course 3d. Doing an elevation slice through the pattern I have seen extensive variation in the pattern as the elevation slice is moved up and down in the z-axis when multiple elements are involved. Normally the main lobe in the field pattern is not at 90 degrees to the vertical antenna, but tilted up by some number of degrees. Standing at ground level a few hundred feet away doesn't really give you a good idea of the of what the field pattern looks like.

> And I still don't understand the desire for front/back gain on a

Long haul truckers spend a lot of their time driving over long sections of straight highways.

Tell a hard core Dxer that a db or so difference don't matter and see what happens. They will swear up and down it does.

> Oh well, to each his own. As for me, I'm going to try dual 9'
> whips on the rear bumper of the GMC.

A buddy of mine used a 4-point mag-mount on the roof of his car to hold a 9 foot whip when he was on 11m years ago. He claimed around 100+ miles with a standard radio.

I think if you contact Mr. Cebik, W4RNL, you will find he does both, model and test. Seems his models predict real antenna performace rather well. If he didn't then there would be no way to advise others about areas that

require care when modeling atennas. Also Roy, W7EL, has a lot of experience too.

I worked with Mr. Cebik on a Turnstile matching idea. As he pointed out in an article in QEX the schema has the draw back of producing a gain variation of around 2 db from perfect omnidirectional. While not a big deal it can be improved by a small adjustment to the length of the phasing lines that do the impedance match at the expense of a small increase in SWR. The analytical solution was confirmed by the antenna simulation software, which showed an improvement in pattern circularity and equal currents in the antenna elements.

Why? Don't hams use CB? I would like to put a repeater on my roof. I'd prefer 2 meters, but those freq pairs are unavailable here. 440 is going to be tough in an urban area.

And it's spelled "dumB".

Listen I know how you feel. Bought a brand new F150 and didn't want any holes in it either. after talking in this dopey group i decided to drill the holes. I put in a plastic side mount bracket right next to the F150 marking and used a fiberglass 4' antenna. works better and looks better than any other hook up I have had in the past. Forget about the drilling problem, go for the looks and it will all work out better for you. PS what kind of a truck is it?

I have been using it for about a week now.....pretty cool, at a 6.8MB download. I did download Version .9 the other day, but haven't installed this 4.8MB file yet. They seem to be getting smaller with each revision.

Jeeze.....I don't know who's worse... the snot nose hams or the "27.025" idiots. I think the absolute worse has to actually be the useless little freaks that show up at public events with their HT's and think they're somehow important and special. You know the types, those real "he-man" emergency operation preparedness fruits.

Oh well, keep worrying about who operates where, what mode, what class license, and whether their a "real" ham or not. Oh, and BTW, why any ham ("real" or otherwise) should worry about who transmits on the 27 mhz freeband is beyond me. HERE'S BPL! You did it to yourselves.

Yeah, and Linux is also getting a bit more newbie friendly. I am
building 2 new boxes, one for my IRLP node, and one for personal use,
the one for personal use will be running the new athalon 64 bit chip
with the new SuSe linux optemized for 64 bit. The IRLP box will be
running Redhat.

Hello, Keith

Well, I'm going to dump the dsl and go back to dial-up. Now the question is should I use the built-in modem, or go for a hardware modem (much more expensive). The reason I'm thinking of the hardware modem is that I have Linux sitting right next to me ;)

Now you've done it Keith - you've got me thinking (and that can be dangerous lol)

Best regards from Rochester, NY
Jim

I never claimed any numbers expressed in db. I only tested specific antennas side by side to get a relative gain order. One of the better antennas tested was (there are others) the X-terminator. The X-terminator is a five foot antenna that would barely outdo a 9 foot stainless steel whip. The X-terminator would consistently show a higher reading on different S meters.

Further tests showed that if you replace the 9 foot stainless steel whip with a 9 foot one inch silver pipe then the full length silver pipe would beat all others tested. Including the X-terminator

Like the FRS as in 15 minutes [meant seconds], since I got this FRS radio I am picking up a lot of business Communications & I took all the channels & put them on my scanner & the scanner seems to act as a big base antenna & I can hear more on the scanner then my walike talkie. I only head 1 person who cussed like they did on the 11 metter band, but this radio seems to be ok for what I want. Also if anyone on here is near Georgia Ave in Wheaton, MD & has an 10-33 & I hear you I will come back. REACT may have kicked me out [:-(>], but I still handle emergency calls & this 1 business I know [next door] of, I told them [voice + e-mail] if they need me [emergency or even help them as a volunteer] just to call me on their channel. I told them that I have them on my scanner but do not know what channel they are on, so just to yell either 'PEE-WEE' or my name & I channel # & I will come on to help them. These radios [maybe the different types or how new they get] have different tones to them & some sound like what you hear on the scanner as alert tones. But I like this little radio, it is so cool. My battery door is broken, so I use masking tape + cardboard to keep it closed. Also the other day I turned on my radio & got on the screen;

'88"

So what does this mean? I turn my radio off then on & it is ok for a while then it keeps saying '88', thanks.

PEE-WEE = KBKS-20902 [10-10]

Thank God for radios & all these computers!

Linux does not play well with plug-n-play modems, you need one with jumpers that you set the Comm Port with, but hell if you are on DSL, install Redhat, get the IRLP board, and have a simplex IRLP node, or work with one of the local clubs and link your linux box to their repeater, then more people can play. As many dead repeaters as there are, this would be a prime way to make use of them. And unlike Echolink, it is RF on both the broadcast and recieve.

All the Xterminator antennas are loaded 1/4-wave verticals. The fact
that the radiating element (whip) is smaller than a full-size 1/4-wave
vertical necessarily means that they are less efficient -- that's just
simple physics.

I should point out that the company also makes a model called the
MTM-1 which is a center-loaded mini using Litz wire in the loading
coil, totally ignoring the fact that Litz wire offers no advantage
when used at frequencies higher than a couple MHz. Also note that the
prices of these antennas have hit bargain-basement levels (even lower
than Radio Shack cheapies) reflecting the slumping demand for these
supposedly 'superior' products. People are finally learing that the
company has no clue regarding antenna design -- they cater to the

George Jetson types who respond to sci-fi aesthetics and internet propaganda.

>Further tests showed that if you replace the 9 foot stainless steel
>whip with a 9 foot one inch silver pipe then the full length silver
>pipe would beat all others tested. Including the X-terminator

I don't think anyone, including you, keeps a stock of 1" silver pipe laying around just waiting to be cut and tuned for a CB antenna. But oddly enough, I do. So after all your whining about me doing my own tests, I'll repeat your test with the silver pipe. Now I'll need the parameters of the test:

1. What was the final trim length/frequency of that pipe?
2. SWR?
3. Field strength relative to 9' SS and at what distance?
4. What was used for a FSM?
5. What was the vehicle used and the location of the antenna mount?
6. What was used to couple the pipe to the mount?

>good idea of the of what the field pattern looks like.

It gives a good idea of the field pattern where it matters. How many
aeronautical CBers do you talk to in any given year?

>> And I still don't understand the desire for front/back gain on a

>> whips on the rear bumper of the GMC.
>
>A buddy of mine used a 4-point mag-mount on the roof of his car to hold a 9

>foot whip when he was on 11m years ago. He claimed around 100+ miles with a
>standard radio.

I have pulled in signals from just about every distance between here
and Mexico with my homebrew base vertical, but propogation just isn't
very reliable beyond 5 or 10 miles. Regardless, I have no intention of
mounting an 18' stick on the truck. I think I'll stay with the idea of
dual niners on the rear bumper. It should make the most out of the
range that's available, and I'll also be able to test some of these
dual-antenna theories.

>> Antenna modeling software is a great tool for learning theoretical
>> antenna design. But unless the software was written by a team of grad
>> students at Cal-Tech and runs on Big Blue, it cannot possibly account

>> a substitute for actual field measurements.
>
>I think if you contact Mr. Cebik, W4RNL, you will find he does both, model
>and test. Seems his models predict real antenna performace rather well. If
>he didn't then there would be no way to advise others about areas that
>require care when modeling atennas. Also Roy, W7EL, has a lot of experience
>too.

I am familiar with W4RNL, and he is very good with the software. But
if you haven't noticed, he tends to play with software much more than
hardware. But if modeling software had the capability to accurately
predict the performance of any given antenna then there would be no
reason to test them in the field. Yet he -does- test his models, which
is indicitive of the fact that the software has not evolved far enough
to stand on it's own, and he evidently recognizes this fact.

>I worked with Mr. Cebik on a Turnstile matching idea. As he pointed out in
>an article in QEX the schema has the draw back of producing a gain variation
>of around 2 db from perfect omnidirectional. While not a big deal it can be
>improved by a small adjustment to the length of the phasing lines that do
>the impedance match at the expense of a small increase in SWR. The
>analytical solution was confirmed by the antenna simulation software, which
>showed an improvement in pattern circularity and equal currents in the
>antenna elements.

Now this is what I'm talking about.... some people just can't sleep at
night knowing that their radiation pattern is not a perfect circle (or
whatever desired pattern they have drawn in their mind). Smoothing the
dimples of a turnstile doesn't add any gain, it just redistributes it
at the expense of a little ERP. How (or why) is that even worth the
effort for such a cheap and easy antenna?

I was being generous with my comment as to their problems heheh.

Hey this new monitor is great on my eyes. don't have to sit right on top
of the damn thing to see anymore.

There is one of those on a tower here in town, the business is closed
down now, but the tower and antenna is still there, and down the street
a guy has a PDL-II and a Moonraker 4on two different towers, only one is
only 10ft off the ground?

I'd have to ask my wife if she's familiar with 1015's. Man..talk about
an onion you could eat like an apple..those Vidalia's are the bomb!

They don't even give you onion breath real bad..killer on almost anything.

Yep. A non-magnetic whip is best, but even a magnetic steel whip will outperform any other 1/4-wave vertical on the market. That's my story and I'm sticking to it.

BTW, I have been considering what it would take to setup a small scale production run of -good- 9-foot fiberglass whips. Any comments and/or suggestions are welcome.

> <tree pruning problems considered>

I'm not sure but I think the max height for a motor vehicle (without a special permit) is something like 13 feet, which means you should be able to mount the whip up to 4 feet off the ground and have relatively few problems. I'll check on that height limit......

I don't remember

>2. SWR?

I don't remember but the lengths were adjusted for best SWR.

>3. Field strength relative to 9' SS and at what distance?

3 s units for the SS whip..... 3.05 s units for the
X-terminator ..... 3.1 s units for the silver pipe.

Multiple a/b comparisons to determine the gain order.

A consistent gain order was evident.

The numerical values were obtained by averaging.

>4. What was used for a FSM?

A Tentec radio

>5. What was the vehicle used and the location of the antenna mount?

On the roof of a pickup. (quick disconnects)

>6. What was used to couple the pipe to the mount?

Hose clamp

You won't have to check..you'll hear it banging pretty strong. <g> They
are great antenna's, but not usually practical..and very odious looking.

there was a guy in my senior class, went into the army reserves summer between jr sr years.he let his hair grow out too long, when theywent in for maneuvers, his platoon sgt took him out, got him drunk,and shaved his head.

Tony came back to school with a nice shiny head, and being the kind sympathetic soul that I am, I went out and bought Tony a tub of Turtle Wax.

Can you make them two piece with an easy dependable connection? That
way a guy could unscrew the clearance problem, and then easily re-connect
it when needed.

heheh hot pastrami and swiss on rye, would kill for a garlic onion bagel
with cream cheese and smoked salmon though.

Oh and I got my steaming cup of Jamaica Blue Mt coffee

Hello, Mopar

Yep, we *love* Vadallia onions. They may well be the same onion; I don't know. However, they have to be grown in a very specific area. There are some farmers mad as heck that live adjacent to a farm that grows Vadallias, but if they grow 'em, they can't sell them as Vadallias as it wasn't grown in the "approved" area (read - control output to keep price higher).

They are really good. I've found sometimes they can be a bit strong (likely growing conditions), but usually they are very mild. I love cutting a *big* slab of Vadallia to put on a hamburg. Yummy!

Best regards from Rochester, NY
Jim

I've had a few bitter ones, but mostly when they are old. .29 cents
a pound for really big sweet ones right now..killer. It won't last
long tho. I've made onion/tomato sandwiches with them, no meat...great!

>X-terminator ..... 3.1 s units for the silver pipe.

It would be nice to try this with an X-terminator, except I'm not
going to waste my money. Is there anyone in Spokane with one of these
and is willing to let it be used for this test, as well as corroborate
the test results?

>Multiple a/b comparisons to determine the gain order.

???????

>A consistent gain order was evident.

"Evident" requires "evidence". Where is the data? Was it even
recorded?

>The numerical values were obtained by averaging.

Averaging what? Did you get enough fluctuation between seperate
key-ups that the data required averaging? How many times was each
antenna keyed-up? Better yet, since you averaged the readings they
must have been recorded, so where is that data?

>>4. What was used for a FSM?
>
>A Tentec radio

Tentec has made lots of radios with different signal-strength meter
circuits. I can't quantify (and therefore validate) your meager data
without knowing the model.

>>5. What was the vehicle used and the location of the antenna mount?
>
>On the roof of a pickup. (quick disconnects)

Make & model? In case you haven't noticed, pickups come in different
lengths, and the length can have a significant influence on SWR. I may
not be able to obtain the same make and model, but I'm sure I can come
close (unless it's an old Datsun, Chevy Luv, Dodge D-50, or some other
kiddie-truck).

>>6. What was used to couple the pipe to the mount?
>
>Hose clamp

.....ok, I'll bite: How do you use a hose clamp to mount 1" pipe
to a 3/8-24 stud?

In Washington the max vehicle height is 14 feet. That doesn't mean the
roads are required to clear a vehicle with that height, but it does
mean that any hard obstruction lower than 14 feet must be marked.
Maybe adding a small electric winch to pull down the tip of the
antenna, activated by a switch on the dash....?

Telescopic!! Why didn't I think of that!? It would be multi-banded
since you could just extend it more the lower you went in frequency.

It's gonna take quite an off-set under the body panel to hold it all.

:-)

How about a really long door-spring with tubing in the center that is
connected to a pump, so the antenna can be softened or stiffened as
needed? Just give the pump a few strokes and it rises to it's proper
operating length.....

I think they already have that on the market, but it comes with the
warning that if it stays pumped for more than 4 hours you should see
your doctor immediately.

It's called taking the numbers given and then averaging them. The
numbers mean nothing being so close, however with a/b comparisons
it was easy to establish a gain order of the antennas.

Whatever there Mr. Garden Master, but if the ohio department of
agriculture, and the USDA says these ohio grown onions are Vidalias,
I'll believe them over you, they have more experiance and education in
the field than you do.

Plus if you notice the site you listed, it's a COMMERCIAL site, they
have interest in making people think they are the only source of
Vidalias.

That would be the same as saying a Rose isn't a Rose unless it is raised
in Rose Texas (or where ever there is a town named rose).

So pardon me if I don't fall for your commercial BS

While I tend to agree with you (and all the conventional theory I've
been taught) that a full length 1/4 wave antenna will have more total
GAIN than an electrically shortened 1/4 wave antenna, there are other
factors to consider which could explain a slightly better signal from
the shortened antenna. The biggest of these would be radiation angle.
If the shortened antenna concentrates its gain at an angle which is
more favorable to the distant station, it will produce a stronger
signal, even if its total gain is slightly less.

Frank;
Can you qualify that a little more? A 1/4 wave S/S whip will
outperform any other 1/4 wave antenna when mounted in the same
location?

if a shortened antenna has a lobe that favors dx then it is only good
during dx conditions and only in the direction of that one lobe. the
rest of the time it is not performing as good as a 9 ft whip.

>sheet of stainless,

Congratulations. The "Richochet Skip Dish" has been used for years on vehicles around here,,practically standard fare on many pickup trucks 'round here. And you're right, it makes one hell of a difference,,,it gets up and out,,,,.since you have a 4 X 4, pull that bad boy into some water, like on the edge of the lake or on a beach. Add a Leece-Neville or two and you're humming.

_
>the pedestal is mounted to the floor of the bed

>and the bottom of the antenna. Very powerful

>system using a highly tuned 25 LTD

>Mad-Dog

Nice set up for any eleven meter activity. Attaching the mast and Richochet dish to a steel toolbox is also another popular method. Copper strap as a ground is preferred instead of wire because of differing inductance value.

If you have any other question just do a google search.

The bottom line is that there is only one way to determine
what antenna will outperform another antenna when we
know the results will be very close.

When the results are very close the only way to determine
the best antenna is by the use of a side by side comparison.

A side by side comparison can only be done by physically
having the antennas and testing them. It can't be done here.

Conclusion. If you really are interested in the truth, you'd just
do the test yourself.

Hey,,Tarpon Tournament this weekend,,,,the damn things are rolling like mad in the day time...a 124 pounder was caught this morning on a breakaway jig, but I'm a purist and prefer the live bait. Breakaways may catch more, but they literally "break away" and line the bottom of Boca Grande with lead. Ever see a picture of a sliver king doing his tail dance across the water? A beeeyooo-ta-fulll sight to behold!

Man that sounds like a blast, Twist. One of these days I'm going to take you up on your offer to take me out on the big pond and wet a line.. Do you take pictures of these great fishing days? It's a lot of fun to look back at those days on the water when they're jumping in the boat and you have pics of it.

>I won't retire, but I might retread.

Someone always has a camera, but we don't take pics of tourist (but we do sell disposable cameras, for their convenience of course) catch unless its something to write home about, like the billfish that have been getting hooked off the coast of Tarpon Springs,,,small,,,but rare nonetheless.
Next time we have something worth taking a pic if, I'll send ya' a few. A small winner this past weekend,,,was only 126 pounds. The sharks have been a major problem in the pass,,,,,,once the Tarpon is hooked, sharks often nail the fish before one can get it over to the weigh boat. In fact, this has been happening more than not. Many theories on this, but there is no doubt about the shark population being WAY up due to mandatory protections enacted some years back...sorta like the gator....anywhere there is freshwater, there is one there, thanks to them being placed on endangered species list some years ago.,,they're about as endangered as the spring Robin.
C'mon down, man..I'll show ya' the real Florida, the side the tourists don't get to see...and you'll get some pics to show your yankee friends of gators and sharks and swamps up close. If ya' fancy world class bass fishing,,,,,it doesn't get any better than local Lake Tarpon,,,,check it out on the web,,,ranks right there with Lake Okeechobee, but a better kept secret. Spring and Fall is best, but summer can be almost as good in the wee and early morning hours, on occasion.

heheh hot pastrami and swiss on rye, would
kill for a garlic onion bagel with cream cheese
and smoked salmon though.
Oh and I got my steaming cup of Jamaica
Blue Mt coffee

You're speaking my language loud and clear.....the Jamaican crop was absolutely lousy two years ago and I went to the Ethiopian Harrar (a close runner up, in addition to a distinct Arabica Hawaiian bean offered by Gevalia),,,,did the Blue Mountain Crop rebound? Sometimes they get two growing seasons per year. I couldn't justify the price for an inferior bean that is supposed to set the standard,,we drank Blue Mountain for years and until it changed two years ago due to a poor crop year..,,,,I haven't tried this year's crop yet,.....nothing like world class whole bean from a press out of a ceramic mug. Ditto for the smoked salmon, although smoked mullet is a dead tie when making spread.

Twist with a Republican bumper sticker!? -never-

LOL!!! I think I might
be able to sneak one onto his boat maybe ;)
Landshark
-

The world is good-natured to people

I wouldn't care if Geogre touted his image of Chairman Mao. People are
free to back anyone they wish. I focus on the candidate rather than the
people backing the candidate, with the notable exceptions of the Enrons,
S & L scams, Whitewater, Iran-Contra, Halliburton, Root, Kellog and
Brown, Blackwater, etc.
Among the mementos in one of the curios,,,a Nixon vs. McGovern handbill
and several items from the Bob Martinez (R) successful campaign for
governor of Florida, of which I was involved via the young republicans
club with which I was associated at the time.
It's not the repubs that offend me,,it's this current batch of radicals
that hold themselves above all those who dare question their
position....,the Bush regime.

>If you have any other question just do a google search.

I already have:

http://tinyurl.com/2qg7k
http://tinyurl.com/3xpvc

For starters, you claimed that you tested a 1" silver pipe, but in your previous tests you claimed no such thing -- the closest thing to a 1" silver pipe would have been the "one inch wire braid covering a fiberglass rod 9' tall" that you used in your first test. So which was it; a 1" braid, a 1" silver pipe, or both? And if you went through the effort and expense to test a 1" silver pipe, why was that not reported in any of the previous test results? And whether it was pipe or braid, how did you mount it to a 3/8-24 stud using a hose clamp? How was it tuned and/or pruned?

In posts previous to the first test you claimed that the 7' Firestik outperforms the 108" whip. The first test mentions that both a Tentec -and- a Kenwood were used as receivers for the test, but the data shows a discrepancy in the received signal strength between the two radios. And this discrepancy was not just in your 'averaged' results but also in your "gain order". Your first test had the following 'averages' from the Tentec:

1" braid -- 3.1 s units
5'4" X-terminator -- 3.05
108" SS whip -- 3
7' Firestik -- 2.65

From the Kenwood:

1" braid -- 2.3 s units
5'4" X-terminator -- 2.2
7' Firestik -- 2.15
108" SS whip -- 2.1

Your second test yielded a consistent "gain order" of:

1. X-terminator
2. Firestik
3. 108" whip

Just recently you claimed:

silver pipe -- 3.1
X-terminator -- 3.05
108" SS whip -- 3

These latest figures are consistent with your first test with the exception of the silver pipe (it seems that 1" silver pipe is just as efficient as 1" braid over fiberglass, huh?) Yet I can't help but notice that these results have one, and -ONLY- one thing in common: the X-terminator outperformed everything except the pipe/braid.

Now since ALL the other data was contradictory, how did you justify the validity of the ONE and ONLY thing that was consistent? Less than 24 hrs ago that "Relative field strength doesn't lie. Even if it's your radio." How do you justify your inconsistent results when, by your own admission, "relative field strength doesn't lie"?

Back to your 'averages'; In order to calculate an average you must have a set of data. Unless you have a photographic memory, you must have written down this data in order to calculate the average. That means the data was recorded. Where is that data? And if you didn't save the data (which means you didn't save the video tape from the second test), then what was the standard deviation for each antenna? This information is not in your previous posts but is required to duplicate your test, because if I have a standard deviation that is higher than yours then my conditions are fluctuating and my results would be invalid.

I also require the make/model of the vehicle for reasons already stated. This information is also not available in your previous posts.

>The bottom line is that there is only one way to determine
>what antenna will outperform another antenna when we
>know the results will be very close.

"We" know no such thing.

>When the results are very close the only way to determine
>the best antenna is by the use of a side by side comparison.

The only way to validate -your- results is to duplicate -your- test. If I do a test -my- way you will have room to whine about variables between the methods. In order to eliminate those confounds, my test must be done as closely as possible to the original test. I can't do that without the information I am requesting.

>A side by side comparison can only be done by physically
>having the antennas and testing them. It can't be done here.

Where is "here"? The newsgroup? Of course it can't be done on the newsgroup. It -can- be done in Spokane, but not without the information I have requested in order to eliminate any significant confounds.

>Conclusion. If you really are interested in the truth, you'd just
>do the test yourself.

That's what I am trying to do. Provide the information so I can
duplicate your test.

Well, This years crop was good, and there is a bean that comes from the
next mountain over that is damn near as good. The local coffee shop
orders the whole beans for me, and I grind them fresh for each pot. heck
I love the smell of fresh ground beans as much as I love drinking the
fifnal product.

Ok let me correct myself, Vidalias are gorn in GA fine, but it is a spanish onion, as ar the Maui, and other variety, and those (spanish)are grown everywhere, just like apples, granny smith apples are grown in ohio, indiana, michigan, just like red Delicious are grown all over.

So you are correct "Vidalias" are only grown in the Vidalia area, but spanish onions, which is what "Vidalias" are, are grown everywhere including hawaii. And having been a chef for many years, I have worked with every variety you can imagine, and have sampled them all, and the ones Tracy grows here locally are just as good as the "Vidalias" .

Thats whats so great about this country, our soldiers, our men and women in uniform have in the past shed their blood, and in the present, and future are prepared and willing to do the same, to defend our rights.These rights allow us to have our own opinions, and to voice them.

Look at the past, in the Middle East, people there didn't have the right to voice their opinion, Saddam placed anyone who's opinion differed with his in prison or had them executed. Now we (the US) have displaced Saddam, and given the people the right to choose for themselves, and this is the thanks we get.

So they are exercising their rights to be complete frigging idiots.

I will say this though, There is a family living here in town from India, they are not muslims, in fact they are very nice people. They have been to my house, and I to theirs for dinner, I have taken their kids to movies, and helped them buy their computers. It does aggrivate me when I see others call them diaperheads, and lump them in with the terrorist assholes you see on the news.

top posting is when you put your reply at the top of the msg instead of
below it like I am doing right here.

Top posting means that people have to scroll down to see what you are
replying to, and then back up to read your reply so it all makes sense.

Most usenet groups with a charter and FAQ are violently against top
posting, as are most of the experienced usenet users.

yeah according to your ebay advertisement, it can be used as a mobile
radio with supplied attatchment, but the attatchment was hooked up
backwards so it is borked, that means it is ONLY a handheld.

I don't need it and if I wanted one I could buy a new one locally as
cheap by the time you add in shipping.

Do your own test. I know the results. The X-Terminator and similar antennas do match or better a 9 foot stainless steel whip.

The copper, silver, or silver braided antennas of one inch in diameter at 9 feet will beat them all.

Stop whining and do your own test.

There are many American Muslims that feel that way. But hey, we also let the Nazi Party exist in this country (and buy arms, for chrissake); so Islam gets a free pass.

I -have- done my own tests and I have -never- seen a loaded antenna outperform an unloaded 1/4-wave whip, stainless steel or fiberglass. That's why I am trying to duplicate -your- test -- a test where loaded antennas -can- outperform an unloaded whip.

>The copper, silver, or silver braided antennas of one inch in diameter
>at 9 feet will beat them all.

Ok, so you tested 1" copper pipe, 1" silver pipe -AND- 1" braided silver? Where on earth did you find 1" silver braid?

>Stop whining and do your own test.

As I have stated before, the purpose of -my- test is to duplicate the results of -your- test. I can't do that without the information I have requested. It is absolutely impossible to perform all the tests and calculations you claimed and -not- have that information. So are you going to provide the information or not.....

Oh hell, why am I wasting my time..... of course you won't because you can't. It's obvious that you never performed any of those tests. They were probably devised and executed only in your imagination, and were nothing more than an elaborate scheme to promote your unqualified and unquantified opinions.

"Let's see, I used one inch braid over fiberglass..... no, wait, I think it was silver pipe..... no, it was silver braid..... or maybe it was tinned copper braid..... oh, NOW I remember, I tested copper pipe, silver pipe, lead pipe, sewer pipe, copper braid, tinned copper braid, silver braid, braided rope, braided hair and nylon panty-hose! So there! Nyah!"

LOL!!!

Get bent, tnom.

I have never tried one, hell I don't even have an operable CB right now, I
have several old Johnson radios I am restoring, and President Lincoln that
I picked up at a flea market that is a 10m rig that was moded for 11m that I
am building a transverter for 6m to go along with it. I might pick up an
older Unident Grant or an older 148 GTL.

You tested the X-terminator, the 7' Firestik (both of which are loaded antennas) and the 108" whip (an unloaded antenna). Your conclusions were that the loaded antennas outperformed the unloaded antennna. That was your test regardless of how you word it. BTW, I still intend to duplicate your test. Anybody got a 5'4" X-terminator they would be willing to let me use for the test? I'll pay shipping both ways if that's a problem, and I'll list the person's name as a contributor to the test if they want. Any takers?

You still haven't come clean on what exactly you tested. Was it 1" silver pipe or 1" silver braid? Was it silver or tinned copper? How was it mounted to a 3/8-24 stud using a hose clamp? How was it trimmed for SWR? How many times have I asked those questions? How many times have you dodged those questions? How long will you continue to dodge those questions?

>>>Stop whining and do your own test.
>>

>relative gain order?

The average (or 'mean', as used in statistics proper) is very much a
mathematical calculation. Since your tests produced three significant
digits of relative gain which you claim was averaged from several
measurements, the only logical conclusion is that you performed such a
calculation. If you did not calculate the average then how did you
come up with those numbers? Did you observe your "relative gain order"
then pick some random numbers from the meter and assign them to each
antenna according to your "gain order"? It certainly looks that way
since you don't even know how to calculate an average.

>>Oh hell, why am I wasting my time..... of course you won't because

>won't stop whining.

Enough with the 'whining' dodge. Either you have the data or you lied
about the tests. Which is it?

>>"Let's see, I used one inch braid over fiberglass..... no, wait, I
>>think it was silver pipe..... no, it was silver braid..... or maybe
>>it was tinned copper braid..... oh, NOW I remember, I tested copper

>>
>>LOL!!!
>>
>>Get bent, tnom.
>
>
>Whine whine whine

Excuses, excuses, excuses. You don't have the data. You lied about your tests.

The funny thing is that I -am- going to do these tests just to prove, beyond any doubt, that you are a liar and have been lying about your tests for seven years. And I am going to do these tests regardless of whether you step up to the plate and admit your fake tests. I am also going to do the tests with the cooperation of other CBers that can verify the results so nobody can claim that I fabricated the data like you did. Specifics to come at a later date, including the time and location of the test (which I have not yet set). If anybody wants me to test their antenna, contact me via email to make arrangements.

Have a nice day, tnom!

heheh hot pastrami and swiss on rye, would kill for a garlic onion bagel
with cream cheese and smoked salmon though.
Oh and I got my steaming cup of Jamaica
Blue Mt coffee

You're speaking my language loud and clear.....the Jamaican crop was
absolutely lousy two years ago and I went to the Ethiopian Harrar (a
close runner up, in addition to a distinct Arabica Hawaiian bean offered
by Gevalia),,,,did the Blue Mountain Crop rebound? Sometimes they get
two growing seasons per year. I couldn't justify the price for an
inferior bean that is supposed to set the standard,,we drank Blue
Mountain for years and until it changed two years ago due to a poor crop
year..,,,,I haven't tried this year's crop yet,.....nothing like
world class whole bean from a press out of a ceramic mug. Ditto for the
smoked salmon, although smoked mullet is a dead tie when making spread.

Well, This years crop was good, and there is a bean that comes from the
next mountain over that is damn near as good. The local coffee shop
orders the whole beans for me, and I grind them fresh for each pot. heck
I love the smell of fresh ground beans as much as I love drinking the
fifnal product.

Right on! A good supplier is just as valuable,,,I've seen several coffee
distributors selling old stock coffee....if it's been sitting in their
store for an amount of time, it's no good, but of course you already are
aware of this, being a coffee connoisseur yourself.
Oh yea, I agree,,,,when possible, never grind the beans until right
before brewing, but many places don't sell Blue Mountain whole bean
because they sell it by the cup. Mail order has yielded me the best
bean, but you really pay for it. What is the going price this year for
the Blue Mountain? I think it was around 42 bucks per pound before the
bad crop. I can imagine what it went to in the following year.

Many are of the belief that behind closed doors at their own dinner tables, practicing Muslims silently condone the jihad on Americans.

_____

There are many American Muslims that feel that way. But hey, we also let the Nazi Party exist in this country (and buy arms, for chrissake); so Islam gets a free pass.

Thats whats so great about this country, our soldiers, our men and women in uniform have in the past shed their blood, and in the present, and future are prepared and willing to do the same, to defend our rights.These rights allow us to have our own opinions, and to voice them. Look at the past, in the Middle East, people there didn't have the right to voice their opinion, Saddam placed anyone who's opinion differed with his in prison or had them executed. Now we (the US) have displaced Saddam, and given the people the right to choose for themselves, and this is the thanks we get.
So they are exercising their rights to be complete frigging idiots.
I will say this though, There is a family living here in town from India, they are not muslims, in fact they are very nice people. They have been to my house, and I to theirs for dinner, I have taken their kids to movies, and helped them buy their computers. It does aggrivate me when I see others call them diaperheads, and lump them in with the terrorist assholes you see on the news.

_____
Yea,,,the eastern-Indians I've met are usually Hindu or Buddhist, not Muslim.
Iraq is as divided as the US, right down the middle. There are many other countries with leaders as bad, or even worse than Hussein that practice the same "terror", yet Bush has no policy on these countries or plans to deal with them, which shows, imho, the Iraq war was never about "terror". Meanwhile, as Bush plays in his sandbox with Arab religious fanatics, the real threats, such as N Korea, are churning out real WMDS, real nukes, and we know Little Kim will use them,,,he has a short-man complex.

so Islam gets a free pass.
-

I guess that's the price we pay,,,we must take the good with the bad in
order to have such freedoms, but there's always someone looking to take
away more of our freedoms in the name of "security" or "safety" under
the false guise of concern-for-another.

with cream cheese and smoked salmon though.
Oh and I got my steaming cup of Jamaica
Blue Mt coffee

You're speaking my language loud and clear.....the Jamaican crop was
absolutely lousy two years ago and I went to the Ethiopian Harrar (a
close runner up, in addition to a distinct Arabica Hawaiian bean offered
by Gevalia),,,,did the Blue Mountain Crop rebound? Sometimes they get
two growing seasons per year. I couldn't justify the price for an
inferior bean that is supposed to set the standard,,we drank Blue
Mountain for years and until it changed two years ago due to a poor crop
year..,,,,I haven't tried this year's crop yet,.....nothing like
world class whole bean from a press out of a ceramic mug. Ditto for the
smoked salmon, although smoked mullet is a dead tie when making spread.

Well, This years crop was good, and there is a bean that comes from the
next mountain over that is damn near as good. The local coffee shop
orders the whole beans for me, and I grind them fresh for each pot. heck
I love the smell of fresh ground beans as much as I love drinking the
fifnal product.

Right on! A good supplier is just as valuable,,,I've seen several coffee
distributors selling old stock coffee....if it's been sitting in their
store for an amount of time, it's no good, but of course you already are
aware of this, being a coffee connoisseur yourself.
Oh yea, I agree,,,,when possible, never grind the beans until right
before brewing, but many places don't sell Blue Mountain whole bean
because they sell it by the cup. Mail order has yielded me the best
bean, but you really pay for it. What is the going price this year for
the Blue Mountain? I think it was around 42 bucks per pound before the
bad crop. I can imagine what it went to in the following year.

You might try Gevalia

http://www.gevalia.com/gevalia/catalog/product_detail.jsp?PROD_ID=338&catid=29&ITEM_ADDED=
false

I can ask the local store for their suppliers information also

From Gevalia it is $24.95 for 8 oz whole beans so $49.90 for a pound

I buy alot of coffee from Gevalia.

so Islam gets a free pass.

Thats whats so great about this country, our soldiers, our men and women
in uniform have in the past shed their blood, and in the present, and
future are prepared and willing to do the same, to defend our
rights.These rights allow us to have our own opinions, and to voice
them. Look at the past, in the Middle East, people there didn't have the
right to voice their opinion, Saddam placed anyone who's opinion
differed with his in prison or had them executed. Now we (the US) have
displaced Saddam, and given the people the right to choose for
themselves, and this is the thanks we get.
So they are exercising their rights to be complete frigging idiots.
I will say this though, There is a family living here in town from
India, they are not muslims, in fact they are very nice people. They
have been to my house, and I to theirs for dinner, I have taken their
kids to movies, and helped them buy their computers. It does aggrivate
me when I see others call them diaperheads, and lump them in with the
terrorist assholes you see on the news.

Yea,,,the eastern-Indians I've met are usually Hindu or Buddhist, not
Muslim.
Iraq is as divided as the US, right down the middle. There are many
other countries with leaders as bad, or even worse than Hussein that
practice the same "terror", yet Bush has no policy on these countries or
plans to deal with them, which shows, imho, the Iraq war was never about
"terror". Meanwhile, as Bush plays in his sandbox with Arab religious
fanatics, the real threats, such as N Korea, are churning out real WMDS,
real nukes, and we know Little Kim will use them,,,he has a short-man
complex.

Yeah like the kooks in the Phillepines, and the Indonesian islands. And did the US get this involved with the terrorism in Ireland? Granted thats settled down quite a bit lately.

Iran is going to be the biggest problem to face, they have troops on the Iraq border, and they have nukes, and they have shown time and time again in the past they do not care for us.

Be sure to take plenty of pictures to document the setup and the test.
Post the results on your website and it'll make for an interesting
read.

In all the years that I've been involved in CB there have been all
sorts of wild claims made by antenna makers and other CB'ers alike. At
times we've done side-by-side antenna comparisons, but these compared
only relative signal differences in one or two directions only. To do
a proper test with an antenna range, with the ability to raise and
lower the receive antenna (to test E-Plane radiation angle) and with
calibrated equipment is normally a tough thing to do for the average
CB'er. But that's the only way to get the full picture.

Hey tnom I think you meant to say 1" tinned copper braid it just looks
like silver but it is not made of real silver.

also I see a big problem with your tests is that they are secret tests
done by anonymous cbers who cannot be contacted or confirmed or
documented i.e no names since one or more of you are probably involved
with illegal operation etc.

Yes, they were top secret. The tests were documented on special self
destruct paper. The results were never suppose to fall into the hands
of common people like yourself.

http://w3.gwis.com/~ack/Onion.html

http://plantsdatabase.com/search.php?search_text=vidalia+onion&submit=Search

If you'll notice, the specific name for the Vidalia onion is Allium Cepa, and if you'll notice that just hapens to be the specif name of the spanish onion as well. Like all plants and animals different types have different names. The only difference between the Vidalia, the Walla Walls, the Maui, and even the Yellow Granex are all the same, so in a way I was right, the breed of onion ws the same, and he grows them here, the bulbs he planted were from GA the "Vidalia" but they are grown here in NW Ohio.

So yes you were correct, Vidalia is the name for those grown in that region, same as the Walla Walla is named for that area, as is the Maui named for that area, but they are all the same species as the Spanish onion. So I was correct as well.

Have a nice day.

They are most probably Hindu. Awesome religion of tolerance. Had they been Muslim, you would have had your throat slit with a box cutter, and we would be hearing about you on the 6 o'clock news.

I saw a guy that built a mobile antenna out of copper pipe for his
pickup he had a 2x4 set in the stake hole on the front passenger side of
the bed, it was capacitive fed The pipe was capped at the top and held
to the 2x4 with pipe anchors. Not sure how well it performed,but for a
home brew job, it was rather interesting.

Please forgive my crude representation, my ASCII art skills have not
been used in quite a few years heheh.

want to try something really good? here is a recipe I found today, tried
it out and it rocks.

Vidalia Onion Pie with Mushrooms

Substitute any mushroom for the shiitakes.

1 large Vidalia onion, halved and thinly sliced
2 cups sliced shiitake mushrooms
1 tablespoon olive oil
4 large eggs
1 cup whipping cream
1 tablespoon chopped fresh thyme
1 1/2 teaspoons salt
1 teaspoon pepper
1/8 teaspoon ground nutmeg
1 frozen (9-inch) deep-dish pastry shell, thawed

Saut&#65533; onion and mushrooms in hot oil in a large skillet over medium
heat 15 minutes or until tender.
Stir together eggs and next 5 ingredients in a large bowl; stir in
onion mixture. Spoon mixture into pastry shell, and place on a baking
sheet.

Bake on lower oven rack at 350F for 45 minutes or until done.

just like Canine is the family, and is broken into the various species
i.e. Doberman, German Shepard, Irish Setter, ect.

The The Onion Plant
Family: Liliaceae BTW it is actually Alliaceae
Species: Allium cepa.

Now go to that site I listed, look at every one of them, it distinctly
differentiates the different species of onions with different names. the
Allium Cepa, is a "breed" of Alliaceae,just like a rottwieler is a breed
of canine.

Family: Alliaceae
Genus: Allium (AL-ee-um) (Info)
Species: cepa (KEP-uh) (Info)
Cultivar: Sweet Vidalia
comments on the vidalia from this website
"On May 2, 2004, Farmerdill wrote: A 1985 hybrid yellow granex type from

K-F seeds, now offered by Sunseeds. A mild onion that runs in jumbo size. It has very good tolerance to bolting and is adapted to short day growing areas from Georgia to California."

Family: Alliaceae
Genus: Allium (AL-ee-um) (Info)
Species: cepa (KEP-uh) (Info)
Cultivar: Yellow Granex Improved
Comments from the same website "On May 2, 2004, Farmerdill wrote:
A pungent hybrid yellow Granex from Sunseeds. Runs jumbo in size and is adapted from Georgia to California"

Family: Alliaceae
Genus: Allium (AL-ee-um) (Info)
Species: cepa (KEP-uh) (Info)
Cultivar: Harmony (spanish)
comments from the same website "On May 2, 2004, Farmerdill wrote:
A hybrid yellow sweet Spanish type onion from Crookham. This cultivar runs jumbo to colossal in size and will store fro about four months. Excellent tolerance to pink root. I grew hybrid Spanish cultivars(although not this particular cultivar) in Virginia by purchasing field grown plants from Texas and setting them in early March. They did quite well, maturing in late June early July."

Family: Alliaceae
Genus: Allium (AL-ee-um) (Info)
Species: cepa (KEP-uh) (Info)
Cultivar: Granex 33
comments about this onion on same site "On Apr 29, 2004, Farmerdill wrote: This is one of several hybrid versions of the short day onion Yellow Granex.These are grown extensively in Middle Georgia and are marketed as Vidalia onions.

Family: Alliaceae
Genus: Allium (AL-ee-um) (Info)
Species: cepa (KEP-uh) (Info)
Cultivar: Aranex (Granex 7092)
comments onthis onion from same site: "On Apr 30, 2004, Farmerdill wrote: A 1999 hybrid Granex short day onion from Seminis. Has resistance to pink root but is otherwise almost identical to Granex 33. Suitable for "Vidalia" growers.

Family: Alliaceae
Genus: Allium (AL-ee-um) (Info)
Species: cepa (KEP-uh) (Info)
Cultivar: Henry's Special
commens on same site about this onion: "On Apr 30, 2004, Farmerdill wrote: A 1966 hybrid granex type from Arco. A short day onion that is resistant to pink root.

and there are too many more to paste in, everyone here can go look at the site for themselves.

http://plantsdatabase.com/search.php?search_text=onion&offset=20

It's all there in black and white. In case you were not aware, I happen to live smack dab in the middle of agricultural country, there are entire farms here dedicated to growing fresh produce for Campbells Soup, Lachoy, Con-Agra. These farmers are friends, and family of mine, I started working on the farms when I was barely even a teenager, including planting, harvesting, and driving the procudeto market. Ever drink a V-8? all ingredients grown here in NW Ohio.

Well Keith, it's the same principle that cb radio's are all
cb radio's, just some are made by different manufacturers.
Don't bother with him Keith, he just wants to argue, that's
all he ever does here.
I did like you're recipe on another post though, I just don't
like Mushrooms (Yuck) Something about how they grow in
crap ;)

Cuz I like toys. And I respond to assholes. What do you care if someone has
toys on their radio? Are you so constipated that you get all huffy when
someone uses one on the radio?

Ya know, you could try some alternate items, water chestnut would probably
go pretty well with maybe some Jalapeno Peppers, with maybe some cheese
added on top.

Look at it this way; How would you feel, if you were sitting in your
living room listening to your favorite music and someone decided to
sit outside your house and blast something that you found to be
obnoxious?

While you may think CB noise toys are "neat", there are plenty of
people who do not appreciate them. By continuing to use them when it
becomes obvious that they are not appreciated is indicative of
inconsiderate or rude behavior.

Amateur Radio Newsline™ Report 1401 June 18, 2004

Now, Amateur Radio Newsline report number 1401 with a release date of Friday, June 18 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. A new ham-sat is made ready for launch and the B-P-L struggle continues. Find out the details on Amateur Radio Newsline report number 1401 coming your way right now.

(Billboard Cart Here)

**

HAM RADIO IN SPACE: ECHO PREPARED FOR LAUNCH

The soon to be launched ECHO ham radio satellite has arrived safely at the launch complex in Russia and is being made ready for launch. This, according to Chuck Green, N0ADI, who is traveling with the bird to the launch facility. Bill Pasternak, WA6ITF, is here with more:

--

According to Green, once he and the team arrived at the launch site, the satellite shipping containers were opened and placed in the clean room. ECHO was taken out of it's shipping case and set up for completion. The bottom antennas were then installed.. So was the bottom solar panel, magnets, and corner reflectors.

ECHO was then powered on and the team successfully communicated with it over a hard wire connection from a computer. The four two meter receivers and the two 70 cm transmitters were all successfully tested. And that's good news for everyone waiting for the new hamsat
to take its ride into space.

For the Amateur Radio Newsline, Bill Pasternak, WA6ITF, in Los Angeles.

--

Currently the planned launch period for ECHO is four weeks beginning June 28th. Once in orbit the command teams will be working together to assure everything is working OK and get ECHO into its initial 'normal' modes as quickly as possible. After that it will be open to the users in the ham radio community. (AMSAT)

**

THE BPL FIGHT: AN UPDATE ON WHAT'S HAPPENING IN THE USA

The fight to keep Broadband Over Powerlines from going nationwide continues. Amateur Radio Newsline's Mark Abramowicz, NT3V, is here
with the latest:

--

With summer now here, expect the Broadband over Power Line Internet access issue to heat up - especially as more people get a chance to look over the latest filing from the National Telecommunications and Information Administration.

The federal agency, which advises the White House on telecommunications policies and oversees radio spectrum used by government agencies, weighed in with more BPL comments in a June 4 filing with the Federal Communications Commission.

And the American Radio Relay League and others who've analyzed the comments say it's clear the political considerations are overshadowing the engineering data which raises many questions about the viability of BPL.

In its filing with the FCC, the N-T-I-A's policy makers now call BPL a win-win situation for all and make what some call an outlandish claim - that deployment of the technology could actually lead to reduction, that's right, reduction of power line noise.

Now, the engineering types who've been studying the BPL and doing all kinds of test measurements are really scratching their heads trying to make sense out of that. The N-T-I-A filing also contains this comforting assertion for BPL opponents. It says that the current power line system is responsible for even greater local interference risks than what BPL would bring.

And, it says, B-P-L operators would implement procedures to eliminate any harmful interference.

The stack of complaints about BPL test sites and assertions by a lawyer representing one of the large utilities testing the technology might lead some to question that reassurance.

A source tells Amateur Radio Newsline the FCC has failed to "properly direct" BPL complaints to the appropriate FCC regulatory office for action. And, the source says, commissioners questioned about that haven't offered any explanation.

And a lawyer who has commented in writing to the FCC about some of the BPL complaints his utility company received claimed there was no basis for them, essentially saying the amateur radio operators making them don't know what they're talking about.

One thing the NTIA did suggest in its filing is the exclusion of certain bands and frequencies in specific geographical areas to protect critical government systems.

Does that suggest an agency confident BPL won't be an interference source?

The American Radio Relay League and others who've been vocal in this fight suggest otherwise.

They say BPL is far from a done deal and they're hopeful that the FCC's extension of reply comments to June 22 will net some helpful information. And, they say, they're not giving up or going away quietly.

In the meantime, there is a sense BPL is on a fast-track at the FCC where the majority of the commissioners view it as an engine to help stimulate the economy.

Could the FCC act on the BPL issue before the November election?

Anything is possible. And some close to the BPL debate say if the Bush administration believes it will generate a much-need bump in the public opinions polls or at the ballot box...well, you get the idea.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

Mark will continue to monitor the B-P-L situation and report back in future Amateur Radio Newsline reports. (ARRL, CQ, Repeater Journal, Published news reports, others)

**

THE BPL FIGHT: AUSTRALIA REACTS TO THE BPL CHALLENGE

The United States is not the only place planning to introduce this controversial Internet access technology. Proposals for Power Line Communications or Broadband over Power Lines in Australia have become a concern many spectrum users down-under. This includes the Wireless Institute of Australia which is that nations Amateur Radio national society. From Brisbane, Q-News Graham Kemp, VK4BB, reports:

--

WIA President, Michael Owen, VK3KI has said that the WIA's position in relation to B-P-L is that it supports increasing broadband access and broadband competitiveness in Australia, but in a way that does not cause interference to legitimate users of the High Frequency spectrum. The WIA supports the development by the ACA of policies for BPL that protect existing users.

The WIA believes that one of the problems associated with B-P-L is that trials on a limited basis are not good indicators, and that the full effects of a problematic technology will not be seen with such trials. The WIA considers that B-P-L will not really serve the community's long run needs because of its limited bandwidth. A deep fibber network is to be preferred to using long runs of power lines.

The WIA has appointed a team to deal with this issue. WIA President has appointed Phil Wait, VK2DKN the director responsible for developing and advocating the WIA's position in relation to BPL. He has asked Owen Duffy, VK1OD Barry White, VK2AAB and David Wardlaw, VK3ADW to assist Phil, as the WIA's BPL Team.

--

A report on a recent small trial of B-P-L in the city of Hobart to some 4 houses and 2 floors of one building is on the WIA website. (Q-News)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the VE9BSQ repeater serving St. John, New Brunswick, Canada.

(5 sec pause here)

**

RADIO RULES: COMMISSION ADOPTS SPECTRUM SHARING PLAN FOR L AND S BAND

The Federal Communications Commission adopted a spectrum sharing plan for low earth orbit satellite systems in the 1.6 GHz and 2.4 GHz bands. The so-called Big Leo birds. And here's how it will work

In the 1.6 GHz or "L-band," mobile-satellite service operators with satellite systems that utilize code division multiple access and time division multiple access technologies will share 3.1 megahertz of spectrum at 1618.25 to 1621.35 MHz. At "S-band," the Commission allocated the 2495 to 2500 MHz band to fixed and mobile except aeronautical mobile services, in order to provide additional spectrum and to accommodate the relocation of Multipoint Distribution Service channels 1 and 2.

The commission says that its new spectrum sharing plan will further the agency's goal of efficient frequency utilization by increasing the number of providers offering services to consumers over the same spectrum. It will promote the deployment of more innovative services to consumers. (FCC)

**

ENFORCEMENT: COUNTY HAS DONE NOTHING WRONG

The FCC says that a complaint that a county is using ham radio for its routine business is without merit. The agency's Daryl Duckworth, NN0W, is here with more:

--

Duckworth: "A complaint concerning Bell County Communications
Center
and club license W5BEC was dismissed. There is no showing that this
station is operated by anyone other than amateurs, nor is there a
showing that it is there a showing that it is used or intended to be
used for routine county business."

--

W5BEC is the club station license issued to the Bell County Emergency
Operations Center in Belton, Texas. Its also the call sign of a wide
area two meter repeater that covers much of central Texas. (FCC,
RAIN)

**

ENFORCEMENT: STAY OFF 10 METERS

Meantime, the FCC's crackdown on 10 meter unlicensed intruders
continues. This time the agency acts in a New Jersey case. Again,
the FCC's Daryl Duckworth, NN0W:

--

Duckworth: Auto Elite Transportation of Morristown, New Jersey, has
been sent a warning notice about a vehicle of theirs; truck number
2113, as being the source of unlicensed radio transmissions on 28.085
Mhz."

--

Auto Elite was warned that continued unlicensed operation of radio
transmitting equipment without is a violation of Section 301 of the
Communications Act. That it could subject the operator to fine or
imprisonment, as well as seizure of any non-certified radio
transmitting equipment. Monetary forfeitures for this kind of
violation normally ranges from $7,500 to $10,000. (FCC, RAIN)

**

ENFORCEMENT: SAN DIEGO'S 96.9 MHZ PIRATE REACTIVATES

According to a news bulletin from Chris Carmichael appearing in the
CGC Communicator, San Diego's 96.9 MHz pirate is back on the air.
Chris says that there is no news on the location of the transmitter,
but he believes that will only take the Commission a short time to
figure out. (CGC)

**

ENFORCEMENT: SPAMMER GOES TO JAIL

A New York state man who sent out millions of "spam" e-mails has been
sentenced to three and a half to seven years in prison. This

according to a May 27th news release from that states Attorney General's office which said that Howard Carmack, known as the "Buffalo Spammer," received the maximum sentence for 14 counts of identity theft and forgery.

A spokesman for New York Attorney General Eliot Spitzer said that Carmack sent out hundreds of millions of bulk e-mail messages. That he flooded inboxes and saddled Internet providers with millions of dollars in costs. But it was his use of stolen identities and forged addresses that caused action by state prosecutors. New York has no state laws specifically dealing with spam. Carmack was found guilty of violating state forgery and identity-theft laws in April.

Internet provider EarthLink Inc. won a $16.5 million judgment against Carmack last year, and EarthLink officials testified in the criminal trial as well. (Published news reports)

**

EMERGING TECHNOLOGY: EARTHLINK VS. PHISHERS

Meantime, EarthLink claims that it has developed a program to fight phony websites like this,. The sites, called phishers are those designed to deceive e-mail users into providing personal information such as passwords and credit card or Social Security numbers.

Phisher sites pronounced "fishers" but with a leading "p" are called
that because they "fish" for personal information that can be used in identity theft. They work by telling an Internet user via e-mail that there is a problem with the service-provider account and providing directions to a Web site for clarification. The link takes the user to a hoax Web site that may be a perfect copy of a real page used by Earthlink, eBay or another legitimate business. That is where the user is deceived into providing personal information.

EarthLink's anti-phisher program will rely on a list of known fraudulent sites. When a subscriber responds to the e-mail message, he will be linked instead to a special Web page that warns the e-mail is a fraud. The site also will provide a chance to report the hoax attempt.

EarthLink says that it receives about 40,000 telephone calls or e-mails each month from subscribers who have received one of the fraudulent e-mails. (Earthlink)

**

HAM RADIO BUSINESS: A SEARCHABLE CQ MAGAZINE ARCHIVE

Finding an article or an advertisement in a back issue of CQ Magazine is about to become only a mouse click away. This, as CQ Communications and Buckmaster Publishing announce plans to create a searchable on-line archive of CQ magazines back issues.

Buckmaster, which produces the Hamcall CD has for decades filmed issues of CQ onto microfiche for use by researchers and hobbyists. Buckmaster also provides advanced scanning and searching technology for on-line posting of documents for major corporations. Now this same technology will be applied to back issues of CQ.

As currently envisioned, searches will be free, while access to reading and printing specific pages will require a subscription at a nominal fee. Eventually Buckmaster plans to have every issue of CQ available dating back to the magazine's first issue in January 1945.

A beta test version covering CQ from 1990 to 2002 is already on-line. The archive may be accessed at http://hamcall.net/cgi-bin/cqcgi. (CQ)

**

WITH ARNEWSLINE: YHOTY NOMINATIONS CLOSE JUNE 30TH

And a reminder that the nominating period for the 2004 Amateur Radio Newsline Young Ham of the Year Award closes midnight on Wednesday, June 30th. If you are planning to nominate a youngster for this years award or, if you want to update a previous years nomination -- and have not yet done so -- you have only about two weeks left to do so.

The Young Ham of the Year Award program is open to any FCC licensed young radio amateur age 18 or younger residing in the contiguous 48 states. He or she must have made a significant contribution to the community, the nation or ham radio though the United States Amateur Radio Service.

More information and a downloadable on-line nominating form is at our website. That's in cyberspace at www.arnewsline.org.

Again, the cutoff for nominations this year is midnight on June 30th. The award presentation takes place in August at the Huntsville Hamfest in Alabama. (ARNewsline(tm))

**

BREAK 2

This is ham radio news for today's radio amateur. From the United
States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

EMERGING TECHNOLOGY: INSTANT MESSAGING EXPANDING WORLDWIDE

Wonder where some of your ham radio buddies are these days? Maybe they are now using Instant messaging instead of 2 meter FM. Norm Seeley, KI7UP, has more:

--

According to Tech Web News, Instant Message use is growing steadily among corporate workers who use free services from companies like America Online, Microsoft, and Yahoo to send quick text messages to coworkers, family, and friends. And by 2008 closer to 80 percent of corporations worldwide are expected to use either public or private Instant Messaging networks.

A recent study by The Radicati Group says that by 2008 the number of Instant Message users worldwide is expected to reach 670 million. Business wise, this equates to revenues in the $413 million range.

Even so, the percentage of people using public networks and private networks is expected to remain the same. That's at 88 percent public and 12 percent private, respectively. The reason: Its hard to get people to pay for what someone else is giving away for free.

For the Amateur Radio Newsline, Norm Seeley, KI7UP, reporting.

--

Ham radio groups are also turning to Instant Messaging. According to Internet postings, it comes in handy when there is a net to be held and propagation goes away. (TechWeb Online)

**

HAM INTERNET NEWS: THE VHF REFLECTOR BACK ON LINE

And speaking about instant messaging, or almost instant messaging, news that the VHF Reflector is back on line. This, according to Bob Vaughan, KC6SXC, who oversees the systems operation.

In a posting, Vaughn explained that the W6YX server that hosts the VHF Reflector suffered a disk failure and was off line for the past month. Vaughn says that the team has now recovered the data from the failed disk and has put the system and the Reflector back on-line. (VHF Reflector)

**

ON THE AIR: KY REPEATER NEEDS A NEW HOME

The Repeater Journal reports that the Danville, Kentucky, 146 point 655 WD4DZC repeater is looking for a new site. According to trustee George Griebe, WQ4Z, the tower supporting the systems antenna is to be taken down and will not be replaced.

Griebe says that the Wilderness Road Amateur Radio club which sponsors the repeater plans to keep it on the air from a temporary location with reduced coverage. Meantime the club is continuing its

search for a suitable, high level, wide coverage permanent site. (Repeater Journal)

**

THE SOCIAL SCENE: OHIO IN JULY

Turning to the ham radio social circuit, the 7th annual OH-KY-IN hamfest is slated for the July 24th at the Diamond Oaks Career Development Center in Cincinnati Ohio. The event will feature commercial vendors, a flea market and much more. Information is on line at www.ohkyin.org or by e-mail to n8bv@juno.com. (OH-KY-IN)

**

THE SOCIAL SCENE: COLORADO IN JULY

And the Northern Colorado Amateur Radio Club will hold its 2004 Superfest at the Budweiser Events Center in the Larimer County Fairgrounds on July 17th. Talk-in is on the 145.115 Mhz repeater with a 100 hertz tone access. For information on this one contact Willis Whatley, WA5RVL, at his Callbook address. (E-mail)

**

INTERNATIONAL - GREECE: HAM RADIO AT THE SUMMER OLYMPICS

Some more good news for foreign radio amateurs visiting Greece for the Summer Olympic Games. From the August 1st through September 15th hams from CEPT signatory nations will be permitted to operate in Greece without the need to submit any papers for a license. They will also be allowed to use the special prefix J42004. Meantime, Greek radio amateurs can use the special prefixes SX2004 or SY2004 through the 15th of November in celebration of the games. (GB2RS)

**

DX

In D-X, word that MM0AFJ will be on the air from the Island of Harris. This, from the 27th of June until the 2nd of July, mainly in the mornings on 80 to 10 meters CW and SSB. There may be some activity on 160 meters in the evenings. Requests for skeds should be sent via e-mail to m0afj@tiscali.co.uk. QSL direct to MM0AFJ at his Callbook address. (RSGB)

Also, IK4RUX reports he will operate portable IF9 on HF SSB from Favignana between the 19th and the 26th of June. Side trips to other islands in the Egadis group as well as some lighthouse operations are also possible. QSL to the operators home call or via the bureau. (RSGB)

**

THAT FINAL ITEM: HAM RADIO HONORS THE MEMORY OF PRESIDENT RONALD REAGAN

And finally this week, ham radio finds a way to honor the memory former President Ronald Reagan. Here's Bruce Tennant, K6PZW with the
rest of the story:

--

Two suburban Los Angeles area radio clubs are joing forces to honor the memory former President Ronald Wilson Reagan. This, by operating Field Day in his honor from the Reagan Library in Simi Valley, California.

According to Peter Heins, N6ZE, the two groups joing forces to honor the late United States president are the Ventura County Amateur Radio Society and the Conejo Valley Amateur Radio Club. The Ventura County group has operated Field Day before from the Reagan Library. This year, the Conejo Valley club will be joining with them for the first time.

Heins says that 2004 is the fourth year a special event will have been held at the Reagan Library using the special N-6-R call sign. The previous three were dedicated to all members of the former first family. This years Field Day operation will be specific in its remembrance of President Reagan who died of Alzheimer's disease on
June 5th at age 93.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Field Day 2004 is the weekend of June 26th and 27th. Visitors to the Reagan Library will be able to listen in on amateur radio communication, talk to amateur radio stations located in other countries, and find out more about obtaining an FCC Amateur Radio License of their very own.

Also, the complete Field Day rules are on-line at the ARRL website. Its in cyberspace at www.arrl.org (N6ZE)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937,

Arcadia, California 91066.

Again, the cutoff for submitting nominations for this years Young Ham of the Year Award is midnight on June 30th. The award presentation takes place in August at the Huntsville. Full details are on our website at www.arnewsline.org

Also, don't forget Field Day the weekend of June 26th and 27th. We'll see you on the air.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don
Wilbanks, AE5DW, saying 73 and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2004. All rights reserved.

I guess you would want to be democratic about it, so.....
Find out how many CB folks are anal about it. Then compare what percentage
are for and against them. Then we can have a democratic solution. I wager
that most CB users do not give a shit one way or the other. "Plenty" is not
a very accurate number.
As to "rude", yeah, sometimes, so?

-Perfesser's Amp-
(Sung To The Tune Of "Jessie's Girl"
by Rick Springfield)

Perfesser is a friend
Yeah I know, he's been a good friend of illegals all the time
But lately somethin's changed, it ain't hard to define
Perfessers got himself an amp, and I wanna make it mine
And he's designed it Class C with no bias
And it's got spurs like mad, I just know it
And he got his flywheel theory screwed up, late late at night
But Y'know, I wish that I had Perfessers amp
I wish that I had Perfessers amp
Where can I find a design like that?

I'll play along with his charade
There doesn't seem to be a reason to change
Y'know I feel so dirty when Sparky starts talkin' truth
I wanna tell him I'm illegal too but the point is prob'ly moot
'Cause it's designed with no bias
And it's sounds like shit, I just know it
And it was dreamed up when he was drunk, late late at night
But Y'know, I wish that I had Perfessers amp
I wish that I had Perfessers amp
Where can I find a design like that?

And I'm lookin' in the mirror all the time
Wond'rin' when the FCC will catch up with me
Yeah I've been illegal I've been crude and I do lines
Ain't that the way CB's supposed to be?
Tell me, where can I find an amp like that?
But Y'know, I wish that I had Perfessers amp
I wish that I had Perfessers amp
Where can I find a design like that?
Like Perfessers amp
I wish that I had Perfessers amp!

Steve Earle -- Copperhead Road

Well my name's John Lee Pettimore
Same as my daddy and his daddy before
You hardly ever saw Grandaddy down here
He only came to town about twice a year
He'd buy a hundred pounds of yeast and some copper line
Everybody knew that he made moonshine
Now the revenue man wanted Grandaddy bad
He headed up the holler with everything he had
It's before my time but I've been told
He never came back from Copperhead Road

Now Daddy ran the whiskey in a big block Dodge
Bought it at an auction at the Mason's Lodge
Johnson County Sheriff painted on the side
Just shot a coat of primer then he looked inside
Well him and my uncle tore that engine down
I still remember that rumblin' sound
Well the sheriff came around in the middle of the night
Heard mama cryin', knew something wasn't right
He was headed down to Knoxville with the weekly load
You could smell the whiskey burnin' down Copperhead Road

I volunteered for the Army on my birthday
They draft the white trash first,'round here anyway
I done two tours of duty in Vietnam
And I came home with a brand new plan
I take the seed from Colombia and Mexico
I plant it up the holler down Copperhead Road
Well the D.E.A.'s got a chopper in the air
I wake up screaming like I'm back over there
I learned a thing or two from ol' Charlie don't you know
You better stay away from Copperhead Road

Copperhead Road
Copperhead Road
Copperhead Road

Oh no doubt dude. I was thinking along the lines of Prawns
on some andouille sausage or both.

Group,

I have a turner road-king 76 mic with a four wire plug. I can open it and see the battery and the color of the wires coming down from the plug.

Can anyone provide me with the meaning of the wires or how to best determine which is PTT and audio?

Tnx for Singing Lizard

Amateur Radio Newsline™ Report 1402 June 25, 2004

The following is an advisory and not necessarily for air. Ladies and gentlemen, Amateur Radio Newslines' Support Fund Administrator, Andy Jarema, N6TCQ:

--

This is Andy Jarema, N6TCQ, Newsline Support Fund Administrator, getting caught up with our supporters. In the month of September of last year we heard from Benton Bonney, W4PE of Orlando; monthly contributor Joseph Bartzi, Jr., KC8DKF of Columbus, OH; the St. Charles, MO ARC, WB0HSI; monthly contributor William Walters, WA2IBM, of San Jose; monthly contributor Scott Hensley of the Area Communications Team, also in San Jose and the Anchorage ARC.

Of special mention was support received in memory of the late Roy Neal, K6DUE, by the Brackett family of Cerritos, CA. Our thanks to Sharyn, Jim, KE6FVN, David, KE6OPK, and Lynn, WA6HBS.

Thank you to everyone, and we promise to do our best to continue to earn your care and support. A reminder that Newsline is a 501c 3 California non-profit corporation. FCC regulations prohibit us from telling you exactly how to support us, but that information is on our website at www.arnewsline.org. That address will be repeated at the end of the newscast.

I'm Andy Jarema, N6TCQ.

--

Thank you Andy. Now, Amateur Radio Newsline report number 1402 with a release date of Friday, June 25 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. Changes coming to ham radio in New Zealand and maybe to the 40 meter band here in the United States. Find out the details on Amateur Radio Newsline report number 1402 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: A NEW HAM RADIO IN ZED-L

Big changes appear to be in store for ham radio in New Zealand. This, as the current licensing system is replaced by one test and one class of ham radio operator. ,Jim Meachen, ZL2BHF, is in Auckland

where its all taking place:

--

Here's the bottom line. Our current New Zealand Amateur Radio licensing system is being renovated. We now have only one class of ham radio license in Zed-L called the General Amateur Radio License. This is just one of many changes coming to ham radio down-under as New Zealand radio amateurs discover the full outcome of their regulatory authority's review of the Amateur Radio service. It's all good!

The changes started on June 17th when a new revised Schedule attached to the Zed-L license came into effect. A Schedule here in New Zealand is kind of like a new set of rules. That's the first step. Other changes will take effect over the next 18 months or more. Many long standing problems are being eliminated and some of the changes are believed to be world firsts. Under the new structure there will be only one grade of Amateur operator license in New Zealand. That's the General Radio License that I mentioned earlier. One license means only one test needs to be administered.

A newly-licensed amateur will have immediate access to all amateur bands below 5 MHz and to all amateur bands above 25 MHz. After getting experience over 3 months and with at least 50 contacts logged, access is then permitted to all amateur radio bands.

All existing Limited Amateur licensees automatically became General Amateur licensees on June 17th irrespective of what is written on their existing licenses. There being only one license grade, callsigns will no longer indicate a class. There is already an established procedure to request a change of callsign if a licensee so wishes.

All amateur bands remain the same but a newly-extended Low Frequency band 130 to 190 kHz is being listed for the first time as an amateur allocation.

The permitted maximum transmitter power output for an amateur station on all bands is 500 watts P-E-P. With only one figure, the maximum power level in New Zealand is now mode-independent.

How about visitors to New Zealand? Touring hams holding a current amateur certificate of competency, authorization, or license issued by another administration, may operate an amateur station in New Zealand under a General User Radio License for visitors. A licensed visitor will be granted similar privileges to a New Zealand resident station for a period not exceeding 90 days. The present country-to-country reciprocal license agreements will disappear in time as more countries directly recognize the licenses issued by other administrations. This will make cross-border travel by radio amateurs a lot easier than it is today.

There are now minimum rules and restrictions for Amateur Radio in New Zealand and the future is positive.

For the Amateur Radio Newsline, I'm Jim Meachen, ZL2BHF, reporting from Auckland.

--

With one license exam, one license grade, and with new and simplified procedures, New Zealand telecommunications regulators say that they have positioned that nations Amateur Radio Service for an exciting future. (ARNewsline(tm), ZL2BHF, Q-News)

RESTRUCTURING: FCC RELEASES NPRM ON 40-METER CHANGES

The FCC says pending changes in the 40-meter amateur band as a result of the 2003 World Radiocommunication Conference will improve spectrum efficiency. It said so in a rule making notice dealing with the 40 meter band. Norm Seeley, KI7UP, has the latest:

--

The ARRL Letter reports that this remark came in an FCC Notice of Proposed Rule Making in ET Docket 04-139. This is an inquiry that seeks public comments on proposed rule changes to complete domestic implementation of various World Radiocommunication Conference allocation decisions made in 2003. Among them the future of the Amateur Service 40 meter allocation.

The regulatory agency says that it anticipates that administrations in I-T-U Regions 1 and 3 will, in the near future, authorize phone emissions in the 7 point 150 to 7 point 200 MHz band segment. The FCC notes that the ARRL has requested that the United States frequency segment for phone emissions be expanded to 7 point 125 to 7 point 300 MHz. The FCC says that authorizing voice operations in this band segment would permit same-frequency US-to-DX contacts, resulting in increased spectrum efficiency.

The N-P-R-M also addresses the deployment of Earth Exploration Satellite Service-Active spacecraft in the 70-cm band. The Commission says that this operation should not cause harmful interference to, nor claim protection from, any other services allocated in the band in the United States. This includes the Amateur Satellite service as well as any others.

For the Amateur Radio Newsline, Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Comments in the proceeding are due July 16, with reply by August 2. Interested parties may view the entire NPRM, file comments and view comments filed in ET Docket 04-139 via the FCC's Electronic Comment

Filing System at www.fcc.gov/cgb/ecfs/ (ARRL)

**

RESTRUCTURING: NO VANITY CALLS IN THE UK RIGHT NOW

Vanity callsigns 'are unlikely to be introduced in the United Kingdom before March of 2006. This, according to the Radio Society of Great Britain which says that for the last three years it has been in discussion with licensing authorities over the introduction of such a program for U-K amateurs.

The latest word is that telecommunications regulators have informed the RSGB that due to software issues it is unlikely that vanity callsigns can be introduced before March 2006. In other words, the waiting goes on. (RSGB)

**

More news in a moment, but right now its time for you to identify your station. Linda Reader, N-7-H-V-F, if you please: "From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W7FP repeater serving Salt Lake City, Utah."

THE BPL FIGHT: ARRL JOINS IOWA HAM IN BPL INTERFERENCE STRUGGLE

The ARRL has joined in the fight on behalf of Iowa amateur and ARRL member. This, following complaints from Jim Spencer, W0SR, of Cedar Rapids, that he has suffered severe Broadband Over Powerline interference for more than two months.

According to the ARRL Letter, a formal complaint to FCC Enforcement Bureau Chief David H. Solomon calls on the Commission to order Alliant Energy's B-P-L field trial system to shut down. It also demands that the agency fine the utility $10,000 for violating the Communications Act of 1934 and FCC's Part 15 rules.

Alleging that the ongoing interference is both harmful and willful to one or more licensed radio station the ARRL asked Solomon to intervene on an emergency basis. ARRL Chief Executive Officer David Sumner, K1ZZ, who signed the letter of complaint, said Alliant Energy has been aware since March 30th. Thats the date it installed Amperion BPL equipment in Spencer's neighborhood and the interference began. (ARRL)

**

ENFORCEMENT: EX-KG6IRO FINED $10000 FOR UNLICENSED OPERATION

A man who challenged the FCC and the southern California ham radio community has been fined $10,000. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the latest on a person who the F-C-C has told to stay off the air:

--

The FCC has issued a $10,000 Notice of Apparent Liability to Monetary Forfeiture -- that's a fancy way of saying a fine -- to Jack Gerritsen, the at least temporarily former KG6IRO. This, for operating a radio station in the Amateur Radio Service without the authorization from the FCC to do so.

In a June 15th letter to the Bell, California, former licensee, the regulatory agency notes his past record of non compliance with, among other things, its orders to keep off the air. It also notes his previous conviction for interfering with police radio communications in 2000 and the November 14, 2001 decision by the FCC to set aside his ham radio ticket based on complaints about the operation of his stations. Kit also raises questions regarding his qualifications to be a Commission licensee in light of his 1999 arrest and 2000 conviction on the police radio jamming charges.

At the time of the license set aside Gerritsen was warned that he has no authority to operate radio transmitting equipment. That doing so would be considered to be a violation of Section 301 of the Communications Act and could subject him to monetary penalties or imprisonment.

But on December 9th 2001, the Bell, California Police Department notified the FCC that it had received complaints against Gerritsen for making radio transmissions. On December 28th of 2001 the FCC's Los Angeles Office issued a warning letter to Gerritsen for unlicensed operation, and basically told him to get off the air. On January 2, 2002 Gerritsen replied and asserted that the set aide of his license was improper. On January 29th, the Bell Police and the California Highway Patrol arrested Gerritsen on a probation violation charge. On May 7th of 2002 he was found guilty of the parole violation and sentenced.

Soon after his release on July 28th of 2003 the FCC began getting complaints of unauthorized transmissions over local Los Angeles area amateur, business band and public safety repeaters. The complaints alleged that the person making the transmissions identified using the call letters KG6IRO. An investigation was launched. This lead to an agent positively identifying Gerritsen on November 6, 2003 as a person holding a transceiver while the investigator recorded the radio transmissions he was making. The investigation continued with the FCC identifying Gerritsen as the interference source on November 7th 2003 and on February 9th of this year.

Now, based on what the FCC cites as conclusive evidence it has levied the $10,000 fine against Gerritsen for willful and repeated

violations of Section 301. As usual, Gerritsen was given the customary 30 days to pay up or to file an appeal.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Word is that Gerritsen has responded to the FCC with a demand that the agency rescind the fine. He reportedly claims that his license granted on November 14th 2001 has not been terminated, revoked or in any way modified to prevent him from being on the air. (FCC)

**

ENFORCEMENT: THE FCC ENFORCEMENT LOG

Gerritsen is not the only ham radio enforcement story making news this week. With more, heres the FCC's Daryl Duckworth, NN0W:

ENFORCEMENT VICTORVILLE CA PIRATE STILL ON THE AIR

A pirate broadcaster in Victorville, California, is still operating full time on AM 660 and FM 91.3. This, in defiance of FCC actions to shut it down.

Back on March 31st, the FCC issued a $20,000 fine to alleged station owner Stanley Mark Mayo. This, for willful and repeated violation of Section 301 of the Act for operating radio transmitting equipment without the required Commission authorization.

None the less, the stations remain on the air leading to speculation that another level of enforcement action might be taken. One that could lead to seizure of the broadcast equipment and jailing of those who put the stations on the air.

For a look at the Commission's action on these stations, see www.fcc.gov/eb/FieldNotices/2003/DOC-246123A1.html (CGC, others)

**

RESCUE RADIO: A 100 WATT TRAVELERS INFORMATION STATION AT LAX

The FCC has granted a request by the managers of Los Angeles International Airport for a ten fold power increase to their Travelers Radio Information Radio service. On December 4, 2002, managers filed the application that asked to increase power from 10 to 100 watts. The reason for the increase was to facilitate the airport's efforts to provide emergency communications to the traveling public in the event of a terrorist attack. The FCC has now granted the 100 watt request, due, it says, to the circumstances involved. More on this story is on-line http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-03-3843A1.doc (CGC)

**

THE SOCIAL SCENE: NEBRASKA IN JULY

Turning to the ham radio social scene, Nerbraska's Pioneer Amateur Radio Club will hold its flea market on Sunday, June 11th. The venue is the St. Charles Parish Center in North Bend. For more information e-mail mehaffey@dtnsped.net (E-mail)

**

THE SOCIAL SCENE: MARYLAND IN JULY

And the BRATS Hamfest and Computer Fest will take place July 25th at the Timonium Fairgrounds in Timonium, Maryland. This is one of the biggies that features more than 500 outdoor flea market spaces, hundreds of indoor vendors, free ham radio exams and much more. There is lots of information on this one on-line. You will find it in cyberspace at www.bratsatv.org (Press release)

**

HAM RADIO AND THE 2004 OLYMPICS: THE ATHENS 2004 AWARD

Athens 2004 Olympic Games Awards will available for all radio amateurs and short-wave listeners who make or log a requisite number of contacts with stations in Greece. This, during the period of the 15th of May until the 30th of September.

Special prefixes J4, SX and SY count 10 points each, normal SV stations count 5 points each and the Radio Amateur Association of Greece's HQ station SZ1SV counts 50 points. A total of 250 points is required for the Bronze Award, 350 for the Silver and 500 points for the Gold Award.

The address for applications is RAAG Award Manager, PO Box 3564, 102 10 Athens, Greece, or see the RAAG web site: www.araag.org/award2004.html (RSGB)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

**
AN ARNEWSLINE FOLLOW-UP: MILITARY APPRECIATION DAY

A follow-up to a story we ran several weeks ago. Thanks to the efforts of several amateur radio operators in Ft. Wayne, Indiana a message of hope and appreciation was sent via the airwaves to our military personnel around the world. Newsline's Jack Parker W8ISH has the details:

It's official. By proclamation, May 29th, is officially Amateur Radio Military Appreciation Day in Fort Wayne, Indiana. The event was organized to honor and show appreciation to those that serve and have served in the military and related auxiliary groups. Planning for the event started last spring and quickly grew into a nationwide effort as organizer Emery McClendon KB9IBW spread the word to amateurs and MARS operators in the US and around the world.

The key to success centered on what Amateur Radio could do to let our Military members know that people supported them. Unlike written letters, amateur radio allowed Americans, in their own voice and words, tell the troops how much they care.

To get lots of public input, event organizers searched for a special event location. The Fort Wayne Wizards baseball team got into the game by offering up a spot at their stadium and a home game crowd. The effort grew momentum when radio volunteers from three Allen county amateur radio groups joined the ranks to spread the good word.

The amateurs ran three Echolink stations, IRLP, and two HF stations along with PSK31. The event scored local media coverage from newspapers, radio and network TV stations. Indiana Governor Joe Kernan, a former Vietnam POW and Indiana's senior Senator Dick Lugar both sent proclamations. They were just two of several proclamations read in a special ceremony before the first pitch of the baseball game. Many of the 65-hundred fans on hand, took advantage of the amateur radio connection to express their support to the military stationed around the world.

Reporting for Amateur Radio Newsline, this is Jack Parker W8ISH

--

The Fort Wayne hams say their mission was a success. They now plan to make Amateur Radio Military Appreciation Day an annual event. (ARNewsline(tm), KB9IBW)

HAM RADIO ON THE INTERNET: THE AOL RADIO COMMUNICATIONS FORUM

If you use America Online to get your e-mail and have never explored the Radio Communications forum pages, then you are missing half the fun. Almost since the day AoL took to Internet, the Radio Communications Forum has been a part of the service, and its not just limited to ham radio operators either. No matter what you radio hobby interest, there is probably a board for you. C-B. Scanners. You name it. There's a place for you.

So the next time you sign on and hear the famous words -- "you've got mail" -- type in the keywords radio communications and join the other radio hobbyists around the world who make this area of AoL their cyberspace home." (ARNewsline(tm))

**

HAM RADIO IN SPACE: AN ORBITAL FIELD DAY

Ham radio space travelers Mike Fincke, KE5AIT, and Gennady Padalka, RN3DT, may participate in Field Day from the International Space Station if time permits. ISS Ham Radio Project Engineer Ken Ransom, N5VHO, sent Field Day operating instructions and pass times to the ISS support team at Johnson Space Center. If they were on, Fincke should have been operating as NA1SS. Padalka would likely have signed RS0ISS. Both stations would be classified as 1 Alpha operations. (ARISS)

**

HAM RADIO IN SPACE: ITS A GIRL

And less we forget, a word of congratulations to Astronaut Mike Fincke and his wife Renita on the birth of their second child. Tarali Fincke was born on Friday June 18th with KE5AIT himself making the announcement from the orbiting I-S-S. (N1ORC)

**

THE EDUCATION FILE: THE 2004 TAPR - ARRL DCC

On the educational agenda, the 2004 TAPR and ARRL Digital Communications Conference will be held September 10th to the 12. The venue is the Airport Holiday Inn in Des Moines, Iowa and the planners say that are now accepting papers for the conference proceedings. You do not have to be present at the conference to have your paper included in the proceedings.

Submissions are due before August 10th. Send them to Maty Weinberg at ARRL Headquarters, 225 Main Street, Newington, Connercticut. The zipcode is 06111 and you will find more conference information on the web at www.tapr.org/dcc (TAPR)

**

WORLDBEAT - INDIA: A NEW HAM RADIO INITIATIVE

In world news. India's national Amateur Radio society says that it plans to conduct various programs to promote Amateur Radio as part of a disaster mitigation program in many venues across that country. Many local radio amateurs and clubs across India plan to back this National Institute of Amateur Radio initiative and also take part in this program. (NIAR via Q-NEWS)

**

WORLDBEAT - SCOTLAND: RSGB DISTRICT NAME CHANGES

And some major changes to the two Radio Society of Great Britain Scottish Regions have been announced. Region 1, previously known as Scotland West and the Western Isles, becomes Scotland South and the Western Isles Region 2, previously known as Scotland East and the Highlands becomes Scotland North and the Northern Isles.

As a result of these changes, two new RSGB districts will be added to Region 1. These are District 15 to be called Lothians and District 16, the Borders. The Deputy Regional Manager for District 15 is Dave Stockton, GM4ZNX. (GB2RS)

**

DX

In D-X, word that IZ3EFL is currently active as S79DF from the Seychelles. Look for him during his evening hours on 20 meters SSB. He expects to remain there for quite some time so QSL as directed on the air. (GB2RS)

And PA5M is now in Sudan and will be active in his spare time as ST2DX. He will be there for about one month. QSL is via PA7FM. (GB2RS)

**

THAT FINAL ITEM: D-DAY AND HAM RADIO - NEW ORLEANS STYLE

And finally this week, the story of ham radio helping to celebrate a national holiday, southern style. It took place in New Orleans and Don Wilbanks, AE5DW, is there with the rest of the story:

--

The weekend of June 5th and 6th the Jefferson Amateur Radio Club, based in Metairie, Louisiana operated W5D, a special event station to commemorate the 60th anniversary of the D-Day invasion at the National D-Day Museum located in downtown New Orleans.

Event co-chairman Keith Barnes, W5KB reports that by all measures it was a rousing success. Just over 600 contacts were made and the station display was very well received by visitors and Veterans alike. The hams manning the booth didn't miss many opportunities to

talk up amateur radio.

The display, prominently located in the main entrance hall just past the front door, featured a large collection of World War II vintage military radio gear. Among the visitors to the station were former New Orleans Archbishop Philip Hannan, himself a World War II vet and member of the 82nd Airborne. The Archbishop actually jumped with the 82nd on D-Day.

Also stopping by was Louisiana governor Kathleen Babineaux Blanco. She even sat at the radio and made a contact.

Both Archbishop Hannan and Governor Blanco signed the commemorative poster along with World War II veteran radio operators and World War II veteran hams. The poster will be made into the commemorative certificate for those stations making contact with W5D.

For more information on the special event, along with pictures of the station and vintage radio display, take your web browser to the Jefferson Amateur Radio Club's website at www.w5gad.org. To find out more about the National D-Day Museum visit www.ddaymuseum.org.

From New Orleans, I'm Don Wilbanks, AE5DW for the Amateur Radio Newsline.

-- credit: JARC --

Oh and I got my steaming cup of Jamaica
Blue Mt coffee

You're speaking my language loud and clear.....the Jamaican crop was
absolutely lousy two years ago and I went to the Ethiopian Harrar (a
close runner up, in addition to a distinct Arabica Hawaiian bean offered
by Gevalia),,,,did the Blue Mountain Crop rebound? Sometimes they get
two growing seasons per year. I couldn't justify the price for an
inferior bean that is supposed to set the standard,,we drank Blue
Mountain for years and until it changed two years ago due to a poor crop
year..,,,,I haven't tried this year's crop yet,.....nothing like
world class whole bean from a press out of a ceramic mug. Ditto for the
smoked salmon, although smoked mullet is a dead tie when making spread.

Well, This years crop was good, and there is a bean that comes from the
next mountain over that is damn near as good. The local coffee shop
orders the whole beans for me, and I grind them fresh for each pot. heck
I love the smell of fresh ground beans as much as I love drinking the
fifnal product.

Right on! A good supplier is just as valuable,,,I've seen several coffee
distributors selling old stock coffee....if it's been sitting in their
store for an amount of time, it's no good, but of course you already are
aware of this, being a coffee connoisseur yourself. Oh yea, I
agree,,,,when possible, never grind the beans until right before
brewing, but many places don't sell Blue Mountain whole bean because

they sell it by the cup. Mail order has yielded me the best bean, but
you really pay for it. What is the going price this year for the Blue
Mountain? I think it was around 42 bucks per pound before the bad crop.
I can imagine what it went to in the following year.

You might try Gevalia
http://www.gevalia.com/gevalia/catalog/product_detail.jsp?PROD_ID=338&catid=29&ITEM_ADDED=
false
I can ask the local store for their suppliers information also
From Gevalia it is $24.95 for 8 oz whole beans so $49.90 for a pound
I buy alot of coffee from Gevalia
_------------

Dig it,,,,I too, spend plenty of money with Gevalia..I think I mentioned
it above,,,,,,,it's where I obtained the Hawaiian Arabica bean,,,and I
did purchase Blue Mountain from them a few times.....2 coffee makers and
several ceramic sugar containers with their insignia. I've been buying
whole bean Dunkin Donuts for the past month or so,,that's as low as I
go.

1008. More on antenna tests

he pasted the headers from my post, someone was fooling around with my
system at the office and changed the settings, unfortunately I can not
set up a real newsreader there.

Boy am I glad to have my linux box up and running again, now one of
these days I'll have the time to install newer version. I'll do that
before I switch to DSL. Once I have DSL here, I'll be able to host a
IRLP node here instead of having to bring up the Angola, In or Lima, Oh
machines.

1020. Noise in '92 Grand Voyager

Newsgroup: rec.radio.cb
Date: 2004-06-25 22:57:13 UTC
From: Chris <spadfly@earthlink.net>
Message-ID: <d52Dc.13682$w07.8616@newsread2.news.pas.earthlink.net>
Source record: 183830

I just installed a CB radio in a 92 Plymouth Grand Voyager. All went smoothe except for one thing. There is something in the van causing a great deal of noise in the receive on certain channels. It sounds like a constant mid-frequency tone. It comes on when the ignition switch is turned on but remains on for 15 minutes or so after the switch is turned back off. When I listen under the hood, I can hear a faint noise from something electronic there. It is the same pitch as what I hear in the CB. When that noise quits, the CB noise quits. Could it be the fuel pump or injectors? Someone please help me locate the source of this noise. If I know what it is, I can deal with it better.

Thanks,
Chris

1021. Galaxy 99v freq prob

1022. Cobra 25 WX LTD Classic mic squeal

Newsgroup: rec.radio.cb
Date: 2004-06-26 01:19:48 UTC
From: Chris <spadfly@earthlink.net>
Message-ID: <Ua4Dc.13890$w07.3343@newsread2.news.pas.earthlink.net>
Source record: 183832

I connected a Cobra CA-75 power mic to My Cobra 25 WX LTD Classic and it squeals like crazy. If I hold it just right it won't but it's too prone to squealing. The radio is fine with a stock mic and the power mic is fine on other radios. I have also had another radio with a power mic in the same vehicle with the same antenna with no problems. Is there an easy solution to this?

Chris

1023. CB Radio Recommendations

Newsgroup: rec.radio.cb

I've been running a Cobra 29 WX ST for the last four years paired with a Wilson 'Little Wil'. It's my first radio and its done alright, but its time for an upgrade.

I'm looking at a getting a hold of a PC68XL. It seems to be the best radio offered in a small compact size.. I'm also thinking of tossing my Little Wil and getting either a K40 or Wilson 5000.

Might I be better off upgrading into a AM/SSB radio instead? Something like the older GX979 from Galaxy?

Any suggestions?

Patrick

Source record: 183834

Minivan pumps are as noisy as a Dremel. Start the van and go sit in the liftgate area or anywhere behind the vehicle. Something that is buzzing for 15 minutes after the vehicle is shut off aint right. When you turn the key to on, before you start it, the fuel pump will run for a few seconds to pressurize the system.
Ignition and fuel pump noise in the radio have never been a problem in my vehicles, so someone else can tell you how to chase it out of those S body vans.

Uniden Grant or LT is a great AM/SSB radio the Wilson and K-40 are both
great antennas

Good luck

Do you have talk back installed in the radio? manay times if talkback is
installed and the mic is too close to the radio it will feedback.Also
(and this is one of the more common mistakes) is the mic wired properly
for the radio.

I have outlook express at the office which does my email and usenet, but
I much prefer a real usenet client. for winblows I like Forte` Agent.

Haven't decided what one I want to use for my linux box.

From: Totalrod2@aol.com
Message-ID: <570546c0.0406252225.4fcdbe45@posting.google.com>
Source record: 183841

I recently accquired a Realistic (Radio Shack)TRC-452 CB radio. It has
been peaked (mod and power) and 25 channels added above 40. It's a
great old radio. My father had a TRC-452 he bought brand new in 1976
and I grew up seeing it in every truck he's owned since (I'm 30 now).
Anyhow, the reason I'm here is to ask a question. Everything on my
radio is in working condition except for the meter. The needle seems
to be stuck on "1". Is anyone familiar with this model? How do I
repair the meter so it'll work?

Bryan Lord

1032. Re: Cobra 25 WX LTD Classic mic squeal

Newsgroup: rec.radio.cb

Message-ID: <fUbDc.14357$w07.4167@newsread2.news.pas.earthlink.net>
Source record: 183842

I found it! The electret mic element was bad. I have a nearly identical mic that worked just fine even with the gain wide open. I looked everything over closely and compared the mics. I noticed one thing. When I put my fingers close to the mic element, it would squeal. The good one didn't do that. I found an old electret element lying around, put it in the mic, and it works just great now.

I had a Uniden Pro510XL doing the same thing a few months back. I think I'll try a new mic element for it too.

if you are careful,, look on top of the meter inside radio. there is a very small brass screw. this is the needle pivot bearing. heat the glue holding screw, and turn c.c.w. about 1/8 turn.. this usually frees up the movement

behold ,,how good and pleasant for brethren to dwell together in unity

Isn't there special equipment needed to properly tune a SSB radio &
antenna? I mean other then the normal SWR and power meter?

Mind to educating me on the fine art of tuning a SSB radio & antenna?

Thanks,

Patrick

I use a Icom 706MKII-G and set the memory channels to the 40 CB channels. This way it's easy to stay on channel and change channels while mobile. For an antenna..I use a 102" stainless-steel whip on a ball mount. Get pretty good signal reports.

mike elements dont squeal when they go "bad" maybe the connections
were not made properly or the sheilding was broken ungrounded
somewhere on it but congratulations on fixing it

Anything would be better than the Clownfish I usually get. <g>

Twist,

You don't even have to bait the hook. The clownfish show up in droves -
even when you haven't posted in a week!

Would you believe we set a record low high temperature yesterday? 62
degrees! After the start of summer! Dang!

Meanwhile, up in British Columbia, it is in the 80s! Go figure. BTW, this
is probably 300 miles North of the boarder into Canada. You aren't melting
the glaciers, are you? I heard something like that in this newsgroup. Next
thing, you'll be causing my washing machine to oversuds. I'm gonna blow you
in to the FCC .... BWAaaahahahahaha :))

The english version is on line

On line for one year, the site devoted to HAM INTERNATIONAL products, has
received the visit of approximately two thousands Net surfers to date.
To simplify its access to the greatest number, its pages "got dressed" with a
new address:
http://www.ham-international.com easier to retain. Some diagrams are already on
line, others will follow soon as well as new pages. The objective is to ensure
a retrospective detailed, of a range of TX/RX, accessories, micro antennas
etc... extremely present on market CB and Radio ham in the Eighties. Many
equipment still present are wisely arranged on the chimney, others fewer are
always active. You will find information of all kinds concerning the materials
(characteristic detailed, infos technical adjustments, photographs etc...). For
some perhaps T-it will act of a discovery, for others the occasion of replonger
at the time glorious of our Hobby. Do not hesitate to contact me if you have
anecdotes, documents, suggestions. In waiting be welcome.

Good visit and @bientï¿½t.

I'll second that opinion. I always laugh when I hear operators on 38 LSB say they are running a Yaesu, Kenwood, or Icom rig on 11 meters. Why spend all that money to talk on one band when a $200 Uniden, Cobra, or Galaxy will do the job just as well as the high priced amateur rig?

For what it's worth, I use an "old" (early 90's) Uniden PC122 and a five foot Wilson Silver Load for my mobile setup and have no trouble getting out. And you need no special equipment to properly tune a radio and antenna for SSB operation. Just make sure you have the mode switch on your radio set to AM when you check your SWR.

73,
David

I've been out of town for the past few days and was unable to respond right away. Anyhow the takeoff angle is of great interest for DX work.Its the pattern for the main lobes in the antenna pattern that is of interest. Too high, or too low, and the skip distance is not optimum.

Doing field strength measurements as you outline is fine if all you're interested in is local contacts. For DX work you have to have a better idea of the over all antenna radiation pattern, i.e. a 3D plot. That you can't get with your simple method.

I also take issue with your posted link dealing with antenna resistance values. You can't calculate so simply. The reason being is the antenna current is a "standing wave" on the antenna element(s), thus the current is not evenly distributed. The areas were you have the most lost is where the current is highest. Going through the math I come up with around 4.655 ohms compared to your 9.31 ohms. It is still high, but not as bad as the number you came up with. Other current distributions, from loading coils etc, will result in other values.

The comments about a 1/4 wave whip being the "best" antenna I'm not so sure about. I would tend to say that some of the CBer's may have a point when they claim otherwise. There are two items to consider. One is total over all antenna efficiency. Second is signal strength at the RX station location. While the 1/4 wave whip may be an efficient antenna, radiating just about every watt fed in to it, but if it does so at high angles relative to horizontal then its nothing but an efficient cloud warmer. Now if you have an antenna much less efficient than the 1/4 wave whip, but just about every watt radiated is done so at a very low angle relative to the horizontal the signal strength at the RX station location is maximized. It there for becomes conceivable that an antenna design that is not "efficient" as a 1/4 wave whip yet in the area of interest, signal strength at the RX location because the take off angle is much better, could be a better antenna. I know a while back this point came up and some of the CBers had some interesting measurements that tend to confirm such a thing can happen.

I use a Kenwood 751 on 11 and also listen to some of the idiots on the
'amateur' bands. Didn't spend a dime for the radio. Those operators who
have the high priced rigs may use them for something other than checking
road conditions. Speaking of which, does 19 have an equal on the amateur
bands? (Not counting those asswipes who use 10 meters over the road).

I think it's from the engine control computer. The antenna is a lip mount on the hood. This could be the main reason for the noise but moving the antenna means a new antenna.

Ah! the 452, a nice Uniden based radio. I had a couple of 152's (the
23 channel version of the same basic radio). The meters are fairly
common between the many makes which use those older Uniden chassis.

Unfortunately, they do tend to stick when they get older. It might
have something to do with surface corrosion or otherwise tarnishing of
the needle bearings. Sometimes you can remove the meter, take the
plastic lens off of the front, and adjust the little brass screw that
controls the tension on the bearing. You have to be real careful
though as it is extremely easy to mess it up. Sometimes you can get it
to work again, but it's been my experience that the repair is only
temporary and it will act up again.

You might check with a local shop. They might have replacement meters
for those things.

1086. Royce 1-640 schematic and owners manual now on-line

Newsgroup: rec.radio.cb
Date: 2004-06-29 03:12:53 UTC
From: alkjalksdfjlkj@hotmail.com
Message-ID: <40e0dc00.13640744@news.verizon.net>
Source record: 183896

I recently acquired several vintage CB radios complete with owner's manuals from an estate sale. I will be scanning selected parts of the owner's manuals and making them available to all.

Currently up is selected pages from the Royce 1-640 23 AM/SSB channel sideband CB base. I will also donate the scanned pictures to CBTricks.com as their on-line database has helped me repair vintage CB radios on previous occasions.

From Night Ranger's Radio Communication Page at;
http://www.shadowstorm.com/cb/

Selected Pages from the Royce 1-640 Owner's Manual
http://www.shadowstorm.com/cb/schematics/Royce640.htm

Future CB manuals to be scanned include;

1) The Realistic TRC-451 (Radio Shack)
2) Royce 1-662
3) Hy-Gain Hy-Range 2
4) Cobra 85

and others.

6.0.711 / Virus Database: 467

I managed some skip on 38 low this weekend,,,it was hopping with activity. I tried to get out on 6 but those bad dudes in south St. Pete were steppin' on my red neck.
Summer is here in full force. Our thunderboomers started and each afternoon the humidity afterwards makes for some serious heat index. For some odd reason, the tourists didn't leave this summer. I guess we have over-developed to the point of being a year 'round tourist destination..(sigh),,perhaps if they closed Disney World,,,,,,oh well, I can dream, can't I?
  Been really busy,,,,almost bought a flats boat for fresh water this week but decided to put the money toward vacation this summer or fall...and perhaps a rather large DC amplifier will assist me in contacting my radio buds via HF as I meander across the country....I'm gonna sell my camper this summer for a song..,when I open it up I'll post some pics. Too bad I wasn't heading north this year,,,,,but then again, if we could ever get a rec.radio picnic together...if someone else would bring the smoker, I'd supply the hog.

>Any uncertified (this means power mics

>too!)device that causes more than 100 % AM

>modulation on TX is illegal on CB.

Are you saying power mics need certified to be legal or are you claiming
all power mics cause more than 100% modulation and are therefore,
illegal? Because,,,,you're wrong. Power mics are as legal as roger
beeps.

>You can have it but you can't operate with it.

One can use all power mics and roger beeps they wish.

>Roger beeps were not around when the rules

>were made.

Irrelevant. Power mics are legal and so are roger beeps. If the feds
meant for these to be illegal, they would have adopted and updated the
rules, just as they do in other rule areas each and every year.

> They are not used to continue or maintain a

>QSO.

Sure they are, in many, many, many instances.
In fact, that is their primary use and for which they were designed.

>Very primitive tone encode/decode

>sytems were tried by several manufacturers

>but nothing stuck.

By speaking of roger beeps, most people mean it to encompass roger
beeps, k beeps, and any other tone that signals the beginning or end of
transmission, and many of them "stuck",,,which is why the beeps are
still sold today on many radios and mics.

It's not wired directly now but I tried it. The noise is coming through the antenna, which is on the hood. The source is the body control module. I'm not sure what it does but the engine runs without it. I may have to go with a short antenna on the roof because it has to clear parking garages.

Simple, you get a better receiver! That is worth a lot! Besides, some of these guys are also HAMS and use them on HAM frequencies. Its actually better for CB too! The ham radios have a much cleaner transmitter at 100 watts than your CB does at 12 watts! Less crap on the bands!

To answer the original question:
Get a Uniden Grant or an OLDER Cobra 148GTL (made in the Phillipines or Malaysa). Stay away from the new Cobras!

Run a Wilson 1000 unless you are going to buy a big amp. You won't go wrong with a Wilson 1000!

>Why spend all that money to talk on one band when a $200 Uniden, Cobra, or
>Galaxy will do the job just as well as the high priced amateur rig?

This little guy is sitting at the bar just staring at his drink. He's been sitting there for half an hour when this big trouble-making truck driver steps next to him, grabs his drink and gulps it down in one swig. The poor little guy starts crying. "Come on man, I was just giving you a hard time," says the truck driver. "I'll buy you another drink. I just can't stand to see a man crying." "This is the worst day of my life," says the little guy between sobs. "I can't do anything right. I overslept and was late to an important meeting, so my boss fired me. When I went to the parking lot, I found my car was stolen and I have no insurance. I grabbed a cab home but, after the cab left, I discovered my wallet was left in the cab. At home I found my wife in bed with the gardener. So I came to this bar and was intent on putting an end to my life, and then you show up and drink the damn poison."

If you thought things weren't going well for you, think of this poor guy.

PADERBORN, GERMANY - Overzealous zookeeper Friedrich Riesfeldt fed his constipated elephant 'Stefan' 22 doses of animal laxative and more than a bushel of berries, figs and prunes before the plugged-up elephant finally let fly and suffocated the keeper under 200 pounds of poop! Investigators say ill-fated Friedrich, 46, was attempting to give the ailing elephant an olive oil enema when the relieved beast unloaded on him like a dump truck full of mud. "The sheer force of the elephant's unexpected defecation knocked Mr. Riesfeldt to the ground, where he struck his head on a rock and lay unconscious as the elephant continued to evacuate his bowels on top of him," said flabbergasted Paderborn police detective Erik Dern. "With no one there to help him, he lay under all that dung for at least an hour before a watchman came along, and during that time he suffocated. "It seems to be just one of those freak accidents that happen."

STILL think you're having a bad day?

A woman came home to find her husband in the kitchen shaking frantically, like in a dancing frenzy, with some kind of wire running from his waist towards the electric coffee pot. Intending to jolt him away from the deadly current, she whacked him with her son's baseball bat, breaking his arm in two places. Up until that moment, he had been happily listening to his Walkman.

STILL think you're having a bad day?

Two animal rights protesters were protesting the cruelty of sending pigs to a slaughterhouse in Bonn, Germany. Suddenly, all two thousand pigs broke

loose and escaped through a broken fence, stampeding madly. The two hopeless protesters wer e trampled to death.

STILL think you're having a bad day?

There was a case in one hospital's Intensive Care ward where patients always died in the same bed, on Sunday morning, at about 11am, regardless of their medical condition. This puzzled the doctors and some even thought that it had something to do with the supernatural.
No one could solve the mystery as to why the deaths occurred around 11 A.M. on Sundays. So a Worldwide team of experts was assembled to investigate the cause of the incidents. The next Sunday morning, a few minutes before 11am, all the doctors and nurses nervously wait outside the ward to see for themselves what the terrible phenomenon was all about. Some were holding wooden crosses, prayer books and other holy
objects to ward off the evil spirits. Just when the clock struck 11, Pookie Johnson, the part-time Sunday sweeper, entered the ward and unplugged the life support system so that he could use the vacuum cleaner.

STILL think you're having a bad day?

The average cost of rehabilitating a seal after the Exxon Valdez oil spill in Alaska was $80,000. At a special ceremony, two of the most expensively saved animals were being released back into the wild amid cheers and applause from onlookers. A minute later, in full view, a killer whale ate them both.

STILL think you're having a bad day?

A terrorist, Khay Rahnajet, didn't pay enough postage on a letter bomb. It came back with "return to sender" stamped on it. Forgetting it was the bomb; he opened it and was blown to bits.

There now, feeling better?

1126. OT - TELEPHONE PROBLEMS

Newsgroup: rec.radio.cb
Date: 2004-06-30 22:36:54 UTC
From: Keith Hosman KC8TCQ <logdshr@bnnorth.net>
Message-ID: <40E34086.1DF3655D@bnnorth.net>
Source record: 183938

Subject: TELEPHONE PROBLEMS

An elderly lady called her telephone company to report that her telephone failed to ring when her friends called - and that on the few occasions when it did ring, her pet dog always moaned right before the phone rang. The telephone repairman proceeded to the scene, curious to see this psychic dog or senile elderly lady.

He climbed a nearby telephone pole, hooked in his test set, and dialed the subscriber's house. The phone didn't ring right away, but then the dog moaned loudly and the telephone began to ring.

Climbing down from the pole, the telephone repairman found:

1. The dog was tied to the telephone system's ground wire via a steel chain and collar.

2. The wire connection to the ground rod was loose.

3. The dog was receiving 90 volts of signaling current when the phone number was called.

4. After a couple of such jolts, the dog would start moaning and then urinate on himself
and the ground.

5. The wet ground would complete the circuit, thus causing the phone to ring.

Which demonstrates that some problems CAN be fixed by pissing and moaning.

First the Lord made man in the Garden of Eden.

Then he said to himself, "There's something he's needing.'"

After casting about for a suitable pearl,
He kept messing around and created a girl.

Two beautiful legs, so long and so slender,
Round, slim, and firm, and ever so tender.

Two lovely hips to increase his desire,
And rounded and firm to bring out the fire.

Two lovely breasts, so full and so proud,
Commanding his eyes, as he whispers aloud.

Two lovely arms, just aching to bless you,
And two loving hands, to soothe and caress you.

Soft, cascading hair hung down over her shoulder,
And two dreamy eyes, just to make him grow bolder.

'Twas made for a man, just to make his heart sing.

Then he added a mouth.

Ruined the whole thing !!!!!!!!!!!!!

1. A kindergarten pupil told his teacher he'd found a cat, but it was dead.
"How do you know that the cat was dead?" she asked her pupil.
"Because I pissed in its ear and it didn't move," answered the child innocently.
You did WHAT ? ! ?" the teacher exclaimed in surprise.
"You know,"explained the boy, "I leaned over and went 'Pssst!' and it didn't move."

2. A small boy is sent to bed by his father.
Five minutes later....."Da-ad...."
"What?"
"I'm thirsty. Can you bring drink of water?"
"No, You had your chance. Lights out."
Five minutes later: "Da-aaaad....."
"WHAT?"
"I'm THIRSTY. Can I have a drink of water??"
I told you NO! If you ask again, I'll have to spank you!!"
Five minutes later....."Daaaa-aaaad....."
"WHAT!"
"When you come in to spank me, can you bring a drink of water?"

3. One summer evening during a violent thunderstorm a mother was tucking her son into bed. She was about to turn off the light when he asked with a tremor in his voice, "Mommy, will you sleep with me tonight?"
The mother smiled and gave him a reassuring hug. "I can't dear," she said.
"I have to sleep in Daddy's room."
A long silence was broken at last by his shaky little voice: "The big sissy."

4. It was that time, during the Sunday morning service, for the children's
sermon. All the children were invited to come forward.One little girl was
wearing a particularly pretty dress and, as she sat down, the pastor leaned
over and said, "That is a very pretty dress. Is it your Easter Dress?"
The little girl replied, directly into the pastor's clip-on microphone,
"Yes, and my Mom says it's a bitch to iron."

5. When I was six months pregnant with my third child, my three year old came into the room when I was just getting ready to get into the shower. She said, "Mommy, you are getting fat!"

I replied, "Yes, honey, remember Mommy has a baby growing in her tummy."
"I know," she replied, but what's growing in your butt?"

6. A little boy was doing his math homework. He said to himself,
"Two plus five, that son of a bitch is seven.
Three plus six, that son of a bitch is nine...."
His mother heard what he was saying and gasped, "What are you doing?"
The little boy answered, "I'm doing my math homework, Mom."
"And this is how your teacher taught you to do it?" the mother asked.
"Yes," he answered.
Infuriated, the mother asked the teacher the next day,
"What are you teaching my son in math?"
The teacher replied, "Right now, we are learning addition."
The mother asked, "And are you teaching them to say two plus two,
that son of a bitch is four?"
After the teacher stopped laughing, she answered,
"What I taught them was, two plus two, THE SUM OF WHICH, is four."

7. A certain little girl, when asked her name, would reply,
"I'm Mr.. Sugarbrown's daughter."
Her mother told her this was wrong, she must say, "I'm Jane Sugarbrown."
The Vicar spoke to her in Sunday School, and said,
"Aren't you Mr.. Sugarbrown's daughter?"
She replied, "I thought I was, but mother says I'm not."

8. A little girl goes to the barber shop with her father.
She stands next to the barber chair, while her dad gets his hair cut,
eating a snack cake. The barber says to her, "Sweetheart, you're gonna
get hair on your Twinkie."
She says, "Yes, I know, and I'm gonna get boobs too."

Now keep that smile on your face and pass it on to someone else!!

1129. OT - Day in the life of a one room school teacher

Newsgroup: rec.radio.cb
Date: 2004-06-30 22:46:33 UTC
From: Keith Hosman KC8TCQ <logdshr@bnnorth.net>
Message-ID: <40E342C9.8F41AC56@bnnorth.net>
Source record: 183941

A teacher in a one-room school house arrives one morning to
find a nice red apple on her desk with a tag tied to it saying T.O.T.

Knowing that she had some not-so-nice pranksters in her class,
she cautiously asked "Can someone explain what T.O.T. means?"
Mary in the front row raised her hand to explain, "It means "To
Our Teacher."

The next morning the teacher finds a bigger and prettier apple
than the day before. This time there is a tag with T.O.T.W.L.
written on it. She asks for an explanation for this note and little
Johnny waves his hand to explain "That means "To Our Teacher
With Love".

The next morning she arrives to find a great big watermelon
sitting on her desk with a tag saying "F.U.C.K."
Her jaw drops and she screams "Who can explain this?" Little
Buckwheat in the back row raises his hand and says, That means
"From Us Colored kids !"

Thanks Dave.
I'm not much of a technician, but replacing a broken meter seems
pretty straight forward. Just one more question. In your opinion, do
you think the meter on this website will work as a replacement?
http://www.kenselectronics.com/lists/meters.htm
The meter I'm looking at is: WV23-M1. At $6, the price is right. Not
to mention it looks almost identical to the original. If it'll work,
I'll probably get 2 of them. The second one will go into my Cobra 77X
which is basically the same radio as the Realistic TRC-452. Please let
me know what you think.
Bryan Lord

1146. FREE! "THE CB EPROM DATA BOOK" OF FREQ. MODS

Newsgroup: rec.radio.cb
Date: 2004-07-01 02:42:53 UTC
From: Lou Franklin <lou@cbcintl.com>
Message-ID: <ahu6e0556v0qu9jrqe94l3svnj8v1ag50u@4ax.com>
Source record: 183956

FREE!!

For advanced techs and serious radio hobbyists, we're now offering a FREE copy of our previously published "CB EPROM DATA BOOK" by Martin Pickering. (EPROM = Erasable Programmable Read Only Memory.) We sold it for many years but it's now out of print. This little manual of 60 illustrated pages is an absolute GEM of CB technical knowledge you'll just never find anywhere else. And it's yours for FREE from our Web site.

This book reveals the secrets of advanced channel programming, and picks up where our "CB PLL DATA BOOK" (www.cbcintl.com/pllbook.htm) leaves off. You'll get a thorough background in how these amazing programmable chips can be used to modify many popular CB PLL circuits for expanded frequency coverage. Covers the basic programming techniques, and even includes real PC board artwork for making EPROM circuits. Sample artwork includes EPROM boards for the popular MB8719, PLL02A, ï¿½PD2824, and ï¿½PD858 PLL circuits.

Best of all, the price is right! Download your FREE copy of "THE CB EPROM DATA BOOK" (948 KB Adobe PDF) at:

www.cbcintl.com/docs/EpromBook.htm

Don't forget to check out all our other CB specialty books, plans, kits, & high-performance accessories at:

www.cbcintl.com

SAVE MONEY! We regularly run EBAY auctions in which you can save up to HALF the cost of our most popular CB books and accessories. To see what's currently on sale, double-click the line below:

We've now added all our crystal charts for free download/printing
(PDF) on our site. These 36 charts cover about 95% of all American
mobile & base CB models, and show exactly which crystal(s) affects
which mode or channel. Very useful for troubleshooting "dead
channels" symptom, or for modification to 10M or other freqs.

Check 'em out at: www.cbcintl.com/xtals/xtals.htm

We specialize in CB books, plans, kits, and high-performance CB
accessories. Please visit our Web site to see all those "goodies" you

1149. CB REPAIR & MODIFICATION BOOKS AT 40% OFF

Newsgroup: rec.radio.cb
Date: 2004-07-01 02:43:04 UTC
From: Lou Franklin <lou@cbcintl.com>
Message-ID: <mhu6e0helg8703303vcg3rmdsrlt9edcjt@4ax.com>
Source record: 183959

To learn the technical TRUTH about CB Radio without all the hype from people who are just plain ignorant, check out the following books from CBC International. They're selling right now at a big discounts on our EBAY & AMAZON stores too.

Check it out!

To see exactly what these books look like, plus all the specific, chapter-by-chapter details, see our Web at:

www.cbcintl.com

Some of the books included are:

BOOK #1: THE "SCREWDRIVER EXPERT'S" GUIDE To Peaking Out & Repairing CB Radios. List $25. The most popular "big dummy's" guide ever published on do-it-yourself CB repairs & modifications. Covers peaking of receivers, transmitters, modulation, mike problems, antenna & SWR problems, detailed frequency modifications for both crystal & PLL radios. Loaded with charts, illustrations, and specific instructions for most brands including the new export models. This latest edition also covers slider and broadbanding tricks, FM conversions, and much more!

BOOK #2: THE CB PLL DATA BOOK. List $20. The only complete reference source on CB PLL synthesizer circuits ever published! Detailed PLL theory explained in layman's terms. How they work, and how to modify them for many more channels. Includes specific PLL block mixing diagrams, truth charts, & IC pin function diagrams for nearly every PLL chip ever used. Covers all the most popular U.S. & export chassis, with specific listings of all models using the chip.

BOOK #3: UNDERSTANDING & REPAIRING CB RADIOS. List $42. Giant 370-page technical book for the professional repairman. Picks up where the "SCREWDRIVER EXPERT'S" GUIDE leaves off. Includes circuit descriptions & troubleshooting guide for 23- & 40-Ch., crystal & PLL, solid-state & tube, AM, FM, SSB, CW, American & export models. Covers test equipment (& where to find it), transistor basics, synthesizers, receivers, transmitters, power supplies, T/R switching, antennas, interference, parts & accessory sources. Over 350 illustrations including schematics, charts, and photos. Huge subject index also lets you look up repairs by symptoms. This is "must" reading for any serious CB technician!

For details on our Galaxy-Ranger Service Manual (2nd Ed.) go to:

www.cbcintl.com/galaxy.htm

To be fair, Jerry has caused much problems. in the trucking group, but
not here. I had my own issue here with Jerry concerning his actions on a
single occasion, but I don't hold grudges like I force some others to
do. I agree he didn't say anything nasty. In fact, never has this group
went so long without his name appearing in the posts (*).

Shut up, dickcheese. If Twistedhed has the right to post against the
government laws we have a right to post against him.
BTW: are you going to blow off (yet another) field day this year, so
that you can spend your weekend here, posting your akc googlefuck spew
on rrcb instead..??? LOL!

>As long as Twistedhed breaks the law we will

>expose him forever and ever if that's what it

>takes.

Umm,,hate to break it to you in such a manner,,,but I wrote an article
concerning my dx and freeband activities that KC8LDO came across (while
scouring the internet on anything he could find on me,,,((chuckle)),,I
still chuckle that my postings and words discombobulated KC8LDO to the
point of hysteria where he actually went down a rabbit hole in search of
my handkle via google). In any event, KC8LDO
brought my article to the group and shared it with the masses here a
year after it ran in the publication. Your massive deficit in
communications will not allow your low self-esteem to grasp such a
realization that you "exosed" nothing. You're impotent.

> Already have his boats name thanks to this

>web page and information by tipsters. Carry

>on, potatohead.

And that will do,,,umm,,what? Hehhehe,,,,tell people about my dx
activities? Heck, I do that! Make up some more lies? Go ahead,,,the
truth= nothing to fear! In fact, I had one hell of a weekend DXing with
several big dogs.

_
(Um, which laws, exactly, are you on about?)

Several years ago he began experiencing blood in his urine after reading my posts concerning dx and 27.555. Every once in a while the ticks revisit him. Cut him some slack, the rest of the group does, as he simply can't help himself,,,,he suffers a sickness and most of us pity him, illustrated by only a select few even willing to give him the time of day.

It's worth what someone will pay for it. Yes, it does have some good
stuff in it. It's a great introductory read and written for the layman.
If you have no clue what you are doing, it would probably be worth the
twenty bucks for the elementary knowledge alone.
Lou often has great books,,check the archives for his posts and links.

Hey mopar I guess you were left out of the loop too because you didn't
know his boats name either. Funny that he keeps you in the dark even
though you were his zombie ham stalker for a while.

A truck driver was sitting in the resturant eating his lunch when a gang
of bikers came in. One of the bikers sat down next to him, reached over
and took the truckers lunch and proceeded to eat it. Grinning the biker
said, "so what are you going to do about it?" The trucker said nothing,
got up, walked over to the cashier and paid for the lunch and walked
out. The biker said, "boy that trucker sure was a sissy wasen't he,
wouldn't even put up a fight for his lunch". The cashier said, "yea, not
a very good truck driver either, he just backed over three motocycles."

Everyone have a safe and happy Independence Day. Thank God and thank a veteran for our freedom!
There are people around here who practice fascism on a regular basis, who wish to take away freedoms and birthrights of Americans. They wish to silence the views they have not the intellect to debate. They wish to do away with all that intimidates them. They seek to silence those with who they disagree. They attempt to attack the freedoms our veterans died for on the holiday weekend commemorating those freedoms.

>From: citizensagainsttwistedhed@yahoo.com

>(Twistedhed Must Go)

>http://www.geocities.com/keyclownzmustgo

I suggest you move to country that supports your hatred toward American freedoms, as you will gain no support here for what upsets you. CB is as American as Apple Pie and Baseball. Begs directed at a cb group for support for your failed fascism on a holiday weekend commemorating the freedoms you seek to take away illustrates your recent lobotomy.

I'm listening to a lot of skip also, Tuesday was notably crazy. I have a barefoot rig in a piuckup truck so I can't really do much talking. Although I don't mind the falmetrhowers that much I do wish they'd stay away from 19. Some asses were rattling toasters on both 18 and 20 making the noise level on 19 unbearable and barefoots were only getting about a mile on super flat farmground.

Hopefully it keeps up. Keeps driving interesting.

Chad

Thats a real old one but still real funny.

I can just see three bikers looking at the bent and mangled bike frames
and handle Bars, hehehhehehe.

I remember the News Papers photo showing a downed pilot in central
america that was cauth, and was tied up in ropes.

The caption said: "Think your having a bad day?"

I felt real good about all my little problems, and was glad of my
blessings, after seeing that.

Jay in the Great Mojave Desert, ... just down the road ah ways from the
fillin station.

Miss Dinah's fillin station and market now has the LA Times, but no one
seems to be buying them!?!?!?!!?!. Got a good deal on Vacuume Cleaner
Belts and Bags. And as always a great price on all kinds of Ammo.
Wounder how she has the best prices on that? Must sell a lot I guess?
But the Gas prices are still pretty steep!

There was nothing in his post that said anything of the sort. He never said anything about freebanders, he said freedom. In your effort to incite an arguement with or about twist, you have put down veterans that put everything on the line for your freedoms. If your looking for donations, why don't you ask for donations for a one way ticket for yourself to the middle east? I'm sure you would receive more donations that you would know what to do with. And I will be the first to contibute to that fund. Maybe the political system and lifestyle of the middle east is more to your liking, since you seem to have such a problem with the freedoms that we have in America.

Everyone have a safe and happy Independence Day. Thank God and thank a
veteran for our freedom!
There are people around here who practice fascism on a regular basis,
who wish to take away freedoms and birthrights of Americans. They wish
to silence the views they have not the intellect to debate. They wish to
do away with all that intimidates them. They seek to silence those with
who they disagree. They attempt to attack the freedoms our veterans died
for on the holiday weekend commemorating those freedoms.

>From: citizensagainsttwistedhed@yahoo.com

>(Twistedhed Must Go)

>http://www.geocities.com/keyclownzmustgo

I suggest you move to country that supports your hatred toward American
freedoms, as you will gain no support here for what upsets you. CB is as
American as Apple Pie and Baseball. Begs directed at a cb group for
support for your failed fascism on a holiday weekend commemorating the
freedoms you seek to take away illustrates your recent lobotomy.

Happy 4th right back to the East, the week side :)

Hi Patrick.

It covers basic repair information for those with no technical background.
If all you want to do is tinker in your own radios and pass the difficult
jobs to a real tech, then it will do fine. If you want to really get into
repairs and mods, you should look for a book that covers at least basic
electronics and radio theory.
With the theory, you can work out the rest.

The trained monkey approach may be fine if you are just tinkering with your
own equipment and can only hurt yourself, but it really helps to understand
more of why things are as they are so that you don't do repairs or mods that
seem OK but can cause serious problems.
It should always be remembered that high voltages can kill, so mains sets
and tube amps can be dangerous. Basic safety needs to be learned if you want
to look at any such equipment.

One fine example was a repair I once saw, where the complaint was that it
was "not getting out well". The strange thing was that it was putting out
about 7 Watts, but not getting as far as a 4 Watt radio.
The problem was a modification inside that caused it to spread it's output
across not only the CB band, but also Amateur frequencies. I am sure that
the "rig doctor" involved saw no reason why his circuit should not be
used... it seemed to work. Basic theory would have told him what would
happen.

Regards,

Peter.

Maybe you have forgotten that this man twistedhed you are defending
has used veterans to support his lies. In order to shore up his anti
legal position he claimed to be a member of a nonexistant veterans
group. He has no respect for veterans or this country as he abuses
one and violates the laws of the other.

it was basically brit vs brit and throw in some hessian (german)
mercenaries on the brit side and some 'volunteer' french on the
colonists side.
ww2 was just that. the allies destroyed german fascism and japanese
imperialism. this country came of age at this point in history by using
its industrial, military and intellectual might.

Last night was an incredible night for ducting on the East Coast.

I talked from Baltimore to Long Island on 146.505 simplex using a
three element coathanger yagi at 15 feet off the ground with 50 watts.

Radio is an Icom 2100H. Nothing fancy here.

I was bringing up repeaters by the threes and fours calling CQ.

Also, 11 meters was active yesterday afternoon, and I talked to
Indiana from my mobile on 38 LSB. Now calling as 104 in Baltimore.

Can't say I'm not radio active.

Now that the weather has changed, I don't expect good ducting tonight.

According to the Hepburn Tropo prediction page
http://www.iprimus.ca/~hepburnw/tropo.html
things may be good anyway. If it's not raining, I'll set up again tonight.

This guy does a real good job predicting tropo ducting.

It's possible that the same display is used for other radios
that use FM. FM is not intended for use on the CB band,
but some folks do use it there. They do not use a regular CB
for this. You can't get FM on your AM/SSB radio because the guts of the
radio
is a very different beast indeed.
Although it might have been a good idea for the FCC to
to make use of FM on 27MHz. It would have prevented
"skip" and that would have made them happy.

Its used in the UK on their 11m band.

http://www.fact-index.com/c/cb/cb_radio_uk.html

> but some folks do use it there. They do not use a regular CB

Depending on the radio you may be able to use the steep side skirts of the
AM filter as a form of slope detector for FM. I've done it using an Icom
IC-706 ham rig. The problem is you have to be able to tune significantly off
the channel center frequency to put the signal center frequency on the skirt
of the AM filter. Normal unmodified CBs don't allow such frequency sliding.

No it would not have done so. I've heard enough 10m FM DX to know. Try
monitoring 29.600 MHz which is the Ham FM national calling frequency on FM.

http://www.qsl.net/g3xbm/10m.htm (look under 10m FM)

This sounds like a hot group, can I join?
>
From: BillyBoy (pajust4dad@yahoo.com)
Subject: Yahoo Group For Mature Bi Men Phila Area

A virtual home for a group of mature (40+) masculine BI men in the
Philadelphia area who are seeking friends for social and physical
intimacy.

Many of our members are married men, so privacy and discretion are
imperative. Senior bi men, retired or widowed bi men especially
encouraged to join and are very welcome.

This group is strictly for masculine "BI" men and is NOT open to
exclusively gay men or those that are "trans-gendered".

You must be 40 years old or older, BI and your Yahoo profile must
reflect your age.

To join visit:

> 73zzzzzz

DUDE.....you are clearly clueless! You have NO idea how things work, "SKIP" is skip...doesnt care what the modulation/deviation is PERIOD.(AM) broadcast band at night skips, Ham(FM) 10,6 and 2 meters skips during the day,Ham (SSB) skips on 80/75/40/30/20/17/15 Meter bands day and night. Television (VSB) skips during the day in the summertime.
The UK operators have FM service (for years) on the 26.965-27.405Mhz.
BTW..it's VERY easy to Phase modulate a AM CB rig to convert it to Narrow FM. Adding a FM detector to the receiver is also easy, so the "GUTS" are not all that differant. Interferance between FM radios is a lot less due to the needed "Capture Ratio" .
Quit handing out "Facts" until you know what your talking about Barry..you piss off the rest of us that DO know how radio works.

1247. Browning Eagle II or III

Newsgroup: rec.radio.cb

Hello All:

Looking for a Browning Eagle II or III with plenty of "Gink Gonk" when ya key the mic. Must be reasonable shape. Also need the manual to go with it.

Let me know.

Jay in the Mojave

I don't know who's more stupid. The 'alleged' guy who wrote this BS
by modifying a story that's been floating around as an insurance claim
letter from the 60's, or the people who actually believe it.

The only intelligent guy in the whole mess is the unknown comedian
from probably the 50's that started the whole thing as the 'farm accident'.

No! no! In Wal-Mart you take peanut butter and go into the bathroom and
smear a bit on some toilet paper. Then when someone comes into the
next stall you flick the paper under the wall, then say "Excuse me, sorry.
Would you mind just kicking that back over here please?"

The Robyn WV-23 was a Uniden based radio, and the meter was virtually
identical to what was carried forward on your TRC 452. So it should be
almost an identical fit. And you're right, the Cobra 77X is an
identical Uniden chassis to the TRC-452, so the meters are also
similar.

It started life as part of a speech given by Gerard Hoffnung to the
Oxford Union (a debating society) in 1958. It was recorded by the BBC
and is available on a CD. In the original the unfortunate man is a
bricklayer explaining to his boss why he is absent from work.

The only "one" who "could" say such things is you and the rest of the
N8WWM trouble-making crew of lids.
CB IS anonymous handles...here you go once again whining about cb.
In addition, ALL security experts, privacy advocates, and ISPs ALL
stress the need for privacy on the net.............don't get mad at
those who practice internet safety just because you continue to make
poor decisions regarding your own life and internet practices.

>Chad

Agreed,,,,,long distant driving is much more palatable when the dx is hopping. I haven't been to 19 in a while,,,,for us, this weekend was all vhf action, with the exception of a rapid fire dx session on channel 6 for about four minutes late Saturday afternoon. 26.285 USB was kicking up some good dx activity early Sunday morning.

I've done it with a regular CB. I just turn the clarifier to either edge. It isn't perfect, but quite understandable. My radio has a narrow receive bandwidth compared to some radios. I'm still using my TRC-451 (Cobra 146). Other radios I've done this with include a PC-122 (TRC-465). All stock. The last thing I want is my transmit frequency to change after spending good money on a PROPER tune-up to factory specs. No ruined clarifiers here. If I want to go off-frequency, I have a 2950. It's clarifier is also locked. It shifts in 100Hz increments. Why chop it up for a clarifier mod?

Is this a normal mobile rig or a useless handheld unit?

For a mobile radio, get a Wilson 1000. Don't complain that you hear engine noise in this radio when the motor is on. We know it's going to happen with this radio.

All my AM only units had motor noise problems. It went away when I got my first real CB, a PC-122 sideband unit. Since then, I've only used SSB units and no longer have engine noise problems. YMMV.

One of the reasons I have a barefoot rig. It doesn't take much to get out
around here if you are into local stuff. And trust me it is FLAT!!!
Weather plays an important role as does (I believe) crops in the ground.
(seems better with the corn and beans up, maybe because they are mostly
water).

> Agreed,,,,,long distant driving is much more palatable when the dx is

I even turned the 'ol XM off a few times to listen to the rants :)

> I haven't been to 19 in a while,,,,

I dual watch 19 as it's nice to know where the law is at and it's road
construction season here so sometimes you can hop off the I-state to avoid
delays. Comes in quite handy.

I just bought a log home out in the country in the middle of 3.5 acres of
flatland. I will start playing with sidebands then! Any base radio
reccommendations? Antenna's? I'm not gonna push mega power off the bat and
it has to be easy for the wife to use when I'm out on the grounds, etc. I
was kind of looking at the Cherokee CBS-1000, good/bad?

First, get a life. Second, without knowing the total amount of people taking the survey, 90% means nothing.

it, ya goof.

1290. small CB

Newsgroup: rec.radio.cb
Date: 2004-07-06 18:18:14 UTC
From: fs <d@comast.net>
Message-ID: <G1CGc.32875$a24.14494@attbi_s03>
Source record: 184100

Is there any good small CBs .
From what I have read the Midland sucks on receive, the
Magnum Is not as good as the bigger radios either.
Need good receive, good NB and ANL.
I wish Icom mabe a CB, then all the BIG SQUARE BOX cbs would go by by. All
the China CBs suck.
One just copyies the other mistakes and then puts bandaids all over them to
make them work.

1291. Why are Ham Radio ops So Cheap?

Newsgroup: rec.radio.cb
Date: 2004-07-06 20:48:41 UTC
From: Sammy Sampson <whose@sammsonsor.net>
Message-ID: <ccf35tiii0@pita.alt.net>
Source record: 184101

Why are ham radio operators so cheap?

CB ops will pay what a radio is worth, but hams always want
something for free. What makes hams different?

I go to a hamfest last month and see a radio I want. The guy wants
$650 for the transceiver. I figure it's worth $500, and I know who the
guy is. He has an excellent reputation at hamfests. After some haggling,
sure enough, I get it for$500. Just as we are closing the deal, a fat
filthy loud mouth ham steps up and says the radio is worth $200.
So the seller asks the ham how much he would buy it for , and the ham
says $100. I think the seller knew something, so he says OK sold,
for $100. The fat filthy loud mouth ham then walks away cursing
and stuffing his face with nachos.

So why are hams like this?

Oh BTW, the radio really is worth at least $500 and that is a very
fair price. I paid the guy $500 and got a fine radio. He even
threw in some accessories at no charge, a station clock and an
extra microphone.

Sammy

1292. Amateur Radio Newsline™ Report 1403 – July 2, 2004

Newsgroup: rec.radio.cb

**

BPL: SCORE ONE FOR THE GOOD GUYS

A major broadband-over-power line pilot test by Alliant Energy in Cedar Rapids,
Iowa is shut
down after local hams document the harmful interference and the Federal
Communications
Commission gets a formal complaint from the A-R-R-L. We get the details from
Amateur Radio
Newsline's Mark Abramowicz NT3V:

****

It took nearly three months to accomplish the mission, but amateurs in Cedar
Rapids - armed
with ample data and the muscle of the American Radio Relay League - convinced
Alliant to
prematurely halt their B-P-L test.

Jim Spencer, W0SR, first discovered the interference on his HF radio right
after Alliant
launched its B-P-L testing March 30.

Spencer, who quickly mobilized other Cedar Rapids hams to form a technical
committee,
says the interference was so severe that it wiped out his and others' ability
to use
their radios.

Spencer says the group worked with Alliant officials to try to resolve the
interference
and conducted several test measurements with the utility's cooperation.

Spencer tells Amateur Radio Newsline the group appealed to Alliant to shut down the system and stop the interference on several occasions. But it was clear the B-P-L industry was telling Alliant's managers something else.

"There's a lot of regulatory uncertainty here," Spencer explains. "And that what the hams were calling harmful interference - in my case S-9 signals, you know, every 1-plus kilohertz across the band, they were being told that wasn't really harmful.''

Spencer says communications between his technical group and Alliant officials were civil, but they accomplished little action. He says he and others filed complaints with the FCC.

"I think in 21 communications I received one simple response basically told me to go back to the power company - the operator of the system," Spencer says. "And, of course, I had done that all the time. So, we had been asking the utility company to close it down, we had been asking the FCC to help us and then the ARRL went and escalated that."

Wade Walstrom, W0EJ, is the ARRL's Midwest Division Director. He says the league's FCC complaint finally got the utility's attention.

"The thrust of the complaint was that they were now aware that the system was causing interference and didn't shut the system off so now that makes it willful interference," Walstrom said...

Alliant stopped the B-P-L pilot test on June 25 saying it had gathered the necessary data to make a determination on whether a general rollout of B-P-L would be worth pursuing, according to Spencer. He says Alliant's project leader told him the ARRL's FCC complaint was just one factor in the company's decision.

"Obviously we're happy, but we didn't feel like we had won," Spencer said. "We felt like this was a technical problem and that we tried to communicate some of the technical parameters to them and that they'd made a good business decision."

Spencer says an Alliant representative told him the company has no plans to pursue B-P-L at this time.

"In order to distribute it out to a sparsely-populated rural area with all the equipment it would take, it's not clear that this thing makes economic sense," Spencer says. "And that this really can meet the goals of the rural user which is
one of the things that people touted."

The ARRL's Walstrom is cautiously optimistic Alliant's decision might have a ripple
effect.

"We would hope that other utilities or other organizations that were looking to

possibly use B-P-L as a source of revenue will look and see the decision that Alliant
has made and re-think their own plans and hopefully decide that maybe there are other
ways to provide broadband internet connections to the population as a whole," Walstrom says.

Walstrom says the Cedar Rapids group led by Spencer has set a precedent.

"All the proof on how well it's going to work isn't there yet," Walstrom says.

"And the proof that we have established here in Cedar Rapids and is coming out from other parts of the country is that it's not an interference-free system by

any means and in fact it causes a lot of interference and we've documented that here."

Spencer says his committee, consisting of a group of engineers - most of them retired from Rockwell Collins - stuck strictly to technical evidence in communications
with Alliant. But he says its clear B-P-L has taken on a very political tone.

"Obviously the problem has got a lot of political implications, but the thing that
hams can do is remain professional and keep it primarily on a technical level," Spencer says.

The ARRL's Walstrom says if he could stand before the FCC panel to make his case,
he would strongly urge the commissioners to postpone action on or even walk away from B-P-L.

"I think they need to delay it until they're satisfied that they're able to mitigate any
interference problems at all and by mitigate from an amateur radio standpoint that really
means eliminate," Walstrom says.

Spencer adds, there are no hard feelings toward Alliant. Spencer says he and members of
his technical group still have a good, working relationship with the utility.

"We've had quite a bit of communication back and forth through this whole thing," Spencer
says. "I mean I've had many, many e-mails and some phone calls and I would say that it
was pretty positive and still is."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

****

In addition to operations in Cedar Rapids, Alliant also provides utility services to
customers in sections of Minnesota and Wisconsin, and a small strip of northwestern Illinois

(W0SR, ARRL)

**

HAM RADIO IN SPACE: ECHO IS UP AND RUNNING

The newest Amateur Radio satellite is now in orbit and doing fine. Chuck Green, N0ADI,
reported by phone from the Baikonur Cosmodrome that the launch of AMSAT Echo and the
other satellites occurred on time on June 29th at 0630 UTC. He watched the rocket climb
out and said it appeared to be flying straight and true. A second phone call from Chuck
18 minutes later confirmed that the launch carrying AMSAT OSCAR Echo was successful and
that all spacecraft had separated successfully.

Chuck was assisted in the final integration and checkout process at Baikonur by the team
from SpaceQuest which included Dr. Dino Lorenzini KC4YMG, Mark Kanawati N4TPY, and Lyle
Johnson KK7P. The SpaceQuest team members are also AMSAT members and volunteers.

First contact with Echo was at 1452 UTC on June 29th. After collecting a bit of TLM the
435.150 MHz transmitter was turned off at 1500 UTC. The preliminary keps were observed
to be pretty close. The first look at Echo’s telemetry shows things are looking good.
The battery was fully charged and the panels were delivering about 950 ma, which is fine.
The panels were supporting the transmitter power adequately at about 2.3W output. The
bird appeared to be tumbling as expected. Internal temperatures are around 10 degrees
Celsius which is also as expected.

On the second pass the loading of software began and good progress was made.

Telemetry continues to look very good. While fades clearly indicated Echo continues to
tumble (as expected), at 2.2 Watts output good bits were received without difficulty.
Rather than turn the transmitter off at the end of that pass, based on a very good
looking power system, the power was turned down to about 0.3 Watts.

The hour between passes was spent closely examining the captured telemetry and comparing
it to pre-launch testing, as well as tweaking the keps a bit.

During the second set of passes approximately twelve hours later, the command team
finished loading the housekeeping software. The housekeeping task is up and running
as of June 30th at 0525 UTC. With more data available on the power systems performance
the transmitter has now been left at about 1.2W.

The morning passes on June 30th concentrated on gathering telemetry. The evening passes
continued with checkout activities.

A telemetry decode program, TLMEcho, is available for those who would like to view and
report data from Echo. It may be downloaded from AMSAT.ORG in the Echo project area,
http://www.amsat.org/amsat-new/echo/

If you record telemetry please send the CSV files to ke4azn@amsat.org.

Please do not transmit to Echo until checkout and commissioning has been completed and
the satellite is made available for general use. Unexpected uplinks may cause delays
in verifying the proper operation of ECHO and delay the opening of the transponders to
general use.

(AMSAT, WD0E)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin
stations around the world including the N7SKO repeater serving Arizona, California and Nevada.

**

WITH NEWSLINE: SEND US YOUR ID - PLEASE

Would you like to ID your own repeater or bulletin station here on Amateur Radio
Newsline? Well here is how you can do it. Record the following sentence and include
the call sign and location you want to honor.

From the United States of America, we are the Amateur Radio Newsline, heard on bulletin
stations around the world including the xxx repeater serving yyy zzz. The xxx is the
call sign. The yyy and zzz are the city and state.

Then, take the tape and mail it to Amateur Radio Newsline, Editorial Office, 28197
Robin Avenue, Santa Clarita, California, 91350. As time permits, we will select an
audio I-D and include it in the newscast.

All tapes submitted become the property of the Amateur Radio Newsline and cannot be
returned. Again, the address to make yourself a part of this bulletin service is
Amateur Radio Newsline, Editorial Office, 28197 Robin Avenue, Santa Clarita,
California, 91350.

**

RESCUE RADIO: VA HOSPITALS SAY YES TO HAM RADIO

Hospitals in Roanoke, Virginia, will soon be ham radio equipped. Mike Knight, K4IJ,
reports through the Repeater Journal that a budget of twenty-five thousand dollars has
been approved for the installation of Amateur stations at between ten and twelve primary
healthcare facilities in the Roanoke area.

Knight says that the system will include a dual band base radio, a mobile radio, a power
supply, antennas and full lightning protection at each hospital. Also going on-line will
be a pair of commercial grade FM voice repeaters with back-up generators, and a dedicated
digital repeater. The voice systems will have IRLP and Echolink tie-ins to communicate
outside the local area.

When completed, the Roanoke system will consist of five to six linked repeaters. The
base stations will be connected to each hospitals emergency power system to keep them on the air.

(Repeater Journal)

**

RADIO LAW: COURT SAYS NO TO EXPANDED MEDIA OWNERSHIP

A U.S. Court of Appeals in Philadelphia has thrown out most of the Federal Communications
Commission's new and controversial media ownership deregulation. Its Thursday, June 24th
decision means that for the time being, ownership levels of broadcast properties and
related media will remain at current levels.

Back on June 2nd of 2003, the FCC's Republican majority voted to dramatically ease a
prohibition barring daily newspapers from buying broadcast stations in their markets.
The agency lifted caps limiting how many radio and TV stations a broadcaster could own
in the same area.

But in its 2 to 1 decision the Philadelphia court said that while some relaxation of the
ownership limits might be reasonable, the agency had failed to adequately justify the
limits it had put in place. The court announced that its original stay on the FCC's media
ownership deregulation would continue until the agency fixes the regulations to the court's
liking.

(TV Week)

**

ENFORCEMENT: TOO MUCH MORSE CODE

The FCC is asking a Missouri ham why he is running a Morse code training program smack in
the middle of the 40 meter band. The target of the inquiry is Paul D. Westcott, KC0OAB of
Purdy who apparently has code practice on the air around the clock.

Its June 21st letter to Westcott notes that the agency had previously discussed this matter
with KC0OAB and was given assurances that the transmissions he was making were for Morse
Code practice. Since that time the agency has received another complaint which alleges
that the purported 40 meter code practice transmissions are 24 hours a day, seven days per
week. The FCC says that due to the crowded nature of the 40 Meter Band, it is extremely

inconsiderate to take up spectrum in that area for transmissions 24 hours a day. This,
even if it is purportedly for “code practice” purposes.

The agency has posed several questions to Westcott to explain his operation and was given
20 days from the date of the FCC letter to provide a very detailed response.

**

ENFORCEMENT: NO LICENSE - DON’T OPERATE

The town of Reseda, California, is only about 10 miles from the Newsline studio. It’s
also the place where the FCC alleges that someone has been operating a ham radio transmitter
without the benefit of being a licensed ham.

In a letter to a resident identified as Joseph A. Mosbergen, the FCC says that he or someone
in his residence has been operating radio-transmitting equipment on several Los Angeles area
Two Meter Amateur Radio repeaters. The agency warns Mosbergen that this is a violation of
it rules and will subject him or whoever is proven to be operating to punitive action.
This could include a fine or imprisonment, as well as seizure of any non-certified radio
transmitting equipment. It also tells Mosbergern that this is the last warning that he
will receive.

**

HAM RADIO BUSINESS: HEIL TO MARKET CLEAR SPEECH SPEAKER

Turning to the ham radio business scene, word that the NCT Group has appointed Heil Sound
Limited as its prime worldwide manufacturer and distributor of the Clear Speech Speaker
system. Under the terms of the deal, Heil Sound will distribute Clear Speech speakers to
their present amateur radio dealers and commercial broadcast distributors. Also, the
Clear Speech speaker will be improved and several new products will be brought to the market
using the NCT Group technologies. According to Heil Sound these new product models are in
development and will be available for market by the end of July. More is on line at
www.heilsound.com

**

COMMUNICATIOS NEWS: DUAL-CORE PROCESSORS ON THE WAY

Tech News reports that Advanced Micro Devices plans to begin selling microchips with
the equivalent of two microprocessors in one next year. The Sunnyvale, California based
company said it plans to offer dual-core processors for data-serving business computers
in the middle of next year, and for high-end home computers in the second half of next year.

Dual-core technology combines the power of two processors in one package. This permits
the creation of a more powerful computer and increased computation power when multitasking.

Last month, Intel said it would bring dual-core chips to the marketplace in 2005. That’s
more than a year ahead of schedule.

**

HAM RADIO BUSINESS: CW IS GOING STRONG

If you think Morse code is on its way out, the ham radio business community probably
disagrees with you. At least that’s the impression one gets thumbing through the articles
in the July issue of CQ Magazine.

Not only are the ads for Morse related products holding steady, but the new products area
has some reviews of the latest CW related products. And not to be outdone, Dave Ingram,
K4TWJ, devotes his World of Ideas column to Morse Keys from around the world.

If you are a Morse lover, this is the CQ edition for you. It’s on your newsstand now.
More information is on the web at www.cq-amateur-radio.com.

**

THE SOCIAL SCENE: COME TO THE TENNESSEE HAM BREAKFAST

On the ham radio social scene, the Middle Tennessee Ham Breakfast takes place at the
famed Tennessean Truckstop on the second Saturday of every month. People begin to
gather there at about 9 a.m. and it’s billed as a chance to meet the middle Tennessee
hams you may have contacted on the air.

Interested in attending? For full information simply send a note to kenbreed@surfmore.net
or call Ken, AI4DV at area code 931 – 424 – 9523 during normal business

hours.

(Do Not Read: Repeater Journal)

**

THE SOCIAL SCENE: ROANOKE VA. IN JULY

And still in the South, mark down July 31st to attend the annual Roanoke Hamfest.
This event is sponsored by the Roanoke Valley Amateur Radio Club and will be held at
William Byrd High School in Vinton, Virginia starting at 8 a.m. local time. Full
information on this friendly event is on line at w4ca.host4www.com

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America,
We are the Amateur Radio Newsline with links to the world from our only official
website at www.arnewsline.org and being relayed by the volunteer services of the
following radio amateur:

**

COLOR TV IS CELEBRATING ITS 50TH ANNIVERSARY THIS YEAR

Now for a bit of a history lesson. Although color TV transmissions were in the

development stages many years earlier, the broadcast industry is celebrating its
half century mark this year. This is because it was 50 years ago that color broadcasts
were initially
made available to the public.

Now, National Public Radio has posted a story and some interesting historical resources
at its website. It is very interesting reading. That URL is in this week’s printed
Amateur Radio Newsline report.

(www.npr.org/features/feature.php?wfId=1789944 (CGC))

**

EMERGING TECHNOLOGY: NEW DVD PLAYER FILTERS OUT BAD WORDS

Wal-Mart is selling the world's first DVD player that can seamlessly skip over violence,

swearing, nudity and other potentially offensive movie content. The $79 unit features
technology by ClearPlay and is manufactured by Thomson Inc. under its RCA brand.

The DVD player is the latest development in a legal battle between the Salt Lake City-based
software company and Hollywood. Members of the Directors Guild of America filed suit
against ClearPlay in September 2002, when the filtering product was available as a
computer program claiming it impinges on intellectual and creative rights. Those legal
proceedings are still under way in Colorado's 10th District Court. Both sides currently
are waiting for a ruling on a summary judgment filed by ClearPlay.

**

WORLDBEAT - SLOVAKIA: FIRST CELLPHONE VIRUS ANNOUNCED

On the international scene word that a group of underground virus writers have announced
what is believed to be the world's first worm that can spread on advanced mobile phones.
According to news reports, the worm named Cabir, was sent to security software firms in
the United States and Russia by a member of 29a.

29a is described as a group of virus writers from the Czech Republic and Slovakia who
pride themselves in creating proof of concept malicious viruses. Thankfully, Cabir has
been found to have no damaging code attached that might destroy files or execute other
harmful operations.

**

WORLDBEAT – UK: RSGB QSL BUREAU CHANGE

On a more positive note, word that Marc Litchman, G0TOC is the new RSGB QSL Bureau
Sub-Manager for the G7AAA through G7ZZZ series of callsigns. Litchman can be reached at
26 Oak Tree Close, Loughton, Essex IG10 2RE, in the U-K.

**

WORLDBEAT – NEW ZEALAND: ZL1AN HONORED FOR EDUCATIONAL WORK

And a word of congratulations to New Zealand’s Dr. Gary Bold, ZL1AN. Bold is a physics
lecturer at the University of Auckland and he has been awarded the Prime

Ministers
Supreme Prize based in part on his 43 years of dedication to teaching.

Bold has taught every course in the physics department, all courses in geophysics signal
processing and network theory. He has also devised and revised experiments and designed
the curriculum for many second and third year physics courses. A dedicated C-W enthusiast,
in his spare time he writes the NZART Break-In Magazine column "The Morseman."

The presentation was made at the recent 2004 Tertiary Teaching Excellence Awards.
ZL1AN was one of 12 academics from nine institutions presented with awards, each of which
brings with it a $30,000 prize.

**

DX

In D-X, word that several O-H prefix operators will be operational from Aland Island as
OH0I during the CQ Magazine and RTTY Journal RTTY DX Contest. This, from September 25th
to the 26th. They will operate as a Multi class 2 entry using multiple beams and vertical arrays on the low bands. QSL via OH3BHL.

And keep an ear open in September for RA3AMG from Cyprus. He will also be active in the
same contest signing P3B. QSL via his home callsign.

Lastly, ST2DX will be active from the Sudan until the 10th of July. Look for him mainly
on SSB, with some CW, on all bands between 30 and 6 meters. QSL this one as directed on the air.

**

THAT FINAL ITEM – HAMMIN’ OLDIES ON WBCQ

And finally this week… who says hams and short wave listeners are nothing but a bunch of
stuffy old geezers?

The Peacock Project is a group of Internet broadcasters that have banded together to
present a variety of music eras, styles and talk over WBCQ on Saturday nights at 8PM
Eastern time, which is Midnight Universal Time, Sunday. Named in tribute to one of their
group, Rob Peacock, who suddenly passed away in January, the show features a different
host each week with a program that is unique to his own musical preference and

personal
presentation.

The first weekend of every month will feature Dave Kirby's look back at
Old Time
Radio and some non-English language versions of American songs. The second
weekend is
The Voice of Savage Henry, a 1960's and 70's "Garage Band" rock show hosted by
Steve Evanchuck,
KG8KO. Tim Gaynor is heard directly from Australia on the 3rd week and the 4th
week is S
teve Coletti, aka “Big Steve Cole”. Four times a year there is a 5th
Saturday to the month
and on those weekends it is time for "Hollow-State Hound", a show scheduled to
feature
big band music with Mike "The DX Hound".

The broadcasters got together in an odd way, and going on WBCQ's 7415
kHz frequency
is like going home to where it all started. A few years ago there was a group
of ham radio
operators who were also listeners to shortwave broadcasters and utility
stations. Under the
umbrella organization of the Association Of North American Radio Clubs,
(ANARC), they would
join into a ham traffic net every Sunday morning on 7240 kHz to compare their
station
loggings. While the net still has a lot of good memories for those who joined
in or only
listened in, the group eventually disbanded. The net then moved to an Internet
Relay
Chat channel that was already in existence.
To a few die hard members like Dave Kirby, N1DK, the discontinuance of
the radio
net was only a minor setback. Dave began doing weekly reports by way of the
Cyber
Shortwave real audio file that was available for download by anyone. It was at
the suggestion
of member Pete Costello that Dave began doing his presentations as a live
interactive program
by way of sending sound via live365.com and receiving typed comments back from
listeners via
the IRC chat channel.

As loggings and SWL news tapered off, Dave began doing more music and
off topic bantering.
This led the powers that be at the chat room to ask Dave to create his own chat
room for the show.
The kick in the butt turned out to be a blessing as now the door was opened for
others who wanted
to do interactive radio using Dave's chat room

We hope that you will enjoy the diversity of programming that these enterprising hams and
SWLs have created. The Peacock Project begins July 3rd on WBCQ at 7415 kHz and your fellow
broadcasters, hams and SWLs at the Amateur Radio Newsline wish you the best.

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the
Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all

1293. Re: Why are Ham Radio ops So Cheap?

Newsgroup: rec.radio.cb
Date: 2004-07-06 21:21:50 UTC
From: fs <d@comast.net>
Message-ID: <OJEGc.34232$%_6.15143@attbi_s01>
Source record: 184103

It depends on what it is.
In building a repeater a Ham will try to find a cheap old radio used two way
to save cost that will cause problems later, and then put a $1000.00
controller on it hooking it up with wirenuts, adds a fan to the final held
in place using wireties, go figure that one out.

This is NOT a flame. I've been told by MANY people and specifically by Bill Good (when he was alive) to RUN AWAY from this radio! If it was such a great design, why was it discontinued so soon after coming out? Buyer Beware, but I'd RUN! My understanding is that the problems are MANY! Its not just one thing.

I will say that it sure looks good though!

1309. CB REPAIR & MODIFICATION BOOKS AT 40% OFF

Newsgroup: rec.radio.cb
Date: 2004-07-07 04:21:43 UTC
From: Lou Franklin <lou@cbcintl.com>
Message-ID: <miume05gfesi561ienfhtldjv7nso5kq90@4ax.com>
Source record: 184119

To learn the technical TRUTH about CB Radio without all the hype from people who are just plain ignorant, check out the following books from CBC International. They're selling right now at a big discounts on our EBAY & AMAZON stores too.

Check it out!

To see exactly what these books look like, plus all the specific, chapter-by-chapter details, see our Web at:

www.cbcintl.com

Some of the books included are:

BOOK #1: THE "SCREWDRIVER EXPERT'S" GUIDE To Peaking Out & Repairing CB Radios. List $25. The most popular "big dummy's" guide ever published on do-it-yourself CB repairs & modifications. Covers peaking of receivers, transmitters, modulation, mike problems, antenna & SWR problems, detailed frequency modifications for both crystal & PLL radios. Loaded with charts, illustrations, and specific instructions for most brands including the new export models. This latest edition also covers slider and broadbanding tricks, FM conversions, and much more!

BOOK #2: THE CB PLL DATA BOOK. List $20. The only complete reference source on CB PLL synthesizer circuits ever published! Detailed PLL theory explained in layman's terms. How they work, and how to modify them for many more channels. Includes specific PLL block mixing diagrams, truth charts, & IC pin function diagrams for nearly every PLL chip ever used. Covers all the most popular U.S. & export chassis, with specific listings of all models using the chip.

BOOK #3: UNDERSTANDING & REPAIRING CB RADIOS. List $42. Giant 370-page technical book for the professional repairman. Picks up where the "SCREWDRIVER EXPERT'S" GUIDE leaves off. Includes circuit descriptions & troubleshooting guide for 23- & 40-Ch., crystal & PLL, solid-state & tube, AM, FM, SSB, CW, American & export models. Covers test equipment (& where to find it), transistor basics, synthesizers, receivers, transmitters, power supplies, T/R switching, antennas, interference, parts & accessory sources. Over 350 illustrations including schematics, charts, and photos. Huge subject index also lets you look up repairs by symptoms. This is "must" reading for any serious CB technician!

For details on our Galaxy-Ranger Service Manual (2nd Ed.) go to:

www.cbcintl.com/galaxy.htm

SAVE MONEY! We regularly run EBAY auctions in which you can save up to
HALF the cost of our most popular CB books and accessories. To see

FREE!!

For advanced techs and serious radio hobbyists, we're now offering a FREE copy of our previously published "CB EPROM DATA BOOK" by Martin Pickering. (EPROM = Erasable Programmable Read Only Memory.) We sold it for many years but it's now out of print. This little manual of 60 illustrated pages is an absolute GEM of CB technical knowledge you'll just never find anywhere else. And it's yours for FREE from our Web site.

This book reveals the secrets of advanced channel programming, and picks up where our "CB PLL DATA BOOK" (www.cbcintl.com/pllbook.htm) leaves off. You'll get a thorough background in how these amazing programmable chips can be used to modify many popular CB PLL circuits for expanded frequency coverage. Covers the basic programming techniques, and even includes real PC board artwork for making EPROM circuits. Sample artwork includes EPROM boards for the popular MB8719, PLL02A, ï¿½PD2824, and ï¿½PD858 PLL circuits.

Best of all, the price is right! Download your FREE copy of "THE CB EPROM DATA BOOK" (948 KB Adobe PDF) at:

www.cbcintl.com/docs/EpromBook.htm

Don't forget to check out all our other CB specialty books, plans, kits, & high-performance accessories at:

www.cbcintl.com

I find it just a bit hypocritical for someone to have the unmitigated gaul to complain about anonymous posters who use resenders, while they, themselves, hide behind a fake name. As long as someone conceals their identity, they cannot be held accountable for their actions. Therefore the things that they do and the ideas that they put forth are already suspect, and lack the same credibility as the same ideas coming from someone who's identity is easily verifiable.

Only the gutless hide from the truth.

Hello Train:

How yall doing there?

Yeah there are great radios. I am not a Browning Fan either, but I am setting up a station for a friend. Putting up one of my Interceptor 10K Antennas, and this guy has a commercial telescoping mast that goes to 55 feet, so that will work out great. He is some kind of Attorney I guess. He dress's in a suite and drives something else than a old truck. That was active in the radio stuff back in the 70's.

I fixed a Mark IV once, ... never again.

I was fond of the General Radiotelephone Super MC-11A, we called them Junky Generals. I still drive by the old factory building there on Holly wood Way, in Burbank. Ah the memories of having to get the ol mans radio fixed before he got home from work, when I was a kid.

I have a old Mustang 100, a old relick 100 watt linear amplifier, that the techs working at General made in thier garages. It has a transistorized high voltage power supply, and a pair of the 15 or 20 watt smaller sweep tubes in it. Its uses a GE-47 Light Bulb as the output level indicator that you would adjust the Tune and Load to for maximum brightness. Man I wish I had a dime for everytime I blew that amp up, hehehehe.

I always liked the look of the General Radiotelephone SB-72, their version of a SSB and AM Radio. Talking to Bob, I guess they had problems with them working, even at the factory. I have the service manual on the General Radiotelephone SB-72 if any one is interested. Very rare.

The D-201A yeah are great radios. I have never played with any of the Stoner radios tho. I know Woody likes them.

Here's a few Neat-Oh sites for the older radios and stuff:

http://www.cbgazette.com/gaz2.html
http://members.aol.com/radiokbob/
http://www.browninglabsinc.com/
http://www.retrocom.com/
http://www.angelfire.com/ok/funwithunclejim/

And of course these great old time radio web sites have other links that they list, so you could be busy here for hours going thru all the neat sites.

Maybe we should post what out favorite old radio was????

BULLSHIT! I've known many a cheap CB bastard over the years! everyone has the same interest: getting what they can for as cheap as they can. I have yet to find a true CB radio younger than 15 years thats worth the money charged for it! Converted ham rigs OTOH are a different story.

been there, heard that, and half the time, it was a fat fuck of a CB operator doing most of the stuffing of the mouth with whatever fast food came to hand, and spilling drivel all over the lot where the fest was at (at least here in Phoenix). Sure, some hams are guilty of this as well, but I have yet to hear one locally doing that recently.

>

what was the radio? if it was anything the likes of a kenwood, yeasu, icom or the like, I'd say yeah.

Anonymous Sender's are lower than a snakes belly.
-
One could say the same thing about fictitious
"handles". They are just as anonymous.
Dave
"Sandbagger
-
The only "one" who "could" say such things is you and the rest of the N8WWM trouble-making crew of lids.
CB IS anonymous handles...here you go once again whining about cb. In addition, ALL security experts, privacy advocates, and ISPs ALL stress the need for privacy on the net.............don't get mad at those who practice internet safety just because you continue to make poor decisions regarding your own life and internet practices.

_
>I find it just a bit hypocritical

What you "find", think, feel, and believe is irrelevant. You have effectively demonstrated your views as extremely radical and fascist. Such views are shared by the minority, the troublemakers among us, of who you have defended on many occasion.

>for someone to

>have the unmitigated gaul to complain about

>anonymous posters who use resenders, while

>they, themselves, hide behind a fake name.

And just who are you attacking now, Davie?
Who complained about anonymous posters that you are accusing of using resenders?

>As long as someone conceals their identity,

>they cannot be held accountable for their

>actions.

Pure ignorance. If one breaks the law, the isp will give one up faster
than you reduce yourself with attacks on those with opposing views that
differ from your own.

> Therefore the things that they do and the

>ideas that they put forth are already suspect,

Again, the fact that you openly disagree with ALL security experts and
isp's concerning identity protection illustrates your problems and level
of intellect concerning the net,,identity theft is at an all-time high,
and as an often-imitated-never-duplicated popular caricature, it is
clear your yearning for others identities are nefarious, as real-world
id's are irrelevant on cb and in this forum.
Do not blame the rest of the enlightened world who follow security
protocol in protecting their id and who failed to make the same ignorant
mistake you did that trashed your name and reputation.
After all these years, you are still kicking yourself in the ass for
your huge self-inflicted wounds, yet you continue to attack others for
protecting what you failed to protect.

>and lack the same credibility as the same

>ideas coming from someone who's identity is

>easily verifiable.

>Only the gutless hide from the truth.

>Dave

>"Sandbagger"

Only those severely obsesses with others id's for nefarious purposes
would equate following
internet, worldwide, accepted security protocol
with "hiding", but then again, that is exactly what most educated people
do, Davie, they HIDE their personal identities from internet kooks like
yourself who want nothing more than personal informaiton and identities
of internet personalities.

Can be confusing for the wife to operate if she's not into radio, unless she don't have to mess with any of the dials or buttons. The CBS isn't the heartiest of radios,,.not recommended for peaking (heat sink is too small) but conversion is fine. I'd get a Washington or new Galaxy for strictly cb and if you're not a hammie and want expanded capacity, I'd look at an export. It's very cost effective.

Lucky you,,,,right on!

Right place, Right time. It's pretty cool, just what I wanted.

>I will start playing with sidebands then! Any

>base radio reccommendations?

For strictly cb, that new FCC approved Galaxy rig is pretty strong.

And sexy! Can the channels be opened up easily like on the CBS1000? As
opposed to buying the export. If it's that new there may not be as much
tech info on it yet, time will tell.

>Antenna's?

I like metal opposed to fiberglass. The higher the better. Of course,
for practicality you can go with a fiberglass stick like an Antron and
stick it way high in tree, if possible.

Lots of trees! and the house is tall and on a hill. Height shouldn't be a
problem, Lightning on the other hand.......

Can be confusing for the wife to operate if she's not into radio, unless
she don't have to mess with any of the dials or buttons.

She's pretty technically savy, I got lucky there too! I guess I was looking
to say non intimidating rather than easy.

The CBS isn't
the heartiest of radios,,.not recommended for peaking (heat sink is too
small) but conversion is fine.

Could always re sink it or even upgrade the pill, I like the ease of
modification :)

I'd get a Washington or new Galaxy for
strictly cb and if you're not a hammie and want expanded capacity, I'd
look at an export. It's very cost effective.

Will do! Thank you for your time, I appreciate it. I've been into mobile
and hven't looked into home rigs.

Best
Chad

Hey braniac, make up your mind which side your on. An anti link, and then
one promoting freebanding.
Take to many of your meds, or are you drunk again?

> I also have a lil wil antenna. What range to you think I should expect with it.

On AM? Not much. I guess 2 or 3 miles to a mobile, 5 or 10 to a base, IF THE SKIP ISN'T RUNNING! Lately, it's been noisy as hell. I get full scale on 19 in the mobile. I use a Firestik KW-7. It's big. It works. It's bolted to the metal bumper. Very directional where it's mounted, but great for DX on 36 to 40 sideband. Just point and shoot!!! The little 2x455 box doesn't hurt either. About a 25 watt dead key.

Sideband uses half the bandwidth of AM. Figure on a 6db improvement.

This works out to a 200% improvement.

Sorry to piggy-back my own post.. if you're new to SSB, listen for
awhile before you transmit, it's different from AM. Handles are not
used, or breaker or..etc

Also, ch 36 and up is where ssb should be used.

(are there still people using ch 16?)

PKB much lamer?

>
>wtf is a torll, rat-fuck?

Ahh, the spelling lame. The last great resort of the truly pathetic.
So now you join the ranks of the 'Tard. How happy you must be. Ranked
up there with the lamest of the lame.

Just admit it, your still pissed because you were spanked so long and
so hard about trying to find out inside customer info from a NSP that
your ass is still hurting. What's it been 6 months at least and you
still pop back in here to lame away. You really should learn to take
your spankings like the lamer you are and just accept the fact you
are, well, lame.

Hope you don't mind about the restore, I like continuity when I spank
my pet lamers.

So why don't we xpost to a few of your favorite groups there steve so
people can really get to know the truly lame side of steveo the poser.

'Ratz

Been there done that. I used to work for a local computer repair shop
here in Columbus Ohio and one day I happen to be replacing a
deflection board (as I had done many times before) in a Apple 19"
monitor and I forgot to discharge the CRT before unplugging it. I
believe my heart stopped beating for a few seconds. Needless to say
from that day forward, I always remembered to discharge the CRT tube.

LOL, such information is known by quite a few people but Steve is not
smart enough to find it nor tough enough to intimidate someone to give
it to him. He is just being whiny because of a serious ass pounding he
took some months back. So he comes though a.b.n-s-c lames away for a
while then runs off and sulks again.

I just tossed a couple xposts in figuring anyone this lame has to have
annoyed a lot of people so why not let them in on the fun too.

I had a mag mount lil wil paired up with my Cobra 29 WX ST and I got
about 1.5 - 2.5 miles on a good day. It didn't matter if I put that
bad boy directly in the center of my roof or on the trunk. Partly do
to the cheap China made radio, and partly do to a short antenna.

I'd recommend placing the antenna in the middle of your roof. You'll
have better chances of getting out better.

Patrick

>MERCY! there cotton-picker! you just DONT want to break protocol on them
sacred SSB channels!. You might get labled a "Misfit" and not invited to any
of the "Coffee-breaks"..
So get with the program..be "Wall to wall and tree-top tall" but DONT break
the fuckin "Protocol".

You ***MUST*** change that "Handle" for a "First Personal" (WHatever the
fuck THAT is). And "Breaker" is a bad,filty,dont you EVER say that on SSB!
type of utterance. You better just say "Unit buttfuck is on the side"..
Protocol on CB.......HAHAHAHA....righty-O!

If you violate this law......Steveo will drop an old 361 Engine block (not
to be confused with a 318/340/360 or 383) on your doorstep (Kinda like a
horses head) as a reminder....

1352. Re: Noise in '92 Grand Voyager

Newsgroup: rec.radio.cb
Date: 2004-07-08 06:13:06 UTC
From: Chris <spadfly@earthlink.net>
Message-ID: <SB5Hc.8765$R36.3351@newsread2.news.pas.earthlink.net>
Source record: 184162

The noise was from the transmission control module. I solved it with a 150pf capacitor between the 12 V supply line of the TCM and ground. The capacitance and length of wire were both critical.

Chris
"Chris" <spadfly@earthlink.net> wrote in message
news:d52Dc.13682$w07.8616@newsread2.news.pas.earthlink.net...
| I just installed a CB radio in a 92 Plymouth Grand Voyager. All went
smoothe
| except for one thing. There is something in the van causing a great deal
of
| noise in the receive on certain channels. It sounds like a constant
| mid-frequency tone. It comes on when the ignition switch is turned on but
| remains on for 15 minutes or so after the switch is turned back off. When
I
| listen under the hood, I can hear a faint noise from something electronic
| there. It is the same pitch as what I hear in the CB. When that noise
quits,
| the CB noise quits. Could it be the fuel pump or injectors? Someone please
| help me locate the source of this noise. If I know what it is, I can deal
| with it better.
|
| Thanks,
| Chris

It's so easy to forget or overlook something, everyone makes mistakes. This
is why it is always best not to work alone on high voltage electronics or
electrics. That extra person could save your life, as long as all the
engineers know life saving techniques.

I think you will find that Lou Franklin now offers free PDF downloads of
some of his books from his site.
You could also take a look at my two sites below. Both are purely
information sites, all for free.

You gotta be kiddding... I think it's hilarious.

Comparing Twisty to Sadam and the Devil... it's just too funny.
And the poll... the wording of some of the choices is quite funny, but not as funny as some of the results.

How much have you spent on radio gear?
$1000 or more: 79%

What do you think about the FCC?
I think they suck and I defy them to come get me: 36%

What kind of radio do you operate?
10 meter radio modded to transmit all over hell: 36%

All over hell? That will be so they can talk to Twisty :-)

Do you plan on getting a ham license?
I am already a ham: 60%

Surely not, such a "law breaking" mentality among Hams?

And, my favourite...

What should be done with Twistedhed once he is brought to justice?
I like Twistedhed. He should remain free: 38%
Nothing: 19%
Flogged: 14%

Those of you who have not voted should go and place your vote now.
Twisty for president.

Regards,

Peter.

The site is on free Geocities space. What is there to "sponsor", when it
costs nothing?

Maybe what he means is that they paid to have their ads shown on a
Website... that does NOT mean that they agree with or even know what is on
the Website.
All they care about is sales and promotion.

Don't take the site too seriously, it's too funny for that.
If it really is meant as a serious site, then it's just sad that some people
are that stupid.

No, it has to be an attempt at humour.

Regards,

Peter.

Stevey my little spanktard, you just keep getting lamer and lamer. No
wonder you feel a need to defend the 'Tard. You get any lamer and you
will replace the 'Tard the lamest neuron challenged poser on usenet.

So now you are claiming I am following you around? Gee, who was it
started this thread? Was not me, but then you probably overheated your
two working brain cells just coming up with that oh so *original*
response, so it dropped out of what little mental storage you have.

So you never did tell us (TINU), does your ass still hurt from your
last spanking? Did you ever find out that information you were
demanding from the NSP? You know the internal information you were
sure they just had to give you because your ISP might be signing on as
a customer. How many times did you have to be told it was private
internal info and they would not tell you? Seem to remember at least
10 or 15 times. Then you got in a childish snit called everyone *mean
names* and went off and to sulk somewhere else.

You are not very good at this, especially when I spank your ass
around. I would advise you try people of your own two digit IQ level
but there are so few on usenet that I am sure you would have a
difficult time finding them.

'Ratz

news:8518-40EC21AC-224@storefull-3254.bay.webtv.net...
I just bought a log home out in the country in
the middle of 3.5 acres of flatland.

Lucky you,,,,right on!

Right place, Right time. It's pretty cool, just what I wanted.
I will start playing with sidebands then! Any
base radio reccommendations?

For strictly cb, that new FCC approved Galaxy rig is pretty strong.

And sexy! Can the channels be opened up easily like on the CBS1000? As
opposed to buying the export. If it's that new there may not be as much
tech info on it yet, time will tell.
Antenna's?

I like metal opposed to fiberglass. The higher the better. Of course,
for practicality you can go with a fiberglass stick like an Antron and
stick it way high in tree, if possible.

Lots of trees! and the house is tall and on a hill. Height shouldn't be
a problem, Lightning on the other hand.......

Can be confusing for the wife to operate if she's not into radio, unless
she don't have to mess with any of the dials or buttons.

She's pretty technically savy, I got lucky there
too! I guess I was looking to say non intimidating rather than easy.

The CBS isn't
the heartiest of radios,,.not recommended for peaking (heat sink is too
small) but conversion is fine.

Could always re sink it or even upgrade the pill, I like the ease of
modification :)

I'd get a Washington or new Galaxy for
strictly cb and if you're not a hammie and want expanded capacity, I'd
look at an export. It's very cost effective.

Will do! Thank you for your time, I appreciate it. I've been into mobile
and hven't looked into home rigs.
Best
Chad

–

Hey Chad! Let us know what radio you go with. Yea,,you can always add a larger heat sink or a small fan,,,with some tinkering, the CBS can be a screamer,...I agree,,the ease of conversion on this radio is simple, plus it covers a full 400 AM "channels". There is knock-off of this radio out there and it's called an "Eagle" (I believe) and it goes one better than the CBS,,it has FM where the CBS has its weather band. Same exact radio, different name on face plate.
Not sure about the Galaxy on the conversion, as I don't own one of those newer models (although I did play around with one).

> The fee for a Vanity Call will rise on August 6 from $16.30 to $20.80.
> This is for a 10-year license.

Doing the math, that comes out to about $2.08
per year, or 0.0057 CENTS per-day over the
course of a 10-Year period...........

How much do you wanna bet however that the
average traditionally el-cheapo ham radio operator
will piss-and-moan like a stuck pig over a 0.0057
Cent-per-day fee...??? (my guess is alot will !)

For example, I was selling at a hamfest in Pa last
month. Had a shoebox full of miniature tubes for
$1.00 each. A real bargain considering tubes are
going for much more on e-Bay. This putz comes
walking up, digs thru the box for 2 minutes and pulls
out *one* tube and wants it for 35 cents. I was willing
to let it go for 75 cents but he wants it for 35 cents.
No deal. He puts it back (tosses it) and gets all
smart-ass saying "you'll sell it to me later for 35 Cents."
The schmuck comes back 1/2 hour later digs it out
and asks for it for 35 Cents again. I say OK, offer to
wrap it, he hands it to me and while he's reachin for his
35 cents, I dropped the tube on the ground and smashed
it with my trusty Nike, then told him I changed my mind
and wanted $1.00 for it. This putz goes completely nuts saying
he's looked all over 4 hamfests for this tube and he
couldn't believe I smashed it. Jumpin up and down like a looney
and me quietly hoping he would have a stroke right there
as he must have weighed 300 pounds. A real "Eddie Slobbo"
fer sure - baaaaaa hahahahah!! I just laughed and offered
him a pleasant balance of the afternoon.

After he left the dealers either side of me were almost teary-eyed
laughing at the spectacle of this event, and we each shared a Pepsi
from my trusty Coleman cooler and had a nice late-lunch at the
pizza hut afterwards.

El-Cheapo hams....always too much FUN to pass up
the opportunity to poke'em-with-a-stick thru the
monkey bars !! :) :) :)

Do they make that fence for pet rats? My barn cats usually just chew
their heads off..not much to eat in rat-boy's dome.

Let's see,,Frank blames me for losing another isp access because he can't exercise any self-control and obey rules that are necessary to comply with federal regulations governing internet service.
KC8LDO has been hostile since his boss found out what type scumbag he employs. Of course, Lelnad's failures and miserable feelings, of course, are somehow my fault.

LMAO!!!

Such poignancy in such few words how do you accomplish it? Egyptian
lobotomy? You know the one where they stick a hook up your nose twirl
it around and pull your brains out through the nasal cavity.

What's the matter cupcake, Stevey your hero and you want to emulate
him? I do enjoy it when the erudite join in the spank parade.

LOL... I imagine it would work just fine if you can get the collar to fit snuggly around it's neck.... it may be a bit more painful on an animal as small as a rat, and because of the pea-sized brain it may take a few more training sessions to get it to respond properly ~ but I'm sensing that you may not have a problem with those two issues... ;)

Well you have done the speelink lame and now the name lame. Why don't
you try a gay lame or a mommy lame next. You don't have much in the
way of intelligence so I will try to help you along as best I can.
Please do bring a few more friends along, they seem almost as lame as
you do, so you all can have a lamefest and try too out lame one
another. If you need it I can post the top 10 lames list so you can
work off that without me having to guide you along.

You at least show some originality and I applaud that. But slurping
Stevey boys posts shows a considerable lack of judgement. Well you
cannot have everything. Now, some advice, use your own lames in the
future, slurping on others will get boring quick.

So does Stevey get spanked around in your group as much as when he
pokes his head into abn-s-c? If I had not xposted these he would have
run away by now. But now that he has *supporters* he has to make a
show of not running away too soon.

Okay, now you try a post all on your own without slurping stevey boy.

Come on, at least try something new, go out on a limb, experiment,
worst that could happen is I spank you a litte harder.

So Stevey, why did this all start, you never did answer that. You
always take the cowards way out and snip rather than answer. You
remember why, you got beat mercilessly for a couple days (sort of like
now) and then ran away (which you will do soon spanktard). You keep
coming back to torll people and you didn't get much response. But this
time I decided to pull your chain and watch you k00k dance for me. I
even went to the trouble to bring along some of your ?friends? just so
it would be fair. Now that was a very nice thing for me to do. Now you
are doing the k00kdance with partners and it looks soooooo cute.

Oh -- oh -- oh!!! Please say the tube was a 1L6!!! That would be soooooo
cooooool!!

Sorry, this is where credibility of the story gets weak. The image of a fat
guy buying fat tubes is much more beliveable. Next time, bust up a good 50
or even a NOS S-bulb 80.
